SECTION 1.0 INTRODUCTION AND PURPOSE

1.1 PURPOSE OF THE INITIAL STUDY

As the Lead Agency, the City of Napa has prepared this Initial Study/Addendum for the First and Oxbow Gateway Project in compliance with the California Environmental Quality Act (CEQA), the CEQA Guidelines (California Code of Regulations §15000 et. seq.) and the regulations and policies of the City of Napa, California.

The City of Napa adopted the Downtown Specific Plan (DNSP) in May 2012. The specific plan provides a long-term vision for Downtown, and identifies implementation policies, that direct how that vision may be achieved over the life of the document.

The DNSP Planning Area (Planning Area) encompasses Downtown Napa, which is bounded on the east by the eastern bank of the Napa River, on the south by Division and Third Streets, and on the west by Jefferson Street. The northern boundary generally follows the edge of the “Downtown Commercial” zoning area boundary adjacent to northern residential neighborhoods along Polk and Caymus Streets west of Soscol Avenue. The Planning Area boundaries extend east to include the Oxbow Market and former Copia area east of Soscol Avenue. The Planning Area encompasses approximately 210 acres.

The City of Napa prepared and certified the Downtown Napa Specific Plan Program EIR (SCH# 2010042043) in May 2012 to address future development under the DNSP. The EIR analyzed projected development capacity of the Downtown by increasing potential residential units from 125 units to 642 units. In addition, the Specific Plan provides the opportunity for an additional 470,600 square feet office space, a 303-room hotel and conference center, and 108,590 square feet of additional retail space over existing development capacity under the General Plan. The EIR included analyses for all applicable CEQA resource areas and identified the following impacts as significant and unavoidable with the assumption of full buildout of the project:

- Air quality impact,
- Greenhouse gas impact, and
- Transportation/traffic impact.

In certifying the DNSP EIR, the City of Napa City Council adopted a statement of overriding consideration for the DNSP for the above mentioned significant and unavoidable impacts, in accordance with CEQA Guidelines Section 15093.

The purpose of this Initial Study/Addendum is to evaluate the potential environmental impacts of the First and Oxbow Gateway Project (as described in Section 3.0) and determine whether the project is within the scope of development program described in the DNSP and evaluated in the Downtown Napa Specific Plan Program Environmental Impact Report (the “DNSPEIR” or “EIR”) (State Clearinghouse No. 2010042043), and whether the project has the potential to result in any new environmental impacts.

The project is requesting a Certificate of Appropriateness to relocate two historic structures from the project site to 58 Randolph Street, a Demolition Permit to demolish five existing non-historic

structures, and a Design Review Permit and Use Permit to redevelop the site with two, four-story hotel buildings on an approximately 0.8-acre site in Downtown Napa. Other related approvals include a Sign Permit, Right-of-Way Abandonment, and a Lot Merger. This Initial Study/Addendum evaluates the environmental impacts that might reasonably be anticipated to result from implementation of the proposed project.

The DNSP EIR was a “Program EIR”, which is defined by CEQA Guidelines Section 15168 as:

- (a) **General.** A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:
- i) Geographically,
 - ii) As logical parts in the chain of contemplated actions,
 - iii) In connection with issues of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or
 - iv) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

Pursuant to CEQA Guidelines Section 15168(c), Program EIRs may be used for subsequent activities contemplated in the Program EIR. CEQA Guidelines Section 15168(c) states:

- c) **Use with Later Activities.** Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.
- i) If a later activity would have effects that were not examined in the program EIR, a new study would need to be prepared leading to either an EIR or a negative declaration.
 - ii) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.
 - iii) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.
 - iv) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.
 - v) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

The CEQA Guidelines Section 15162 states that when an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the Lead Agency determines, on the basis of substantial evidence in light of the whole record, one or more of the following:

1. Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the Negative Declaration was adopted, shows any of the following:
 - a. The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
 - b. Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - c. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
 - d. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

CEQA Guidelines Section 15164 states that the Lead Agency or a Responsible Agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary, but none of the conditions described in 15162 (see above) calling for preparation of a subsequent EIR have occurred. Pursuant to CEQA Guidelines §15164(d), the Lead Agency shall consider the addendum with the Final EIR prior to making a decision on the project.

1.2 PUBLIC REVIEW PERIOD

This addendum will not be circulated for public review, but will be attached to the EIR, pursuant to CEQA Guidelines §15164(c).

SECTION 2.0 PROJECT INFORMATION

2.1 PROJECT TITLE

First and Oxbow Gateway Project

2.2 LEAD AGENCY CONTACT

Erin Morris, Planning Manager
City of Napa
Community Development Department
1600 First Street,
Napa, CA 94559
(707) 257-9530

2.3 PROJECT APPLICANT

JB Leamer
438 Technology Way
Napa, CA 94558

2.4 PROJECT LOCATION

The approximately 0.8-acre site is located in Downtown and is bounded by First Street to the north, Soscol Avenue to the west, a single-family residence accessed from McKinstry Street to east, and Water Street to the south. Regional and vicinity maps and an aerial photograph of the project site are shown on Figures 2.7-1, 2.7-2, and 2.7-3, respectively.

2.5 ASSESSOR'S PARCEL NUMBER

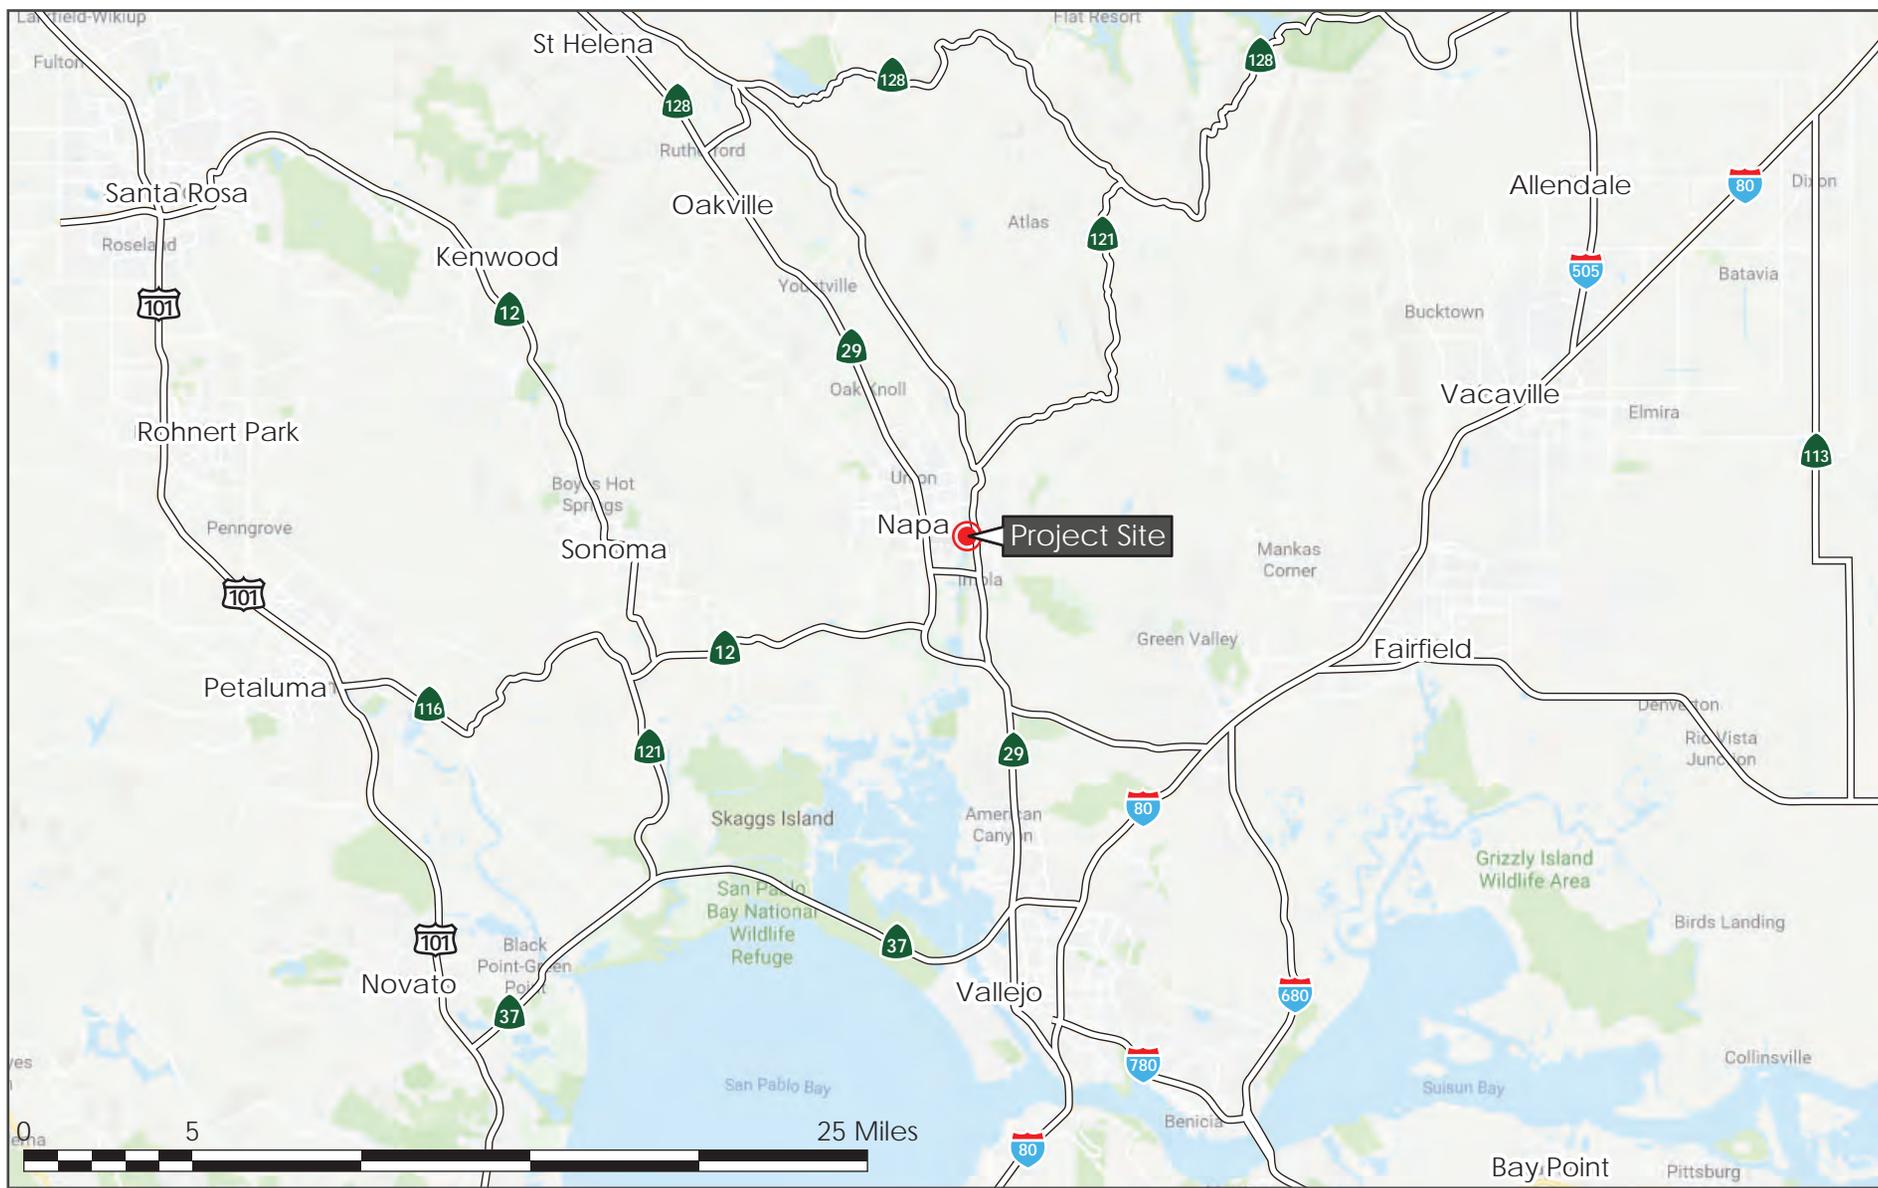

003-235-003, -004, -005, -006, -007 and 003-241-003, -005, -006

2.6 GENERAL PLAN DESIGNATION AND ZONING DISTRICT

Zoning Designation: *OBC – Oxbow Commercial*
General Plan Designation: *Oxbow Commercial*

2.7 PROJECT-RELATED APPROVALS, AGREEMENTS, AND PERMITS

- Design Review
- Certificates of Appropriateness
- Use Permit
- Sign Permit
- Right-of-Way Abandonment
- Lot Merger
- Demolition Permit

FIGURE 2.7-3

2.8 SUMMARY OF ENVIRONMENTAL IMPACTS

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|---|---|---|---|---|
| 1. Aesthetics <i>Would the project:</i> | | | | | |
| a) Conflict with City goals and policies related to visual quality, to other applicable aesthetic or visual policies or standards? | Yes | No | No | No | Not Applicable (N/A) |
| b) Significantly alter the existing natural viewsheds, including changes in natural terrain or vegetation? | Yes | No | No | No | N/A |
| c) Significantly change the existing visual quality of the region or eliminate significant visual resources? | Yes | No | No | No | N/A |
| d) Significantly increase light and glare in project vicinity? | Yes | No | No | No | N/A |
| e) Significantly reduce sunlight or introduce shadows in areas used extensively by the public? | Yes | No | No | No | N/A |
| 2. Agricultural & Forestry <i>Would the project:</i> | | | | | |
| a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? | Yes | No | No | No | N/A |
| c) Conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production? | Yes | No | No | No | N/A |
| d) Result in a loss of forest land or conversion of forest land to non-forest use? | Yes | No | No | No | N/A |
| e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? | Yes | No | No | No | N/A |
| 3. Air Quality Where available, the significance criteria established the applicable air management or air pollution control district may be relied upon to make the following determinations. <i>Would the project?</i> | | | | | |
| a) Conflict with or obstruct implementation of the applicable air quality plan? | Yes | No | No | No | No |
| b) Result in a cumulatively considerable net increase of any nonattainment pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard (including releasing emissions, which exceed | Yes | No | No | No | Yes |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|---|---|---|---|---|
| quantitative thresholds for ozone precursors)? | | | | | |
| c) Expose sensitive receptors to substantial pollutant concentrations? | Yes | No | No | No | Yes |
| d) Result in substantial emissions (such as odors) adversely affecting a substantial number of people? | Yes | No | No | No | No |
| 4. Biological Resources <i>Would the project:</i> | | | | | |
| a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife (CDFW) or U.S. Fish and Wildlife Service (USFWS)? | Yes | No | No | No | Yes |
| b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the CDFW e or USFWS? | Yes | No | No | No | No |
| c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but | Yes | No | No | No | No |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|---|---|---|---|---|
| not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | | | | | |
| d) Have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or substantially reduce the number or restrict the range of an endangered, rare, or threatened species? | Yes | No | No | No | No |
| e) Conflict with any local policies or ordinances protecting biological resources, such as tree preservation policy or ordinance? | Yes | No | No | No | No |
| f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | Yes | No | No | No | No |
| 5. Cultural Resources <i>Would the project:</i> | | | | | |
| a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5? | Yes | No | No | No | Yes |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to 15064.5? | Yes | No | No | No | Yes |
| c) Disturb any human remains, including those interred outside of formal cemeteries? | Yes | No | No | No | Yes |
| 6. Energy <i>Would the project:</i> | | | | | |
| a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation? | Yes | No | No | No | Yes |
| b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | Yes | No | No | No | N/A |
| 7. Geology and Soils <i>Would the project:</i> | | | | | |
| a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: | | | | | |
| i. Rupture of a known earthquake fault, as delineated on the most recent Alquist Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|--|--|--|--|--|
| evidence of a known fault? | | | | | |
| ii. Strong seismic ground shaking? | Yes | No | No | No | N/A |
| iii. Seismic related ground failure, including liquefaction? | Yes | No | No | No | N/A |
| iv. Landslides? | Yes | No | No | No | N/A |
| b) Result in substantial soil erosion or the loss of topsoil? | Yes | No | No | No | N/A |
| c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? | Yes | No | No | No | N/A |
| d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property? | Yes | No | No | No | N/A |
| e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater? | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|---|---|---|---|---|
| d) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? | Yes | No | No | No | N/A |
| 8. Greenhouse Gases <i>Would the project:</i> | | | | | |
| a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | Yes | No | No | No | Yes |
| b) Conflict with any applicable plan, policy or regulation adopted for the purposes of reducing the emissions of greenhouse gases? | Yes | No | No | No | Yes |
| 9. Hazards and Hazardous Materials <i>Would the project:</i> | | | | | |
| a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | Yes | No | No | No | N/A |
| b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | Yes | No | No | No | N/A |
| c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| one-quarter mile of an existing or proposed school? | | | | | |
| d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | Yes | No | No | No | N/A |
| e) Result in a safety hazard for people residing or working in the project area for a project within the vicinity of a private airstrip or within an airport land use plan? | Yes | No | No | No | N/A |
| f) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? | Yes | No | No | No | N/A |
| 10. Hydrology and Water Quality <i>Would the project:</i> | | | | | |
| a) Violate any water quality standards or waste discharge requirements? | Yes | No | No | No | N/A |
| b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which | Yes | No | No | No | N/A |

|--|--|--|--|--|--|
| would not support existing land uses or planned uses for which permits have been granted)? | | | | | |
| c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner, which would result in substantial erosion or siltation on- or off-site? | Yes | No | No | No | N/A |
| d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site? | Yes | No | No | No | N/A |
| e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff? | Yes | No | No | No | N/A |
| f) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? | Yes | No | No | No | N/A |
| g) Place within a 100-year flood hazard area structures | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| that would impede or redirect flood flows? | | | | | |
| h) Expose people or structures to a substantial risk of loss, injury or death involving flooding as a result of the failure of a levee or dam? | Yes | No | No | No | N/A |
| i) Result in inundation by seiche, tsunami, or mudflow | Yes | No | No | No | N/A |
| 11. Land Use and Planning <i>Would the project:</i> | | | | | |
| a) Physically divide an established community? | Yes | No | No | No | N/A |
| b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | Yes | No | No | No | N/A |
| c) Conflict with any applicable habitat conservation plan or natural community conservation plan? | Yes | No | No | No | N/A |
| 12. Mineral Resources <i>Would the project:</i> | | | | | |
| a) Result in the loss of availability of a known mineral resource that will be of value to the region and the residents of the state? | Yes | No | No | No | N/A |
| b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| specific plan or other land use plan? | | | | | |
| 13. Noise and Vibration <i>Would the project:</i> | | | | | |
| a) Result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | Yes | No | No | No | Yes |
| b) Result in generation of, excessive groundborne vibration or groundborne noise levels | Yes | No | No | No | Yes |
| c) Be located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The project would not expose people residing or working in the project area to excessive noise levels? | Yes | No | No | No | N/A |
| 14. Population and Housing <i>Would the project:</i> | | | | | |
| a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension | Yes | No | No | No | N/A |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|---|---|---|---|---|---|
| of roads or other infrastructure)? | | | | | |
| b) Displacement of existing residents or housing units? | Yes | No | No | No | N/A |
| 15. Public Services <i>Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:</i> | | | | | |
| i. Fire Protection? | Yes | No | No | No | No |
| ii. Police Protection? | Yes | No | No | No | No |
| iii. Schools? | Yes | No | No | No | No |
| iv. Parks? | Yes | No | No | No | No |
| v. Other public facilities? | Yes | No | No | No | No |
| 16. Recreation <i>Would the project:</i> | | | | | |
| a) Increase the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | | No | No | No | N/A |
| b) Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment? | Yes | No | No | No | N/A |
| 17. Transportation <i>Would the project:</i> | | | | | |
| a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, | Yes | No | No | No | Yes |

| Issues and Supporting Data Sources | Was Impact Analyzed in Prior Environmental Document(s)? | Does proposed project involve new significant impacts or substantially more severe impacts? | Any new circumstances involving new significant impacts or substantially more severe impacts? | Any new information requiring new analysis or verification? | Prior environmental document's mitigation implemented to address impacts? |
|--|---|---|---|---|---|
| roadways, bicycle lanes and pedestrian facilities? | | | | | |
| b) For a land use project, conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)? | No | No | No | No | N/A |
| c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible land uses (e.g., farm equipment)? | Yes | No | No | No | No |
| d) Result in inadequate emergency access? | Yes | No | No | No | N/A |
| 18. Tribal Cultural Resources | | | | | |
| <i>Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:</i> | | | | | |
| a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? | Yes | No | No | No | N/A |
| b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying this criteria, the significance of the resource to a California | Yes | No | No | No | N/A |

SECTION 3.0 PROJECT DESCRIPTION

3.1 OVERVIEW

The approximately 0.8-acre project site is comprised of multiple parcels (APN 003-235--003, - 004, - 005, -006, -007 and 003-241-003, -006) located on the south side of First Street, bounded by Soscol Avenue and McKinstry Street in Downtown Napa. The portion of the site located east of the Napa Valley Wine Train railroad tracks is currently developed with one single-story, single-family residence and a one-story commercial structure that was formerly a single-family residence. The portion of the site located west of the Napa Valley Wine Train railroad tracks is currently undeveloped.

The project site is designated *Oxbow Commercial* in the City of Napa General Plan and zoned *Oxbow Commercial*. The *Oxbow Commercial* zoning district applies to the eastern portion of the Downtown area and is generally located between Soscol Avenue and the Napa River. The district allows for uses oriented to tourists such as hotels and their related amenities; recreational facilities; community and visitor-serving retail, commercial, entertainment and restaurants; and similar compatible uses in addition to live/work opportunities.

3.2 PROPOSED DEVELOPMENT

3.2.1 Hotel

The project proposes to develop the site with two, four-story hotel buildings with two subterranean levels totaling approximately 184,106 square feet. The two hotel buildings would be constructed on the east and west sides of the Napa Valley Wine Train railroad tracks. The proposed building west of the railroad tracks (West Building) would be 91,027 square feet in size and contain approximately 37 hotel rooms, a 2,787 square-foot ground floor retail area for a café, accessed from First Street, a pool, gym and spa available for hotel guests and two levels of subterranean parking accessed from a driveway on First Street. The proposed building east of the railroad tracks (East Building) would be 93,079 square feet in size and contain 37 hotel rooms, 3,507 square feet of ground floor retail, conference rooms, and two levels of subterranean parking accessed from a driveway on Water Street. The fourth floor of each building would contain an outdoor lounge area that would each include a bar.

The proposed buildings would have varying roof heights with a maximum height of 60 feet for each building. The West Building would be set back approximately 11 feet from the First Street property line and approximately 16 feet from the Soscol Avenue property line. The East Building would be set back approximately 11 feet from the First Street property line and approximately eight feet from the east property line that is shared with an existing single-family home. The proposed setbacks are consistent with the setback requirements prescribed in the DNSP.

The conceptual site plan and building elevations for the proposed project are shown on Figures 3.2-1 to 3.2-4.

3.2.2 Site Access and Parking

The project would provide a total of 121 parking spaces in two separate subgrade parking garages (see Figure 3.1-5). Vehicle access to the proposed project would be provided via two proposed driveways. The West Building would be accessed via a driveway east of the existing driveway curb-cut on First Street and would be right-in/right-out only. The East Building would be accessed via a new driveway on Water Street, located just east of the railroad tracks. Traffic exiting (and entering) the East Building would gain access to Water Street via McKinstry Street. The applicant has requested the City to abandon a portion of Water Street. If the City approves the abandonment of Water Street, Water Street would revert to the adjacent property owners, and a portion of Water Street would be converted from a public street to a private street. The proposed subgrade garages would be operated via valet parking. A valet dropoff zone would be provided on First Street.

Pedestrian access to the hotel would be provided by the existing sidewalk along First Street. The project would install an ADA-compliant pathway to allow for public access from the First Street to Water Street, adjacent to the river. The project would provide parking for 16 bicycles.

3.2.3 Landscaping and Stormwater Control

The proposed buildings would be built around a central interior courtyard which would include ornamental landscaping and trees. Each of the buildings would have three outdoor terraces with planted trees, providing views to First Street. The project would install ornamental landscaping on the ground floor. See Figure 3.2-6. Street trees would be added in the planter strip on Soscol Avenue and on First Street.

Runoff from the project site would be conveyed to four bioretention facilities for onsite stormwater treatment. The bioretention facilities would be 1,709 sf in total and would be generally located in landscape areas along the perimeters of the eastern and western buildings and outside of riparian areas.

3.2.4 Utility Improvements

The project would connect to existing storm drain and sanitary sewer lines in First Street. The project would replace the existing four-inch sewer lateral line with a six-inch sanitary sewer line (see Figure 3.2-7). The project would also connect to an existing 12-inch water line in First Street.

3.2.5 Green Building and Energy Efficiency

The project would incorporate rainwater collection and harvesting, water conservation and green building technologies.

3.2.6 Public Art

The project would install public artwork at the project's interface with the First Street and Soscol Avenue intersection to signify entrance into the Oxbow District of Downtown Napa.

3.2.7 Building Relocation

The project proposes to relocate the historic single-family residence and one-story commercial building on the project site to 58 Randolph Street, located approximately 1.3 miles north of the project site (see Figure 3.2-8). The 58 Randolph Street site is zoned Traditional Residential Infill (RT-5). The 58 Randolph Street site is currently developed with a building that is identified on the City's Historic Resource Inventory. That building occupies the southern half of the 58 Randolph Street site. The relocated buildings from the project site would be placed on the northern half of the 58 Randolph Street site. The relocated buildings would adhere to the height and setback requirements of the Traditional Residential Infill zoning district.

3.2.8 Property Acquisition and Easements

Implementation of the project would require acquisition of land currently owned by the Napa County Flood Control District and Water Conservation District and the City of Napa. The project would incorporate approximately 6,518 square feet of Napa County Flood Control District and Water Conservation District-owned parcels (APN 003-241-005 and 003-235-007) located on the east and west side of the Napa Valley Wine Train railroad tracks, as shown in Figure 3.2-9. The Flood Control District would grant an easement to the project for the land. In addition, if the City of Napa abandons Water Street as requested by the applicant, the project would acquire a 10,018 square-foot portion Water Street from the City. The Napa County Flood Control District and Water Conservation District would retain ownership of the existing parking lot (APN 003-242-001) located to the south of Water Street.

3.2.9 Project-Related Approvals

The project would require the following approvals:

- Design Review Permit and Use Permit to redevelop the site with two, four-story hotel buildings on an approximately 0.8-acre site in Downtown Napa.
- Certificate of Appropriateness for the relocation of the two historic structures from the project site to 58 Randolph Street.
- Right-of-Way Abandonment to allow Water Street to revert to the adjacent property owners and a portion of Water Street to be converted from a public street to a private street.
- Lot Merger to assemble multiple existing parcels into a single parcel for hotel development.
- Demolition Permit to demolish five existing structures.
- Sign Permit.

3.2.10 Construction

Project construction would last approximately 13 months (270 construction working days). The two buildings would be constructed concurrently. Project construction would require 18,140 cubic yards of soil to be exported for construction of the proposed underground garages.

SECTION 4.0 ENVIRONMENTAL SETTING, CHECKLIST, AND IMPACT DISCUSSION

This section presents the discussion of impacts related to the following environmental subjects in their respective subsections:

| | | | |
|------|------------------------------------|------|------------------------------------|
| 4.1 | Aesthetics | 4.12 | Mineral Resources |
| 4.2 | Agriculture and Forestry Resources | 4.13 | Noise |
| 4.3 | Air Quality | 4.14 | Population and Housing |
| 4.4 | Biological Resources | 4.15 | Public Services |
| 4.5 | Cultural Resources | 4.16 | Recreation |
| 4.6 | Energy | 4.17 | Transportation |
| 4.7 | Geology and Soils | 4.18 | Tribal Cultural Resources |
| 4.8 | Greenhouse Gas Emissions | 4.19 | Utilities and Service Systems |
| 4.9 | Hazards and Hazardous Materials | 4.20 | Wildfire |
| 4.10 | Hydrology and Water Quality | 4.21 | Mandatory Findings of Significance |
| 4.11 | Land Use and Planning | | |

The discussion for each environmental subject includes the following subsections:

- **Environmental Setting** – This subsection 1) provides a brief overview of relevant plans, policies, and regulations that compose the regulatory framework for the project and 2) describes the existing, physical environmental conditions at the project site and in the surrounding area, as relevant.
- **Impact Discussion** – This subsection 1) includes the recommended checklist questions from Appendix G of the CEQA Guidelines to assess impacts and 2) discusses the project’s impact on the environmental subject as related to the checklist questions. For significant impacts, feasible mitigation measures are identified. “Mitigation measures” are measures that will minimize, avoid, or eliminate a significant impact (CEQA Guidelines Section 15370). Each impact is numbered to correspond to the checklist question being answered. For example, Impact BIO-1 answers the first checklist question in the Biological Resources section.

4.1 AESTHETICS

4.1.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Conflict with City goals and policies related to visual quality, to other applicable aesthetic or visual policies or standards? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Significantly alter the existing natural viewsheds, including changes in natural terrain or vegetation? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Significantly change the existing visual quality of the region or eliminate significant visual resources? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Significantly increase light and glare in the project vicinity? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Significantly reduce sunlight or introduce shadows in areas used extensively by the public? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Note: Certain projects within transit priority areas need not evaluate aesthetics (Public Resources Code Section 21099).

Downtown Napa Specific Plan EIR – Aesthetics Conclusion

The *Downtown Napa Specific Plan EIR* (DNSP EIR) concluded that implementation of the *Downtown Napa Specific Plan* (Specific Plan) would result in less than significant aesthetic impacts. No mitigation was incorporated into the DNSP EIR.

Impact AES-1: The project would not conflict with City goals and policies related to visual quality, to other applicable aesthetic or visual policies or standards. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP contains standards and design guidelines applicable to development projects located within the Planning Area. The proposed project includes Design Guidelines specific to development within the Oxbow District of Downtown Napa. The intent of the guidelines is to guide and define the character of new development in Downtown and implement the vision of the Specific Plan. The guidelines are related to the following: site layout and building design, massing and scale, building heights and setbacks, building setbacks, building façade articulation, materials, lighting, building signage, and awnings. Applicable guidelines to the proposed project are listed under the *Specific Plan Policies and Design Standards* following the Aesthetics Impact discussion.

The project would be required to adhere to the standards and design guidelines found in the DNSP and would require the issuance of a Design Review permit. With adherence to the guidelines and approval of the Design Review permit, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact AES-2: The project would not significantly alter the existing natural viewsheds, including changes in natural terrain or vegetation. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR determined that implementation of the Specific Plan EIR would not conflict with the goals and policies of the General Plan EIR and the aesthetic impact of project implementation would be less than significant. The DNSP EIR did not identify officially designated scenic views or vistas; however, State Routes 29 and 121, which runs in the north-south directions within the Planning Area are eligible scenic highways. Other view corridors, including views of the hills from the Oxbow area, Jefferson Street, Soscol Avenue, and First, Second, and Third Streets could be affected from buildout of the Specific Plan. Given that the Planning Area is relatively flat, largely built-out, and contains many street trees, public views from and through the Downtown corridors are already somewhat obstructed. Project implementation, therefore, would not significantly impact viewsheds in the area.

Buildout of the Specific Plan would result in increased density of structures within the Planning Area through the construction of buildings on undeveloped lots or redevelopment of existing ones. The proposed project would conform to the building heights and stepback guidelines of the Specific Plan and the Oxbow District, which are listed in the *Specific Plan Policies and Design Standards* that follow the Aesthetics Impact discussion.

As stated in Impact AES-1, the project would adhere to the Downtown Specific Plan Design Guidelines and Historic Guidelines which would ensure consistency with the Specific Plan. As shown in Photos 1-7, the project site is partially developed with five existing structures and the remainder of the site is undeveloped. Project implementation would result in the loss of 21 trees on-site; however, the project would install ornamental landscaping throughout the site to enhance the streetscape and surrounding area. The project would also construct a pedestrian path to provide public access from First Street to the Napa River. Additionally, the proposed hotel would include terraces and windows that would provide views of the Napa River to hotel users.

The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Photo 1: View of project site from Soscol Ave. & First Street intersection.

Photo 2: View of riparian corridor from the western portion of the project site.

Photo 6: View of driveway aisle extending to First Street from single family residence on-site.

PHOTOS 5 AND 6

Photo 7: View of single family residence on-site from Water Street.

PHOTO 7

Impact AES-3: The project would not significantly change the existing visual quality of the region or eliminate significant visual resources. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project design would be consistent with the buildout of the Specific Plan which would improve the vitality and character of the Downtown area. The project would include public amenities to continue to provide public access to the Napa riverfront. As described in Impact AES-2, the project would install ornamental landscaping throughout the project site and place artwork to further enhance the visual character of the area. The project would not remove any significant visual resources from the site.

The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact AES-4: The project would not significantly increase light and glare in the project vicinity. **[Same Impact as Approved Project (Less than Significant Impact)]**

The Specific Plan includes Design Guidelines that would address potential light and glare impacts, specify exterior lighting where the cone of light and/or glare from the lighting element is kept entirely on the property or below the top of any fence, edge or wall; verify that fixtures do not cast light directly into adjacent residential windows; a translucent or optical lens diffuser globe or shield is recommended; balance the need to provide illumination and security with the desire to maintain the ambience of Downtown and minimize light pollution. Adherence to the Specific Plan guidelines would ensure that the project would not result in light spillover or glare onto adjacent properties or the riparian corridor.

Consistent with the DNSP EIR, the project would be required to conform to the Design Guidelines, as listed in the *Specific Plan Policies and Design Standards* that follow the Aesthetics Impact discussion. With conformance, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact AES-5: The project would not significantly reduce sunlight or introduce shadows in areas used extensively by the public. **[Same Impact as Approved Project (Less than Significant Impact)]**

The Specific Plan includes Design Guidelines related to massing and scale of future development. The project would be required to adhere to the massing and scale design guidelines, as listed in the *Specific Plan Policies and Design Standards* that follow the Aesthetics Impact discussion. The proposed building massing would be consistent with the vision of the Specific Plan and would not introduce shadows in areas used extensively by the public. As described in Impact AES-2, the project would construct a pedestrian path from First Street to provide public access to the Napa River, a public use.

With conformance to the applicable policies, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

There are no General Plan Policies that were used to reduce potential impacts from implementation of the Specific Plan to a less than significant level.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

The Specific Plan includes Design Guidelines intended to guide future development within the Planning Area and ensure consistency in visual character within the defined subareas. The following are some of the Design Guidelines that would shape the visual character within the Planning Area.

Site Layout and Building Orientation. Orient buildings so that primary façades and key pedestrian entries face major streets; locate semi-private open spaces, such as common courtyards, to face major streets, activating the corridor and providing “eyes on the street”; design river and creek frontages to activate the promenade and take advantage of views, encourage through-block pedestrian connections, discourage service access and service areas on the river side of any property, and discourage surface parking lots between buildings and the river edge.

Building Setbacks. Setbacks and overall building form should maintain the human scale of Downtown, with emphasis on maintaining an active street edge; the character of the setback area should respond to the surrounding context, whether it be the heart of Downtown on First Street or a tree-lined street on the edge of Downtown.

Building Heights and Stepbacks. New buildings and building additions should reinforce the historic pattern with heights and setbacks oriented to the many existing two- and three-story buildings; on taller buildings, retain pedestrian scale with design strategies such as upper-story stepbacks; where neighboring buildings are three stories or lower in height, match the height of street façades to adjoining buildings. Where applicable, building heights must also be sensitive to adjacent historic properties.

Building Façade Articulation. Regardless of architectural style, new infill development should reinforce the existing character of finely detailed building façades, with attention to the design details and articulation of façades. Enliven the façade and provide human scale with generous reveals such as inset doorways and windows, as well as projecting elements such as entrance porches, porticoes, canopies, awnings and trellises; on commercial façades, include the elements that make up a complete storefront including doors, display windows, bulkheads, signage areas; utilize architectural elements such as cornices, lintels, sills, balconies, awnings, porches and stoops to enhance building façades. Include a level of architectural detailing and quality of materials that complements historical buildings; for new projects located adjacent to residential neighborhoods, reflect the transition in use and scale with design elements such as porches, roof slope and architectural features.

Massing and Scale. Ensure that building mass and scale does not overwhelm the pedestrian experience on the street; utilize special architectural features such as gables, turrets, towers, and loggias to accent buildings at major street corners, at the terminus of a street corridor, at gateway locations, and/or at other highly-visible building locations; break up the mass of large-scale buildings with articulation in form, architectural details, and changes in materials and colors, and other similar elements; encourage distinctive landmark buildings at gateway locations to have architectural elements such as a tower at the corner, articulation or unique roof silhouettes, providing a corner plaza, and/or a recessed building entrance at the corner.

4.2 AGRICULTURE AND FORESTRY RESOURCES

4.2.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict with existing zoning for agricultural use, or a Williamson Act contract? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Result in a loss of forest land or conversion of forest land to non-forest use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Agricultural and Forestry Resources Conclusion

The DNSP EIR found Agricultural and Forestry related impacts from implementation of the Specific Plan would not be significant as the Planning Area is mapped as urban and built up land by the Department of Conservation.

Impact AG-1: The project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. **[Same Impact as Approved Project (No Impact)]**

The project site is not designated as farmland or used for agricultural purposes. For these reasons, the proposed project would not result in any significant impacts to agricultural resources. **[Same Impact as Approved Project (No Impact)]**

Impact AG-2: The project would not conflict with existing zoning for agricultural use, or a Williamson Act contract. **[Same Impact as Approved Project (No Impact)]**

The project site is not designated as farmland or used for agricultural purposes and is not under a Williamson Act contract. For these reasons, the proposed project would not conflict with zoning for agricultural uses. **[Same Impact as Approved Project (No Impact)]**

Impact AG-3: The project would not conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production. **[Same Impact as Approved Project (No Impact)]**

The project site is partially developed with commercial uses and is not zoned forest land or timberland. For these reasons, the proposed project would not conflict with zoning for forest land, timberland, or timberland zoned for Timberland Production. **[Same Impact as Approved Project (No Impact)]**

Impact AG-4: The project would not result in a loss of forest land or conversion of forest land to non-forest use. **[Same Impact as Approved Project (No Impact)]**

The project site does not contain forest land and, therefore, development of the site with the proposed hotel building would not result in the loss of forest land. **[Same Impact as Approved Project (No Impact)]**

Impact AG-5: The project would not involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use. **[Same Impact as Approved Project (No Impact)]**

The project site is not designated as farmland or used for agricultural or forestry purposes. The project, therefore, would not cause any changes in the environment that would result in the conversion of farmland to non-agricultural use or conversion of forest land to non-forest use. **[Same Impact as Approved Project (No Impact)]**

General Plan Policies that Reduce Impacts

There are no General Plan Policies that were used to reduce potential agricultural and forestry impacts from implementation of the Specific Plan to a less than significant level.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

As agricultural and forestry resources were found not to be impacted in the DNSP EIR, there were no policies identified in the Specific Plan to reduce impacts.

4.3 AIR QUALITY

The following discussion is based, in part, on an Air Quality and Greenhouse Gas Assessment prepared by *Illingworth & Rodkin, Inc.* in March 2019. A copy of the report is attached as Appendix A to this Initial Study/Addendum.

4.3.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Conflict with or obstruct implementation of the applicable air quality plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 2) Violate any air quality standard or contribute substantially to an existing or projected air quality violation? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Result in a cumulatively considerable net increase of any nonattainment pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard (including releasing emissions, which exceed quantitative thresholds for ozone precursors)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Expose sensitive receptors to substantial pollutant concentrations? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Create objectionable odors affecting a substantial number of people? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Air Quality Conclusion

The DNSP EIR concluded that despite incorporation of project mitigation measures, implementation of the Specific Plan would result in significant and unavoidable impacts related to increased long-term emissions of criteria pollutants from increased vehicle traffic and from exceeding the growth assumptions of the *Bay Area 2010 Clean Air Plan*.

Impact AIR-1: The project would not conflict with or obstruct implementation of the applicable air quality plan. **[Less Impact than Approved Project (Less than Significant Impact)]**

The DNSP EIR identified a significant and unavoidable impact with respect to the project and implementation of the *Bay Area 2010 Clean Air Plan*, since the Specific Plan would exceed the

population projections.¹ However, the DNSP EIR introduced land use designations that would place future residents in proximity to transit, which would reduce potential air quality and greenhouse gas emissions associated with traditional single-use vehicle ridership, reducing the potential air quality impact.

Construction activities for the proposed project would generate criteria pollutant emissions. These emissions would be temporary and would not impact any long-term air quality improvement plans or policies and would not interfere with the goals and policies of the most recently adopted Clean Air Plan (2017) for ozone compliance. The Specific Plan implemented measures listed in the General Plan Policies and Specific Plan Policies section immediately following the Air Quality Impact Discussion.

The proposed project would generate 834 vehicle trips per day, which would not exceed the trip generation assumptions of the DNSP EIR. The proposed project’s consistency with the Bay Area 2017 Clean Air Plan is summarized in Table 4.3-1 below. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Less Impact than Approved Project (Less than Significant Impact)]**

| Table 4.3-1: Bay Area 2017 Clean Air Plan Applicable Control Measures | | |
|--|--|---|
| Control Measures | Description | Project Consistency |
| <i>Transportation Control Measures</i> | | |
| Trip Reduction Programs | Encourage trip reduction policies and programs in local plans, e.g., general and specific plans. Encourage local governments to require mitigation of vehicle travel as part of new development approval, to develop innovative ways to encourage rideshare, transit, cycling, and walking for work trips. | The project includes the construction of a pedestrian path on the project site that connects to Water Street, adjacent to the Napa River. Pedestrian improvements through the site would facilitate walking and bicycling as modes of transportation within the project vicinity. The proposed parking would include 16 bicycle parking spaces to encourage visitors to bike during their stays. The project, therefore, is consistent with this measure. |
| Bicycle and Pedestrian Access and Facilities | Encourage planning for bicycle and pedestrian facilities in local plans, e.g., general and specific plans, fund bike lanes, routes, paths and bicycle parking facilities. | The proposed project would provide 16 bicycle parking spaces for future hotel users and employees. The project would also construct a pedestrian path extending from First Street to the Napa River that would be accessible to the public. The project, therefore, is consistent with this measure. |
| Land Use Strategies | Support implementation of Plan Bay Area, maintain and disseminate information on current climate action plans and other local best practices. | This control measure is not applicable to the proposed project. |
| <i>Building Control Measures</i> | | |
| Green Building | Identify barriers to effective local implementation of the CalGreen (Title 24) statewide building energy code; develop solutions to improve implementation/enforcement. | The project would be built to comply with CalGreen Standards. The project, therefore, is consistent with this measure. |

¹ Note that at the time of the preparation of the DNSP EIR, the *Bay Area 2010 Clean Air Plan* was the most recent Clean Air Plan available. In April 2017, the Clean Air Plan was updated by the Bay Area Air Quality Management District (BAAQMD) and remains the most recent Clean Air Plan.

| Table 4.3-1: Bay Area 2017 Clean Air Plan Applicable Control Measures | | |
|--|--|---|
| Control Measures | Description | Project Consistency |
| | Engage with additional partners to target reducing emissions from specific types of buildings. | |
| Urban Heat Island Mitigation | Develop and urge adoption of a model ordinance for “cool parking” that promotes the use of cool surface treatments for new parking facilities. Develop and promote adoption of model building code requirements for new construction or re-roofing/roofing upgrades for commercial and residential multi-family housing. | The proposed project would be constructed to conform to the City’s Specific Plan sustainability measures, High Performance Building Ordinance, and the Citywide Sustainability Plan. The project, therefore, is consistent with this measure. |
| <i>Waste Management Control Measures</i> | | |
| Recycling and Waste Reduction | Develop or identify and promote model ordinances on community-wide zero waste goals and recycling of construction and demolition materials in commercial and public construction projects. | The project would be required to comply with the City’s Construction and Demolition Debris Ordinance (Chapter 15.32), which would require that 50 percent of waste be diverted from landfill disposal. The project, therefore, would be consistent with this measure. |
| <i>Water Control Measures</i> | | |
| Support Water Conservation | Develop a list of best practices that reduce water consumption and increase on-site water recycling in new and existing buildings; incorporate into local planning guidance. | The project would comply with CalGreen and reduce outdoor water use by planting drought tolerant non-invasive landscaping. The project, therefore, would be consistent with this measure. |

Impact AIR-2: The project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The Bay Area is considered a non-attainment area for ground-level ozone and PM_{2.5} under both the Federal Clean Air Act and the California Clean Air Act. The area is also considered non-attainment for PM₁₀ under the California Clean Air Act, but not the federal act. The Bay Area has attained both state and federal ambient air quality standards for carbon monoxide. As part of an effort to attain and maintain ambient air quality standards for ozone and PM₁₀, the BAAQMD has established thresholds of significance for these air pollutants and their precursors. These thresholds are for ozone precursor pollutants (ROG and NO_x), PM₁₀, and PM_{2.5} and apply to both construction period and operational period impacts.

Construction Period Emissions

Construction of the project would occur over 13 months (approximately 270 workdays), beginning in January 2020, and would result in the export of approximately 18,140 cubic yards of soil and import of 1,097 cubic yards of soil. The California Emissions Estimator Model (CalEEMod) was used to predict emissions from construction and operation of the proposed project. The nearest sensitive receptors to the project site are the residents of a single-family home adjacent to the eastern portion of the site.

Construction activities, particularly during site preparation and grading, would temporarily generate fugitive dust in the form of PM₁₀ and PM_{2.5}. Sources of fugitive dust would include disturbed soils at the construction site and trucks carrying uncovered loads of soils. CalEEMod provides annual emission estimates for total PM₁₀ exhaust emissions for the off-road construction equipment and for exhaust emissions from on-road vehicles, with total emissions as 0.13 tons (260 pounds). Fugitive PM_{2.5} dust emissions were calculated by CalEEMod as 0.12 tons (240 pounds) for the overall construction period. For both the total PM₁₀ exhaust emissions and fugitive PM_{2.5} emissions, project construction emissions would be less than the BAAQMD thresholds of 82 pounds/day for PM₁₀ exhaust and 54 pounds/day for PM_{2.5} exhaust. Table 4.3-2 displays the total construction period emissions from the project.

| Table 4.3-2: Construction Period Emissions | | | | |
|---|--------------|---------------|--------------------------------|---------------------------------|
| Scenario | ROG | NOx | PM₁₀ Exhaust | PM_{2.5} Exhaust |
| Total construction emissions (tons) | 0.77 tons | 2.62 tons | 0.13 tons | 0.12 tons |
| Average daily emissions (pounds) ¹ | 5.74 lbs/day | 19.41 lbs/day | 0.94 lbs/day | 0.90 lbs/day |
| <i>BAAQMD Thresholds (pounds per day)</i> | 54 lbs/day | 54 lbs/day | 82 lbs/day | 54 lbs/day |
| Exceed Threshold? | No | No | No | No |
| Notes: ¹ Assumes 270 workdays. | | | | |

Consistent with the findings of the DNSP EIR and Mitigation Measure 4.B-2, the project would implement the following BAAQMD recommended best management practices to control fugitive dust during project construction:

Best Management Practice:

During any construction period ground disturbance, the applicant shall ensure that the project contractor implement measures to control dust and exhaust, consistent with Mitigation Measure 4.B-2. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less-than-significant level. Additional measures are identified to reduce construction equipment exhaust emissions. The contractor shall implement the following best management practices that are required of all projects:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]).
7. Clear signage shall be provided for construction workers at all access points.
8. All construction equipment shall be maintained and properly tuned in accordance with manufacturer’s specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
9. Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District’s phone number shall also be visible to ensure compliance with applicable regulations.

The proposed project would implement BAAQMD Best Management Practices for construction dust to ensure implementation of Mitigation Measure 4.B-2 and reduce the contribution of construction dust to health risks. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Operational Period Emissions

Based on the BAAQMD operational-related criteria air pollutant screening level, the operational air quality emissions from the proposed hotel would not exceed the BAAQMD significance thresholds for criteria air pollutants and precursors. The proposed hotel would have 74 rooms, which is below the BAAQMD threshold screening size of 489 rooms for a hotel. The project operational emissions would be less than significant.

The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Less Impact than Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact AIR-3: The project would not expose sensitive receptors to substantial pollutant concentrations. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Toxic Air Contaminants (TACs)

Construction equipment and associated heavy-duty truck traffic generate diesel exhaust, which is a known toxic air contaminant (TAC). Consistent with Mitigation Measure 4.B-2, a community risk assessment was completed to evaluate potential health effects to nearby sensitive receptors from project construction TAC emissions, which included diesel particulate matter (DPM) dispersion

modeling to predict DPM concentrations at the nearby sensitive receptors to find the maximally exposed individuals (MEIs).²

The residential construction MEI was identified at a single-family residence at 903 McKinstry Street, adjacent to the eastern portion of the project. Table 4.3-3 below displays the maximum cancer risks, PM_{2.5} concentrations, and health hazard indexes for project construction activities and combined sources affecting the residential MEI. Non-construction sources of emissions within the project vicinity include traffic along Soscol Avenue, which has approximately 19,055 vehicles per day. No stationary sources of TAC emissions are present within 1,000 feet of the project site.

Results of the assessment indicate that the maximum residential cancer risks would exceed the BAAQMD significance threshold of greater than 10 in one million and the maximum annual PM_{2.5} concentration significance threshold of greater than 0.3 µg/m³. The maximum computer Hazard Index based on the DPM concentration would not exceed the significance threshold of greater than 1.0.

| Table 4.3-3: Construction Risk and Combined Source Impacts at the Offsite MEI | | | | |
|--|-------------|----------------------------------|---|---------------------|
| Source | | Cancer Risk (per million) | Annual PM_{2.5} (µg/m³) | Hazard Index |
| Project Construction | | | | |
| | Unmitigated | 61.6 (infant) | 0.47 | 0.07 |
| | Mitigated | 7.8 (infant) | 0.09 | 0.01 |
| BAAQMD Single-Source Threshold | | >10.0 | >0.3 | >0.1 |
| <i>Significant?</i> | | | | |
| | Unmitigated | Yes | Yes | No |
| | Mitigated | No | No | No |
| Soscol Avenue (north-south roadway) with MEI 80 feet east, ADT 19,830 | | 1.1 | 0.04 | <0.03 |
| <i>Combined Sources</i> | | | | |
| | Unmitigated | 62.7 (infant) | 0.51 | <0.10 |
| | Mitigated | 8.9 (infant) | 0.13 | <0.04 |
| BAAQMD Cumulative Source Threshold | | >100 | >0.8 | >10.0 |
| <i>Significant?</i> | | | | |
| | Unmitigated | No | No | No |
| | Mitigated | No | No | No |

² The maximally exposed individual (MEI) is the individual that is exposed to the highest concentration of a pollutant.

To reduce the potential significant health risk impacts, the project would implement the following Condition of Approval to ensure implementation of Mitigation Measure 4.B-2:

Condition of Approval:

The project shall develop a plan demonstrating that the off-road equipment used on-site to construct the project would achieve a fleet-wide average 84-percent reduction in DPM exhaust emissions or greater. One feasible plan to achieve this reduction would include the following:

- All diesel-powered off-road equipment, larger than 25 horsepower, operating on the site for more than two days continuously shall, at a minimum, meet U.S. EPA particulate matter emissions standards for Tier 3 engines and this equipment shall include CARB-certified Level 3 Diesel Particulate Filters or equivalent. Additionally, equipment that meets U.S. EPA Tier 4 interim standards or use of equipment that is electrically powered or uses non-diesel fuels would meet this requirement.

Consistent with Mitigation Measure 4.B-2, the above Condition of Approval would ensure the maximum increased lifetime residential cancer risk from construction, assuming infant exposure, would be 7.8 in one million or less, the maximum annual PM_{2.5} concentration would be 0.09 µg/m³, and the Hazard Index would be 0.01. The project impacts would be below the BAAQMD thresholds of significance and would be consistent with the findings of the DNSP EIR. The project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact AIR-4: The project would not result in substantial emissions (such as odors) adversely affecting a substantial number of people. **[Same Impact as Approved Project (Less Than Significant)]**

Project implementation would not result in the generation of permanent or long-term objectionable odors. Odors associated with the intermittent operation of diesel-powered equipment might be detected by nearby sensitive receptors at adjacent residences; however, these odors would be temporary (less than 13-month construction period) and would not affect a substantial number of people. Once construction activities are completed, there would be no potential for odor impacts at surrounding sensitive receptors. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

Policy NR-5.4: The City shall, during discretionary review, require that development proposals comply with federal and state air quality standards, or make findings that the project has overriding benefits to the community that outweigh nonattainment of the standards.

Policy NR-5.5

The City shall, during early consultation with project proponents, encourage project design that minimizes direct and indirect air emissions. Projects should consider the following air quality concerns:

- a) Land use and design measures to encourage alternatives to the automobile and to conserve energy;
- b) Land use and design measures to minimize exposure of sensitive receptors to odors, toxics, and criteria pollutants; and
- c) Applicable Bay Area Air Quality Management District rules, regulations, and permit requirements.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Mitigation Measures

Mitigation Measure 4.B-1: In order to be consistent with the MSM A-1 and MSM A-2 transportation control measures (TCMs) listed in Table 4.B-4, the City shall require that the following measures be included as potential Transportation Demand Management (TDM) strategies to be implemented by individual project applicants, where feasible and appropriate:

- Install charging units for electric vehicles at residences and businesses.
- Develop incentives for businesses to include preferential parking for electric and/or hybrid vehicles.

Mitigation Measure 4.B-2: The City shall ensure that the Specific Plan design guidelines and development standards incorporate the following measures to reduce or avoid exposure of sensitive receptors to TACs:

For construction activities, measures may include, but not limited to, the following:

- Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes (as required by the state airborne toxics control measure [Title 13, Section 2485 of the California Code of Regulations]). Provide clear signage that posts this requirement for workers at the entrances to the site.
- Use new diesel engines that are designed to minimize DPM emissions (usually through the use of catalyzed particulate filters in the exhaust), or retrofitting older engines with catalyzed particulate filters which would reduce up to 85 percent of DPM emissions.

For operational activities, in order to comply with the Air Quality and Land Use Handbook: A Community Health Perspective (ARB 2005)

and achieve an acceptable interior air quality level for sensitive receptors, appropriate measures, shall be incorporated into residential building design. For projects to be developed under the Specific Plan that include residential receptors within 1,000 feet of a source of TACs (stationary or CNR railroad), the appropriate measures shall include one of the following methods:

1. The project applicant shall retain a qualified air quality consultant to prepare a health risk assessment (HRA) in accordance with the ARB and the Office of Environmental Health and Hazard Assessment requirements to determine the exposure of project residents to TACs prior to issuance of a demolition, grading, or building permit. The HRA shall be submitted to the Planning Division for review and approval. The applicant shall implement the approved HRA recommendations, if any. If the HRA concludes that the air quality risks from nearby sources are at or below acceptable levels, then additional measures are not required.
2. The project applicant shall implement the following features that have been found to reduce the air quality risk to sensitive receptors and shall be included in the project construction plans. These shall be submitted to the Planning Division and the Building Division for review and approval prior to the issuance of a demolition, grading, or building permit and ongoing.
 - a. Do not locate sensitive receptors near distribution center's entry and exit points.
 - b. Do not locate sensitive receptors in the same building as a perchloroethylene dry cleaning facility.
 - c. Maintain a 50' buffer from a typical gas dispensing facility (under 3.6 million gallons of gas per year).
 - d. Install, operate and maintain in good working order a central heating and ventilation (HV) system or other air take system in the building, or in each individual residential unit, that meets the efficiency standard of the MERV 13. The HV system shall include the following features: Installation of a high efficiency filter and/or carbon filter to filter particulates and other chemical matter from entering the building. Either HEPA filters or ASHRAE 85% supply filters shall be used.
 - e. Retain a qualified HV consultant or HERS rater during the design phase of the project to locate the HV system based on exposure modeling from the mobile and/or stationary pollutant sources.
 - f. Maintain positive pressure within the building.
 - g. Achieve a performance standard of at least one air exchange per hour of fresh outside filtered air.

- h. Achieve a performance standard of at least 4 air exchanges per hour of recirculation
- i. Achieve a performance standard of 0.25 air exchanges per hour of in unfiltered infiltration if the building is not positively pressurized.
- j. Project applicant shall maintain, repair and/or replace HV system or prepare an Operation and Maintenance Manual for the HV system and the filter. The manual shall include the operating instructions and maintenance and replacement schedule. This manual shall be included in the CC&R's for residential projects and distributed to the building maintenance staff. In addition, the applicant shall prepare a separate Homeowners Manual. The manual shall contain the operating instructions and maintenance and replacement schedule for the HV system and the filters. It shall also include a disclosure to the buyers of the air quality analysis findings.

Mitigation Measure 4.B-3: The City shall ensure that the Specific Plan design guidelines and development standards incorporate the following measures to reduce or avoid exposure of sensitive receptors to odors during development under the Specific Plan:

- Consider the odor-producing potential of land uses when the exact type of facility that would occupy areas zoned for commercial or mixed-use land uses is determined. Facilities that have the potential to emit objectionable odors would be located with appropriate buffers from existing and proposed sensitive receptors.
- Identify odor control devices within building permit applications to mitigate the exposure of receptors to objectionable odors if a potential odor producing source is to occupy the Planning Area. The identified odor control devices would be installed before the issuance of certificates of occupancy for the potentially odor-producing use.

Mitigation Measure 4.B-4: Implement Mitigation Measure 4.B-1 to ensure consistency with the BAAQMD TCMs to promote clean, fuel efficient and zero emission vehicles.

4.4 **BIOLOGICAL RESOURCES**

The following discussion is based, in part, on a Riparian Area Assessment prepared by *Zenter Planning & Ecology*, in February 2018. A copy of the report is attached as Appendix B to this Initial Study/Addendum.

4.4.1 **Impact Discussion**

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife (CDFW) or United States Fish and Wildlife Service (USFWS)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Have the potential to degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or substantially reduce the number or restrict the range of an endangered, rare, or threatened species? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 6) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Biological Resources Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant biological resource impacts to special-status wildlife species and migratory fish or wildlife species in the area through incorporation of mitigation measures.

Impact BIO-1: The project would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The DNSP EIR found that the Specific plan had the potential to adversely impact special-status species; however, implementation of General Plan policies would reduce potential impacts to special-status species occurring in the area to a less than significant level. A Riparian Assessment, including evaluation of existing biological resources on-site, was prepared for the project and is discussed below.

Plant Species

Vegetation on-site consists of live oak, willow, and cottonwood trees and non-native acacia. Dominant native tree species on-site include Coast live oak and Cottonwood. The current species on-site are not consistent with tree species of the original riparian corridor. Other dominant non-native tree species observed on-site include Black locust and Australian blackwood. Upland of the riparian corridor, the larger project site is dominated by ruderal grassland.

Wildlife Species

The project site is surrounded by development, degrading its potential habitat value for special-status species in the area to utilize the site. Urban environments can provide habitat for wildlife species adapted to human habitation, such as striped skunk, Virginia opossum, raccoon, European starling, American robin, and mourning dove. The project would implement MM 4.C-1b and MM-4.C-1c to reduce potential impacts to special status and nesting birds within the project vicinity to a less than significant level. Additionally, the proposed hotel would be consistent with the Bird-safe Building Guidelines of the DNSP to further reduce potential impacts to bird species within the project area.

With implementation of Mitigation Measures 4.C-1b and 4.C-1b of the DNSP EIR, and adherence to the Bird-safe Building Guidelines of the Specific Plan, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact BIO-2: The project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the CDFW or USFWS. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is adjacent to the Napa River riparian corridor on its southern boundary. The Napa River is classified as “waters of the United States” and the bank and channel are under jurisdiction of the U. S. Army Corps of Engineers. Much of the remaining riparian habitat of the Napa River has been replaced with rip rap and concrete.

The project would be constructed upland of the Napa River, entirely outside of the riparian corridor. As such, the project would have a less than significant impact to the already highly-disturbed riparian corridor. The project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact BIO-3: The project would not have a substantial adverse effect on state or federally protected wetlands through direct removal, filling, hydrological interruption, or other means. **[Same Impact as Approved Project (Less than Significant Impact)]**

As described in Impact BIO-2, the project would be constructed entirely outside of the delineated riparian zone of the Napa River. There are no wetlands located on the project site.

Since the project would be replacing more than 10,000 square feet of impervious surface area on the project site, the project would comply with the state’s Phase II Small Municipal Separate Storm Sewer Systems (MS4s) General Permit (see *Section 4.10 Hydrology and Water Quality*). Consistent with General Plan Policies NR-1.10 and NR-4.4 and Provision E.12 of the state’s Phase II Small MS4 Permit, the project would incorporate bioretention facilities to treat stormwater and reduce potential impacts to water quality to a less than significant level. Consistency with the permit conditions would further reducing potential effects to Napa River and its associated wetlands.

For these reasons, the proposed project would not impact federally protected wetlands. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact BIO-4: The project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is within a developed and disturbed area of Downtown Napa and does not propose construction activities within the riparian corridor of Napa River. There are no wildlife nursery sites within the project boundary. To the extent that waterway and adjacent upland is used for fish and wildlife movement, the proposed project would not interfere substantially with these corridors. Therefore, no impacts related to interference with wildlife movement corridors or waterways suitable for migratory fish are expected to occur from project construction. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact BIO-5: The project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. **[Same Impact as Approved Project (Less than Significant Impact)]**

The Municipal Code designates specific parts of the City where a tree permit is required for tree removal or impacts, tree replacement ratios for removed trees, and tree protection measures for retained trees.

The project proposes to remove 21 trees on-site. These trees are not located within the adjacent riparian corridor and one (1) coast live oak is identified as a protected native tree, as defined by the City's Municipal Code. The project would replace trees consistent with the City's Municipal Code and would implement tree preservation measures, as applicable.

The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact BIO-6: The project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. **[Same Impact as Approved Project (No Impact)]**

The project site is not located within an adopted Habitat Conservation Plan or a Natural Community Conservation Plan. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (No Impact)]**

General Plan Policies that Reduce Impacts

- Policy NR-1.2 The goal of this policy is aimed at protecting wildlife corridors such as Napa Creek and Napa River and these shall be protected by not severing or obstructing them. All developments which proposed to cross or alter Napa Creek and Napa River shall take into consideration the potential impact the development may have upon its ability function as a wildlife corridor.
- Policy NR-1.10 The City shall pursue appropriate new management practices for reducing the impact of pollution from urban activities.
- Policy NR-4.4 The City shall adopt standards and regulations for the reduction and/or elimination of nonpoint sources of pollution.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Bird-safe Building Guidelines

- a) Minimize the use of reflective glass at lower building levels, especially where vegetation or water features may be reflected;
- b) Minimize bird habitat near ground stories, place new landscaping far enough away from glass building facades such that no vegetation reflection occurs, or situate trees and shrubs immediately adjacent to glass walls at a distance of less than three feet from the glass;
- c) Minimize the reflection of rooftop landscaping in adjacent building features and design with adequate space for birds to fly safely into and out of any rooftop gardens;
- d) Avoid placing water features in close proximity to glazed facades, or place soil berms, furniture, landscaping, or architectural features to prevent reflection of water in glass;
- e) Design to avoid monolithic, undistinguishable expanses of glazing by maximizing “visual noise” both on the building scale and individual glass units;
- f) Utilize glass that has been treated to reduce reflectivity, such as low-e patterning[3], etching, or low reflectivity glazing;
- g) Where appropriate use plastic or metal screens over windows, especially on the ground levels, incorporate louvers, awnings, sunshades or other exterior shading/shielding devices to reduce reflection and give birds an indication of a visual barrier;
- h) Angle glass to reflect the ground instead of nearby habitat and sky;
- i) Minimize the number of, and co-locate, rooftop antennas and other structures;
- j) Utilize self-supporting lattice or monopole structures that do not require guy wires.

Mitigation Measures

- Mitigation Measure 4.C-1b: Pre-Construction Special-Status Avian Surveys. No more than two weeks in advance of any tree or shrub pruning, removal, or ground-disturbing activity that will commence during the breeding season (February 1 through August 31), a qualified wildlife biologist will conduct pre-construction surveys of all potential special status bird

nesting habitat in the vicinity of the planned activity. Pre-construction surveys are not required for construction activities scheduled to occur during the non-breeding season (August 31 through January 31). Construction activities commencing during the non-breeding season and continuing into the breeding season do not require surveys (as it is assumed that any breeding birds taking up nests would be acclimated to project-related activities already under way). Nests initiated during construction activities would be presumed to be unaffected by the activity, and a buffer zone around such nests would not be necessary. However, a nest initiated during construction cannot be moved or altered.

If pre-construction surveys indicate that no nests of special-status birds are present or that nests are inactive or potential habitat is unoccupied: no further mitigation is required.

If active nests of special-status birds are found during the surveys: implement Mitigation Measure 4.C-1c.

- Mitigation Measure 4.C-1c: Avoidance of active nests. If active nests of special-status birds or other birds are found during surveys, the results of the surveys would be discussed with the California Department of Fish and Game and avoidance procedures will be adopted, if necessary, on a case-by-case basis. In the event that a special-status bird or protected nest is found, construction would be stopped until either the bird leaves the area or avoidance measures are adopted. Avoidance measures can include construction buffer areas (up to several hundred feet in the case of raptors), relocation of birds, or seasonal avoidance. If buffers are created, a no disturbance zone will be created around active nests during the breeding season or until a qualified biologist determines that all young have fledged. The size of the buffer zones and types of construction activities restricted will take into account factors such as the following:
1. Noise and human disturbance levels at the Plan area and the nesting site at the time of the survey and the noise and disturbance expected during the construction activity;
 2. Distance and amount of vegetation or other screening between the Plan area and the nest; and
 3. Sensitivity of individual nesting species and behaviors of the nesting birds.

4.5 CULTURAL RESOURCES

The following discussion is based, in part, on an Archaeological Literature Search prepared by *Holman & Associates* in March 2019, which is on file with the City of Napa. A Historic Project Evaluation and Relocation Project Evaluation were prepared by *Preservation Architecture* in September 2018 and October 2018, respectively. Copies of the evaluations are attached as Appendix C to this Initial Study/Addendum.

4.5.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Cause a substantial adverse change in the significance of a historical resource pursuant to CEQA Guidelines Section 15064.5? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Cause a substantial adverse change in the significance of an archaeological resource as pursuant to CEQA Guidelines Section 15064.5? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Disturb any human remains, including those interred outside of dedicated cemeteries? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Cultural Resources Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant cultural resource impacts with mitigation incorporated, including project-level review for Downtown Historic Design Guideline consistency, review of the City’s “Pastfinder” database, and adherence to standard procedures in the event human or archaeological remains are discovered during construction activities. The mitigation incorporated into the DNSP is applicable to the proposed project and described in the impact discussions herein.

Impact CUL-1: The project would not cause a substantial adverse change in the significance of a historical resource pursuant to CEQA Guidelines Section 15064.5. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The project site contains two historic buildings located at 731 First Street and 718 Water Street.

These two structures on the project site have previously been identified by the City of Napa as a *Local Landmark* and a *Neighborhood Conservation Property*. The Oxbow District of Napa was reviewed in 2011 for designation of a potential historic district. The Oxbow District was determined not to be eligible for listing on national, state, or local historical registers. The single-family

residence at 718 Water Street and the commercial building at 731 First Street, therefore, are historic based on their individual merits and not part of any larger historic district.

The commercial building located at 731 First Street was a residence from its original construction date of approximately 1880 until the 1970s. The building has undergone elemental building alterations since its construction and, consequently, the remaining and potentially historic integrity is compromised. The remaining character-defining features of the building include:

- The single-story, front and east side gabled-roof building forms;
- The covered front porch with its wood porch posts and low-hipped roof;
- The pattern of door and window openings at the front (north) elevation; and
- Clapboard-siding and flat wood-trim work of the original/early building exteriors.

The single-family residence located at 718 Water Street was constructed circa 1890 and has remained a single-family residence since its construction. The house has undergone extensive modification to its exterior. The structure's character-defining features include:

- Original L-shaped form under a front-gabled roof;
- Shed-roofed front porch and entry door opening;
- Window openings with wood trims and sills (in original building); and
- Wood drop-sided exterior walls (on original building).

The project proposes to relocate the existing single-family residence and commercial building at 731 First Street and 718 Water Street, respectively, currently located within the project site boundaries to 58 Randolph Street, located approximately one mile south of the site in the Napa Abajo Neighborhood. The Relocation Project Evaluation prepared for the project found that the two properties at 731 and 718 Water Street are not part of any collection of resources and their specific sites are not relevant to their identified significance. As such, the character-defining forms and features of these structures may be relocated to an appropriate receiver site or sites and would retain the structures integrity.

The proposed relocation site at 58 Randolph Street is located within the Napa Abajo Neighborhood. A portion of the Napa Abajo Neighborhood is a National Register historic district; however, the district lies several blocks north of the proposed relocation site. The existing structure at the relocation site is listed on the City's Historic Resource Inventory as a *Listed Resource*. However, the existing residence does not appear to be from 1890, and the county assessor identifies the construction date as 2013. The existing residence is located on the southern half of the site and the two relocated structures would be located on the northern half of the site. The 718 Water Street building would face the street and the 731 First Street residence would be located in the rear of the property facing south. The proposed relocated houses fit the context of the surrounding neighborhood and their relocation would not have any direct impact on any adjoining, identified or potential historic resources, including residences on the south side of Ash Street (nos. 1229 and 1247) that are identified on the City's Historic Resources Inventory as *Listed Resources*.

Pursuant to the DNSP EIR and MM 4.D-1, projects affecting any identified historic properties are required to obtain approval of a Certificate of Appropriateness prior to any substantial alteration or construction proposed that would be visible from a public way. Consistent with this requirement, the

Applicant is requesting a Certificate of Appropriateness for relocation of the two historic structures at 731 First Street and 718 Water Street to 58 Randolph Street as part of the project entitlements. The Certificate of Appropriateness will be considered by the City Council concurrently with its consideration of the Use Permit and Design Review Permit for the project. Approval of the Certificate of Appropriateness is exempt from CEQA under CEQA Guidelines Sections 15303, 15331, and 15332 as 58 Randolph Street satisfies the criteria set forth therein.”

The DNSP EIR concluded that with implementation of City of Napa Downtown Historic Design Guidelines, which requires a Certificate of Appropriateness, impacts to historic resources would be reduced to a less than significant level. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact CUL-2: The project would not cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines Section 15064.5. **[Same Impact as Approved Project (Less than Significant Impact)]**

An Archaeological Literature Search was prepared for the project by *Holman & Associates* in March 2019. The Archaeological Literature Search consisted of a records search at the Northwest Information Center of the California Historic Resources Information System (CHRIS) to determine if there are any identified archaeological sites within a quarter of a mile, and all other cultural resources and all studies within 100 meters of the project site.

The results of the Archaeological Literature Search indicate that there are no known cultural resources on the project site. The Caltrans First Street Bridge over the Napa River (No. 21C0091) is not eligible to either the National Register of Historic Places or the California Register of Historical Resources. The CHRIS identified four other resources near the project site, including the Southern Pacific Railroad, two depots associated with the railroad, and the two-story single-family house at 876 Water Street. None of the resources are eligible for the National or California Registers.

There is one recorded archaeological site documented along the Napa River within the project vicinity. Given that the project site is adjacent to the Napa River, the project site has a high sensitivity for uncovering unknown Native American resources. The project site is also located within the former historic Chinese neighborhood of Napa; therefore, project construction activities may uncover unknown buried archaeological resources. On March 21, 2019, an archaeological survey was completed for the entire project site to determine if there were any observable archaeological or cultural resources. No visible resources were found during the field survey.

Given the high archaeological sensitivity of the site and location within the former Chinese neighborhood of Napa, project construction may encounter buried archaeological resources. The project would be required to implement the following Condition of Approval:

Condition of Approval

- Consistent with Mitigation Measure 4.D-2a, an archaeological literature search was completed and found the project site is highly sensitive for archaeological resources. As a

condition of approval, a program of subsurface exploration to sample the historically sensitive areas and the deeper native soils that could contain remnant archaeological resources shall be completed by a qualified archaeologist immediately following building demolition and prior to project grading. In the event archaeological materials are discovered, the resources will be assessed consistent with Mitigation Measure 4.D-2b.

The proposed project would be developed consistent with Mitigation Measures 4.D-2a and 4.D-2b of the DNSP EIR. With the implementation of the above condition of approval and previously identified mitigation measures, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less Than Significant Impact with Mitigation Incorporated)]**

Impact CUL-3: The project would not disturb any human remains, including those interred outside of dedicated cemeteries. **[Same Impact as Approved Project (Less Than Significant Impact with Mitigation Incorporated)]**

The project is located in an area of high archaeological sensitivity; however, no burials are known to be present on the site. The DNSP EIR included Mitigation Measure 4.D-4 to reduce potential impacts to human remains to a less than significant level. Consistent with the DNSP EIR, the project would stop work within 50 feet of any burial in the event that human remains are discovered at any point during project construction. The project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less Than Significant Impact with Mitigation Incorporated)]**

General Plan Policies that Reduce Impacts

- Policy HR-1.6: The City shall use the State Historical Building Code to preserve historic resources consistent with protection of life safety.
- Policy HR-1.M: The City shall adopt design guidelines and standards to guide rehabilitation, infill and new development in historic areas.
- Policy HR-6.1: The City shall enforce current federal and state and procedures for identifying, preserving and protecting prehistoric sites.
- Policy HR-6.2: The City shall require investigation during the planning process for all proposed developments in archaeologically sensitive areas in order to determine whether prehistoric resources may be affected by the project and, if so, require that appropriate mitigation measures be incorporated into the project design.
- Policy HR-6.3: Recognizing that Native American burials or archaeological artifacts may be encountered at unexpected locations, the City shall continue to enforce state mandates with its current mitigation requirement, applied to all development permits and tentative subdivision maps, that upon discovery of remains

during construction, all activity will cease until qualified professional archaeological examination and reburial in an appropriate manner is accomplished.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Mitigation Measures

- Mitigation Measure 4.D-1: The City shall require that any future development under the Specific Plan to meet the intent and goals of the City of Napa Downtown Historic Design Guidelines. This includes any project that would alter historic resources or would be constructed adjacent to a historic resource. Alternatively, the General Plan shall include a new policy which requires that any development in the Downtown Area adhere to the goals identified in the City of Napa Downtown Historic Design Guidelines.
- Mitigation Measure 4.D-2a: When specific projects are proposed under the Specific Plan that involves ground-disturbing activity into native soils, the City's Pastfinder archaeological database shall be consulted. Recommendations provided by the Pastfinder database shall be implemented based on a parcel's archaeological sensitivity. In those cases where a site-specific cultural resources study is necessary, it shall be performed by qualified cultural resources professional. The study will include an updated records search, pedestrian survey of the project area, development of a historic context, sensitivity assessment for buried prehistoric and historic-period deposits, and preparation of a technical report that meets federal and state requirements. If significant resources are identified and cannot be avoided, treatment plans will be developed in consultation with the City and Native American representatives to mitigate potential impacts to less than significant.
- Mitigation Measure 4.D-2b: Should any archaeological artifacts be found during construction in the Planning Area, all construction activities within 50 feet shall immediately halt and the City must be notified. A qualified archaeologist shall inspect the findings within 24 hours of the discovery. If the site is determined to contain significant cultural resources, funding will be provided to identify, record, report, evaluate, and recover the resources as necessary. Construction within the area of the find shall not recommence until impacts on the historical or unique archaeological resource are mitigated.
- Mitigation Measure 4.D-4: The treatment of any human remains and associated or unassociated funerary objects discovered during soil-disturbing activities shall comply with applicable state laws. Such treatment would include

ATTACHMENT 13

immediate notification of the Napa County Coroner. In the event of the coroner's determination that the human remains are Native American, the coroner shall notify of the Native American Heritage Commission, which would appoint a Most Likely Descendant (MLD) (PRC § 5097.98). The archaeological consultant, the Event Authority, and MLD shall make all reasonable efforts to develop an agreement for the treatment, with appropriate dignity, of any human remains and associated or unassociated funerary objects (CEQA Guidelines § 15064.5[d]). The agreement would take into consideration the appropriate excavation, removal, recordation, analysis, custodianship, curation, and final disposition of the human remains and associated or unassociated funerary objects. The PRC allows 48 hours to reach agreement on these matters. If the MLD and the other parties could not agree on the reburial method, the Event Authority shall follow Section 5097.98(b) of the PRC, which states that "the landowner or his or her authorized representative shall reinter the human remains and items associated with Native American burials with appropriate dignity on the property in a location not subject to further subsurface disturbance."

4.6 ENERGY

4.6.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Energy Conclusion

The impacts of energy use were analyzed in the DNSP EIR in the context of criteria air pollutant and greenhouse gas emissions resulting from the project.

Impact EN-1: The project would not result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Construction

The project would be constructed over a period of approximately 13 months. Project construction would include grading, excavation, site preparation and construction of the proposed hotel.

The overall construction schedule and process is designed to be efficient in order to avoid excess monetary costs. That is, equipment and fuel are not typically used wastefully on the site because of the added expense associated with renting the equipment, maintaining it, and fueling it. Therefore, the opportunities for future efficiency gains during construction are limited. However, the proposed project does include several measures that would improve the efficiency of the construction process. Implementation of the BAAQMD Best Management Practices (BMPs) detailed in *Section 4.3 Air Quality* would restrict equipment idling times to five minutes or less and would require the applicant to post signs on the project site reminding workers to shut off idle equipment.

Construction of the project would require the use of fuels and energy related to the manufacturing and transportation of building materials that are fundamental to construction of the proposed project. With implementation of the air quality related BMPs and mitigation measures (refer to *Section 4.3 Air Quality*), construction of the project would not result in wasteful, inefficient, or unnecessary

consumption of energy resources. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Operation

As disclosed in the DNSP EIR, new development under the proposed Specific Plan would result in the commitment of existing and planned sources of energy, which would be necessary for the operation of the proposed hotel development. However, the Specific Plan incorporates energy-conserving features, as required by the California Building Code and California Energy Efficiency Standards (Title 24) and the City's adopted High-Performance Building Ordinance which provides for 15 percent higher energy efficiency than Title 24 for new development. The Specific Plan also incorporates sustainable construction policies and features where feasible or as otherwise required by law that would strive to meet the LEED Program over the long-term, resulting in a more energy efficient development and reduced consumption using local materials and labor.

Operation of the proposed hotel and commercial/retail space would use approximately 951,415 kWh annually.³ The proposed project would incorporate energy-efficiency features to comply with the City's adopted High-Performance Building Ordinance. The proposed green building measures ensure the project would not use energy in an inefficient or wasteful manner. The project would incorporate the following green building measures:

- Bicycle parking to reduce vehicular load
- Electric vehicle (EV) charging
- EV trash collection via 'private garbage' system
- Light pollution reduction
- energy efficient standards per code
- PV electric production
- Cool roof design
- Reduced indoor / outdoor water use
- Increased daylighting thru design
- Building & material design to improve longevity of materials and prevent water intrusion
- Construction waste and recycling plan
- Building operations plan for recycling and waste reduction
- Building operations plan for energy efficient operation and monitoring
- Building material selection to reduce pollutants and improve indoor air quality

The project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

³ Illingworth & Rodkin, Inc. *First & Oxbow Hotel Air Quality and Greenhouse Gas Assessment*. March 29, 2019.

Impact EN-2: The project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. **[Same Impact as Approved Project (Less than Significant Impact)]**

As described in Impact EN-1, construction and operation of the proposed project would not result in significant energy-related impacts. The Specific Plan includes policies to encourage energy efficiency and green building techniques for project-level implementation. Since the proposed project would comply with applicable building efficiency standards and regulations, such as the City's High-Performance Building Ordinance and Title 24, the project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that would be applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Refer to *Sections 4.3 Air Quality* and *4.8 Greenhouse Gas Emissions* for applicable air quality and greenhouse gas emission measures that would be incorporated into the project and would reduce potential energy impacts.

4.7 GEOLOGY AND SOILS

The following discussion is based, in part, on a Preliminary Geotechnical Investigation prepared by *Miller Pacific Engineering Group* in November 2018. A copy of the report is attached as Appendix D to this Initial Study/Addendum.

4.7.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: | | | | | |
| - Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault (refer to Division of Mines and Geology Special Publication 42)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

| 5) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 6) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Geology and Soils Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant geology and soils impacts. Mitigation was incorporated into the DNSP EIR to address paleontological impacts. The project would not result in new or greater impacts than those disclosed in the DNSP EIR.

Impact GEO-1: The project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault; strong seismic ground shaking; seismic-related ground failure, including liquefaction; or landslides.
[Same Impact as Approved Project (Less than Significant Impact)]

Fault Rupture

As disclosed in the DNSP EIR, the Specific Plan area is not located within an Alquist-Priolo Earthquake Fault Hazard Zone. The nearest active fault to the project site is the West Napa Fault, located approximately 1.9 miles from the site. As such, people or structures would not be exposed to substantial adverse effects from a rupture of a known earthquake fault. Therefore, consistent with the findings of the DNSP EIR, the potential for fault rupture on the project site is very low.

Seismic Ground Shaking

The DNSP Planning Area is located in a seismically active region of California and strong ground shaking would be expected during the lifetime of development. The DNSP EIR concluded that the potential for damage or loss during an earthquake with a magnitude of 6.7 or greater would be considered a potentially significant impact. Analyses completed for the *Geotechnical Investigation* indicated the potential for strong seismic shaking at the project site is moderate. Consistent with the DNSP EIR, the project would be designed in compliance with the 2019 California Building Code. In addition, the project would implement the following Standard Permit Conditions to reduce seismic hazards and impacts to a less than significant level.

Standard Permit Condition:

- To avoid or minimize potential damage from seismic shaking, the project shall be built using standard engineering and seismic safety design techniques. Building design and construction at the site shall be completed in conformance with the recommendations of an approved geotechnical investigation. The buildings shall meet the requirements of applicable Building and Fire Codes, as adopted or updated by the City.
- All Project-related grading, trenching, backfilling and compaction operations shall be conducted in accordance with the City of Napa Public Works Department Standard Specifications.
- All construction activities shall meet the California Building Code regulations for seismic safety (e.g., reinforcing perimeter and/or load bearing walls, bracing parapets).
- Developer shall provide an erosion and sediment control plan and a schedule for implementation of approved measures to the Public Works Director for approval prior to the issuance of any grading permits. No grading and excavation shall be performed except in accordance with the approved plan and schedule.

Seismic-Related Ground Failure**Liquefaction**

Analyses completed for the *Geotechnical Investigation* indicated that zero to three inches of post liquefaction settlement may be anticipated across the site following a major earthquake. The adverse effects of liquefaction include potential loss of foundation bearing capacity, post liquefaction settlement, lateral spreading, and other issues. Loss of bearing capacity and resulting building settlements/rotations can occur during liquefaction of soils immediately below the building foundations.

The DNSP EIR concluded that impacts from liquefaction would be less than significant since all new development would comply with current industry standard geotechnical practices and seismic structural design according to the requirements found in the most recent version of the California Building Code. Implementation of the following Standard Permit Condition would reduce seismic hazard impacts related to liquefaction to a less than significant level.

Lateral Spreading

Lateral spreading typically occurs as a form of horizontal displacement of relatively flat-lying soil toward an open or “free” face such as an open body of water, channel, or excavation. This movement is often associated with liquefaction. Due to the close proximity of the Napa River and known liquefiable soils, lateral spreading is considered a moderate to significant risk at the project site. With implementation of standard permit conditions, construction of the project would not result in seismically induced lateral spreading. Therefore, the project would not result in new or greater impacts than those disclosed in the DNSP EIR.

Standard Permit Condition:

To avoid or minimize potential impacts resulting from liquefaction and seismically induced lateral spreading, the proposed project would be built using standard engineering and seismic safety design

techniques. Building design and construction at the site will be completed in conformance with the recommendations of a design-level geotechnical investigation (including ground improvement systems).

Landslides

The project site is not located within a landslide hazard zone. The project site is relatively flat and is not located in the vicinity of any slope that could be affected by a landslide.

Impact GEO-2: The project would not result in substantial erosion or the loss of topsoil. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is located along the Napa River, where erosion would be anticipated to occur. Sandy soils on moderate slopes or clayey soils on steep slopes are susceptible to erosion when exposed to concentrated water runoff. Development of the site under the proposed project would disturb the ground and expose soils, thereby increasing the potential for wind- or water-related erosion and sedimentation at the site until the completion of construction. The proposed project would direct stormwater runoff from the site to bioretention areas prior to discharge to the City storm drainage system. The project, therefore, would not contribute to any bank erosion along the Napa River from stormwater runoff. No modifications to the existing riverbank adjacent to the site are proposed. Implementation of the Standard Permit Conditions listed in Impact GEO-1 would reduce potential impacts related to loss of topsoil to a less than significant level. The project would not result in new or greater erosion impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact GEO-3: The project would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse. **[Same Impact as Approved Project (Less than Significant Impact)]**

As described in Impact GEO-1, the project site is not located within a landslide hazard zone and is not in the vicinity of a slope that could be affected by a landslide. The project site is mapped in an area with high susceptibility to liquefaction.⁴ With implementation of the standard permit conditions listed under Impact GEO-1, the project would not result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse. The project would not result in new or greater soil hazard impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

⁴ Association of Bay Area Governments. *Resilience Program*. Site accessed on May 21, 2019. <http://gis.abag.ca.gov/website/Hazards/?hlyr=cgsLiqZones>

Impact GEO-4: The project would not be located on expansive soil, as defined in the current California Building Code, creating substantial direct or indirect risks to life or property. **[Same Impact as Approved Project (Less than Significant Impact)]**

Expansive soils will shrink and swell with fluctuations in moisture content and are capable of exerting significant expansion pressures on building foundations, interior floor slabs, and exterior flatwork. Distress from expansive soil movement can include cracking of brittle wall coverings (stucco, plaster, drywall, etc.), racked door and/or window frames, and uneven floors and cracked slabs. Flatwork, pavements, and concrete slabs-on-grade are particularly vulnerable to distress due to their low bearing pressures.

As part of the *Geotechnical Investigation*, existing structures at the site were observed for signs of distress associated with expansive soils. Significant heave or distress to pavements/curb and gutter or other surfaces was not observed. Additionally, the surficial soils observed in the reference borings were generally lower plasticity; therefore, expansive soils are not considered a significant geologic hazard at the site. The project would implement standard permit conditions, which would require that the project's building design and construction shall be completed in conformance with the recommendations of an approved geotechnical investigation.

Implementation of standard permit conditions listed under Impact GEO-1 above would ensure that development of the site would not exacerbate existing soil conditions on the project site, nor exacerbate risks to life and property. The project would not result in new or greater impacts related to expansive soils than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact GEO-5: The project would not have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is located within an urbanized area of Napa and sewers are available to dispose of wastewater from the project site. Therefore, redevelopment of the site would not require septic tanks or alternative wastewater disposal systems. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact GEO-6: The project would not directly or indirectly destroy a unique paleontological resource or site or unique geological feature. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The DNSP EIR found that development facilitated by the DNSP could potentially adversely affect unidentified paleontological resources. The majority of the Planning Area is underlain by a geologic unit (Pleistocene alluvium) with high paleontological potential, the EIR concluded that subsurface

excavations beyond previously disturbed soils could disturb or destroy paleontological resources. Therefore, impacts to paleontological resources could be potentially significant.

Consistent with DNSP EIR, the project would be required to implement MM 4.D-3, thereby reducing this impact to a less-than-significant level by educating earth moving crews on the appearance of fossils, procedures to follow if any are discovered, and ensuring that a paleontologist assess the significance of any fossil find, and recovers it, if appropriate. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

General Plan Policies that Reduce Impacts

- Policy HS-1.1: The City shall require that all new buildings be designed and constructed to resist stresses produced by earthquakes. To this end, the City shall require all new buildings to conform to the structural requirements of the most recently adopted edition of the Uniform Building Code (the Uniform Building Code was replaced by the International Building Code in 2000. As noted above, the California Building Code [CBC] is based on the IBC).
- Policy HS-1.3: The City shall require soils and geologic studies for proposed development with large client populations (such as schools and convalescent centers) within areas subject to very strong, violent, or very violent ground shaking, as indicated in the ABAG Shaking Intensity Map. Such studies should determine the actual extent of the seismic hazards, optimum location for structures, the advisability of special structural requirements, and the feasibility and desirability of a proposed facility in a specified location. Mitigation measures shall be incorporated as conditions of any project approval.
- Policy HS-1.4: The City shall require special construction features in the design of structures where site investigations confirm potential seismic hazards.
- Policy HS-2.1: The City shall seek to minimize grading and impermeable surfaces in high-erosion areas. If grading or impermeable surfaces are necessary, they shall be properly engineered and drained to reduce runoff and erosion.
- Policy HS-2.2: The City shall consider natural landform contours and geologic conditions in the development of roadways and individual project design.

Specific Plan Policies and Design Standards that Reduce Impacts

Mitigation Measure

- Mitigation Measure 4.D-3: Prior to the start of any subsurface excavations that would extend beyond previously disturbed soils, all construction forepersons and field supervisors shall receive training by a qualified professional paleontologist, as defined by the Society of Vertebrate Paleontology

ATTACHMENT 13

(SVP), who is experienced in teaching non-specialists, to ensure they can recognize fossil materials and will follow proper notification procedures in the event any are uncovered during construction. Procedures to be conveyed to workers include halting construction within 50 feet of any potential fossil find and notifying a qualified paleontologist, who will evaluate its significance. Training on paleontological resources will also be provided to all other construction workers, but may involve using a videotape of the initial training and/or written materials rather than in-person training by a paleontologist. If a fossil is determined to be significant and avoidance is not feasible, the paleontologist will develop and implement an excavation and salvage plan in accordance with SVP standards.

4.8 GREENHOUSE GAS EMISSIONS

The following discussion is based, in part, on a Greenhouse Gas Assessment prepared by *Illingworth & Rodkin, Inc.* in March 2019. A copy of the report is included as Appendix A to this IS/Addendum.

4.8.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict with any applicable plan, policy or regulation adopted for the purposes of reducing the emissions of greenhouse gases? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Greenhouse Gas (GHG) Emissions Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in significant and unavoidable greenhouse gas impacts related to the Specific Plan’s GHG emissions exceeding BAAQMD thresholds for 2020 emissions. A mitigation measure was incorporated into the DNSP EIR which required development projects reduce their GHG emissions by 30 percent in order to achieve statewide targets in 2020.

Impact GHG-1: The project would generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment. **[Same Impact as Approved Project (Significant and Unavoidable Impact)]**

Construction Emissions

Construction of the proposed hotel would temporarily generate greenhouse gas (GHG) emissions due to the operation of construction equipment and vehicles traveling to and from the project site. Construction-related GHG emissions vary depending on the amount, duration, and type of construction. Construction of the project would result in GHG emissions totaling approximately 379 metric tons of CO₂ (MT CO₂e). Because project construction would be temporary and would not result in a permanent increase in emissions that would interfere with long-term GHG reduction goals, the temporary increase in emissions would be less than significant and the proposed project would not result in new or greater greenhouse gas emission impacts than identified in the DNSP EIR. **[Same Impact as Approved Project (Significant and Unavoidable)]**

Operational Emissions

The DNSP EIR determined that operational DNSP-related greenhouse gas emissions would be approximately 23,089 metric tons/year of CO₂e (including emissions from vehicle trips, space heating, landscape equipment, and indirect emissions from the use of electricity, solid waste generation, and water and wastewater treatment and conveyance). However, implementation of the City's Specific Plan sustainability measures, High Performance Building Ordinance, and the Citywide Sustainability Plan would result in reduced GHG emissions. The values presented in the DNSP EIR were found to be higher than the actual emissions.

The proposed project is consistent with the site's General Plan land use designation (*Oxbow Commercial*) and zoning district (*Oxbow Commercial*). The project would construct a 74-room hotel on a partially undeveloped site. The project would, therefore, intensify uses on the project site, increasing vehicle trips and energy usage compared to existing conditions.

The CalEEMod model and project vehicle trip generation rates were used to estimate daily emissions associated with operation of the fully developed site under the proposed project. The estimated construction period GHG emissions are shown in Table 4.8-1.

| Source Category | Proposed Project in 2022 | Proposed Project in 2030 |
|----------------------------------|---------------------------------|---------------------------------|
| Area | <1 | <1 |
| Energy Consumption | 312 | 312 |
| Mobile | 609 | 488 |
| Solid Waste Generation | 23 | 23 |
| Water Usage | 3 | 3 |
| Total (MT CO ₂ /year) | 948 | 827 |
| Bright-line 2030 Threshold | 660 MT CO ₂ e | |
| Significant? | Yes | Yes |

BAAQMD adopted revised CEQA Air Quality Guidelines in June 2010 and then adopted a modified version of the Guidelines in May 2017. The BAAQMD CEQA Air Quality Guidelines include thresholds of significance for GHG emissions. The BAAQMD GHG thresholds include a specific plan- and project-level GHG emission bright-line threshold of 1,100 MT of CO₂e or 4.6 MT of CO₂e per service population (residents and workers) per year for projects to achieve the 2020 AB 32 statewide targets. Although BAAQMD has not published a quantified threshold for 2030 yet, this assessment uses a bright-line threshold of 660 MT CO₂e/year based on the GHG reduction goals of EO B-30-15. The 2030 bright-line threshold is a 40 percent reduction of the 2020 1,100 MT CO₂e/year threshold.

Annual emissions resulting from operation of the project would be 948 MT of CO₂e for the assumed first full operational year of 2022 and 827 MT of CO₂e for the year 2030. The GHG emissions in 2020 would exceed the bright-line threshold of 660 MT of CO₂e. Consistent with Mitigation Measure 4.B-5 of the DNSP EIR, the project would implement a GHG Reduction Plan to reduce operational GHG emissions to a less than significant level. The project proposes the following design and

operational measures to reduce GHG emissions that would be incorporated in the GHG Reduction Plan:

- Bicycle parking to reduce vehicular load
- Electric vehicle (EV) charging
- EV trash collection via ‘self-haul’ system
- Light pollution reduction
- Energy efficient standards per code
- PV electric production
- Cool roof design
- Reduced indoor/outdoor water use
- Increased daylighting thru design
- Building & material design to improve longevity of materials and prevent water intrusion
- Construction waste and recycling plan
- Building operations plan for recycling and waste reduction
- Building operations plan for energy efficient operation and monitoring
- Building material selection to reduce pollutants and improve indoor air quality

Condition of Approval

The project applicant shall prepare a GHG Reduction Plan that includes the proper elements to reduce emissions from the project below 660 MT of CO₂e annually. Elements of this plan may include, but would not be limited to, the following:

- Installation of solar power systems or other renewable electric generating systems that provide electricity to power on-site equipment and possibly provide excess electric power;
- Install efficient space and water heating systems;
- Develop and implement a transportation demand management (TDM) program to further reduce mobile GHG emissions.
- Construct onsite or fund off-site carbon sequestration projects (such as a forestry or wetlands projects for which inventory and reporting protocols have been adopted). If the project develops an off-site project, it must be registered with the Climate Action Reserve or otherwise approved by the BAAQMD in order to be used to offset Project emissions;
- Purchase of carbon credits to offset Project annual emissions. Carbon offset credits must be verified and registered with The Climate Registry, the Climate Action Reserve, or another source approved by the California Air Resources Board or BAAQMD. The preference for offset carbon credit purchases include those that can be achieved as follows: 1) within the City; 2) within the San Francisco Bay Area Air Basin; 3) within the State of California; then 4) elsewhere in the United States. Provisions of evidence of payments, and funding of an escrow-type account or endowment fund would be overseen by the City.

Implementation of the Condition of Approval would reduce the project’s operational GHG emissions below the 2030 thresholds, resulting in a less than significant impact. The GHG emissions from the hotel would be reduced consistent with DNSP EIR Mitigation Measures 4.B-5; however, the project would contribute to the significant unavoidable GHG emissions impact identified in the DNSP EIR.

The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Significant and Unavoidable)]**

Impact GHG-2: The project would not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHGs. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The proposed project is consistent with the land use and development assumptions of the Specific Plan. The proposed project would comply with the DNSP Design Guidelines and sustainability requirements and mitigation measures MM 4.B-1 through 4.B-5. The proposed hotel would incorporate Green Building and Development Measures into the project design to demonstrate GHG emissions from operations would adhere to the City's reduction goals.

By incorporating the measures discussed under Impact GHG-1, the proposed project would be consistent with the DNSP and would not otherwise conflict with applicable plans, policies or regulations adopted to reduce emissions of GHG. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that would be applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Mitigation Measures

Mitigation Measure 4.B-1: In order to be consistent with the MSM A-1 and MSM A-2 transportation control measures (TCMs) listed in Table 4.B-4, the City shall require that the following measures be included as potential Transportation Demand Management (TDM) strategies to be implemented by individual project applicants, where feasible and appropriate:

- Install charging units for electric vehicles at residences and businesses.
- Develop incentives for businesses to include preferential parking for electric and/or hybrid vehicles.

Mitigation Measure 4.B-5: The City shall ensure that applicant(s) for individual projects to be developed under the Specific Plan would incorporate Green Building and Development Measures as listed in Appendix D (AIR-2). Each

ATTACHMENT 13

increment of new development under the Specific Plan requiring a discretionary approval from the City (e.g., proposed tentative subdivision map, conditional use permit), would demonstrate that GHG emissions from operation would be reduced by 30 percent from business-as-usual 2020 emissions levels, in order to achieve 1990 levels by 2020.

4.9 HAZARDS AND HAZARDOUS MATERIALS

The following discussion is based, in part, on a Phase I Environmental Site Assessment prepared by *Odic Environmental* in January 2018. A subsequent Phase II was prepared by *Odic Environmental* in February 2019. Copies of these reports are attached as Appendix E and Appendix F, respectively.

4.9.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, will it create a significant hazard to the public or the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Result in a safety hazard for people residing or working in the project area for a project within the vicinity of a private airstrip or within an airport land use plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 6) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Hazards and Hazardous Materials Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant hazards and hazardous materials impacts. Impacts from hazards and hazardous materials

were found to be adequately addressed with the implementation of General Plan policies and no additional mitigation measures were required in the DNSP.

Impact HAZ-1: The project would not create a significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials. **[Same Impact as Approved Project (Less than Significant Impact)]**

The proposed project is construction of a 74-room hotel and 6,294 square feet of retail space. As described in the DNSP EIR, implementation of the Specific Plan would require temporary construction activities that would likely involve the transport and use onsite of hazardous materials, such as limited quantities of gasoline, diesel fuel, hydraulic fluid, solvents, oils, and paints for the construction of individuals projects within the Planning Area. These materials would be transported along the roadways and temporarily stored onsite.

The proposed hotel would routinely use limited amounts of cleaning materials and would not generate substantial hazardous emissions from hazardous materials use. As applicable, the current regulations and programs for regulated hazardous materials use would ensure potential impacts from the use of these chemical would be less than significant. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HAZ-2: The project would not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Consistent with the DNSP EIR, a Phase I Environmental Site Assessment was completed for the project to identify potential impacts of the project site to the existing environment.

On-site Sources of Contamination

Lead

Lead was detected in soils on-site in excess of ESLs for a proposed residential land use scenario, but below the commercial/industrial land use ESL. Background concentrations of lead could vary significantly across the area and were evaluated against the regulatory standards applicable to the planned future use. In this instance, the lead concentrations would be below the commercial / industrial land use ESL threshold. However, given that the contaminated soil is directly exposed and accessible to human exposure, the Phase I ESA determined that the contaminated soil would need to be removed. Consistent with General Plan policies and the findings of the DNSP EIR, the project would be required to adhere to the following Condition of Approval:

Condition of Approval

- The project shall prepare a Soil Management Plan, Health and Safety Plan, and a Human Health Risk Assessment to Construction Workers to ensure contaminants of concern do not pose human health risks to future construction and utility workers and general public.

Vapor Intrusion

The existing structure at 731 First Street, currently occupied by Trade Brewing, was formerly a dry-cleaning business that operated from approximately 1982 to 1988, and from 2003 to 2014. The western portion of the project site (831 First Street) was previously developed with a gas plant operated by Napa Gas & Electric Company. A machine shop with a foundry later occupied this portion of the project site. Structures on the western portion of the project site were demolished to allow for the realignment of Soscol Avenue.

A limited subsurface investigation was conducted in 2015 at the former dry-cleaning site. The investigation included soil and groundwater sampling. Results of the sampling indicate that there is no evidence of soil or groundwater impacts from previous dry-cleaning operations. However, based on historical uses of the area, there is a potential vapor intrusion condition. Consistent with General Plan policies and the findings of the DNSP EIR, the project would be required to adhere to the Condition of Approval described above.

Adherence to the Condition of Approval would ensure potential impacts to future construction workers would be less than significant.

Off-site Sources of Contamination**Former Dry Cleaner – 712-714 First Street**

A former dry cleaner's ("Valet Cleaners & Tailors") at 712-714 First Street was located approximately 90 feet to the north of the project site. It was identified as having operated from 1965 to 1985. It is unknown if this site was a dry-cleaning plant or a drop-off location. This site is located up-gradient from the project site and groundwater in the vicinity flows to the southwest, towards the project site and the Napa River. As such, there is a potential vapor intrusion condition (VIC) that exists from the Valet Cleaners & Tailors site that is located north of the project site. This is considered a recognized environmental concern (REC).

A subsequent Phase II Soil and Groundwater investigation was completed to determine the extent of possible contamination on-site. The limited subsurface investigation determined that the presence of perchloroethylene (PCE) and trichloroethylene (TCE) in soil gas and soil around the building exceed the respective environmental screening level (ESL) thresholds. This presents a potential risk of vapor intrusion resulting in an incremental lifetime carcinogenic risk and non-cancer hazard. Consistent with Policy HS-7.2 and 7.3, the project would be required to participate in the County's Certified Unified Program Agency, which would ensure the potential impact from historic releases of hazardous materials are remediated prior to reuse of contaminated sites.

Former Gas Plant and Machine Shop – 831 First Street

Based on Sanborn Fire Insurances Maps from 1901 and 1910, the west-adjacent property that is currently Soscol Avenue was a former Napa Gas & Electric Company gas plant that became a machine shop that also operated an onsite foundry. Although this site became part of Soscol Avenue, since no known assessments have been conducted at the property, a VIC exists. Consistent with Policy HS-7.2 and 7.3, the project would be required to participate in the County's Certified Unified Program Agency, which would reduce the potential impact from historic releases of hazardous materials by requiring an evaluation for potential risks and remediation, if necessary, prior to reuse of contaminated sites.

Groundwater

Groundwater on the site is anticipated at 10 feet below ground surface (bgs); however, due to seasonal fluctuations no groundwater was present to depths of 15 feet bgs in samples taken for the Phase II Environmental Site Assessment. Although it is unlikely that contamination found in shallow soil samples on the site has impacted groundwater, the vertical extent of chlorinated organic solvents on the site has not been defined. Excavation on the site is anticipated to depths of approximately 15 feet to construct the proposed parking garages. The project is likely to encounter groundwater during construction and may require dewatering over the life of the project. To avoid the spread of potential harmful levels of contamination, the discharge of any water from dewatering activities would be required to comply with NPDES permit requirements or wastewater discharge permit conditions to the sanitary sewer, which may involve installation of a treatment system(s) at the dewatering locations. The implementation of General Plan Policy HS-7.3 would ensure potential groundwater contamination is addressed consistent with the findings of the DNSP EIR.

With adherence to Policy HS-7.2 and 7.3 of the City's General Plan, the project would be consistent with the findings of the DNSP EIR. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HAZ-3: The project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. **[Same Impact as Approved Project (Less than Significant Impact)]**

The nearest school to the project site is Alta Heights Elementary, located at 15 Montecito Boulevard, approximately 0.8 mile east of the project site. There are no existing or proposed schools within one-quarter mile of the project site. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HAZ-4: The project would not be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, create a significant hazard to the public or the environment. **[Same Impact as Approved Project (Less than Significant Impact)]**

The building at 731 First Street on-site is identified in the Resource Conservation & Recovery Act (Small Quantity Generators), Facility Index System (FINDS), Napa County Division of Environmental Health, Department of Toxic Substances Control Hazardous Waste Tracking System (DTSC HWTS), and EDR Historical Cleaners databases. As described in Impact HAZ-2, as a condition of project approval, the project would adhere to Policies HS-7.2 and 7.3 of the City's General Plan, which would reduce potential on-site sources of contamination to a less than significant level to future construction workers and site users. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HAZ-5: The project would not be located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The project would not result in a safety hazard or excessive noise for people residing or working in the project area. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is located outside of the Airport Land Use Plan of the nearest airport, Napa County Airport. The project would, therefore, not result in a safety hazard for people working or residing in the area.

As described in *Section 4.13 Noise and Vibration*, the project would not result in excessive noise for people working or residing in the area. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HAZ-6: The project would not expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is not located within an identified wildfire hazard zone.⁵ The project would not result in new or greater wildland fire impacts than those disclosed in the DNSP EIR.

⁵ City of Napa. *Downtown Napa Specific Plan Program Environmental Impact Report*. January 2012.

General Plan Policies that Reduce Impacts

- Policy HS-7.1: The City shall continue to monitor, modify if necessary, and implement goals of the *Household Hazardous Wastes Element*.
- Policy HS-7.2: The City shall support the Countywide *Integrated Solid Waste Management Plan*.
- Policy HS-7.3: The City shall support the county's role as the Certified Unified Program Agency for all County jurisdictions.
- Policy HS-7.4: The City shall seek to further develop and support policies such as green chemistry and Extended Producer Responsibility that will reduce the overall generation of hazardous wastes and/or provide more sustainable funding and collection opportunities for the local residents and businesses.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

The policies listed in the General Plan were used to ensure potential hazards or hazardous materials impacts from the DNSP would be less than significant. No new policies or mitigation measures were included in the DNSP and DNSP EIR to address hazards or hazardous materials.

4.10 HYDROLOGY AND WATER QUALITY

The following discussion is based, in part, on a Floodplain Analysis prepared by *River Focus* in January 2018. A copy of the report is attached as Appendix G to this Initial Study/Addendum.

4.10.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Violate any water quality standards or waste discharge requirements? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner, which would result in substantial | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on-or off-site? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 6) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 7) Place within a 100-year flood hazard area structures that would impede or redirect flood flows? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |

| 9) Result in inundation by seiche, tsunami, or mudflow? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Hydrology and Water Quality Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant hydrology and water quality impacts. Hydrology and water quality impacts were found to be adequately addressed with the implementation of City ordinances and General Plan policies. No mitigation measures, therefore, were incorporated into the DNSP EIR.

Impact HYD-1: The project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR found that future development under the Specific Plan could potentially violate water quality standards, waste discharge requirements, or otherwise degrade water quality by increasing nonpoint source pollutants in stormwater runoff. Consistent with the DNSP EIR, the project would adhere to the City of Napa Storm Water Management Plan, City of Napa Stormwater Runoff Pollution Control Ordinance Code, and the City of Napa General Plan policies to reduce potential hydrology and water quality impacts from project implementation to a less than significant level.

A portion of the project site is developed with a commercial building, three residences, and associated driveways. The remainder of the project site is undeveloped. As a condition of approval, the proposed project would comply with the City’s Storm Water Management Plan, Stormwater Runoff Pollution Control Ordinance, and the DNSP Design Guidelines. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HYD-2: The project would not substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that implementation of the Specific Plan would not impact the underlying groundwater aquifer in the Planning Area since the aquifer is not used by the City for water supply purposes, no groundwater extraction would result beyond minor temporary dewatering activities that may be required for construction facilitated by the DNSP, the Planning Area is largely developed and covered in impervious surfaces, and the DNSP included stormwater management guidelines to encourage design features that would increase pervious surfaces and groundwater recharge. Depending on the final foundation design, dewatering may be required to address seasonal fluctuations in groundwater levels over the life of the project. Given the occasional nature of any required dewatering, operation of the project would not substantially deplete groundwater. The DNSP EIR concluded that implementation of the Specific Plan, therefore, would not substantially deplete groundwater supplies.

The proposed project would not substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HYD-3: The project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site; substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or impede or redirect flood flows. **[Same Impact as Approved Project (Less than Significant Impact)]**

Flooding

The western portion of the project site is located within FEMA Special Flood Hazard Zone X which is outside the 100-year floodplain. The eastern portion of the site is located in Zone AE of the 100-year floodplain. Base flood elevations (BFEs) on the project site range from 18.3 feet (NAVD⁶) on the westernmost portion of the site to approximately 19 feet on the eastside of the site. . As such, a FEMA Letter of Map Revision (LOMR) was prepared to reflect the flood reduction provided by the Napa River Dry Bypass and other flood protection project features that are currently being processed by FEMA. The LOMR removed an area from the one-percent annual chance floodplain to reflect the placement of fill.

⁶ The North American Vertical Datum (NAVD) is the data set used to determine surface elevation.

Consistent with General Plan Policies HS 3.2-3.4, a flooding analysis was prepared by *River Focus* in January 2018 to analyze the impact of the proposed project on computed flood elevations and flood flow under the current LOMR revisions. Two conditions were modeled in the analysis, which included the existing conditions with structures near the project site and the proposed conditions with the proposed project. Results of the hydraulic analysis indicate there would be minimal impact (less than 0.1-foot increase) on offsite flood elevations with implementation of the proposed project.

Modeling of the proposed project indicates that the proposed building west of the Napa Wine Train tracks would have no impact on the floodplain while the proposed building east of the tracks would have a minimal impact on flow conveyance and storage reduction compared to existing conditions. As a result of project implementation, there would be an onsite increase of 0.04 feet in base flood elevation (BFE) in the immediate vicinity of the proposed structure and an increase of 0.01 feet in offsite flood elevations upstream of the site. There would be no increase in offsite flood elevation downstream of the proposed project. Consistent with the findings of the DNSP EIR, implementation of the City's Floodplain Management Ordinance and General Plan Policies HS-3.1 through HS-3.8 would ensure the flooding impacts of the project would be less than significant. Consistent with General Plan policies, the project would be required to implement the following Condition of Approval. **[Same Impact as Approved Project (Less Than Significant Impact)]**

Condition of Approval:

- The project shall be designed to ensure the project would not cause significant off-site flooding impacts as defined by Chapter 17.38 of the Napa Municipal Code.

Erosion

Project construction would disturb soils on-site, which could potentially lead to a loss of topsoil. Consistent with the findings of the DNSP EIR, the project would be required to adhere to the City's Storm Water Management Plan and Stormwater Runoff Pollution Control Ordinance. Erosion resulting from project construction activities, therefore, would be reduced to a less than significant impact.

The project would not result in new or greater flooding and erosion impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HYD-4: The project would not risk release of pollutants due to project inundation in flood hazard, tsunami, or seiche zones. **[Same Impact as Approved Project (Less than Significant Impact)]**

As described in Impact HYD-3, with the approval of the LOMR, the east side of the project site will be removed from the FEMA 100-year floodway and will have a base flood elevation of 18.6 feet (NAVD88). As a result of project implementation, there would be an onsite increase of 0.04 feet in BFE in the immediate vicinity of the proposed structure and an increase of 0.01 feet in offsite flood elevations upstream of the site. There would be no increase in offsite flood elevation downstream of the proposed project. The project would not use or store substantial quantities of hazardous materials that would have the potential to be released due to flooding on the site.

The project would not risk release of pollutants due to project inundation in flood hazard, tsunami, or seiche zones and would not result in new or greater impacts than identified in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact HYD-5: The project would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. **[Same Impact as Approved Project (Less than Significant Impact)]**

As described in Impact HYD-1, the project would comply with the City of Napa Storm Water Management Plan, City of Napa Stormwater Runoff Pollution Control Ordinance Code, City of Napa Floodplain Management Ordinance, and the City of Napa General Plan policies. The DNSP EIR also concluded the underlying groundwater aquifer in the Planning Area is not used for water supply purposes and the DNSP facilitated development would not deplete groundwater supplies. Compliance with these regulations would ensure that the project would not conflict with water quality control plan or sustainable groundwater management plan. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

- Policy HS-3.1 The City shall continue to provide for floodplain management to protect its residents and property from the hazards of development in the floodplain of the Napa River and its tributaries.

- Policy HS-3.2 The City shall continue to apply flood plain management regulations for development in the floodplain and floodway.

- Policy HS-3.3 The City shall continue to participate in the Federal Emergency Management Agency’s National Flood Insurance Program.

- Policy HS-3.4 The City shall continue to utilize the Federal Emergency Management Agency’s Flood Insurance Rate Map to define the flood hazard areas, the floodway and the floodplain.

- Policy HS-3.5 The City shall balance the housing needs of its residents against the risk from potential flood-related hazards.

- Policy HS-3.6 The City shall support programs and methods to reduce the flooding of the Napa River and its tributaries.

- Policy HS-3.7 The City shall continue to assist the Army Corps of Engineers, Napa County, other responsible agencies, and the public to maintain funding for the development of the Napa River Flood Management Project.

- Policy HS-3.8 The City shall continue to cooperate with Napa County to maintain a reliable funding source for the local share of flood control costs.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.11 LAND USE AND PLANNING

4.11.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Physically divide an established community? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Conflict with any applicable habitat conservation plan or natural community conservation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Land Use and Planning Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant land use and planning impacts. No mitigation was incorporated into the DNSP EIR.

Impact LU-1: The project would not physically divide an established community. [**Same Impact as Approved Project (Less than Significant Impact)**]

The proposed hotel is consistent with the General Plan land use designation (*Oxbow Commercial*) and zoning (*Oxbow Commercial*) for the site. The DNSP EIR concluded that the Specific Plan would not result in significant land use and planning impacts and would not create new physical barriers in the planning area.

Implementation of the project would require acquisition of land currently owned by the Napa County Flood Control District and Water Conservation District and the City of Napa. The project would incorporate approximately 6,518 square feet of Napa County Flood Control District and Water Conservation District-owned parcels (APN 003-241-005 and 003-235-007) located on the east and west side of the Napa Valley Wine Train railroad tracks, as shown in Figure 3.2-8. The Flood Control District would grant an easement to the project for the property. In addition, the project would acquire a 10,018 square-foot portion Water Street from the City of Napa. The City would abandon the portion of Water Street to the project. The Napa County Flood Control District and Water Conservation District would retain ownership of the existing parking lot (APN 003-242-001) located to the south of Water Street. The project would continue to allow access to properties along Water Street and would not physically divide the community.

As the project is consistent with the land use assumptions of the Specific Plan and the DNSP EIR determined that the proposed Specific Plan would not result in significant land use and planning impacts, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact LU-2: The project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. **[Same Impact as Approved Project (Less than Significant Impact)]**

As stated in Impact LU-1, the project is consistent with the General Plan land use designation and zoning for the site. The proposed hotel and commercial/retail use would be consistent with the vision of the Specific Plan and would be consistent with the General Plan Policies LU-1.3, -6.1, -6.2, -6.4, -6.5, -6.8, and -6.10. In addition, the project is requesting approval of a Use Permit to allow for the hotel development. As such, the proposed project would not conflict with the land use plans, policies, or regulations adopted for the purpose of avoiding or mitigation an environmental effect. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact LU-3: The project would not conflict with any applicable habitat conservation plan or natural community conservation plan. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is not located within an adopted habitat conservation plan or natural community conservation plan. The project would not result in greater impacts than those identified in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

Policy LU-6.1: The City shall require retail and commercial uses to orient to the sidewalk or public spaces and to maintain an active street frontage in the pedestrian oriented parts of downtown.

Policy LU-6.2: The City shall work with local preservation groups and downtown property owners to improve building facades and exteriors consistent with the historic and visual character of downtown.

Policy LU-6.4: The City shall promote riverfront development that reorients downtown to the Napa River and shall encourage creative designs during the development review process.

Policy LU-6.5: The City shall provide for development of hotel and conference facilities in the downtown area. The City shall encourage any hotel developer to tie the

facility to downtown and riverfront restoration through physical improvements and joint promotional involvement.

Policy LU-6.8: The City shall identify key entry points and blighted conditions on the edges of downtown and support programs and projects that enhance downtown gateways and transitional zones between downtown and surrounding neighborhoods. The City shall seek to remove blighting conditions at key entry points to make downtown more inviting for residents and visitors.

Policy LU-6.10: The City shall continue to support development of public amenities along the Napa Riverfront such as parks, plazas, trails, docks and landscaping.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.12 MINERAL RESOURCES

4.12.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Result in the loss of availability of a known mineral resource that will be of value to the region and the residents of the state? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Mineral Resources Conclusion

The DNSP EIR found that mineral resources are not present in the Planning Area. Implementation of the Specific Plan, therefore, would have no impact on mineral resources.

Impact MIN-1: The project would not result in the loss of availability of a known mineral resource that would be of value to the region and residents of the state. **[Same Impact as Approved Project (No Impact)]**

There are no known mineral resources located within the Specific Plan area. The proposed project, therefore, would not impact mineral resources. **[Same Impact as Approved Project (No Impact)]**

Impact MIN-2: The project would not result in the loss of availability of locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan. **[Same Impact as Approved Project (No Impact)]**

There are no known mineral resources located within the Specific Plan area. The proposed project, therefore, would not impact mineral resources. **[Same Impact as Approved Project (No Impact)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that are applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.13 NOISE & VIBRATION

The following discussion is based, in part, on an Environmental Noise and Vibration Assessment prepared by *Illingworth & Rodkin, Inc.* in March 2019. A copy of the report is attached as Appendix H to this Initial Study/Addendum.

4.13.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project result in: | | | | | |
| 1) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Generation of excessive groundborne vibration or groundborne noise levels? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Noise and Vibration Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant noise and vibration impacts with the incorporation of mitigation measures. Such mitigation measures include utilizing best available control techniques, limiting hours of construction to the least disturbing times of the day, and preparing detailed noise and vibration studies for specific projects, as necessary.

Impact NOI-1: The project would not result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. **[Same Impact as Approved Projects (Less than Significant Impact)]**

Existing Noise Environment

A noise monitoring survey was completed in the vicinity of the project site beginning Wednesday, February 27, 2019 and concluding on Friday, March 1, 2019. The monitoring survey included two long-term noise measurements and two short-term measurements, as shown in Figure 4.13-1. The summary of the short-term noise levels collected during the monitoring survey are displayed in Table 4.13-1.

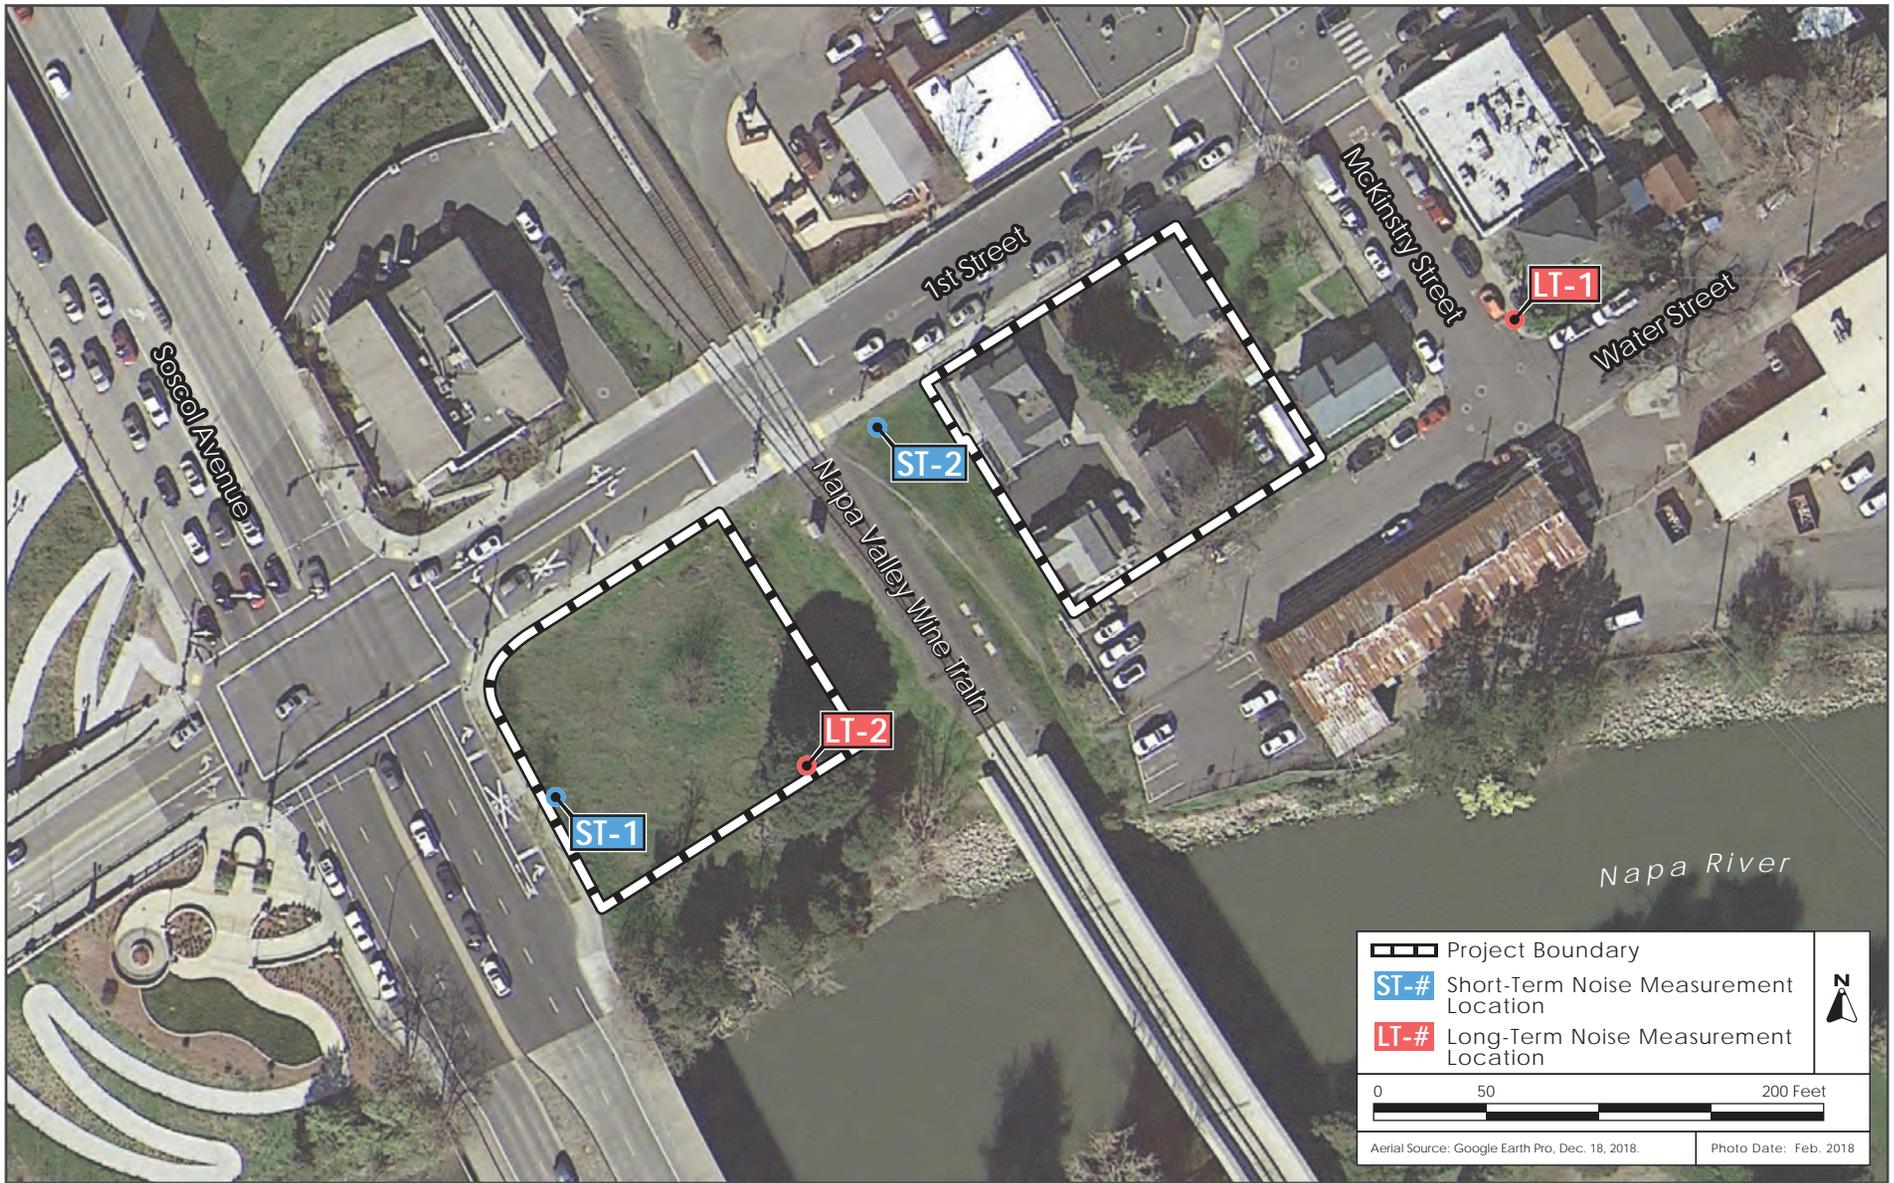

| Table 4.13-1: Summary of Short-Term Noise Measurement Data | | | | | | |
|---|--|-----------------------------------|------------|------------|------------|---|
| Short Term Location | Location (Start Time) | Measured Noise Levels, dBA | | | | Primary Noise Source |
| | | L10 | L50 | L90 | Leq | |
| 1 | West property line of 711 First Street site, 65 feet from Soscol Avenue (12:00 pm to 12:10 pm) | 72 | 67 | 63 | 69 | Traffic on Soscol Avenue |
| 2 | 40 feet from First street and train tracks (12:20 pm to 12:30 pm) | 62 | 58 | 54 | 59 | Traffic on First Street and Soscol Avenue |

The two long-term noise measurements were taken at approximately 150 feet from the centerline of First Street, at the intersection of Water Street and McKinstry Street to the east of the project site, and at 711 First Street, approximately 140 feet from First Street and 175 feet from Soscol Avenue. The primary noise at the long-term noise measurement locations was a result of vehicular traffic on First Street, and traffic along First Street and Soscol Avenue, respectively. The day-night average noise level at the first measurement location was 59 dBA CNEL and 65 dBA CNEL at the second location.

Vibration measurements of train passbys were taken on March 1, 2019 at setbacks of 25 feet and 50 feet from the center of the track. The measurements were taken approximately 0.3 mile north of the project site, 750 feet north of the Napa Train Station, and west of the train track.

Construction Noise

The Napa Municipal Code limits construction hours to between the hours of 7:00 AM to 7:00 PM, Monday through Friday, with no startup of machines nor equipment prior to 8:00 AM, no delivery of materials nor equipment prior to 7:30 AM nor past 5:00 PM, no cleaning of machines nor equipment past 6:00 PM, and no servicing of equipment past 6:45 PM. Construction on weekends or legal holidays is limited to the hours of 8:00 AM to 4:00 PM. In addition, all muffler systems on

NOISE MEASUREMENT LOCATIONS

FIGURE 4.13-1

construction equipment are required to be properly maintained, all construction equipment is prohibited from being placed adjacent to developed areas unless said equipment is provided with acoustical shielding, and all construction and grading equipment is required to be shut down when not actively in use.

Neither the City of Napa nor the State of California specify quantitative thresholds for the impact of temporary increases in noise due to construction. The threshold for speech interference indoors is 45 dBA. Assuming a 15-dB exterior-to-interior reduction for standard residential construction with windows open and a 25-dB exterior-to-interior reduction for standard commercial construction, assuming windows closed, this would correlate to an exterior threshold of 60 dBA L_{eq} at residential land uses and 70 dBA L_{eq} at commercial land uses. Therefore, the project would be considered to generate a significant temporary construction noise impact if project construction activities exceed 60 dBA L_{eq} at nearby residences or exceed 70 dBA L_{eq} at nearby commercial land uses and exceed the ambient noise environment by five dBA L_{eq} or more for a period longer than one year.

Noise impacts resulting from construction depend upon the noise generated by various pieces of construction equipment, the timing and duration of noise-generating activities, and the distance between construction noise sources and noise-sensitive areas. Construction noise impacts primarily result when construction activities occur during noise-sensitive times of the day (e.g., early morning, evening, or nighttime hours), the construction occurs in areas immediately adjoining noise-sensitive land uses, or when construction lasts over extended periods of time.

Construction activities would be carried out in stages. During each stage of construction, there would be a different mix of equipment operating, and noise levels would vary by stage and vary within stages, based on the amount of equipment in operation and the location at which the equipment is operating. Construction activities generate considerable amounts of noise, especially during demolition and earth-moving activities when heavy equipment is used. At this time, pile driving is not proposed for project construction; however, as a worst-case scenario, it is assumed that pile driving would occur during construction of building foundation.

The construction of the proposed project would involve demolition, site preparation, grading and excavation, trenching, building erection, and paving. The hauling of excavated materials and construction materials would generate truck trips on local roadways as well. The anticipated construction noise levels are displayed in **Table 4.13-2**.

| Table 4.13-2: Noise Levels by Construction Phase | | | | | | |
|---|--|---------------|----------------|---|---------------|----------------|
| Construction Phase | Maximum Noise Level (L_{max}, dBA) | | | Hourly Average Noise Level ($L_{eq[h]}$, dBA) | | |
| | 50 ft. | 80 ft. | 150 ft. | 50 ft. | 80 ft. | 150 ft. |
| Demolition | 90 | 86 | 80 | 88 | 84 | 78 |
| Site Preparation | 94 | 80 | 74 | 84 | 80 | 74 |
| Pile driving | 105 | 101 | 95 | 105 | 101 | 95 |
| Grading Excavation | 85 | 81 | 75 | 89 | 83 | 77 |
| Trenching | 94 | 80 | 74 | 82 | 78 | 72 |
| Building Exterior | 94 | 80 | 74 | 85 | 81 | 75 |
| Building Interior | 78 | 74 | 68 | 75 | 71 | 65 |
| Paving | 90 | 86 | 80 | 84 | 80 | 74 |

Noise levels would exceed 60 dBA L_{eq} and ambient levels by more than five dBA at adjacent residences. In addition, pile driving activities may occur over a period of several weeks in which hourly average noise levels would be substantially higher than the average noise levels during other phases of construction. Duration of construction is estimated to exceed 12 months.

Implementation of the mitigation measures included in the General Plan and Specific Plan would reduce this impact to a less than significant level. Those mitigation measures include HS-9.1, -9.6, -9.9 to -9.12 and -9.14 of the General Plan and mitigation measures 4.I-1a, 4.I-1b, 4.I-1c, 4.I-3 of the Specific Plan. Implementation of these mitigation measures would reduce potential impacts to a less than significant level. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Operational Noise

Noise generating on-site operational components of the project would include mechanical equipment and parking lot activities. The Napa General Plan establishes 60 dBA CNEL as the “normally acceptable” noise exposure level for single family residential land uses, which are located to the east of the site, and 65 dBA CNEL as the “normally acceptable” noise exposure level for multi-family residential land uses, which are located to the west and south of the site.

Parking Lot Noise

Parking would be provided in a garage located on each of the below-grade parking levels of the proposed buildings. Surface parking spaces are not proposed. Access to the site and parking would be provided from First Street, to the north of the proposed buildings. Parking activities occurring in a closed garage would not be anticipated to be audible outside the West Building, and from Water Street for the East Building parking structure. Parking lot activities would not exceed the City’s noise limits and would not measurably contribute to the existing ambient noise environment.

Mechanical Equipment Noise

As currently proposed, all mechanical equipment would be contained inside an equipment room located at the southwest corner on the parking level of both buildings. Indoor mechanical equipment is not anticipated to be audible at adjacent off-site uses. Rooftop equipment is not proposed.

Traffic Related Noise

A significant noise impact would occur if traffic or activities generated by the project would substantially increase noise levels at sensitive receptors in the project vicinity. A substantial increase would occur if: a) the noise level increase is five dBA CNEL or greater, with a future noise level of less than 60 dBA CNEL, or b) the noise level increase is three dBA CNEL or greater, with a future noise level of 60 dBA CNEL or greater. Based on a comparison between traffic volumes under the existing plus project scenario and existing conditions, the traffic noise increase attributable to the project would be less than one dBA.

The project would result in a less than significant operational noise impact. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact NOI-2: The project would not result in generation of, excessive groundborne vibration or groundborne noise levels. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Construction Vibration

The City of Napa's General Plan does not specify a vibration limit for construction. For structural damage, the California Department of Transportation recommends a vibration limit of 0.5 in/sec PPV for buildings structurally sound and designed to modern engineering standards, 0.3 in/sec PPV for buildings that are found to be structurally sound but where structural damage is a major concern, and a conservative limit of 0.25 in/sec PPV for historic and some old buildings. The 0.3 in/sec PPV vibration limit would be applicable to properties in the vicinity of the project site.

The construction of the project may generate perceptible vibration when heavy equipment or impact tools (e.g. pile drivers, jackhammers, hoe rams) are used. Construction activities would include site demolition, site preparation, grading and excavation, trenching, building erection, and paving. Pile driving could be used as a method of construction. Table 4.13-3 below presents the typical vibration levels that could be expected from construction equipment at a distance of 25 feet, as given by the Federal Transit Authority, and at a distance of 20, 70, and 120 feet, representative of the nearest structures.

| Table 4.13-3: Vibration Source Levels for Construction Equipment | | | | | |
|---|-------------|-------------------------------|-------------------------------|-------------------------------|--------------------------------|
| Equipment | | PPV at 20 ft. (in/sec) | PPV at 25 ft. (in/sec) | PPV at 70 ft. (in/sec) | PPV at 120 ft. (in/sec) |
| Pile Driver (Impact) | upper range | 1.480 | 1.158 | 0.373 | 0.206 |
| | typical | 0.823 | 0.644 | 0.207 | 0.115 |
| Pile Driver (Sonic) | upper range | 0.938 | 0.734 | 0.236 | 0.131 |
| | typical | 0.217 | 0.170 | 0.055 | 0.030 |
| Clam shovel drop | | 0.258 | 0.094 | 0.065 | 0.036 |
| Hydromill (slurry wall) | in soil | 0.010 | 0.008 | 0.003 | 0.001 |
| | in rock | 0.022 | 0.017 | 0.005 | 0.003 |
| Vibratory Roller | | 0.268 | 0.098 | 0.068 | 0.037 |
| Hoe Ram | | 0.114 | 0.042 | 0.029 | 0.016 |
| Large bulldozer | | 0.114 | 0.042 | 0.029 | 0.016 |
| Caisson drilling | | 0.114 | 0.042 | 0.029 | 0.016 |
| Loaded trucks | | 0.097 | 0.035 | 0.024 | 0.014 |
| Jackhammer | | 0.045 | 0.016 | 0.011 | 0.006 |
| Small bulldozer | | 0.004 | 0.001 | 0.001 | 0.001 |

Construction activity could occur as close as 20 feet and 120 feet from the residences east of the site, 70 feet from commercial buildings to the north of both sites and 120 feet from the restaurant to east of the site. As indicated in Table 4.13-3, at a distance of 20 feet, ‘upper range’ impact pile driving would be anticipated to generate vibration levels as high as 1.48 in/sec PPV, with ‘typical’ levels anticipated approximately 0.823 in/sec PPV. Based on the California Department of Transportation’s recommended vibration limit of 0.5 in/sec PPV to avoid potential structural damage, the project would exceed this threshold at 20, 25, and 70 feet for an impact pile driver, and would exceed this threshold at 20 and 25 feet for sonic pile drivers.

‘Upper range’ impact pile driving would have the potential to produce vibration levels of 0.3 in/sec PPV or more at buildings within 90 feet, with ‘typical’ impact pile driving generating levels producing vibration levels of 0.3 in/sec PPV or more at buildings within 50 feet. Project construction vibration levels of 0.823 in/sec PPV would result in a 12 percent probability of no observable minor or major structural damage. Based on the proposed construction, cosmetic or threshold damage (e.g. hairline cracking in plaster, opening of old cracks, loosening of paint or the dislodging of loose objects etc.) would be anticipated at the nearest structure. Major structural damage is not anticipated since the anticipated vibratory levels would not exceed the 1.48 in/sec PPV threshold. The project would implement the following Condition of Approval to ensure implementation of Mitigation Measure 4.I-3 of the DNSP EIR:

Condition of Approval:

The following measures are required to reduce vibration impacts from construction activities:

- Avoid impact pile driving where possible. Drilled piers or rammed aggregate piers cause lower vibration levels where geological conditions permit their use.
- Phase demolition, earth-moving, and ground impacting operations so as not to occur during the same time period.
- A list of all heavy construction equipment to be used for this project and anticipated time duration of using the equipment that is known to produce high vibration levels (clam shovel drops, vibratory rollers, tracked vehicles, vibratory compaction, jackhammers, hoe rams, etc.) shall be submitted to the City by the contractor. This list shall be used to identify equipment and activities that would potentially generate substantial vibration and to define the level of effort for reducing vibration levels below the thresholds.
- If pile driving is required, notify neighbors within 500 feet of the construction site of the construction schedule and that there could be noticeable vibration levels resulting from pile driving.
- If pile driving is required, foundation pile holes shall be pre-drilled to minimize the number of impacts required to seat the pile.
- If pile driving is required, jet or partially jet piles into place to minimize the number of impacts required to seat the pile.
- A construction vibration monitoring plan shall be implemented to document conditions at all structures located within 50 feet of construction. If pile driving is used the construction vibration monitoring plan shall document all structures within 125 feet prior to, during, and after pile driving. The plan shall be finalized upon receipt of the final foundation design. All plan tasks shall be undertaken under the direction of a licensed Professional Structural Engineer in the State of California and be in accordance with industry-accepted standard methods. The construction vibration monitoring plan should be implemented to include the following tasks:
 - Identification of sensitivity to ground-borne vibration of nearby structures. Vibration limits should be applied to all vibration-sensitive structures located within 50 feet of any pile driving activities.
 - Performance of a photo survey, elevation survey, and crack monitoring survey for each of structure of normal construction within 90 feet of pile driving activities and/or within 25 feet of other construction activities identified as sources of high vibration levels. Surveys shall be performed prior to any pile driving activity, in regular interval during pile driving, and after completion and shall include internal and external crack monitoring in structures, settlement, and distress and shall document the condition of foundations, walls and other structural elements in the interior and exterior of said structures.
- Conduct post-survey on structures where complaints of damage have been made. Make appropriate repairs or compensation where damage has occurred as a result of construction activities.
- Designate a person responsible for registering and investigating claims of excessive vibration. The contact information of such person shall be clearly posted on the construction site.

Implementation of the above Condition of Approval would reduce construction vibration to a less than significant level, consistent with the findings of the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Operational Vibration

Operation of the proposed hotel would not generate vibration. The project is, therefore, consistent with the findings of the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact NOI-3: The project would not be located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The project would not expose people residing or working in the project area to excessive noise levels. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project site is located 0.7 miles north of Napa County Airport. Aircraft noise exposure would be considered significant if the project site were exposed to aircraft noise levels exceeding 65 dBA CNEL. Based on review of the 2002 CNEL Contours for Airport Master Plan⁷, the project site is located outside of the 55 dBA CNEL noise contour. As described in Impact NOI-1, the primary noise source at the site is traffic on First Street and Soscol Avenue, which generates noise levels as high as 65 dBA CNEL at the site. Aircraft noise is generally not audible above traffic noise at the site. The project is, therefore, consistent with the findings of the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

4.13.2 Non-CEQA Effects

Future Exterior Noise Environment

The primary noise sources at the site would continue to be vehicular traffic on First Street and Soscol Avenue, with elevated noise levels occurring during train operations. Based on future traffic volumes, the future traffic noise level would increase by one to two dB above existing conditions along First Street and are not anticipated to increase under future conditions along Soscol Avenue.⁸ It is assumed that future train operations would continue to be occasional and during daytime hours only.

Proposed noise sensitive exterior uses areas would include a pool located on the ground level in the southern portion of west-building and a central courtyard on the first level in both buildings. The future pool area would be exposed to noise levels of up to 60 dBA CNEL, the courtyard of the West Building would be exposed to up to 60 dBA CNEL, and the courtyard in the east building would be exposed to 48 dBA CNEL. Noise levels at the exterior use areas of the proposed hotel buildings would not exceed the City's acceptable exterior noise level criteria of 65 dBA CNEL for transient

⁷ Napa County General Plan Update, Chapter 4.7-Noise, Fig 4.7-1: 2002 Noise Contours Napa County Airport; Source: Jones and Stokes; 2005.

⁸ Traffic volumes taken from *Traffic Impact Study for First and Oxbow Hotel* (April 23, 2019), prepared by W-Trans.

lodging, hotels, and motels or the 70 dBA CNEL criteria for commercial uses. **[Same Impact as Approved Project (Less than Significant Impact)]**

Future Interior Noise Environment

Interior noise levels within hotel rooms are required to be maintained at or below 45 dBA CNEL by City and State Standards. The CalGreen Code limits noise level inside occupied non-residential interior spaces to 50 dBA L_{eq} (1-hr) during any hour of operation. Due to the low and daytime only occurrence of train movements near the site, sleep and speech disturbance is not anticipated.

Interior noise levels in hotel rooms of the West Building with standard construction and windows partially open for ventilation would range from 45 to 58 dBA CNEL, with the highest levels inside units facing Soscol Avenue. Interior noise levels in hotel rooms of the East Building are calculated to range from 43 to 49 dBA CNEL with standard construction and windows partially open for ventilation.

Noise levels inside south and west facing hotel units of the East Building would achieve the 45 dBA CNEL interior threshold with standard construction and windows in the open or closed position. Standard construction with the inclusion of forced-air mechanical ventilation to allow occupants the option of keeping windows closed to control noise would be sufficient for east facing rooms of the West Building and north and east facing rooms of the East Building. Interior noise levels inside rooms with west, north, and south facing façades of the West Building would achieve 45 dBA CNEL with forced air mechanical ventilation and windows and doors with STC ratings of 26 to 30.

Loudest hour noise levels would be anticipated to be one to three dBA $L_{eq(1-hr)}$ ⁹ higher than CNEL levels during periods with train movements, resulting in loudest hour interior noise levels of 44 to 59 dBA $L_{eq(1-hr)}$ with windows open and 34 to 49 dBA $L_{eq(1-hr)}$ with windows closed. The commercial and retail spaces on the second floor would comply with the CalGreen Code standard of 50 dBA $L_{eq(1-hr)}$, assuming standard construction and the inclusion of forced-air mechanical ventilation to allow occupants the option of keeping windows closed to control noise.

Consistent with the DNSP EIR and General Plan policies, the project would be required to adhere to the following Condition of Approval:

Condition of Approval:

- Provide a suitable form of forced-air mechanical ventilation, as determined by the local building official, for all buildings so that windows can be kept closed to control noise.
- Provide sound rated windows to north, south, and west facing hotel room façades of 711 First Street to maintain interior noise levels at acceptable levels. Preliminary calculations show that sound-rated windows with minimum STC Ratings of 26 to 30 or higher would be satisfactory to achieve acceptable interior noise levels, assuming a window to wall ratio of 40 percent or less. The specific determination of what noise insulation treatments are necessary shall be conducted on a room-by-room basis during final design of the project once final building plans are available.

⁹ $L_{eq(1-hr)}$ represents the change in sound levels recorded over a one-hour period.

Adherence to the Condition of Approval would ensure that ambient noise levels in the vicinity of the project would not exceed applicable standards. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Groundborne Vibration

The Napa Valley Wine Train railroad tracks bisect the site. Approximately four to six passenger trains per day travel the route, with only occasional daytime trains traveling south of the Napa Train Station to the portion of the track near the site. The tracks are not used by other commuter or freight trains.

Vibration measurements of a train passby event were conducted on March 1, 2019, at setbacks of 25 feet and 50 feet from the center of the track. The vibration measurements were located approximately 0.3 miles north of the project site, 750 feet north of Napa Train Station, and west of the train track. The occasional, day-time Napa Wine train passbys through the project site would result in vibration impact of up to 74 VdB on the west-building. Based on the calculated drop-off rate between the vibration monitoring positions, train vibration levels would be 80 VdB or higher within a distance of 16 feet from the center of the train track. Project structures would be located 30 feet to the west and 60 feet to the east of the tracks and would not be exposed to vibration levels exceeding the vibration threshold for infrequent events. This would represent a less than significant impact.

General Plan Policies that Reduce Impacts

- Policy HS-9.1: The City shall require new development to meet the exterior noise level standards set out in Table 8-1. For residential areas, these exterior noise guidelines apply to backyards; exceptions may be allowed for front yards where overriding design concerns are identified.

- Policy HS-9.2: The City shall use CEQA and the development review processes to ensure that new development does not exceed City standards.

- Policy HS-9.6: The City shall use the development and building permit review processes to site new construction in ways that reduce noise levels.

- Policy HS-9.9: When feasible and appropriate, the City shall limit construction activities to that portion of the day when the number of persons occupying a potential noise impact area is lowest.

- Policy HS-9.10: The City shall encourage new development to maintain the ambient sound environment as much as possible.

- Policy HS-9.11: The City shall regulate construction in a manner that allows for efficient construction mobilization and activities, while also protecting noise sensitive land uses.

- Policy HS-9.12: The City shall evaluate and modify as necessary the City's designated truck routes to minimize noise impacts for sensitive land uses.
- Policy HS-9.14: The City shall encourage new development to identify alternatives to the use of sound walls to attenuate noise impacts. Appropriate techniques include site planning such as incorporating setbacks, revisions to the architectural layout such as changing building orientation to provide noise attenuation for portions of outdoor yards, and construction modifications. In the event that sound walls are the only practicable alternative, such walls should be designed to be as visually pleasing as possible, incorporating landscaping, variations in color and patterns, and/or changes in texture or building materials.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Mitigation Measures

- Mitigation Measure 4.I-1a: Construction contractors for subsequent development projects within the Planning Area shall utilize the best available noise control techniques (e.g., improved mufflers, equipment redesign, use of intake silencers, ducts, engine enclosures, and acoustically-attenuating shields or shrouds, etc.) when within 400 feet of sensitive receptor locations. Additional techniques shall include, but not be limited to the following noise control elements:
- Non-residential construction project activities (Monday through Friday) shall be limited to the hours of 7:00 AM to 7:00 PM with no start up of machines or equipment prior to 8:00 AM. No delivery of materials nor equipment shall occur prior to 7:30 AM or after 5:00 PM. No cleaning of machines or equipment shall occur after 6:00 PM. No servicing of equipment shall occur past 6:45 PM. Construction of weekends and holidays shall be limited to the hours of 8:00 AM to 4:00 PM, unless a permit allows otherwise.
 - Impact tools (e.g., jack hammers, pavement breakers, and rock drills) used for construction shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed air exhaust from pneumatically powered tools. However, where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used; this muffler shall achieve lower noise levels from the exhaust by approximately 10 dBA. External jackets on the tools themselves shall be used where feasible in order to achieve a reduction of 5 dBA. Quieter procedures shall be used, such as drills rather than impact equipment, whenever feasible;

- All construction equipment shall not be placed adjacent to developed areas unless said equipment is provided with acoustical shielding.
- Signs shall be posted at all construction site entrances to the property upon commencement of project construction, for the purposes of informing all contractors and subcontractors, their employees, agents, materialmen, and all other persons at the construction site, of the basic requirements of Mitigation Measures 4.1-a through 4.1-c.

Mitigation Measure 4.I-1b: Should pile-driving be necessary for a proposed project, the project sponsor would require that the construction contractor limit pile driving activity to the least disturbing hours of the day. To further mitigate pile driving and/or other extreme noise-generating construction impacts, a set of site-specific noise attenuation measures shall be completed under the supervision of a qualified acoustical consultant. No extreme noise-generating activities shall be allowed on weekends and holidays. Techniques included may include but not be limited to the following:

- Erect temporary plywood noise barriers around the construction site,
- Implement “quiet” pile-driving technology (such as pre-drilling of piles and the use of more than one pile driver to shorten the total pile driving duration), where feasible, in consideration of geotechnical and structural requirements and conditions;
- Use noise control blankets on building structures as buildings are erected to reduce noise emission from the site;
- Evaluate the feasibility of noise control at the receivers by temporarily improving the noise reduction capability of adjacent buildings; and
- Monitor the effectiveness of noise attenuation measures by taking noise measurements.

Mitigation Measure 4.I-1c: The City shall condition approval of projects in the Planning Area near receptors sensitive to construction noise, such as residences and schools, such that, in the event of a justified complaint regarding construction noise, the City would have the ability to require changes in the construction practices to address the noise complaints.

Mitigation Measure 4.I-3: Groundborne vibration exposure to proposed Specific Plan residences within 200 feet of the mainline track shall be analyzed in a detailed vibration study by a qualified acoustical engineer to determine if vibration isolation shall be required in building design, such as supporting the new building foundations on elastomer pads similar to bridge bearing pads. The results of each study shall be submitted to the City prior to project approval.

4.14 POPULATION AND HOUSING

4.14.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Induce substantial unanticipated population, housing, or employment growth in excess of local share of regional projections that has the potential to result in adverse physical environmental effects? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Displacement of existing residents or housing units? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Population and Housing Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant population and housing impacts since the Specific Plan would replace any lost housing units with additional housing units, resulting in an increase in residential units available in the Downtown area. No mitigation was incorporated into the DNSP EIR.

Impact POP-1: The project would not induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure).
[Same Impact as Approved Project (Less than Significant Impact)]

The proposed project would not involve the construction of new housing, nor would it generate any long-term employment opportunities that would cause substantial population growth. The construction workers needed for the project would be relatively few and these jobs would likely be filled by the local work force. No new long-term employment opportunities or substantial population growth would result from construction activities. The proposed hotel would have approximately 46 employees, and the proposed retail/commercial space would employ approximately 38 employees, which would not result in a substantial population growth.

The project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact POP-2: The project would not displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere.
[Same Impact as Approved Project (Less than Significant Impact)]

There are currently three single-family residences located on the project site (718 – 730 Water and 731 First Street). The project proposes to relocate the 718 Water Street and 731 First Street structures to 58 Randolph Street, approximately 10 blocks to the south and west of the site, within the Napa Abajo neighborhood. The remainder of the project site is currently undeveloped and does not contain any residences.

Implementation of the Specific Plan would increase the number of housing units in the Downtown area by 627 residential units, which would generate approximately 1,378 new residents within the area.¹⁰ As described in the DNSP EIR, the Specific Plan would establish additional housing within the Downtown area and would therefore, not displace housing or people such that construction of replacement housing would be required elsewhere. More residential units would be constructed than would be demolished with implementation of the Specific Plan.

Since the relocation site for the two single-family residences on-site has been identified as part of the Specific Plan, the relocation of these residents was accounted for in the DNSP EIR and is therefore, consistent with the conclusions of the DNSP EIR. The project would not result in new or greater population and housing impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that are applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

¹⁰ City of Napa. *Downtown Napa Specific Plan*. Draft PEIR. January 2012.

4.15 PUBLIC SERVICES

4.15.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|--|---|---|---|--|--|
| Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 1) Fire Protection? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Police Protection? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Schools? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Parks? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Other Public Facilities? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Public Services Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant public service impacts. No mitigation was required for public services in the DNSP EIR.

Impact PS-1: The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire protection services. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that implementation of the Specific Plan would result in an increase in demand for fire protection services. However, City review of individual development projects would reduce the potential for project-related service deficiencies, should any occur. The project site is located within one mile of Fire Station No. 1 which would allow the City to meet their response time policy for the site without the need for additional facilities. Since the proposed project is consistent with the land use assumptions of the Specific Plan, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact PS-2: The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for police protection services. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that implementation of the Specific Plan would result in an increase in demand for police protection services. However, City review of individual development projects would reduce the potential for project-related service deficiencies, should any occur. The project includes a café and other ground floor retail space which would increase “eyes of the street” to deter crime in Downtown. The project also includes pedestrian walkways and valet only parking which further increases pedestrian activity in Downtown and reduces opportunity for crime. Since the proposed project is consistent with the land use assumptions and furthers the goals of the Specific Plan, the project, therefore, would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact PS-3: The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for schools. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project is the construction of a 74-room hotel and 6,294 sf of commercial/retail space and does not include residential uses. The project would not generate new students. The DNSP EIR concluded that implementation of the Specific Plan would result in a less than significant impact to schools. Since the project would not generate students, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact PS-4: The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for parks. **[Same Impact as Approved Project (Less than Significant Impact)]**

Future hotel patrons may use City parks, trails, or other recreational facilities; however, the increase in use of these facilities would not place a major physical burden on existing park facilities that would result in a substantial physical deterioration of these facilities and would not, therefore, require the construction or expansion of facilities in the area. The project proposes to construct a connection

point to a future Napa Flood Control path extending from the West Building. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact PS-5: The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for other public facilities. **[Same Impact as Approved Project (Less than Significant Impact)]**

Future hotel patrons may use City public facilities within the project vicinity; however, the increase in use of these facilities by hotel users would not place a major physical burden on other public facilities that would result in a substantial physical deterioration of these facilities and would not, therefore, require the construction or expansion of facilities in the area. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

- Policy CS-1.3: The City shall ensure through the development review process that adequate public facilities and services are available to serve new development.
- Policy CS-1.7: The City shall require that all new development meet adopted service levels for public facilities as established in the General Plan.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.16 RECREATION

4.16.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| 1) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility will occur or be accelerated? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Recreation Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant recreation impacts. No mitigation was incorporated into the DNSP EIR.

Impact REC-1: The project would not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project is the construction of a 74-room hotel and 6,294 sf of commercial/retail space. The project does not propose residential uses. Although hotel patrons may use City parks, trails, or other recreation facilities in the area, the future patrons would not place a major physical burden on existing recreational facilities that would result in substantial physical deterioration of these facilities. The project would not cause substantial physical deterioration of local, off-site recreational facilities and would not result in the need for construction of new facilities. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact REC-2: The project would not include recreational facilities or require the construction of expansion of recreational facilities which might have an adverse physical effect on the environment. **[Same Impact as Approved Project (Less than Significant Impact)]**

As stated in Impact REC-1, future hotel patrons may use City parks, trails, or other recreational facilities; however, the increase in use of these facilities would not place a major physical burden on

existing recreational facilities that would result in a substantial physical deterioration of these facilities and would not, therefore, require the construction or expansion of facilities in the area. Consistent with General Plan Policy PR-6.4, the project provides access through the site to a planned public trail to enable access to the Napa River at the site of the West Building. The project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

Policy PR-6.4: The City shall link the Napa River Trail to other trails, parklands and community resources including downtown and river-oriented businesses.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.17 TRANSPORTATION

The following discussion is based, in part, on Traffic Impact Study prepared by *W-Trans* in April 2019. A copy of the Traffic Impact Study is attached as Appendix I to this Initial Study/Addendum.

4.17.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|---|------------------------------------|--|-------------------------------------|-------------------------------------|-------------------------------------|
| Would the project: | | | | | |
| 1) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle lanes and pedestrian facilities? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) For a land use project, conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible land uses (e.g., farm equipment)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Result in inadequate emergency access? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

CEQA Guidelines Update

On December 28, 2018, the California Natural Resource Agency certified and adopted the CEQA Guidelines update package. As part of the comprehensive update to the CEQA Guidelines, the Office of Planning and Research made the following revisions to the Appendix G environmental checklist, as it pertains to transportation:

1. Revised the questions related to “measures of effectiveness” so that the focus is more on the circulation element and other plans governing transportation.
2. Deleted the second question related to level of service (LOS), and refers to Guideline section 15064.3, subdivisions (b)(1) and (b)(2).
3. Clarified the question related to design features.

This Initial Study uses the updated Appendix G checklist as opposed to the checklist utilized in the DNSP EIR.

Downtown Napa Specific Plan EIR – Transportation Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in significant and unavoidable traffic impacts related to level of service (LOS) at study intersections. The DNSP EIR

identified mitigation to reduce impacts at the affected intersections; however, despite implementation of the identified mitigation, significant unavoidable impacts would remain. As a result, the City of Napa adopted a Statement of Overriding Consideration for transportation impacts resulting from full build out under the Specific Plan in accordance with CEQA Guidelines Section 15093 (Resolution R2012 54).

Impact TRN-1: The project would not conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle lanes and pedestrian facilities. **[Same Impact as Approved Project (Contribution to Significant Unavoidable Impact)]**

Implementation of the project would contribute to the overall LOS impacts identified in the DNSP EIR. However, Senate Bill 743 (SB 743) was signed in 2013 and requires that for land use projects, vehicle miles traveled (VMT) per capita, employee, or net VMT are to be used as metrics for transportation analysis. With the passage of SB 743 amending CEQA's evaluation of transportation impacts and the effective date of the Guidelines implementing SB 743, the effect of a project on LOS shall no longer be considered an impact on the environment.

The following discussion is included because the City of Napa has policies that address LOS as a planning or growth management matter, outside the CEQA process. In the event a deficient LOS condition is identified, the City has discretion whether to require a project to address the deficiency by implementing roadway or other transportation improvements to restore or improve the level of service, and the relevant question under CEQA is whether those improvements would result in adverse physical changes to the environment, and not whether LOS has degraded below the condition considered acceptable.

Level of Service Policy Evaluation

The DNSP EIR included development assumptions for a variety of commercial, housing, and entertainment uses in Downtown Napa. The City has indicated that there has been a shift from some of the assumptions made in the DNSP EIR, specifically regarding hotel uses. The DNSP EIR assumed a development capacity of 303 hotel rooms in the Downtown, which would generate 2,476 daily net new trips at full build out. Planned hotel development in the Downtown has exceeded this assumption. As a result, the anticipated trip generation of the proposed hotel project was compared to the potential trip generation for retail and office uses to determine the equivalent amount of office and retail that would generate the same number of trips as the proposed project.

Trip Generation Estimates

The generation resulting from the proposed project were estimated using the trip rates published in the *Institute of Transportation Engineers' (ITE) Trip Generation Manual, 10th Edition (2017)*. The project trip generation rates were estimated using the "Hotels" and "Shopping Center" land use codes.

The proposed project would generate 834 trips per day, with 40 new trips occurring during the AM peak hour and 66 new trips occurring during the PM peak hour (see Table 4.17-1 below).

| Table 4.17-1: Project Trip Generation Estimates | | | | | | | | |
|--|-----------|-------------|--------------|-----------|-----------|--------------|-----------|-----------|
| Land Use | Size | Daily Trips | AM Peak Hour | | | PM Peak Hour | | |
| | | | In | Out | Total | In | Out | Total |
| Proposed Uses | | | | | | | | |
| Hotel | 74 rooms | 619 | 21 | 14 | 35 | 23 | 21 | 44 |
| Shopping Center | 5,701 ksf | 215 | 3 | 2 | 5 | 11 | 11 | 22 |
| New Trips: | | 834 | 24 | 16 | 40 | 34 | 32 | 66 |
| Notes: ksf = 1,000 s.f. All rates are from Institute of Transportation Engineers, <i>Trip Generation Manual, 10th Edition, 2017</i> . Average rates are used. | | | | | | | | |

The anticipated trip generation for the proposed project was compared to the potential trip generation for retail and office uses to determine the equivalent amount of office and retail that would generate the same number of trips as the proposed project. The trip rates were estimated using the “Shopping Center” and “General Office Building” land use codes (see Table 4.17-2 below).

| Table 4.17-2: Project Trip Generation Comparison | | | | | | | | |
|--|----------|-------------|--------------|-----|-------|--------------|-----|-------|
| Land Use | Size | Daily Trips | AM Peak Hour | | | PM Peak Hour | | |
| | | | In | Out | Total | In | Out | Total |
| Proposed Project | -- | 834 | 24 | 16 | 40 | 34 | 32 | 66 |
| Shopping Center | 17.4 ksf | 657 | 10 | 6 | 16 | 32 | 34 | 66 |
| Office | 57 ksf | 555 | 57 | 9 | 66 | 10 | 56 | 66 |
| Notes: ksf = 1,000 s.f. All rates are from Institute of Transportation Engineers, <i>Trip Generation Manual, 10th Edition, 2017</i> . Average rates are used. | | | | | | | | |

It was determined that 17,400 square feet of retail and 57,000 square feet of office would generate an equivalent number of PM peak hour trips as the proposed project. In comparing the proposed hotel use to shopping center uses, the traffic analysis concluded that the proposed project would have similar directionality in traffic during the more critical PM peak hour. However, there would be more traffic leaving the site during the PM peak hour for the office use. Therefore, the project would have similar or less directionality impacts compared with other allowable uses in the Specific Plan Area.

The DNSP specifies that sites within the Downtown II zone (where the project site is located) may consist of medium- to high-density development with a floor area ratio (FAR) of up to 4.0. This equates to up to approximately 139,392 square feet of development, which is considerably higher than the equivalent 17,400 square feet of retail and 57,000 square feet of office used to compare to the proposed project. Therefore, the proposed project would generate lower volumes of traffic than other permitted uses analyzed in the DNSP EIR.

Project Level of Service Summary

Policy T-2.1 of the City’s General Plan establishes a level of service standard of mid-LOS D or better for all signalized intersections on arterial and collector streets with the following exceptions, where midrange LOS E will be permitted.

- Downtown Napa within the area bounded by Soscol Avenue, First Street, California Boulevard, and Third Street
- Jefferson Street between Third Street and Old Sonoma Road
- Silverado Trail between Soscol Avenue and First Street

The results of the intersection LOS analysis under existing plus project, existing plus approved plus project,¹¹ and future plus approved plus project conditions¹² show that all the study intersections would operate at an acceptable level during both the AM and PM peak hours when measured against the City’s level of service standards (see Table 4.17-3). The study intersections included in the Traffic Impact Study are displayed in Figure 4.17-1: Study Intersections.

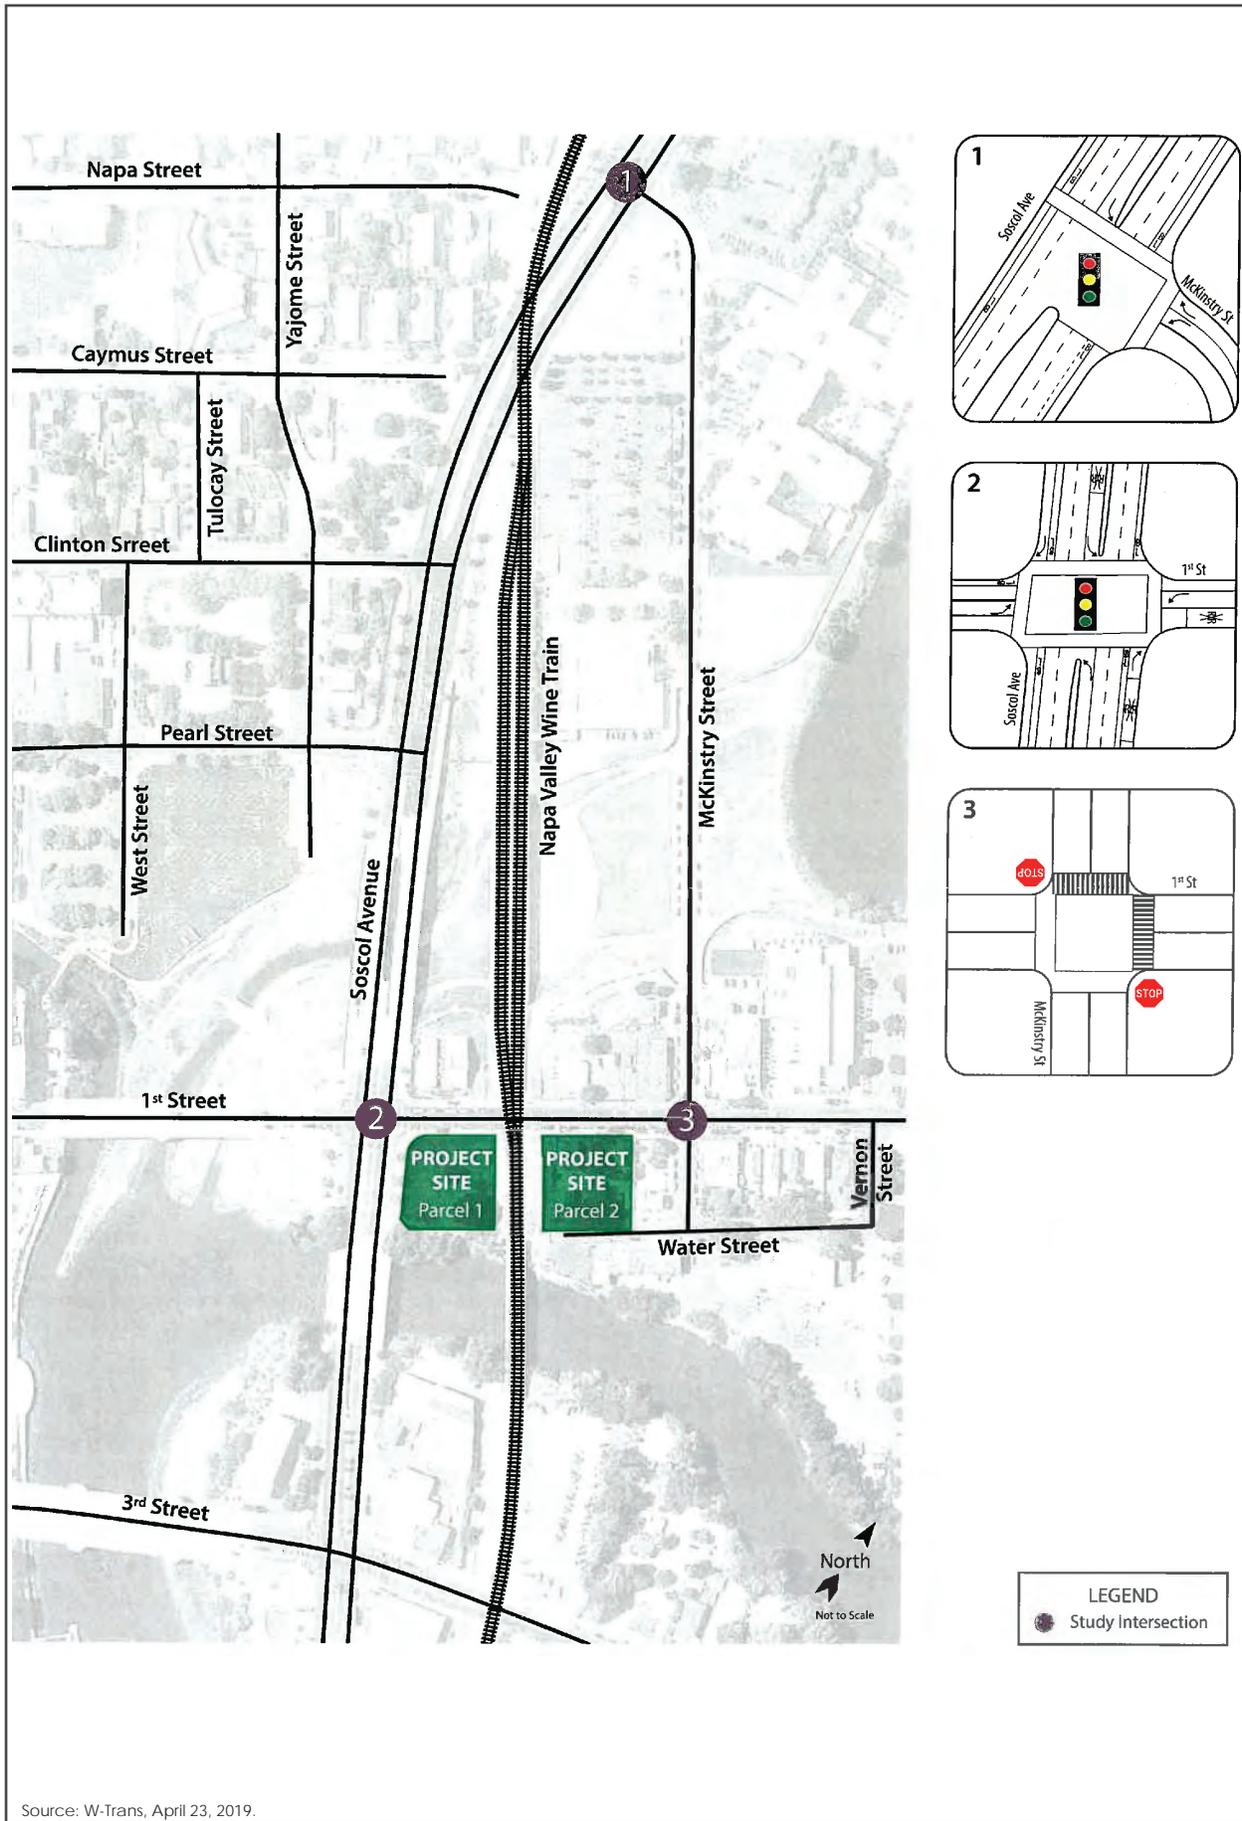

Table 4.17-3: Project Level of Service Summary

| Number | Intersection | Hour | Existing | | Existing Plus Project | | Existing Plus Approved Plus Project Conditions | | Future Plus Project Conditions | |
|--|---|------|------------------|----------|-----------------------|----------|--|----------|--------------------------------|----------|
| | | | Avg. Delay (Sec) | LOS | Avg. Delay (Sec) | LOS | Avg. Delay (Sec) | LOS | Avg. Delay (Sec) | LOS |
| 1 | Soscol Avenue/McKinstry Street | AM | 5.9 | A | 6.1 | A | 6.7 | A | 7.1 | A |
| | | PM | 6.3 | A | 6.8 | A | 8.6 | A | 10.0 | B |
| 2 | Soscol Avenue/First Street | AM | 38.3 | D | 38.1 | D | 37.2 | D | 38.0 | D |
| | | PM | 36.7 | D | 36.6 | D | 35.9 | D | 37.2 | D |
| 3 | McKinstry Street/First Street | AM | 1.9 | A | 2.3 | A | 3.1 | A | 2.5 | A |
| | | PM | 1.9 | A | 2.5 | A | 4.7 | A | 2.9 | A |
| | <i>Northbound (McKinstry St) Approach</i> | AM | <i>12.3</i> | <i>B</i> | <i>12.5</i> | <i>B</i> | <i>15.4</i> | <i>C</i> | <i>14.8</i> | <i>B</i> |

| | | PM | <i>13.0</i> | <i>B</i> | <i>14.0</i> | <i>B</i> | <i>19.5</i> | <i>C</i> | <i>17.2</i> | <i>C</i> |
| Delay is measure in average seconds per vehicle; LOS = Level of Service; Delay for stop-controlled approaches is shown in italics. | | | | | | | | | | |

The LOS traffic impacts from the proposed project have already been analyzed and accounted for in the DNSP EIR. Implementation of the proposed project would contribute to the overall LOS impact on intersections in the DNSP. As previously discussed, these impacts were found to be significant and unavoidable and, as a result, the City of Napa adopted a statement of overriding consideration for the DNSP in accordance with CEQA Guidelines Section 15093. The proposed project would be

¹¹ The Existing plus Approved Projects are found on page 8 of the Traffic Impact Study.

¹² Future volumes for the horizon year 2020 were calculated based on output from the *Napa Solano Travel Demand Model*.

Source: W-Trans, April 23, 2019.

STUDY INTERSECTIONS

FIGURE 4.17-1

required to pay the City's street improvement fee, consistent with the DNSP EIR Mitigation, Monitoring and Reporting Program, to make a fair share contribution to planned transportation improvements. For these reasons, the project would not result in any new or more significant impacts related to the City's LOS policy than were previously identified in the DNSP EIR. **[Same Impact as Approved Project (Significant Unavoidable Impact)]**

General Plan Crucial Corridor Policy Evaluation

The City of Napa General Plan identifies several routes that serve a particularly vital role in communitywide circulation and in providing accessibility to key community facilities as Crucial Corridors. The City's key circulation policies in its traffic management strategy have been established to reserve traffic capacity within these major corridors for communitywide circulation. In general, Crucial Corridor Policies limit additional driveways to these streets and discourage high traffic-generating uses.

According to the *City of Napa Policy Guidelines for Traffic Impact Analysis for Private Development Review*, uses along crucial corridors shall generate less than 520 daily trips per gross acre. The proposed western building is located within a City-designated crucial corridor. This portion of the project is expected to generate 380 daily trips. The proposed building would have a gross square footage of 60,307 square feet (approximately 1.38 acres). The building is estimated to generate approximately 275 daily trips per acre; therefore, the project would meet the City's crucial corridor requirement.

Other Transportation Modes

The DNSP EIR concluded that implementation of the Specific Plan be consistent with policies, plans and programs in the General Plan, and would not cause a significant impact by conflicting with adopted policies, plans, or programs supporting alternative transportation.

In general, the pedestrian network surrounding the project site is well-connected and provides adequate access for pedestrians, especially between Downtown Napa and the Oxbow Market area. The project would generate pedestrian traffic between the project site and the transit stop on the east side of Soscol Avenue, just south of the project site, among other destinations. There are existing pedestrian sidewalks on both sides of First Street and Soscol Avenue and marked crosswalks on all four legs of Soscol Avenue/First Street and McKinstry/First Street. The existing pedestrian facilities in the vicinity of the project site would adequately serve the project.

VINE Route 10 provides regional service to destinations through the City of Napa and stops on the east side of Soscol Avenue at Third Street, just south of the project site. The Soscol Gateway Transit Center is located approximately 0.3 mile south of the project site and would provide access to additional transit routes not offered at the nearest stop. The Napa Valley Wine Train McKinstry station is also located approximately 0.2 mile from the site, which is an acceptable walking distance for future hotel guests wishing to take advantage of this local attraction. Route 10 operates on weekdays and weekends with approximately one-hour headways. Existing transit routes are adequate to accommodate project-generated transit trips.

Existing bicycle facilities, including Class II bike lanes on Soscol Avenue, along with planned bike lanes on First Street outlined in the *City of Napa Bicycle Plan* would provide adequate access for

bicyclists and link the project site to the surrounding bicycle network. The project is consistent with the City's Bicycle Plan.

Consistent with the findings of the DNSP EIR, the proposed project would not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, nor would it decrease the performance or safety of existing facilities in the immediate vicinity of the project site.

[Same Impact as Approved Project (Less than Significant Impact)]

Impact TRN-2: The project would not conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b). **(New Less than Significant Impact)**

This CEQA checklist question specifically addresses the new transportation metric of vehicle miles traveled (VMT), and whether a land use project would exceed an applicable threshold of significance. The City of Napa has not yet adopted a quantitative VMT threshold, as allowed by CEQA Guidelines Section 15064.3, subdivision (c), which allows lead agencies until July 1, 2020 to start using VMT. Therefore, the project would not exceed an applicable threshold of significance.

CEQA Guidelines Section 15064.3, subdivision (b)(1), states that certain projects (including residential, retail, and office projects, as well as projects that are a mix of these uses) proposed within ½ mile of an existing major transit stop or an existing stop along a high quality transit corridor will have less-than-significant impacts on VMT. As previously discussed, the project site is located 0.4 mile from the Soscol Gateway Transit Center, which provides a connection between Napa and the greater Bay Area. In addition, an existing transit stop is located on the east side of Soscol Avenue, just south of the project site. Given the projects proximity to an existing major transit center, the project would be expected to have a less than significant impact on VMT. **(New Less than Significant Impact)**

Impact TRN-3: The project would not substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The project design does not substantially increase hazards. Vehicle access to the proposed project would be provided via two proposed driveways. The West Building would be accessed via a driveway east of the existing driveway curb-cut and would be right-in/right-out only. The East Building would be accessed via a new driveway on Water Street, located just east of the railroad tracks. Traffic exiting (and entering) the East Building would gain access to Water Street via McKinstry Street. Valet parking services would be provided in front of the East building only, where all patrons would arrive for check-in. The existing parallel parking spaces along First Street would be removed as part of the plans to install bike lanes, and the curb set back to create the passenger loading area and valet space. The setback area would include the majority of the East building frontage (approximately 100 feet in length) and would have sufficient space to accommodate four to five vehicles.

The project proposes to convert Water Street from a public to private street with a reduced cross-section. The footprint of the building would extend 20 feet into the 60-foot wide Water Street right-of-way. Water Street would have an 11-foot travel lane in each direction with eight feet of parking and a ten-foot sidewalk on the south side.

Sight distances along First Street from the western project driveway were evaluated based on sight distance criteria in the *Highway Design Manual* published by Caltrans. The recommended sight distance for Front Street is 150 feet. Based on field measurements taken for the traffic analysis, there is at least 150 feet of sight distance available to the west, which allows drivers to view traffic in the intersection with Soscol Avenue, and more than 250 feet of sight distance to the east along First Street. The project would remove existing on-street parallel parking along First Street. Sight distance would be adequate at the project driveway on First Street for the posted speed limit.

The DNSP EIR concluded that development facilitated by the Specific Plan could potentially result in additional automobile, bicycle, and/or pedestrian traffic at existing at-grade railroad crossings and potentially contribute to safety issues at railroad crossings. According to the Air Quality and Greenhouse Gas Assessment prepared for the project, approximately four to six passenger trains (Napa Valley Wine Train) per day travel in the vicinity of the project. As determined by the project trip generation comparison conducted as part of the project's Traffic Impact Study and discussed earlier in this section, the proposed project would generate lower volumes of traffic than other permitted uses analyzed in the DNSP EIR. The project's First Street driveway entrance is designed as a right-in/right-out only, which eliminates turning movements and vehicle queueing from westbound traffic. The project's Traffic Impact Study analyzed sight distance for the First Street driveway and made the finding that it would be adequate for the posted speed limit. The Traffic Impact Study analyzed the pedestrian and bicycle facilities and made the finding that the pedestrian facilities and off-site bicycle facilities serving the project site are adequate. Additionally, the project is required to be constructed consistent with City of Napa Public Works Standard Specifications and Standard Plans. For these reasons, the proposed project is not expected to result in hazards between incompatible uses at at-grade railroad crossings. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact TRN-4: The project would not result in inadequate emergency access. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that the adequacy of emergency vehicle access would be evaluated for each individual development in the study area. The DNSP EIR determined that since each individual development would be expected to be consistent with the City's Fire Code, Subdivision and other regulations in effect at the time, implementation of the Specific Plan would result in a less than significant impact on emergency access. The project would be built in conformance with the current building and fire codes, and be reviewed by the Fire Department to ensure adequate emergency access, including adequate fire apparatus access to buildings and adequate widths for on-site driveways and parking aisles. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

- Policy T-9.1: Require adequate short-term (i.e. bike racks) and long-term (i.e. bike lockers) bicycle parking for non-residential uses as provided in local standards. Nonresidential uses include private commercial and industrial uses, as well as hospitals, clinics, gyms, parks and other civic facilities.
- Policy T-11.A: As new private or public development is approved on or along designated bicycle routes in the City’s bicycle plan, the City shall continue to require needed bicycle improvements appropriate for the type of route, including recreational multi use trail system segments (as along the Napa River and Salvador Channel) using the BTAC as a resource to review and provide recommendations regarding such projects.
- Policy T-11.B: The City shall promote bicycle access and support facilities in the design of future development.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

- Policy TR-1.7: Ensure all street modification, reconstruction or rehabilitation projects, whether City led or development driven, within the Planning Area implement the vehicular, pedestrian, bicycle, streetscape or transit improvements identified in this Specific Plan.
- Policy TR-4.1: Implement the streetscape improvements in this Specific Plan by ensuring private development enhances the public realm, as envisioned in the Streetscape Plan in Chapter 5, through careful placement and design of street trees, public art, street furnishings, bike racks, landscaping, signage, newsstands, street lights, paving and trash receptacles.
- Policy TR-4.2: Require private development to expand public streetscape and open space improvements to extend the network of pedestrian-friendly sidewalks, promenades, plazas, paseos and courtyards into and through development projects.

Mitigation Measure

- Mitigation Measure 4.L-6: This mitigation measure should be applied to developments under the Specific Plan that would generate substantial multi-modal trips crossing at-grade railroad crossings that could substantially increase hazards between incompatible uses (i.e., motor vehicles and trains, or pedestrians and trains):

Transportation Impact Studies (TIS) for At-grade Railroad Crossings
– The TIS, otherwise required to be prepared for proposed

developments under this project, in accordance with standard City policies and practices, must evaluate potential impacts to at-grade railroad crossings resulting from project-related traffic. The TIS should examine whether the proposed project would generate substantial multimodal trips crossing at-grade railroad crossings that could substantially increase hazards between incompatible uses (i.e., motor vehicles and trains, pedestrians and trains), which may include a Diagnostic Review for each railroad crossing.

If required, the Diagnostic Review must be completed with all affected properties and Stakeholders, in coordination with the California Public Utilities Commission (CPUC). It will include: roadway and rail descriptions; collision history; traffic volumes for all modes; train volumes; vehicular speeds; train speeds; and existing rail and traffic controls. Based on the Diagnostic Review and the number of projected trips, the TIS will evaluate if the proposed project increases hazards at the crossing. For example, vehicle traffic generated by the proposed project may cause vehicle queuing at intersections resulting in traffic spilling back onto at-grade railroad crossings.

Where the TIS identifies substantially hazardous crossing conditions caused by the proposed project, mitigations relative to the project's contribution to the crossing as necessary shall be applied through project redesign and/or incorporation of improvements to reduce potential adverse impacts. Proposed improvements must be coordinated with CPUC and affected railroads and all necessary permits/approvals obtained, including a GO 88-B Request (Authorization to Alter Highway Rail Crossings). These improvements may include:

- Installation of additional warning signage;
- Improvements to warning devices at existing rail crossings;
- Installation or improvement to automobiles and/or pedestrian control gates;
- Installation of concrete panels to provide a smooth crossing surface;
- Reduction in the flangeway gap to improve pedestrian and bicyclist safety;
- Installation of median separation to prevent vehicles from driving around railroad crossings;
- Improvements to traffic signaling at intersections adjacent to crossings (e.g., signal preemption);
- Prohibition of parking within 100 feet of the crossings to improve the visibility of warning devices and approaching trains;

- Where soundwalls, landscaping, buildings, etc. would be installed near crossings, maintain the visibility of warning devices and approaching trains;
- Elimination of driveways near crossings;
- Installation of vandal-resistant fencing or walls to limit the access of pedestrians onto the railroad right-of-way.

The DNSP EIR included two additional mitigation measures related to transportation and traffic (4.L-1a and 4.L-2b); however, these measures do not apply to private development projects within the DNSP. Therefore, those measures are not applicable to the proposed project.

4.17.2 Non-CEQA Effects

Per *California Building Industry Association v. Bay Area Air Quality Management District*, 62 Cal. 4th 369 (*BIA v. BAAQMD*), effects of the environment on the project are not considered CEQA impacts. The following discussion is included for informational purposes only because the City of Napa has policies that address existing transportation conditions affecting a proposed project.

Parking

The DNSP EIR anticipated future review of individual development projects facilitated under the DNSP would determine the adequacy of the proposed parking supply to meet the expected parking demand based on the parking requirements presented in the DNSP. The project proposes to provide 121 parking spaces in two separate subgrade parking garages (see Figure 3.1-5).

4.18 TRIBAL CULTURAL RESOURCES

4.18.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: | | | | | |
| 1) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying this criteria, the significance of the resource to a California Native American tribe shall be considered. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Tribal Cultural Resources Conclusion

The potential for archaeological resources that may be considered tribal cultural resources were addressed in the Cultural Resources section of the DNSP EIR. A representative of the Wappo Tribe commented on the DNSP Draft EIR but did not identify any tribal cultural resources in the Planning Area.

Impact TCR-1: The project would not cause a substantial adverse change in the significance of a tribal cultural resource that is listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k). **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The project site does not contain any known tribal cultural resources. On May 14, 2019 the City of Napa sent a letter to six tribes that had requested project notification under AB 52. Each tribe was

sent a letter describing the proposed project with a map of the area and inquiring whether they had concerns. One tribe, the Middletown Rancheria tribe responded requesting notification should any new information or evidence of human habitation be discovered during project construction activities.

The Yocha Dehe Wintun Nation (Nation) requested consultation upon receiving notice of the project from the City. The City and applicant have agreed to implement the following condition of approval:

Condition of Approval:

- A monitor, approved by the Nation tribe, will be present during all grading and other earthwork activities.
- All workers will receive training or a briefing from the Nation tribe prior to initiating work.

The implementation of DNSP EIR Mitigation Measures 4.D-2a, -2b, -3, and -4 and the Conditions of Approval identified in *Section 4.5 Cultural Resources* of this Initial Study/Addendum would reduce potential adverse effects on unknown archaeological resources and Native American burials, considered a tribal cultural resources, to less than significant level. The proposed project would not result in new or greater cultural resource impacts than identified in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact TCR-2: The project would not cause a substantial adverse change in the significance of a tribal cultural resource that is determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The City of Napa has not identified any significant tribal cultural resources on the project site.

The implementation of DNSP EIR Mitigation Measures 4.D-2a, -2b, -3, and -4 and the Conditions of Approval identified in *Section 4.5 Cultural Resources* of this Initial Study/Addendum would reduce potential adverse effects on unknown archaeological resources and Native American burials, considered a tribal cultural resources, to less than significant level. The proposed project would not result in new or greater cultural resource impacts than identified in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that are applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

Mitigation Measures

- Mitigation Measure 4.D-2a: When specific projects are proposed under the Specific Plan that involves ground-disturbing activity into native soils, the City's Pastfinder archaeological database shall be consulted. Recommendations provided by the Pastfinder database shall be implemented based on a parcel's archaeological sensitivity. In those cases where a site-specific cultural resources study is necessary, it shall be performed by qualified cultural resources professional. The study will include an updated records search, pedestrian survey of the project area, development of a historic context, sensitivity assessment for buried prehistoric and historic-period deposits, and preparation of a technical report that meets federal and state requirements. If significant resources are identified and cannot be avoided, treatment plans will be developed in consultation with the City and Native American representatives to mitigate potential impacts to less than significant.
- Mitigation Measure 4.D-2b: Should any archaeological artifacts be found during construction in the Planning Area, all construction activities within 50 feet shall immediately halt and the City must be notified. A qualified archaeologist shall inspect the findings within 24 hours of the discovery. If the site is determined to contain significant cultural resources, funding will be provided to identify, record, report, evaluate, and recover the resources as necessary. Construction within the area of the find shall not recommence until impacts on the historical or unique archaeological resource are mitigated. Additionally, Public Resources Code § 5097.993 stipulates that a project sponsor must inform project personnel that collection of any Native American artifact is prohibited by law.
- Mitigation Measure 4.D-3: Prior to the start of any subsurface excavations that would extend beyond previously disturbed soils, all construction forepersons and field supervisors shall receive training by a qualified professional paleontologist, as defined by the Society of Vertebrate Paleontology (SVP), who is experienced in teaching non-specialists, to ensure they can recognize fossil materials and will follow proper notification procedures in the event any are uncovered during construction. Procedures to be conveyed to workers include halting construction within 50 feet of any potential fossil find and notifying a qualified paleontologist, who will evaluate its significance. Training on paleontological resources will also be provided to all other construction workers, but may involve using a videotape of the initial training and/or written materials rather than in-person training by a

paleontologist. If a fossil is determined to be significant and avoidance is not feasible, the paleontologist will develop and implement an excavation and salvage plan in accordance with SVP standards.

Mitigation Measure 4.D-4: The treatment of any human remains and associated or unassociated funerary objects discovered during soil disturbing activities shall comply with applicable state laws. Such treatment would include immediate notification of the Napa County Coroner. In the event of the coroner's determination that the human remains are Native American, the coroner shall notify of the Native American Heritage Commission, which would appoint a Most Likely Descendant (MLD) (PRC § 5097.98). The archaeological consultant, the Event Authority, and MLD shall make all reasonable efforts to develop an agreement for the treatment, with appropriate dignity, of any human remains and associated or unassociated funerary objects (CEQA Guidelines § 15064.5[d]). The agreement would take into consideration the appropriate excavation, removal, recordation, analysis, custodianship, curation, and final disposition of the human remains and associated or unassociated funerary objects. The PRC allows 48 hours to reach agreement on these matters. If the MLD and the other parties could not agree on the reburial method, the Event Authority shall follow Section 5097.98(b) of the PRC, which states that "the landowner or his or her authorized representative shall reinter the human remains and items associated with Native American burials with appropriate dignity on the property in a location not subject to further subsurface disturbance.

4.19 UTILITIES AND SERVICE SYSTEMS

4.19.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|---|---|---|---|--|--|
| Would the project: | | | | | |
| 1) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Have insufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project’s projected demand in addition to the provider’s existing commitments? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Be noncompliant with federal, state, and local management and reduction statutes and regulations related to solid waste? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Utilities and Service Systems Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would result in less than significant utilities and service systems impacts. No mitigation was incorporated into the DNSP EIR.

Impact UTL-1: The project would not require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects. **[Same Impact as Approved Project (Less than Significant Impact)]**

The proposed project would connect to an existing 12-inch water line in First Street that meets current City standards. Stormwater drainage lines would connect bioretention areas on the perimeter of the site with existing storm drain lines and outfalls. The project would replace an existing outfall at the end of Water Street that is located outside the top of bank of the Napa River. The project would also connect to existing sanitary sewer, electric power, and telecommunication facilities on First Street. The existing utilities have capacity to serve the project. If the City approves the abandonment of Water Street, Water Street would revert to the adjacent property owners and water infrastructure within Water Street would also be abandoned. Any relocation of the water main to serve adjacent parcels would be completed by the project. Relocation of the water main, if required, would occur within existing City right-of-way and would result in similar impacts related to ground disturbance as disclosed elsewhere in this document. The project would not install or upgrade any off-site utilities that would have the potential to cause new significant environmental effects. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact UTL-2: The project would not have insufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

The proposed project would have a water demand of approximately 8,974 gallons per day for hotel and commercial/retail operations.¹³ The DNSP EIR concluded that implementation of the Specific Plan would have adequate water supply sources based on the projections of the City's Urban Water Management Plan which was recently updated in 2017. The City of Napa's existing water supply remains adequate for normal demand through 2035 and the completed construction of a recycled water pipeline under the Napa River will reduce overall potable water demand.

Consistent with the findings of the DNSP EIR, the project would be required to pay its fair share of water system improvements, as required by General Plan policies CS-1.2 and CS-1.4.

Condition of Approval:

The project applicant shall pay its fair share of water system improvements to the City of Napa.

The DNSP EIR concluded that developer-driven fees and payments in combination with other existing and proposed sources of funding for water system improvements would reduce potential impacts to water supplies and distribution. Since the project is consistent with the land use assumptions of the Specific Plan and would adhere to the Condition of Approval, the project would

¹³ Based on a demand factor of 100 gpd per square foot per room (assuming 74 maximum hotel rooms) and 0.25 gpd per square foot for hotel supportive retail uses, the project would generate approximately 8,974 gpd of water.

result in a less than significant impact to water supplies. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact UTL-3: The project would not result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project's projected demand in addition to the provider's existing commitments. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that implementation of the Specific Plan would result in an increase in wastewater generated in the Planning Area, potentially affecting the capacity of the wastewater treatment plant operated by Napa Sanitation District. The development-driven fees, as required by General Plan policies CS 1.2 and CS 1.4.

The proposed project would generate approximately 7,627 gallons per day of wastewater from hotel and commercial/retail operations.¹⁴ As described in Impact UTL-2, the project would be required to pay its fair share of water system improvements and development impact fees. In doing so, the project would be consistent with the findings of the DNSP EIR and would have a less than significant impact to wastewater treatment. **[Same Impact as Approved Project (Less than Significant Impact)]**

Impact UTL-4: The project would not generate solid waste in excess of state or local standards or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals. **[Same Impact as Approved Project (Less than Significant Impact)]**

The project would generate approximately 59,764 tons of solid waste per year from hotel and commercial/retail operations.¹⁵ The DNSP EIR concluded that implementation of the Specific Plan would result in an increase in the amount of solid waste generated. Although the increased residential population and business activities resulting from implementation of the Specific Plan would incrementally increase the total waste generated by the City, the increasing rate of diversion through recycling, composting, and other methods would result in a decreasing share of total waste that would be disposed in landfills serving the City.

Since the proposed project is consistent with the land use assumptions of the Specific Plan and the DNSP EIR concluded that implementation of the Specific Plan would result in a less than significant impact related to solid waste reduction goals, the project would not result in new or greater impacts than those disclosed in the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

¹⁴ Wastewater is assumed to be 85% of the total water demand.

¹⁵ The project's solid waste generation is based on a solid waste generation rate of two pounds per day per hotel guest room and 2.5 pounds per 1,000 square feet per day for commercial/retail space.

Impact UTL-5: The project would be compliant with federal, state, and local management and reduction statutes and regulations related to solid waste. **[Same Impact as Approved Project (Less than Significant Impact)]**

The DNSP EIR concluded that buildout of the Specific Plan would not impede the ability of the City to comply with applicable federal, State, and local statutes and regulations related to solid waste. The project would be required to meet the City's construction and demolition requirements that 50 percent of these materials be diverted from landfills. Since the proposed project is consistent with the land use assumptions of the Specific Plan, the project would be consistent with the findings of the DNSP EIR. **[Same Impact as Approved Project (Less than Significant Impact)]**

General Plan Policies that Reduce Impacts

Policy CS-1.2: Where new development requires the construction of new public facilities, the new development shall fund its fair share of the construction of those facilities. The City shall require dedication of land within newly developing areas for required public facilities, as allowed by law.

Policy CS-1.4: The City shall require, to the extent legally possible, that new development pays the cost of providing new public facilities and services and/or the costs for upgrading of all existing facilities that it uses, based on the demand for these facilities attributable to the new development; exceptions may be made when new development generates significant public benefits (e.g. low-income housing, significant primary wage earner employment) and when alternative sources of funding can be identified to offset foregone revenues.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.20 WILDFIRE

4.20.1 Impact Discussion

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as “Approved Project” | Less Impact than “Approved Project” |
|--|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project: | | | | | |
| 1) Impair an adopted emergency response plan or emergency evacuation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Downtown Napa Specific Plan EIR – Wildfire Conclusion

The DNSP EIR concluded that implementation of the Specific Plan would have no impacts from wildland fires due to the urbanized areas of the Specific Plan.

| | |
|---------------------|--|
| Impact WF-1: | The project would not impair an adopted emergency response plan or emergency evacuation plan. [Same Impact as Approved Project (No Impact)] |
|---------------------|--|

The project would comply with all emergency vehicle access requirements. The DNSP EIR concluded that implementation of the Specific Plan would not impede an established emergency access route or interfere with emergency response requirements and would not result in permanent road closures. The project would, therefore, be consistent with the conclusions of the DNSP EIR. **[Same Impact as Approved Project (No Impact)]**

Impact WF-2: The project would not, due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire. **[Same Impact as Approved Project (No Impact)]**

The project site is not located in or adjacent to an identified wildfire hazard zone. The project would, therefore, not expose project occupants to pollutant concentrations from a wildfire or the uncontrollable spread of a wildfire. **[Same Impact as Approved Project (No Impact)]**

Impact WF-3: The project would not require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment. **[Same Impact as Approved Project (No Impact)]**

The project is not located in a wildfire hazard zone and would not require the installation or maintenance of infrastructure that would exacerbate fire risk or result in temporary or ongoing impacts to the environment. **[Same Impact as Approved Project (No Impact)]**

Impact WF-4: The project would not expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes. **[Same Impact as Approved Project (No Impact)]**

The project is not located in or adjacent to an area identified as a wildfire hazard and, therefore, would not expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes. **[Same Impact as Approved Project (No Impact)]**

General Plan Policies that Reduce Impacts

There are no policies or mitigation included in the General Plan that are applicable to the proposed project.

Specific Plan Policies, Mitigation Measures, and Design Standards that Reduce Impacts

There are no policies or mitigation included in the DNSP that are applicable to the proposed project.

4.21 MANDATORY FINDINGS OF SIGNIFICANCE

| | New Potentially Significant Impact | New Less than Significant with Mitigation Incorporated | New Less than Significant Impact | Same Impact as "Approved Project" | Less Impact than "Approved Project" |
|---|------------------------------------|--|----------------------------------|-------------------------------------|-------------------------------------|
| 1) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Impact MFS-1: The project does not have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

As discussed in the individual sections, the proposed project would not degrade the quality of the environment with the implementation of identified best management practices and Conditions of Approval.

The project would implement best management practices and adhere to Conditions of Approval to reduce construction dust and exhaust impacts to nearby sensitive receptors, consistent with Mitigation Measure 4.B-2 of the DNSP DEIR. The proposed hotel would be constructed to conform with the Bird Safe Guidelines, as outlined in the DNSP to reduce potential impacts to migrating birds to a less than significant level.

The project would require approval of a Certificate of Appropriateness for the proposed relocation of the two existing historic structures on-site to 58 Randolph Street. The project would also adhere to Conditions of Approval related to its potential impact to hazards and hazardous materials on-site, construction noise, and the City's water system.

The project would implement mitigation measures identified in the DNSP EIR and project-specific mitigation measures consistent with the DNSP EIR to reduce potential impacts to buried archaeological and tribal cultural resources to a less than significant level.

For the remaining resource sections, the project would not result in new or more significant impacts than identified in the DNSP EIR and General Plan EIR. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact MFS-2: The project does not have impacts that are individually limited, but cumulatively considerable. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Under Section 15065(a)(3) of the CEQA Guidelines, a lead agency shall find that a project may have a significant effect on the environment where there is substantial evidence that the project has potential environmental effects "that are individually limited, but cumulatively considerable." As defined in Section 15065(a)(3) of the CEQA Guidelines, cumulatively considerable means "that the incremental effects of an individual project are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects." In addition, under Section 15152(f) of the CEQA Guidelines, where a lead agency has determined that a cumulative effect has been adequately addressed in a prior EIR, the effect is not treated as significant for purposes of later environmental review and need not be discussed in detail.

The proposed development would result in temporary air quality, biology, hazardous materials, and noise impacts during construction. With the implementation of the best management practices and Conditions of Approval, and consistency with adopted City policies, the construction impacts would be mitigated to a less than significant level. As the identified impacts are temporary and would be mitigated, the project would not have cumulatively considerable impacts on air quality, water quality, biology, and noise in the project area.

The project would have a less than significant impact on aesthetics, geology and soils, hydrology and water quality, population and housing, recreation, and utilities, and would not contribute to cumulative impacts to these resources. The project would not impact agricultural and forest resources, mineral resources or wildfire hazards. Therefore, the project would not contribute to a significant cumulative impact on these resources.

The project's contribution to a cumulative impact on greenhouse gas emissions was analyzed in the certified Downtown Napa Specific Plan EIR. The proposed project would not result in a more significant cumulative impact related to these issues than disclosed within the prior EIR addressing the entire Planning Area. The project would comply with CalGreen Building standards and applicable State and local ordinances, and the Conditions of Approval implementing Mitigation Measures 4.B-5 to reduce its greenhouse gas emissions impacts to a less than significant level. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

Impact MFS-3: The project does not have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

A portion of the project site is developed with five structures, two of which are proposed for relocation while the three remaining are proposed for demolition. The remainder and majority of the project site is undeveloped. Commercial development, including the proposed uses, is consistent with the long-term goals for the site outlined in the Downtown Napa Specific Plan. The construction of the project would result in the temporary disturbance of developed land as well as an irreversible and irretrievable commitment of resources and energy during construction.

As discussed in Impact MFS-2, the project would implement best management practices and Conditions of Approval to reduce impacts related to project construction and operations to a less than significant level.

With implementation of the mitigation measures included in the project and compliance with City General Plan policies, the proposed project would not cause substantial adverse effects on human beings. **[Same Impact as Approved Project (Less than Significant Impact with Mitigation Incorporated)]**

I&R Project: #17-236

Introduction

The purpose of this report is to address the air quality impacts, estimate the health risk impacts, and compute the greenhouse gas (GHG) emissions associated with the proposed hotel project located at 711 First Street and 731 Water Street in Napa, California. The air quality impacts and GHG emissions would be associated with demolition of the existing uses at the site, construction of the new buildings and infrastructure, and operation of the project. Additionally, the project's construction would be the primary source of toxic air contaminant (TAC) and fine particulate matter (PM_{2.5}) emissions. This could increase health risks at sensitive receptors and lead to community risk impacts. This analysis addresses those issues following the guidance provided by the Bay Area Air Quality Management District (BAAQMD).¹

Project Description

The project would demolish the existing buildings on-site and construct a boutique hotel that would be constructed over two parcels. Each building plan provides 37 rooms, for a total of 74 rooms between the two. Ground level facilities include tenant spaces for commercial or restaurant-oriented use, along with hotel lobby and circulation areas. The proposed retail space totals 6,294 square feet (sf). A total of 124 parking spaces would also be provided in enclosed below-grade parking garages. The hotel buildings would be built over these garages.

Setting

The project is located in Napa, County, which is in the San Francisco Bay Area Air Basin. Ambient air quality standards have been established at both the State and federal level. The Bay Area meets all ambient air quality standards with the exception of ground-level ozone, respirable particulate matter (PM₁₀), and fine particulate matter (PM_{2.5}).

Air Pollutants of Concern

High ozone levels are caused by the cumulative emissions of reactive organic gases (ROG) and nitrogen oxides (NO_x). These precursor pollutants react under certain meteorological conditions to form high ozone levels. Controlling the emissions of these precursor pollutants is the focus of the Bay Area's attempts to reduce ozone levels. The highest ozone levels in the Bay Area occur in the eastern and southern inland valleys that are downwind of air pollutant sources. High ozone levels aggravate respiratory and cardiovascular diseases, reduced lung function, and increase coughing and chest discomfort.

Particulate matter is another problematic air pollutant of the Bay Area. Particulate matter is assessed and measured in terms of respirable particulate matter or particles that have a diameter of 10 micrometers or less (PM₁₀) and fine particulate matter where particles have a diameter of 2.5 micrometers or less (PM_{2.5}). Elevated concentrations of PM₁₀ and PM_{2.5} are the result of both region-wide (or cumulative) emissions and localized emissions. High particulate matter levels aggravate respiratory and cardiovascular diseases, reduce lung function, increase mortality (e.g., lung cancer), and result in reduced lung function growth in children.

¹ Bay Area Air Quality Management District, *CEQA Air Quality Guidelines*, May 2017.

Toxic Air Contaminants

Toxic air contaminants (TAC) are a broad class of compounds known to cause morbidity or mortality (usually because they cause cancer) and include, but are not limited to, the criteria air pollutants. TACs are found in ambient air, especially in urban areas, and are caused by industry, agriculture, fuel combustion, and commercial operations (e.g., dry cleaners). TACs are typically found in low concentrations, even near their source (e.g., diesel particulate matter [DPM] near a freeway). Because chronic exposure can result in adverse health effects, TACs are regulated at the regional, State, and federal level.

Diesel exhaust is the predominant TAC in urban air and is estimated to represent about three-quarters of the cancer risk from TACs (based on the Bay Area average). According to the California Air Resources Board (CARB), diesel exhaust is a complex mixture of gases, vapors, and fine particles. This complexity makes the evaluation of health effects of diesel exhaust a complex scientific issue. Some of the chemicals in diesel exhaust, such as benzene and formaldehyde, have been previously identified as TACs by the CARB, and are listed as carcinogens either under the State's Proposition 65 or under the Federal Hazardous Air Pollutants programs.

Regulatory Agencies

CARB has adopted and implemented a number of regulations for stationary and mobile sources to reduce emissions of DPM. Several of these regulatory programs affect medium and heavy-duty diesel trucks that represent the bulk of DPM emissions from California highways. These regulations include the solid waste collection vehicle (SWCV) rule, in-use public and utility fleets, and the heavy-duty diesel truck and bus regulations. In 2008, CARB approved a new regulation to reduce emissions of DPM and nitrogen oxides from existing on-road heavy-duty diesel fueled vehicles.² The regulation requires affected vehicles to meet specific performance requirements between 2014 and 2023, with all affected diesel vehicles required to have 2010 model-year engines or equivalent by 2023. These requirements are phased in over the compliance period and depend on the model year of the vehicle.

The BAAQMD is the regional agency tasked with managing air quality in the region. At the State level, the CARB (a part of the California Environmental Protection Agency [EPA]) oversees regional air district activities and regulates air quality at the State level. The BAAQMD has published California Environmental Quality Act (CEQA) Air Quality Guidelines that are used in this assessment to evaluate air quality impacts of projects.³ The detailed community risk modeling methodology used in this assessment is contained in *Attachment 1*.

Envision Napa 2020: City of Napa General Plan

The City of Napa General Plan includes goals, policies, and strategies to improve air quality and meet the State and National ambient air quality standards. The following goals, policies, and actions are applicable to the proposed project:

² Available online: <http://www.arb.ca.gov/msprog/onrdiesel/onrdiesel.htm>. Accessed: November 21, 2014.

³ Bay Area Air Quality Management District. 2017. *BAAQMD CEQA Air Quality Guidelines*. May.

Goal Natural Resources (NR)-5: To maintain acceptable levels of air quality in Napa

- NR-5.4 The City shall, during discretionary review, require that development proposals comply with federal and state air quality standards or make findings that the project has overriding benefits to the community that outweigh nonattainment of the standards.
- NR-5.5: The City shall, during early consultation with project proponents, encourage project design that minimizes direct and indirect air emissions. Projects should consider the following air quality concerns:
- a. Land use and design measures to encourage alternatives to the automobile and to conserve energy;
 - b. Land use and design measures to minimize exposure of sensitive receptors to odors, toxics, and criteria pollutants; and
 - c. Applicable Bay Area Air Quality Management District rules, regulations, and per requirements.

Sensitive Receptors

There are groups of people more affected by air pollution than others. CARB has identified the following persons who are most likely to be affected by air pollution: children under 16, the elderly over 65, athletes, and people with cardiovascular and chronic respiratory diseases. These groups are classified as sensitive receptors. Locations that may contain a high concentration of these sensitive population groups include residential areas, hospitals, daycare facilities, elder care facilities, and elementary schools. The closest sensitive receptors to the project site are residences of a single-family home adjacent to the western portion of the project. There are additional residences at farther distances from the project site. The project would not include new residents since it is a hotel and guests would only stay in the area for a temporary period.

Significance Thresholds

In June 2010, BAAQMD adopted thresholds of significance to assist in the review of projects under CEQA and these significance thresholds were contained in the District's 2011 *CEQA Air Quality Guidelines*. These thresholds were designed to establish the level at which BAAQMD believed air pollution emissions would cause significant environmental impacts under CEQA. The thresholds were challenged through a series of court challenges and were mostly upheld. BAAQMD updated the *CEQA Air Quality Guidelines* in 2017 to include the latest significance thresholds that were used in this analysis are summarized in Table 1.

Table 1. Air Quality Significance Thresholds

| Criteria Air Pollutant | Construction Thresholds | Operational Thresholds | |
|---|---|--|--------------------------------------|
| | Average Daily Emissions (lbs./day) | Average Daily Emissions (lbs./day) | Annual Average Emissions (tons/year) |
| ROG | 54 | 54 | 10 |
| NO _x | 54 | 54 | 10 |
| PM ₁₀ | 82 (Exhaust) | 82 | 15 |
| PM _{2.5} | 54 (Exhaust) | 54 | 10 |
| CO | Not Applicable | 9.0 ppm (8-hour average) or 20.0 ppm (1-hour average) | |
| Fugitive Dust | Construction Dust Ordinance or other Best Management Practices | Not Applicable | |
| Health Risks and Hazards | Single Sources Within 1,000-foot Zone of Influence | Combined Sources (Cumulative from all sources within 1,000-foot zone of influence) | |
| Excess Cancer Risk | >10.0 per one million | >100 per one million | |
| Hazard Index | >1.0 | >10.0 | |
| Incremental annual PM _{2.5} | >0.3 µg/m ³ | >0.8 µg/m ³ | |
| Greenhouse Gas Emissions | | | |
| Land Use Projects – direct and indirect emissions | Compliance with a Qualified GHG Reduction Strategy OR 1,100 metric tons annually or 4.6 metric tons per capita (for 2020) and adjusted to 660 metric tons annually or 2.6 metric tons per capita (for 2030)* | | |
| Note: ROG = reactive organic gases, NO _x = nitrogen oxides, PM ₁₀ = course particulate matter or particulates with an aerodynamic diameter of 10 micrometers (µm) or less, PM _{2.5} = fine particulate matter or particulates with an aerodynamic diameter of 2.5µm or less. GHG = greenhouse gases. | | | |
| *BAAQMD does not have a recommended post-2020 GHG threshold. | | | |

Impact 1: Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less-than-significant.

The Bay Area is considered a non-attainment area for ground-level ozone and PM_{2.5} under both the Federal Clean Air Act and the California Clean Air Act. The area is also considered non-attainment for PM₁₀ under the California Clean Air Act, but not the federal act. The area has attained both State and federal ambient air quality standards for carbon monoxide. As part of an effort to attain and maintain ambient air quality standards for ozone and PM₁₀, the BAAQMD has established thresholds of significance for these air pollutants and their precursors. These thresholds are for ozone precursor pollutants (ROG and NO_x), PM₁₀, and PM_{2.5} and apply to both construction period and operational period impacts.

The California Emissions Estimator Model (CalEEMod) Version 2016.3.2 was used to estimate emissions from construction and operation of the site assuming full build-out of the project. The project land use types and size, and anticipated construction schedule were input to CalEEMod. The model output from CalEEMod is included as *Attachment 2*.

Construction Period Emissions

CalEEMod provides annual emission estimates for both on-site and off-site construction activities. On-site activities are primarily made up of construction equipment emissions, while off-site activity includes worker, hauling, and vendor traffic. The construction schedule, equipment quantities, and equipment usage were based on CalEEMod defaults for a project of this type and size. The default acreage was used to account for the underground parking and to capture the height of the hotel.

The following proposed project land uses were inputted into CalEEMod:

- 74 rooms entered as “Hotel”
- 6,294 square feet (sf) entered as “Strip Mall”
- 124 parking spaces entered as “Enclosed Parking with Elevator”

Based on the CalEEMod default construction schedule, the project would be built out over 13 months, beginning in January 2020. There were an estimated 270 construction workdays. Average daily emissions were computed by dividing the total construction emissions by the number of construction days. Table 2 shows average daily construction emissions of ROG, NO_x, PM₁₀ exhaust, and PM_{2.5} exhaust during construction of the project. As indicated in Table 2, predicted construction period emissions would not exceed the BAAQMD significance thresholds.

Table 2. Construction Period Emissions

| Scenario | ROG | NOx | PM ₁₀ Exhaust | PM _{2.5} Exhaust |
|---|---------------|----------------|--------------------------|---------------------------|
| Total construction emissions (tons) | 0.77 tons | 2.62 tons | 0.13 tons | 0.12 tons |
| Average daily emissions (pounds) ¹ | 5.74 lbs./day | 19.41 lbs./day | 0.94 lbs./day | 0.90 lbs./day |
| <i>BAAQMD Thresholds (pounds per day)</i> | 54 lbs./day | 54 lbs./day | 82 lbs./day | 54 lbs./day |
| Exceed Threshold? | No | No | No | No |
| Notes: ¹ Assumes 270 workdays. | | | | |

Additionally, construction activities, particularly during site preparation and grading, would temporarily generate fugitive dust in the form of PM₁₀ and PM_{2.5}. Sources of fugitive dust would include disturbed soils at the construction site and trucks carrying uncovered loads of soils. Unless properly controlled, vehicles leaving the site would deposit mud on local streets, which could be an additional source of airborne dust after it dries. The BAAQMD CEQA Air Quality Guidelines consider these impacts to be less-than-significant if best management practices are implemented to reduce these emissions. *Mitigation Measure AQ-1 would implement BAAQMD-recommended best management practices.*

Mitigation Measure AQ-1: Include measures to control dust and exhaust during construction.

During any construction period ground disturbance, the applicant shall ensure that the project contractor implement measures to control dust and exhaust. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less-than-significant level. Additional measures are identified to reduce construction equipment exhaust emissions. The contractor shall implement the following best management practices that are required of all projects:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
7. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
8. Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

Effectiveness of Mitigation Measure AQ-1

The measures included above would be consistent with BAAQMD-recommended basic control measures for reducing fugitive particulate matter that are contained in the BAAQMD CEQA Air Quality Guidelines.

Operational Period Emissions

Based on the BAAQMD operational-related criteria air pollutant screening level, the operational air quality emissions from this proposed hotel would not exceed the BAAQMD significance thresholds for criteria air pollutants and precursors. The project size is 74 rooms for a hotel and the screening size for a hotel is 489 rooms. Therefore, operational period emissions are assumed to be below the BAAQMD significance thresholds for criteria air pollutants and precursors.

Impact 2: Expose sensitive receptors to substantial pollutant concentrations? *Less-than-significant with mitigation.*

Project impacts related to increased community risk can occur either by introducing a new sensitive receptor, such as a residential use, in proximity to an existing source of TACs or by introducing a new source of TACs with the potential to adversely affect existing sensitive receptors in the project vicinity. The project would not introduce new residents that are sensitive receptors, nor would the project introduce a new TAC source. However, temporary project construction activity would generate dust and equipment exhaust on a temporary basis that could affect nearby sensitive receptors. Community risk impacts were addressed by increased predicting lifetime cancer risk, the increase in annual PM_{2.5} concentrations, and computing the Hazard Index (HI) for non-cancer health risks. The methodology for computing community risks impacts is contained in *Attachment 1*.

Construction Community Health Risk Impacts

Project Construction Activity

Construction equipment and associated heavy-duty truck traffic generates diesel exhaust are known as a TAC. These exhaust air pollutant emissions would not be considered to contribute substantially to existing or projected air quality violations. Construction exhaust emissions may still pose health risks for sensitive receptors such as surrounding residents. The primary community risk impact issues associated with construction emissions are cancer risk and exposure to PM_{2.5}. Diesel exhaust poses both a potential health and nuisance impact to nearby receptors. A health risk assessment of the project construction activities was conducted that evaluated potential health effects of sensitive receptors at these nearby residences from construction emissions of DPM and PM_{2.5}.⁴ Dispersion modeling was conducted to predict the off-site concentrations resulting from project construction, so that lifetime cancer risks and non-cancer health effects could be evaluated.

Construction Emissions

The CalEEMod model provided total annual PM₁₀ exhaust emissions (assumed to be DPM) for the off-road construction equipment and for exhaust emissions from on-road vehicles, with total emissions from all construction stages as 0.1252 tons (250 pounds). The on-road emissions are a result of haul truck travel during demolition and grading activities, worker travel, and vendor deliveries during construction. A trip length of one mile was used to represent vehicle travel while at or near the construction site. It was assumed that these emissions from on-road vehicles traveling at or near the site would occur at the construction site. Fugitive PM_{2.5} dust emissions were calculated by CalEEMod as 0.125 tons (25 pounds) for the overall construction period.

Dispersion Modeling

The U.S. EPA AERMOD dispersion model was used to predict concentrations of DPM and PM_{2.5} concentrations at sensitive receptors (residences) in the vicinity of the project construction area. The AERMOD dispersion model is a BAAQMD-recommended model for use in modeling analysis of these types of emission activities for CEQA projects.⁵ The modeling utilized four area sources to represent the on-site construction emissions, two for exhaust emissions and two for fugitive dust emissions. To represent the construction equipment exhaust emissions, an emission release height of 6 meters (19.7 feet) was used for the area source. The elevated source height reflects the height of the equipment exhaust pipes plus an additional distance for the height of the exhaust plume above the exhaust pipes to account for plume rise of the exhaust gases. For modeling fugitive PM_{2.5} emissions, a near-ground level release height of 2 meters (6.6 feet) was used for the area source. Emissions from the construction equipment and on-road vehicle travel were distributed throughout the modeled area sources. Construction emissions were modeled as occurring daily between 7 a.m. to 4 p.m.

⁴ DPM is identified by California as a toxic air contaminant due to the potential to cause cancer.

⁵ Bay Area Air Quality Management District (BAAQMD), 2012, *Recommended Methods for Screening and Modeling Local Risks and Hazards, Version 3.0*. May.

The modeling used a five-year data set (2009 - 2013) of hourly meteorological data from Napa County Airport prepared for use with the AERMOD model by the CARB. Annual DPM and PM_{2.5} concentrations from construction activities during the 2020 to 2021 period were calculated using the model. DPM and PM_{2.5} concentrations were calculated at nearby sensitive receptors as seen in Figure 1. A receptor height of 1.5 meters (5-foot) was used to represent the breathing heights of residents in nearby single-family residences.

Community Health Risk Construction Impacts

Figure 1 shows the locations where the maximum-modeled DPM and PM_{2.5} concentrations occurred. The maximum concentrations occurred at a single-family home (i.e. 1.5-meter receptor breathing height) adjacent to the western project boundary of parcel 2. The maximum increased cancer risk at the location of the maximally exposed individual (MEI) was calculated using the BAAQMD recommended methods and the maximum annual modeled DPM concentration. The cancer risk calculations are based on applying the BAAQMD recommended age sensitivity factors to the TAC concentrations. Age-sensitivity factors reflect the greater sensitivity of infants and small children to cancer causing TACs. BAAQMD-recommended exposure parameters were used for the cancer risk calculations, as described in *Attachment 1*. Third trimester, infant and adult exposures were assumed to occur at all residences through the entire construction period.

Figure 1. Project Construction Site and Locations of Off-Site Sensitive Receptors and TAC Impacts

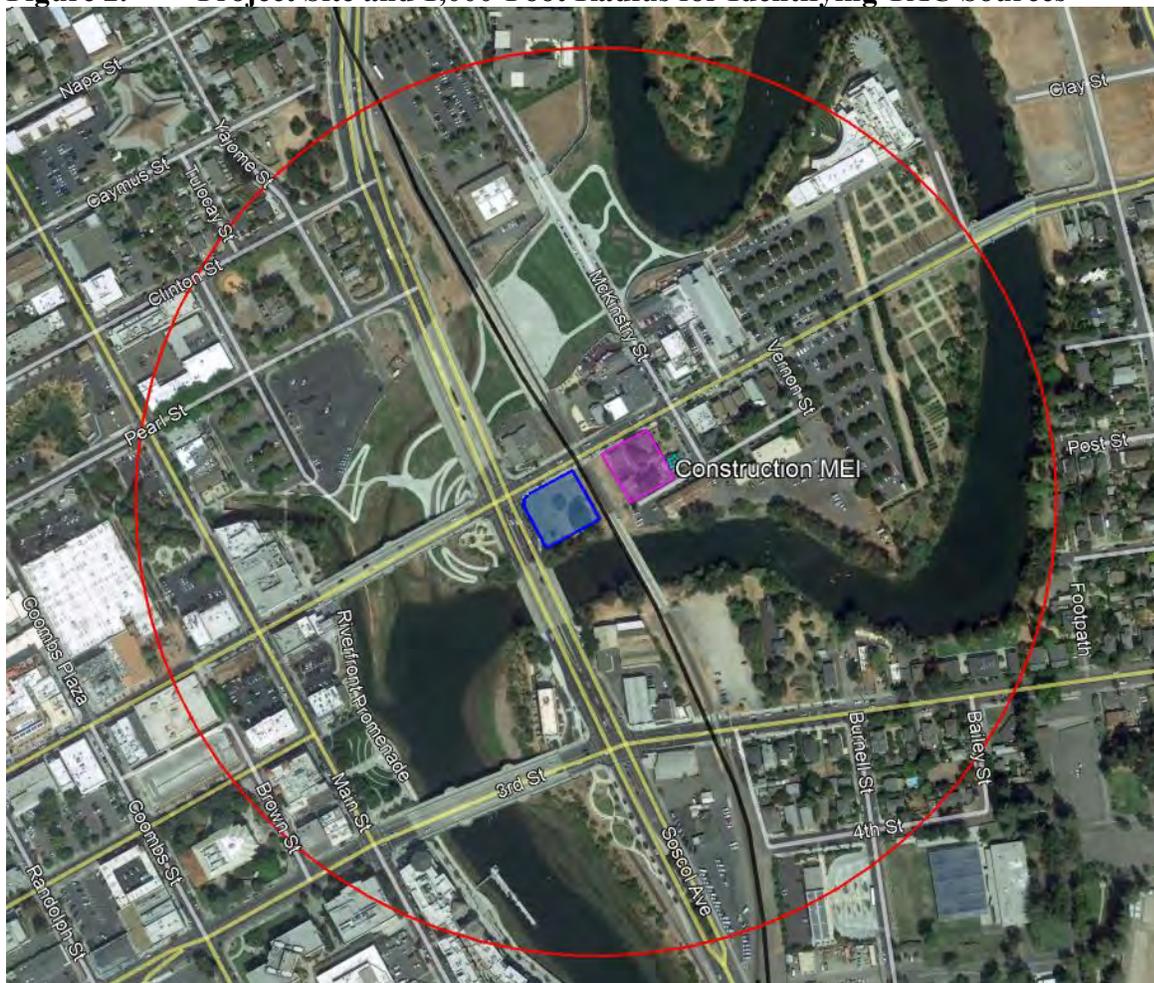

Results of this assessment indicated that the maximum excess residential cancer risks would exceed the BAAQMD significance threshold of greater than 10 in one million and the maximum annual $PM_{2.5}$ concentration would exceed the significance threshold of greater than $0.3 \mu\text{g}/\text{m}^3$. The maximum computed Hazard Index (HI) based on the DPM concentration would not exceed the significance threshold of greater than 1.0.

Cumulative Community Health Risk Impacts

Community health risk assessments typically look at all substantial sources of TACs located within 1,000 feet of project sites. These sources include highways, busy surface streets, and stationary sources identified by BAAQMD. A review of the project area indicates that traffic on Soscol Avenue is a busy roadway with an average daily traffic (ADT) of over 10,000 vehicles, which makes it a significant source of TACs. All other roadways within the area are assumed to have an ADT that is less than 10,000 vehicles. A review of BAAQMD's stationary source Google Earth map tool identified no sources with the potential to affect the project site. Figure 2 shows the sources affecting the project site. Details of the modeling and community risk calculations are included in *Attachment 4*.

Figure 2. Project Site and 1,000-Foot Radius for Identifying TAC Sources

Local Roadways

For local roadways, BAAQMD has provided the *Roadway Screening Analysis Calculator* to assess whether roadways with traffic volumes of over 10,000 vehicles per day may have a potentially significant effect on a proposed project. Two adjustments were made to the cancer risk predictions made by this calculator: (1) adjustment for latest vehicle emissions rates predicted using EMFAC2014 and (2) adjustment of cancer risk to reflect new Office of Environmental Health Hazard Assessment (OEHHA) guidance (see *Attachment 1*).

The calculator uses EMFAC2011 emission rates for the year 2014. Overall, emission rates will decrease by the time the project is constructed and occupied. In addition, a new version of the emissions factor model, EMFAC2014 is available. This version predicts lower emission rates. An adjustment factor of 0.5 was developed by comparing emission rates of total organic gases (TOG) for running exhaust and running losses developed using EMFAC2011 for year 2014 and those from EMFAC2014 for 2018.

The predicted cancer risk was then adjusted using a factor of 1.3744 to account for new OEHHA guidance. This factor was provided by BAAQMD for use with their CEQA screening tools that are used to predict cancer risk.

The ADT on Soscol Avenue was estimated to be 19,055 vehicles. This estimate was based past project traffic volumes for both roadways.⁶ The AM and PM peak-hour volumes were averaged and then multiplied by 10 to estimate the ADT.

The BAAQMD *Roadway Screening Analysis Calculator* for Napa County was used for the roadways. Soscol Avenue was identified as a north-south roadway with the Construction MEI east of the roadway. Estimated risk values for both roadways are listed in Table 4. Note that BAAQMD has found that non-cancer hazards (HI) from all local roadways would be below 0.03.

Stationary Sources

Permitted stationary sources of air pollution near the project site were identified using BAAQMD's *Stationary Source Risk & Hazard Analysis Tool*. This mapping tool uses Google Earth and identifies stationary sources and their estimated risk and hazard impacts. No stationary sources were identified using this tool.

Napa Wine Train

The Napa Wine Train, which previously utilized the adjacent railroad track, now travels primarily between the new Napa Train Station (north of the site) and Saint Helena. Approximately 4 to 6 passenger trains per day travel the new route, with only occasional daytime trains traveling south of the Napa Train Station to the portion of the track near the site. The tracks are not used by other commuter or freight trains. Some of the train locomotives are diesel

⁶ W-Trans. 2018. *Traffic Impact Study for the First and Oxbow Hotel Project*. November.

powered and emit DPM. However, cancer risk and incremental PM_{2.5} emissions are expected to be insignificant from a cumulative standpoint due to the train's limited travel.

Cumulative Risk Impact on Construction MEI

Table 3 reports both the project and cumulative community risk impacts at the construction MEI. Without mitigation, the project would have a *significant* impact with respect to community risk caused by project construction activities, since the maximum cancer risk and maximum annual PM_{2.5} concentration exceed their respective single-source thresholds. As mentioned above, *Mitigation Measure AQ-2 would reduce these impacts to less-than-significant*. The combined annual cancer risk, PM_{2.5} concentration and Hazard risk values, which includes unmitigated and mitigated, would not exceed the cumulative threshold and have a *less-than-significant impact*.

Table 3. Impacts from Combined Sources at Construction MEI

| Source | Maximum Cancer Risk (per million) | PM _{2.5} concentration (µg/m ³) | Hazard Index |
|---|-----------------------------------|--|------------------------|
| Project Construction | Unmitigated | 61.6 (infant) | 0.47 |
| | Mitigated | 7.8 (infant) | 0.09 |
| <i>BAAQMD Single-Source Threshold</i> | <i>>10.0</i> | <i>>0.3</i> | <i>>1.0</i> |
| <i>Significant?</i> | | | |
| | Unmitigated | <i>Yes</i> | <i>Yes</i> |
| | Mitigated | <i>No</i> | <i>No</i> |
| Soscol Avenue (north-south roadway) with MEI 80 feet east, ADT 19,830 | 1.1 | 0.04 | <0.03 |
| <i>Combined Sources</i> | Unmitigated | 62.7 (infant) | 0.51 |
| | Mitigated | 8.9 (infant) | 0.13 |
| <i>BAAQMD Cumulative Source Threshold</i> | <i>>100</i> | <i>>0.8</i> | <i>>10.0</i> |
| <i>Significant?</i> | | | |
| | Unmitigated | <i>No</i> | <i>No</i> |
| | Mitigated | <i>No</i> | <i>No</i> |

Mitigation Measure AQ-2: Selection of equipment during construction to minimize emissions. Such equipment selection would include the following:

The project shall develop a plan demonstrating that the off-road equipment used on-site to construct the project would achieve a fleet-wide average 84-percent reduction in DPM exhaust emissions or greater. One feasible plan to achieve this reduction would include the following:

1. All diesel-powered off-road equipment, larger than 25 horsepower, operating on the site for more than two days continuously shall, at a minimum, meet U.S. EPA particulate matter emissions standards for Tier 3 engines and this equipment shall include CARB-certified Level 3 Diesel Particulate Filters⁷ or equivalent.

⁷ See <http://www.arb.ca.gov/diesel/verdev/vt/cvt.htm>

Additionally, equipment that meets U.S. EPA Tier 4 interim standards or use of equipment that is electrically powered or uses non-diesel fuels would meet this requirement.

Effectiveness of Mitigation AQ-2

With mitigation, the computed maximum increased lifetime residential cancer risk from construction, assuming infant exposure, would be 7.8 in one million or less, the maximum annual PM_{2.5} concentration would be 0.09 µg/m³, and the HI would be 0.01. As a result, impacts would be reduced to *less-than-significant* with respect to community risk caused by construction activities.

Greenhouse Gas Emissions

Setting

Gases that trap heat in the atmosphere, GHGs, regulate the earth's temperature. This phenomenon, known as the greenhouse effect, is responsible for maintaining a habitable climate. The most common GHGs are carbon dioxide (CO₂) and water vapor but there are also several others, most importantly methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF₆). These are released into the earth's atmosphere through a variety of natural processes and human activities. Sources of GHGs are generally as follows:

- CO₂ and N₂O are byproducts of fossil fuel combustion.
- N₂O is associated with agricultural operations such as fertilization of crops.
- CH₄ is commonly created by off-gassing from agricultural practices (e.g., keeping livestock) and landfill operations.
- Chlorofluorocarbons (CFCs) were widely used as refrigerants, propellants, and cleaning solvents but their production has been stopped by international treaty.
- HFCs are now used as a substitute for CFCs in refrigeration and cooling.
- PFCs and sulfur hexafluoride emissions are commonly created by industries such as aluminum production and semi-conductor manufacturing.

Each GHG has its own potency and effect upon the earth's energy balance. This is expressed in terms of a global warming potential (GWP), with CO₂ being assigned a value of 1 and sulfur hexafluoride being several orders of magnitude stronger. In GHG emission inventories, the weight of each gas is multiplied by its GWP and is measured in units of CO₂ equivalents (CO₂e).

An expanding body of scientific research supports the theory that global climate change is currently affecting changes in weather patterns, average sea level, ocean acidification, chemical reaction rates, and precipitation rates, and that it will increasingly do so in the future. The climate and several naturally occurring resources within California are adversely affected by the global warming trend. Increased precipitation and sea level rise will increase coastal flooding, saltwater intrusion, and degradation of wetlands. Mass migration and/or loss of plant and animal species could also occur. Potential effects of global climate change that could adversely affect human health include more extreme heat waves and heat-related stress; an increase in climate-sensitive diseases; more frequent and intense natural disasters such as flooding, hurricanes and drought; and increased levels of air pollution.

Recent Regulatory Actions

Assembly Bill 32 (AB 32), California Global Warming Solutions Act (2006)

AB 32, the Global Warming Solutions Act of 2006, codified the State's GHG emissions target by directing CARB to reduce the State's global warming emissions to 1990 levels by 2020. AB 32 was signed and passed into law by Governor Schwarzenegger on September 27, 2006. Since that time, the CARB, CEC, California Public Utilities Commission (CPUC), and Building

Standards Commission have all been developing regulations that will help meet the goals of AB 32 and Executive Order S-3-05.

A Scoping Plan for AB 32 was adopted by CARB in December 2008. It contains the State's main strategies to reduce GHGs from business-as-usual emissions projected in 2020 back down to 1990 levels. Business-as-usual (BAU) is the projected emissions in 2020, including increases in emissions caused by growth, without any GHG reduction measures. The Scoping Plan has a range of GHG reduction actions, including direct regulations, alternative compliance mechanisms, monetary and non-monetary incentives, voluntary actions, and market-based mechanisms such as a cap-and-trade system.

As directed by AB 32, CARB has also approved a statewide GHG emissions limit. On December 6, 2007, CARB staff resolved an amount of 427 million metric tons (MMT) of CO₂e as the total statewide GHG 1990 emissions level and 2020 emissions limit. The limit is a cumulative statewide limit, not a sector- or facility-specific limit. CARB updated the future 2020 BAU annual emissions forecast, in light of the economic downturn, to 545 MMT of CO₂e. Two GHG emissions reduction measures currently enacted that were not previously included in the 2008 Scoping Plan baseline inventory were included, further reducing the baseline inventory to 507 MMT of CO₂e. Thus, an estimated reduction of 80 MMT of CO₂e is necessary to reduce statewide emissions to meet the AB 32 target by 2020.

Senate Bill 375, California's Regional Transportation and Land Use Planning Efforts (2008)

California enacted legislation (SB 375) to expand the efforts of AB 32 by controlling indirect GHG emissions caused by urban sprawl. SB 375 provides incentives for local governments and applicants to implement new conscientiously planned growth patterns. This includes incentives for creating attractive, walkable, and sustainable communities and revitalizing existing communities. The legislation also allows applicants to bypass certain environmental reviews under CEQA if they build projects consistent with the new sustainable community strategies. Development of more alternative transportation options that would reduce vehicle trips and miles traveled, along with traffic congestion, would be encouraged. SB 375 enhances CARB's ability to reach the AB 32 goals by directing the agency in developing regional GHG emission reduction targets to be achieved from the transportation sector for 2020 and 2035. CARB works with the metropolitan planning organizations (e.g. Association of Bay Area Governments [ABAG] and Metropolitan Transportation Commission [MTC]) to align their regional transportation, housing, and land use plans to reduce vehicle miles traveled and demonstrate the region's ability to attain its GHG reduction targets. A similar process is used to reduce transportation emissions of ozone precursor pollutants in the Bay Area.

SB 350 Renewable Portfolio Standards

In September 2015, the California Legislature passed SB 350, which increases the states Renewables Portfolio Standard (RPS) for content of electrical generation from the 33 percent target for 2020 to 50 percent renewables target by 2030.

Executive Order EO-B-30-15 (2015) and SB 32 GHG Reduction Targets

In April 2015, Governor Brown signed Executive Order which extended the goals of AB 32, setting a greenhouse gas emissions target at 40 percent of 1990 levels by 2030. On September 8, 2016, Governor Brown signed SB 32, which legislatively established the GHG reduction target of 40 percent of 1990 levels by 2030. In November 2017, CARB issued *California's 2017 Climate Change Scoping Plan*. While the State is on track to exceed the AB 32 scoping plan 2020 targets, this plan is an update to reflect the enacted SB 32 reduction target.

SB 32 was passed in 2016, which codified a 2030 GHG emissions reduction target of 40 percent below 1990 levels. CARB is currently working on a second update to the Scoping Plan to reflect the 2030 target set by Executive Order B-30-15 and codified by SB 32. The proposed Scoping Plan Update was published on January 20, 2017 as directed by SB 32 companion legislation AB 197. The mid-term 2030 target is considered critical by CARB on the path to obtaining an even deeper GHG emissions target of 80 percent below 1990 levels by 2050, as directed in Executive Order S-3-05. The Scoping Plan outlines the suite of policy measures, regulations, planning efforts, and investments in clean technologies and infrastructure, providing a blueprint to continue driving down GHG emissions and obtain the statewide goals.

The new Scoping Plan establishes a strategy that will reduce GHG emissions in California to meet the 2030 target (note that the AB 32 Scoping Plan only addressed 2020 targets and a long-term goal). Key features of this plan are:

- Cap and Trade program places a firm limit on 80 percent of the State's emissions;
- Achieving a 50-percent Renewable Portfolio Standard by 2030 (currently at about 29 percent statewide);
- Increase energy efficiency in existing buildings;
- Develop fuels with an 18-percent reduction in carbon intensity;
- Develop more high-density, transit-oriented housing;
- Develop walkable and bikable communities;
- Greatly increase the number of electric vehicles on the road and reduce oil demand in half;
- Increase zero-emissions transit so that 100 percent of new buses are zero emissions;
- Reduce freight-related emissions by transitioning to zero emissions where feasible and near-zero emissions with renewable fuels everywhere else; and
- Reduce "super pollutants" by reducing methane and hydrofluorocarbons or HFCs by 40 percent.

In the updated Scoping Plan, CARB recommends statewide targets of no more than 6 metric tons CO_{2e} per capita (statewide) by 2030 and no more than 2 metric tons CO_{2e} per capita by 2050. The statewide per capita targets account for all emissions sectors in the State, statewide population forecasts, and the statewide reductions necessary to achieve the 2030 statewide target under SB 32 and the longer-term State emissions reduction goal of 80 percent below 1990 levels by 2050.

Significance Thresholds

The BAAQMD's CEQA Air Quality Guidelines recommended a GHG threshold of 1,100 metric tons or 4.6 metric tons (MT) per capita. These thresholds were developed based on meeting the 2020 GHG targets set in the scoping plan that addressed AB 32. However, development and operation of the project would occur post-2020. Therefore, this assessment uses a bright-line threshold of 660 MT CO_{2e}/year based on the GHG reduction goals of EO B-30-15. The 2030 bright-line threshold is a 40 percent reduction of the 2020 1,100 MT CO_{2e}/year threshold.

Impact 1: Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?
Potentially Significant

GHG emissions associated with development of the proposed project would occur over the short-term from construction activities, consisting primarily of emissions from equipment exhaust and worker and vendor trips. There would also be long-term operational emissions associated with vehicular traffic within the project vicinity, energy and water usage, and solid waste disposal. Emissions for the proposed project are discussed below and were analyzed using the methodology recommended in the BAAQMD CEQA Air Quality Guidelines.

CalEEMod Modeling

Land Uses

The same project land uses as described above for the construction period modeling were used.

Model Year

Emissions associated with vehicle travel depend on the year of analysis because emission control technology requirements are phased-in over time. Therefore, the earlier the year analyzed in the model, the higher the emission rates utilized by CalEEMod. The earliest the project could possibly be constructed and begin operating would be 2022. Emissions associated with build-out later than 2022 would be lower.

Trip Generation Rates

CalEEMod allows the user to enter specific vehicle trip generation rates, which were input to the model using the daily trip generation rate provided in the project trip generation table. The Saturday and Sunday trip rates were assumed to be the weekday rate adjusted by multiplying the ratio of the CalEEMod default rates for Saturday and Sunday trips.

The project applicant provided project trip generation values for the proposed residential project.⁸ The weekday trip rate used for the project was 8.36 trips per day based on 619 hotel trips divided by 74 rooms. This changed the Saturday trip rate to 8.38 trips per day and the Sunday rate to 6.09 trips per day. For the shopping center, the weekday trip rate used was 34.16

⁸ W-trans, 2018, *Traffic Impact Study for the First and Oxbow Hotel Project*. November

trips per day based on 215 shopping center trips divided by 6.294 ksf. This changed the Saturday trip rate to 32.40 trips per day and the Sunday trip rate to 15.75 trips per day.

Energy

CalEEMod defaults for energy use were used, which include the 2016 Title 24 Building Standards. Indirect emissions from electricity were computed in CalEEMod. The model has a default rate of 641.3 pounds of CO₂ per megawatt of electricity produced, which is based on PG&E's 2008 emissions rate. The rate was adjusted to account for PG&E's projected 2020 CO₂ intensity rate. This 2020 rate is based, in part, on the requirement of a renewable energy portfolio standard of 33 percent by the year 2020. The derived 2020 rate for PG&E was estimated at 290 pounds of CO₂ per megawatt of electricity delivered.⁹

Other Inputs

Default model assumptions for emissions associated with solid waste generation and water/wastewater use were applied to the project. Water/wastewater use were changed to 100% aerobic conditions to represent wastewater treatment plant conditions.

Construction GHG Emissions

GHG emissions associated with construction were computed to be 379 MT of CO_{2e} for the total construction period. These are the emissions from on-site operation of construction equipment, vendor and hauling truck trips, and worker trips. Neither the City nor BAAQMD have an adopted threshold of significance for construction-related GHG emissions, though BAAQMD recommends quantifying emissions and disclosing that GHG emissions would occur during construction. BAAQMD also encourages the incorporation of best management practices to reduce GHG emissions during construction where feasible and applicable.

Operational GHG Emissions

The CalEEMod model, along with the project vehicle trip generation rates, were used to estimate daily emissions associated with operation of the fully-developed site under the proposed project. As shown in Table 4, the annual emissions resulting from operation of the proposed project are predicted to be 948 MT of CO_{2e} for the year 2022 and 827 MT of CO_{2e} for the year 2030. The 2030 metric ton GHG total exceeds the bright-line threshold of 660. *Mitigation Measure GHG-1* list several ways the project could potentially reduce their total GHG emissions to a *less-than-significant* level.

⁹ Pacific Gas & Electric, 2015. *Greenhouse Gas Emission Factors: Guidance for PG&E Customers*. November.

Table 4. Annual Project GHG Emissions (CO_{2e}) in Metric Tons

| Source Category | Proposed Project in 2022 | Proposed Project in 2030 |
|-----------------------------------|--------------------------|-------------------------------|
| Area | <1 | <1 |
| Energy Consumption | 312 | 312 |
| Mobile | 609 | 488 |
| Solid Waste Generation | 23 | 23 |
| Water Usage | 3 | 3 |
| Total (MT CO _{2e} /year) | 948 | 827 |
| Bright-line 2030 Threshold | | <i>660 MT CO_{2e}</i> |
| <i>Significant?</i> | | <i>Yes</i> |

Mitigation Measure GHG-1: Develop and Implement Greenhouse Gas Reduction Plan

A GHG reduction plan that includes the proper elements would reduce emissions from implementation of the Plan shall be developed. Elements of this plan may include, but would not be limited to, the following:

- Installation of solar power systems or other renewable electric generating systems that provide electricity to power on-site equipment and possibly provide excess electric power;
- Install efficient space and water heating systems;
- Develop and implement a transportation demand management (TDM) program to further reduce mobile GHG emissions.
- Construct onsite or fund off-site carbon sequestration projects (such as a forestry or wetlands projects for which inventory and reporting protocols have been adopted). If the project develops an off-site project, it must be registered with the Climate Action Reserve or otherwise approved by the BAAQMD in order to be used to offset Project emissions;
- Purchase of carbon credits to offset Project annual emissions. Carbon offset credits must be verified and registered with The Climate Registry, the Climate Action Reserve, or another source approved by the California Air Resources Board or BAAQMD. The preference for offset carbon credit purchases include those that can be achieved as follows: 1) within the City; 2) within the San Francisco Bay Area Air Basin; 3) within the State of California; then 4) elsewhere in the United States. Provisions of evidence of payments, and funding of an escrow-type account or endowment fund would be overseen by the County.

Effectiveness of Mitigation GHG-1

With this mitigation, the GHG emissions should be demonstrated to be below the 2030 thresholds. A refined analysis that incorporates final design features and utilizes the current tools for inclusion of State and local adopted measures for predicting GHG emissions should demonstrate lower emissions that do not exceed the 2030 project bright-line emission thresholds.

Supporting Documentation

Attachment 1 is the methodology used to compute community risk impacts, including the methods to compute lifetime cancer risk from exposure to project emissions.

Attachment 2 includes the CalEEMod model outputs.

Attachment 3 is the construction health risk assessment. AERMOD dispersion modeling files for this assessment, which are quite voluminous, are available upon request and would be provided in digital format.

Attachment 4 includes the screening community risk calculations from sources affecting the construction MEI.

Attachment 1: Health Risk Calculation Methodology

A health risk assessment (HRA) for exposure to Toxic Air Contaminates (TACs) requires the application of a risk characterization model to the results from the air dispersion model to estimate potential health risk at each sensitive receptor location. The State of California Office of Environmental Health Hazard Assessment (OEHHA) and California Air Resources Board (CARB) develop recommended methods for conducting health risk assessments. The most recent OEHHA risk assessment guidelines were published in February of 2015.¹⁰ These guidelines incorporate substantial changes designed to provide for enhanced protection of children, as required by State law, compared to previous published risk assessment guidelines. CARB has provided additional guidance on implementing OEHHA's recommended methods.¹¹ This HRA used the 2015 OEHHA risk assessment guidelines and CARB guidance. The BAAQMD has adopted recommended procedures for applying the newest OEHHA guidelines as part of Regulation 2, Rule 5: New Source Review of Toxic Air Contaminants.¹² Exposure parameters from the OEHHA guidelines and the recent BAAQMD HRA Guidelines were used in this evaluation.

Cancer Risk

Potential increased cancer risk from inhalation of TACs are calculated based on the TAC concentration over the period of exposure, inhalation dose, the TAC cancer potency factor, and an age sensitivity factor to reflect the greater sensitivity of infants and children to cancer causing TACs. The inhalation dose depends on a person's breathing rate, exposure time and frequency and duration of exposure. These parameters vary depending on the age, or age range, of the persons being exposed and whether the exposure is considered to occur at a residential location or other sensitive receptor location.

The current OEHHA guidance recommends that cancer risk be calculated by age groups to account for different breathing rates and sensitivity to TACs. Specifically, they recommend evaluating risks for the third trimester of pregnancy to age zero, ages zero to less than two (infant exposure), ages two to less than 16 (child exposure), and ages 16 to 70 (adult exposure). Age sensitivity factors (ASFs) associated with the different types of exposure are an ASF of 10 for the third trimester and infant exposures, an ASF of 3 for a child exposure, and an ASF of 1 for an adult exposure. Also associated with each exposure type are different breathing rates, expressed as liters per kilogram of body weight per day (L/kg-day). As recommended by the BAAQMD for residential exposures, 95th percentile breathing rates are used for the third trimester and infant exposures, and 80th percentile breathing rates for child and adult exposures. For children at schools and daycare facilities, BAAQMD recommends using the 95th percentile breathing rates. Additionally, CARB and the BAAQMD recommend the use of a residential exposure duration of 30 years for sources with long-term emissions (e.g., roadways). For workers, assumed to be adults, a 25-year exposure period is recommended by the BAAQMD.

¹⁰ OEHHA, 2015. *Air Toxics Hot Spots Program Risk Assessment Guidelines, The Air Toxics Hot Spots Program Guidance Manual for Preparation of Health Risk Assessments*. Office of Environmental Health Hazard Assessment. February.

¹¹ CARB, 2015. *Risk Management Guidance for Stationary Sources of Air Toxics*. July 23.

¹² BAAQMD, 2016. *BAAQMD Air Toxics NSR Program Health Risk Assessment (HRA) Guidelines*. December 2016.

Under previous OEHHA and BAAQMD HRA guidance, residential receptors are assumed to be at their home 24 hours a day, or 100 percent of the time. In the 2015 Risk Assessment Guidance, OEHHA includes adjustments to exposure duration to account for the fraction of time at home (FAH), which can be less than 100 percent of the time, based on updated population and activity statistics. The FAH factors are age-specific and are: 0.85 for third trimester of pregnancy to less than 2 years old, 0.72 for ages 2 to less than 16 years, and 0.73 for ages 16 to 70 years. Use of the FAH factors is allowed by the BAAQMD if there are no schools in the project vicinity that would have a cancer risk of one in a million or greater assuming 100 percent exposure (FAH = 1.0).

Functionally, cancer risk is calculated using the following parameters and formulas:

$$\text{Cancer Risk (per million)} = \text{CPF} \times \text{Inhalation Dose} \times \text{ASF} \times \text{ED/AT} \times \text{FAH} \times 10^6$$

Where:

- CPF = Cancer potency factor (mg/kg-day)⁻¹
- ASF = Age sensitivity factor for specified age group
- ED = Exposure duration (years)
- AT = Averaging time for lifetime cancer risk (years)
- FAH = Fraction of time spent at home (unitless)

$$\text{Inhalation Dose} = C_{\text{air}} \times \text{DBR} \times A \times (\text{EF}/365) \times 10^{-6}$$

Where:

- C_{air} = concentration in air (µg/m³)
- DBR = daily breathing rate (L/kg body weight-day)
- A = Inhalation absorption factor
- EF = Exposure frequency (days/year)
- 10⁻⁶ = Conversion factor

The health risk parameters used in this evaluation are summarized as follows:

| Parameter | Exposure Type → | Infant | | Child | | Adult |
|--|-----------------|---------------------------|----------|----------|----------|----------|
| | Age Range → | 3 rd Trimester | 0<2 | 2 < 9 | 2 < 16 | 16 - 30 |
| DPM Cancer Potency Factor (mg/kg-day) ⁻¹ | | 1.10E+00 | 1.10E+00 | 1.10E+00 | 1.10E+00 | 1.10E+00 |
| Daily Breathing Rate (L/kg-day) 80 th Percentile Rate | | 273 | 758 | 631 | 572 | 261 |
| Daily Breathing Rate (L/kg-day) 95 th Percentile Rate | | 361 | 1,090 | 861 | 745 | 335 |
| Inhalation Absorption Factor | | 1 | 1 | 1 | 1 | 1 |
| Averaging Time (years) | | 70 | 70 | 70 | 70 | 70 |
| Exposure Duration (years) | | 0.25 | 2 | 14 | 14 | 14 |
| Exposure Frequency (days/year) | | 350 | 350 | 350 | 350 | 350 |
| Age Sensitivity Factor | | 10 | 10 | 3 | 3 | 1 |
| Fraction of Time at Home | | 0.85-1.0 | 0.85-1.0 | 0.72-1.0 | 0.72-1.0 | 0.73 |

Non-Cancer Hazards

Potential non-cancer health hazards from TAC exposure are expressed in terms of a hazard index (HI), which is the ratio of the TAC concentration to a reference exposure level (REL). OEHHA has defined acceptable concentration levels for contaminants that pose non-cancer health hazards. TAC concentrations below the REL are not expected to cause adverse health impacts, even for sensitive individuals. The total HI is calculated as the sum of the HIs for each TAC evaluated and the total HI is compared to the BAAQMD significance thresholds to determine whether a significant non-cancer health impact from a project would occur.

Typically, for residential projects located near roadways with substantial TAC emissions, the primary TAC of concern with non-cancer health effects is diesel particulate matter (DPM). For DPM, the chronic inhalation REL is 5 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$).

Annual PM_{2.5} Concentrations

While not a TAC, fine particulate matter (PM_{2.5}) has been identified by the BAAQMD as a pollutant with potential non-cancer health effects that should be included when evaluating potential community health impacts under the California Environmental Quality Act (CEQA). The thresholds of significance for PM_{2.5} (project level and cumulative) are in terms of an increase in the annual average concentration. When considering PM_{2.5} impacts, the contribution from all sources of PM_{2.5} emissions should be included. For projects with potential impacts from nearby local roadways, the PM_{2.5} impacts should include those from vehicle exhaust emissions, PM_{2.5} generated from vehicle tire and brake wear, and fugitive emissions from re-suspended dust on the roads.

**First and Oxbow Hotel, Napa, CA - Construction Impacts - Without Mitigation
Maximum DPM Cancer Risk and PM2.5 Calculations From Construction
Impacts at Off-Site MEI Location - 1.5 meter receptor height**

Cancer Risk (per million) = CPF x Inhalation Dose x ASF x ED/AT x FAH x 1.0E6

Where: CPF = Cancer potency factor (mg/kg-day)⁻¹
 ASF = Age sensitivity factor for specified age group
 ED = Exposure duration (years)
 AT = Averaging time for lifetime cancer risk (years)
 FAH = Fraction of time spent at home (unitless)

Inhalation Dose = C_{air} x DBR x A x (EF/365) x 10⁻⁶

Where: C_{air} = concentration in air (µg/m³)
 DBR = daily breathing rate (L/kg body weight-day)
 A = Inhalation absorption factor
 EF = Exposure frequency (days/year)
 10⁻⁶ = Conversion factor

Attachment 4: Screening Community Risk Calculations

Bay Area Air Quality Management District

Roadway Screening Analysis Calculator

County specific tables containing estimates of risk and hazard impacts from roadways in the Bay Area.

INSTRUCTIONS:

Input the site-specific characteristics of your project by using the drop down menu in the "Search Parameter" box. We recommend that this analysis be used for roadways with 10,000 AADT and above.

- County: Select the County where the project is located. The calculator is only applicable for projects within the nine Bay Area counties.
- Roadway Direction: Select the orientation that best matches the roadway. If the roadway orientation is neither clearly north-south nor east-west, use the highest values predicted from either orientation.
- Side of the Roadway: Identify on which side of the roadway the project is located.
- Distance from Roadway: Enter the distance in feet from the nearest edge of the roadway to the project site. The calculator estimates values for distances greater than 10 feet and less than 1000 feet. For distances greater than 1000 feet, the user can choose to extrapolate values using a distribution curve or apply 1000 feet values for greater distances.
- Annual Average Daily Traffic (ADT): Enter the annual average daily traffic on the roadway. These data may be collected from the city or the county (if the area is unincorporated).

When the user has completed the data entries, the screening level PM2.5 annual average concentration and the cancer risk results will appear in the Results Box on the right. Please note that the roadway tool is not applicable for California State Highways and the District refers the user to the Highway Screening Analysis Tool at: <http://www.baaqmd.gov/Divisions/Planning-and-Research/CEQA-GUIDELINES/Tools-and-Methodology.aspx>.

Soscol Avenue, MEI

Cumulative plus project volumes from traffic report
Data for Napa County based on meteorological data collected from Napa Sewage Treatment Plant in 2005

Adjusted for 2015 OEHHA and EMFAC2014 for 2018

1.07

(per million)

Note that EMFAC2014 predicts DSL PM2.5 aggregate rates in 2018 that are 46% of EMFAC2011 for 2014. TOG gasoline rates are 56% of EMFAC2011 year 2014 rates. This is for light- and medium-duty vehicles traveling at 30 mph for Bay Area

Notes and References:

1. Emissions were developed using EMFAC2011 for fleet mix in 2014 assuming 10,000 AADT and includes impacts from diesel and gasoline vehicle exhaust, brake and tire wear, and resuspended dust.
2. Roadways were modeled using CALINE4 Cal3qhc air dispersion model assuming a source length of one kilometer. Meteorological data used to estimate the screening values are noted at the bottom of the "Results" box.
3. Cancer risks were estimated for 70 year lifetime exposure starting in 2014 that includes sensitivity values for early life exposures and OEHHA toxicity values adopted in 2013.

**RE: First and Oxbow Project; Napa, California
Assessment of Riparian Area**

Dear Mr. Sill:

At your request, I reviewed the above referenced project site and the riparian zone adjacent to the Napa River on February 6, 2018. I was also provided a report entitled "Riparian Area Assessment: Parcels 003-235-003, 006, 007; 1st St. and Soscol Ave., Napa CA" by Phill Blake of your office.

After reviewing the site and the report, I concur with the report's conclusions and the mapping of the riparian zone. The riparian zone within the project site is dominated by live oak (*Quercus agrifolia*), willow (*Salix sp.*) and cottonwood (*Populus fremontii*) and also contains non-native acacia (*Acacia melanoxyon*). The understory of the riparian zone is dominated by non-native smilo grass (*Piptatherum miliaceum*).

The riparian vegetation is associated with trees along the bank slope and the hinge at the top of the slope and extends to the edge of these trees and their canopy. The large live oak on the project site, however, is located within the area of fill soils in the uplands outside of this zone. This fill area appears to have once supported a structure and there are a number of trees associated with the upland fill area that are well outside of the riparian zone as well. The canopy of this large live oak is directly adjacent to the riparian canopy, but does not overlap it (**See Photo 1**). However, even if it did, the riparian zone as mapped is consistent with the width of the band of riparian vegetation along the north side of the Napa River in this area. This riparian

zone, as noted, is equivalent to the vegetation along the bank from the toe to the hinge and their canopies.

Photo 1: View of the riparian zone vegetation with its limits near the top of the bank of the Napa River on the right-hand side of the photo and the large live oak (*Quercus agrifolia*) on the left-hand side of the photo within the area of upland fill and outside of the riparian zone. Note that the canopies of the large live oak and the riparian vegetation at the top of the bank do not overlap. February 6, 2018

Further, the large live oak also does not appear to be in the same age class as the existing live oaks and other trees that are associated with the riparian zone of this section of the Napa River.

In short, the riparian zone in the report appears to be mapped correctly and the remaining trees on the property, including the large live oak, are all outside of the riparian zone.

Please let me know if you have any questions in regards to our evaluation of the riparian zone on the project site.

Sincerely,

Sean Micallef
Partner-Chief Ecologist

Enclosure

Napa Riparian Evaluation 2-8-18

September 28, 2016 – DRAFT

731 First Street & 718 Water Street, Napa Historical and Historic Project Evaluation

Introduction

The purpose of this documentation is to summarize historic resource status of the subject properties and to evaluate a currently proposed project with respect to applicable historic rehabilitation standards. The subject properties are located on the block bound by First Street (north), Water Street (south), McKinstry Street (east), and Soscol Avenue (west), yet which is further subdivided into east and west portions by north-south running railroad tracks. The portion east of the tracks houses the subject buildings and their parcels, with 731 Water Street on lot 6 and 718 Water Street on lot 6 of block 3241 (figs.1-3).

The buildings at 731 First St. and 718 Water St. have been previously identified by the City of Napa as *Local Landmarks (LLMs)*. The two buildings were also previously identified by the City as a *Neighborhood Conservation Property (NCR)*. Both such listings require Certificates of Appropriateness (CofA) for any substantial construction visible from a public way; substantial alteration or addition visible from a public way; and demolition of a building or structure. Thus, the current effort was requested and aims to provide requisite historic resource evaluation of the buildings and of a related, proposed project.

Summary Histories and Descriptions

731 First Street (figs.4-8)

The 731 First St. property houses a 1 to 1-1/2 story commercial building (figs.1-2) that was a residence from its origins c1880 until the 1970s. Based on news archives, the last identified residential occupant was in 1972 (*Napa Register*, Sept. 4, 1972). Likewise, record of the first commercial occupant was in 1982 (*Napa Register*, Sept. 22, 1982). In both cases, the uses were evidently somewhat later and earlier, respectively, so at this juncture it appears that the former house was converted to commercial use c1980. The commercial uses under several business names and owners were all clothes cleaning and sewing from c1980 to c2015. As noted, the building is presently vacant. (No specific records have been searched to identify specific alterations, as the primary circumstances surrounding the subject building are plainly evident.)

In 1950, as depicted in a Sanborn map, the house was a small residence consisting of a main north-south structure with an east side gabled wing, a covered porch across the overall front, and a covered rear porch behind the east side. That same building plan was also defined in the 1902 Sanborn, so there was no recorded change during that half-century. Those clearly discernible building parts remain at approximately the front (north) half of the existing building, with the exception of the original/early rear porch, the form of which partially remains yet has otherwise been subsumed by rear additions (figs.2-5). Those rear additions comprise some 1/2 of the overall building and which added almost windowless commercial space, so are understood to date from the building's commercial period (figs.6-8). The building site has also been substantially altered by the surrounding concrete retaining walls and steps at the front (north) sidewalk, another sloping retaining wall along the east driveway, but especially by the large concrete ramp structure that has been added at the west side. The steel railing assemblies at each of those concrete site structures also impose on and are incongruous with the older building and its setting.

Other elemental building alterations are evident. Specifically, replacement doors and windows – to the extent that no original or early doors or windows remain – along with modifications of the wood siding and wood trim work at walls and roof eaves. New concrete foundations are also evident at the bottom of the exterior walls, at which time the brick deck at the front porch would have been added.

Consequently, the remaining and potentially historic structure is limited to the single-story, front and east side gabled-roof building forms along with its covered front porch – the posts of which are most likely the only original or early design elements that remain – and the general clapboard-sided and flat wood-trimmed character of those original/early building exteriors.

With respect to its architectural design, the building's identified historic significance is as a Folk (i.e., vernacular) Victorian style cottage dating from the 1880s. It stands in a grouping of properties, a number of which have similar working class backgrounds. However, per a recent evaluation, there is no potential historic grouping or district ("Oxbow District" DPR form 523D, Feb.2011). So the subject building's historical merits are individual.

In sum, the character-defining features of the building 731 First St. include:

- The single-story, front and east side gabled-roof building forms;
- The covered front porch with its wood porch posts and low-hipped roof;
- The pattern of door and window openings at the front (north) elevation;
- Clapboard-siding and flat wood-trim work of the original/early building exteriors.

718 Water Street (figs.9-11)

The small house at 718 Water Street stands in the southwestern corner of its large parcel (lot 3), which it shares with another residential building in the lot's northeastern corner, facing First Street (711 First St.).

Per the City of Napa's Historic Resources Inventory, updated January 2016, 718 Water Street is an identified Landmark (LLM). It is therein also identified as dating to 1900. However, the house can be seen in the 1891 Sanborn map so is evidently a c1890 house, or earlier. Based on census records and news clippings, the building has always been a single-family residence, variously owned and rented.

Architecturally, it is a Worker's Cottage, without stylistic or decorative architectural characteristics. The house is a rectangular plan, one-story wood frame structure, raised up over a crawl space and with a front-gabled roof. The exterior walls are wood-board sided ('drop' or 'rustic' pattern) with flat trims. A front, covered porch below a shed roof serves as the entry way and the rear has an enclosed shed roofed addition. Windows are double-hung units with flat wood exterior trim and projecting sills. The sloped roofs are composition shingle. A plain masonry chimney extends through the roof at the approximate center of the building.

A range of exterior alterations are evident. All windows and doors have been replaced or added. Originally, the house was not rectangular, it was L shaped, the southeast front corner of which was infilled sometime post-1950. The front porch has been partially if not wholly replaced, its railings and steps evidently so. Its foundations and the wood board apron enclosing the crawl space also appear to be recent. The roofing and roof drainage assemblies are recent. And the rear, shed-roof addition was an early change to the house.

Overall, while this small house is intact, its architectural features are very minimal and basic, its architectural character limited to its identification as a vernacular worker's cottage.

Nonetheless, as noted, the house at 718 Water Street is an identified City of Napa Landmark, though its “LLM” status isn’t clear. Its most recent evaluation was in 2011 as part of the evaluation of a potential Oxbow District, yet which was then determined to be ineligible for listing. Under that evaluation, an adjacent residence at 731 First Street was identified as one of two potential individually eligible buildings (along with 906 McKinstry). Both were also identified in the 2016 HRI as LLMs. Curiously, in the Oxbow District evaluation, 718 Water Street was not identified as individually eligible resource, and yet it was subsequently listed as a LLM. Thus, for the purpose of this evaluation, the residence at 718 Water Street is assumed to be an LLM as well as a Neighborhood Conservation Property (NCP) which, per the City, does not measure or identify historic significance but is assigned for the purpose of neighborhood planning. Further, the HRI score assigned to 718 Water Street is a 3, which is the lowest score in the City’s historical rating system. (It should also be noted that the Oxbow District record identifies 718 Water Street as dating to 1870).

In sum and for the purposes of rehabilitation planning, the characteristics of the subject historic residence that are character-defining are:

- Original L-shaped form under a front-gabled roof;
- Shed-roofed front porch and entry door opening;
- Window openings with wood trims and sills (in original building);
- Wood, drop-sided exterior walls (on original building).

743 First Street

A third property/building is also included in the 2016 HRI, 743 First Street, and which has likewise been identified as a LLM. However, there is simply no existing building at 743 First Street.

Preliminary Project Evaluation

A project is being proposed for the subject block, inclusive of the two subject sites – 731 First and 718 Water. That proposed hotel and housing project will displace the extant structures on these parcels, including these two buildings, both of which are presently identified as LLMs.

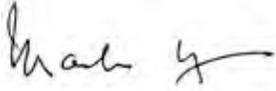

From an historic resource perspective, under the California Environmental Quality Act (CEQA), local jurisdictions must determine the impact of discretionary projects on identified historic resources and to determine if a given project would result in the material impairment of identified historic resources. Under CEQA, the significance of an historic resource is considered to be “materially impaired” when a project demolishes or materially alters the physical characteristics that justify the determination of a historic resource’s significance (CEQA Guidelines §15064.5(b)).

In this case, since the project proposes removal of the two LLMs, the determination of effect is not equivocal: the proposed project would result in the material impairment to both of these buildings and as a direct consequence of their removal.

However, there is a potential option to this detrimental determination and outcome. As the two subject buildings have been collectively evaluated with a determination that they are not part of any collection of resources, nor are their specific sites relevant to their identified significance, the character-defining forms and features of these two buildings may be relocated to an appropriate receiver site or sites and, in so doing, effectively retain and rehabilitate them. To do so, all identified character-defining portions of each of the structures would require relocation to a site or sites within the vicinity (for example, within the Oxbow or, perhaps preferably, East Napa districts). And each building should retain a street-ward orientation similar to the existing. The buildings would then

require rehabilitation meeting the *Standards for Rehabilitation*, including any proposed exterior alterations and additions. Reuse as residential structures would be preferred but not obligatory so long as the proposed reuse again meets the Rehabilitation Standards.

PRELIMINARY GEOTECHNICAL INVESTIGATION
FIRST AND OXBOW GATEWAY PROJECT
1ST STREET AND MCKINSTRY STREET
NAPA, CALIFORNIA

1.0 INTRODUCTION

This report summarizes the results of our Preliminary Geotechnical Investigation for the proposed “First and Oxbow Gateway Project” at the south corner of 1st and McKinstry Streets in eastern Napa, California. A Site Location Map is presented on Figure 1. The purpose of our report is to identify and address potential geotechnical and geologic issues at the project site, offer our opinion on project feasibility, prepare preliminary geotechnical design recommendations and summarize our findings in this report for use in planning, permitting and preliminary design of the project.

Our scope of services is described in our proposal letter dated February 12, 2016 and includes several phases to match project development. We prepared a previous preliminary report dated April 29, 2016 for a similar project without underground parking and this report is based on a revised project with below-grade parking. This report also completes the first phase of our services, including the following:

1. Review of readily available geologic reference information to describe geologic setting and local geologic conditions, including select data from the Napa Flood Control Project, First Street Bridge Replacement and the Copia Building.
2. A site reconnaissance to observe surface conditions.
3. An evaluation of geologic hazards that could affect the site and preliminary recommendations to mitigate identified hazards.
4. Description of other geotechnical constraints that should be addressed during project design and preliminary recommendations for probable foundation types.
5. Preparation of this report with a summary of geologic hazards and preliminary geotechnical recommendations for design and construction.

2.0 PROJECT DESCRIPTION

The project site is located in the western portion of the “Oxbow” of the Napa River, just east of downtown Napa as shown on Figure 1, Site Location Map, and Figure 2, Site Plan. Although still under consideration, the development will likely include a two-building, mixed-use commercial project. Each building will include two levels of underground parking, ground level hotel and commercial space and two additional floors of hotel rooms. The new buildings are planned on either side of the existing railroad tracks.

Building structural type is unknown at this time, but we anticipate reinforced concrete for the below-grade parking. Concrete, wood or steel-framing are all potential “above-ground” building materials and these will result in moderate to heavy foundation loads. A concept of the currently-proposed building is shown on Figures 2 and 3.

3.0 SITE CONDITIONS

3.1 Regional Geology

The site is located within the Coast Ranges Geomorphic Province of California. Topographically, the Province is characterized by northwest-southeast trending mountain ranges of moderate relief, with intervening deep canyons, or narrow stream valleys. The province is known for its active seismicity, high rainfall, and susceptibility to erosion and landslide development in steep terrain. Within the Province there are occasional larger, alluvium-filled, basin-shaped valleys. These include the Santa Rosa Plain and Sonoma, Bennett, Napa, and Knights Valleys. Most of these valleys are associated with known or suspected active faults and have formed in part by past fault displacement and crustal folding.

The Franciscan Complex is the baserock of the Province and it consists of a diverse assemblage of rock units, including sandstone, shale, greenstone (altered, submarine volcanic rocks), chert, and lesser amounts of conglomerate and metamorphic rocks. The Franciscan was deposited during the Jurassic-Cretaceous Period (65-190 million years ago) (Huffman & Armstrong, 1980). Of these rock types, the most prevalent is graywacke sandstone, which is massively bedded and has occasional shale interbeds. Masses of serpentinite of various dimensions are locally present. The serpentinite has been intruded and faulted into the Complex during long and ongoing tectonic processes.

Overlying much of the Franciscan rock in Napa County are the Sonoma Volcanics. This rock sequence is the result of volcanism in the Pliocene Epoch (1.6 to 5 million years ago) that extends from Mt. St. Helena in the north to Vallejo in the south (Wagner & Bortugno, 1982).

As shown on Figure 4, geologic mapping of the area by the California Geological Survey (CGS, 2004), indicates that the project site is underlain by Holocene stream terrace (alluvial) deposits. Alluvial deposits generally consist of poorly sorted and bedded sand, gravel, silt and clay sediments deposited due to stream or river action.

Several faults are present in the site vicinity; most are not known to be seismically active. According to CGS criteria, an active fault is one that has recorded historic seismicity and/or displacement of Holocene-age deposits (less than 11,700 years old). The West Napa, Concord, and Rodgers Creek faults are closest to the site as shown on Figure 5.

3.2 Local Topography and Geology

The City of Napa is located within the long, narrow, northwest-trending, alluvium-filled Napa Valley. The valley is flanked by parallel mountain ranges consisting of the Howell Mountains on the northeast and the Mayacamas Mountains on the southwest. The valley is very narrow at the northern end, while it gradually widens southward where it merges with extensive tidal marshlands of San Pablo Bay - the northern extension of San Francisco Bay. The project site is located within an "oxbow" of the Napa River in the downtown area of the City of Napa.

Bathymetry within the adjacent river is shown on Napa River Flood Control plans (2008). Much of the River channel bottom ranges from about elevation -5 to -10 feet, although localized areas have eroded to depths of -15 to -20 with a maximum eroded hole off the northern tip of the oxbow at an elevation of -25 feet.

3.3 Surface Conditions

The site is relatively flat with an approximately 6-foot high fill embankment for the railroad tracks at the west or middle portion of the site (depending on final project limits). 1st Street is also elevated several feet above the project site elevation in the western portion of the project area. There are five existing one-and two-story, single-family homes in the project area to the east of the railroad tracks which appear to be in relatively good condition considering their age. Old concrete sidewalks and curb and gutter surround the south, east and portions of the north side of the project with some new concrete along the northeast corner of the project site. The project site is bounded to the south by the tidally-influenced Napa River with creek bank slopes of approximately 1:1 and southeastern portion of the site has an older metal building between the river and development area. The creek bank is armored with large rip rap on the “inside bend” that is adjacent to the project.

3.4 Reference Soil Data

Reference data for the site includes U.S. Army Corps of Engineers (COE) exploratory borings at the southwest corner of the property, Kleinfelder borings at the Wine Train Bridge, Phoenix Geotechnical borings for the Copia Building, and Miller Pacific Cone Penetration Tests (CPTs) for the Copia site redevelopment which are located to the northeast of the property. The locations of these borings and CPTs are shown on Figure 3. Laboratory test data and correlations are available from these borings and CPTs, including particle sizes, plasticity, strength and other data.

Reference exploration logs and some supporting laboratory data are included in Appendix A of this report.

3.5 Subsurface Conditions

The reference borings generally confirm the mapped geology of the area referenced earlier. Thin fills likely exist at the ground surface in the project area, and relatively deep deposits of alluvial clay, silt, sand and gravel exists to depths greater than 50 feet. Clays and silts generally ranged from soft to stiff and the sands generally ranged from loose to dense.

3.6 Groundwater

Groundwater was reported in the various reference borings and CPTs at depths of 13 to 30 feet below the existing ground surface. Since a “stabilized” depth to water may not have been observed in these exploratory points, we expect groundwater may be shallower and will likely be at a similar elevation to the water level in the adjacent Napa River. Groundwater will likely be higher during the winter months and may be at or above the ground surface during periods of especially high water in the nearby river.

4.0 GEOLOGIC HAZARDS EVALUATION

4.1 General

The principal geologic hazards which could potentially affect the project site are strong seismic shaking from future earthquakes in the San Francisco Bay Region along with subsequent liquefaction, post liquefaction settlements and lateral spreading. Flooding is also a potential hazard at the site as is buoyancy of underground parking garages if they are not properly designed. Other geologic hazards such as fault rupture, traditional landsliding, seiche and tsunami are not considered significant at the site. Geologic hazards, their impacts, and potential

mitigation measures are discussed below.

As previously noted, this report is preliminary in nature and our geologic hazards discussion should be updated as additional subsurface data and further evaluations are performed for our final design report(s) for the project. Changes in the project plans, including building type, locations or other factors may also impact our preliminary findings and recommendations.

4.2 Fault Surface Rupture

Under the Alquist-Priolo Earthquake Fault Zoning Act¹, the California Geological Survey (CGS) produced 1:24,000 scale maps showing all known active faults and defining zones within which special fault studies are required. Based on currently available published geologic information, the Oxbow Mixed Use Development project site is not located within an Alquist-Priolo Earthquake Fault Zone (APEFZ). The potential for fault surface rupture at the site is therefore considered to be low.

Evaluation: No significant impact.

Mitigation: No mitigation measures are required.

4.3 Seismic Shaking

The site will likely experience seismic ground shaking from future earthquakes in the San Francisco Bay Area. Earthquakes along several active faults in the region, as shown on Figure 4, could cause moderate to strong ground shaking at the site.

Deterministic Seismic Hazard Analysis – Deterministic Seismic Hazard Analysis (DSHA) predicts the intensity of earthquake ground motions by analyzing the characteristics of nearby faults, distance to the faults and rupture zones, earthquake magnitudes, earthquake durations, and site-specific geologic conditions. Empirical relations (Abrahamson and Silva, Boore and Atkinson, Campbell and Borzognia, Chiou and Youngs, Idriss (2008)) for the stiff subsurface conditions were utilized to provide approximate estimates of median peak site accelerations. A summary of the principal active faults affecting the site, their closest distance, moment magnitude of characteristic earthquake and probable peak ground accelerations (PGA), which an earthquake on the fault could generate at the site are shown in Table A.

¹ The Alquist-Priolo Earthquake Fault Zoning Act prohibits placing most structures for human occupancy across traces of active faults. These fault zones are shown on maps issued by the Department of Conservation's Division of Mines and Geology.

TABLE A
DETERMINISTIC PEAK GROUND ACCELERATION
First and Oxbow Gateway Project
1st Street and McKinstry Street
Napa, California

| <u>Fault</u> | <u>Approx. Distance to Fault (km)¹</u> | <u>Max. Moment Magnitude²</u> | <u>Peak Ground Acceleration (g)³</u> |
|----------------------|---|--|---|
| West Napa | 3.1 | 6.6 | 0.41 |
| Concord/Green Valley | 8.5 | 6.8 | 0.30 |
| Rodgers Creek | 20.4 | 7.3 | 0.20 |
| Great Valley 4 | 18.7 | 6.7 | 0.27 |
| Cordelia | 12.5 | 6.5 | 0.22 |

Notes:

- 1) Blake, T.F. (2001)
- 2) USGS (2008)
- 3) Abrahamson and Silva (2008), Boore and Atkinson (2008), Campbell and Borzognia (2008), Chiou and Youngs (2008), Idriss (2008)

Probabilistic Seismic Hazard Analysis – Probabilistic Seismic Hazard Analysis (PSHA) analyzes all possible earthquake scenarios, while incorporating the probability of each individual event to occur. The probability is determined in the form of the recurrence interval, which is the average time for a specific earthquake acceleration to be exceeded. The design earthquake is not solely dependent on the fault with the closest distance to the site and/or the largest magnitude, but rather the probability of given seismic events occurring on both known and unknown faults.

Utilizing the 2008 Interactive Deaggregation (USGS, 2008), we estimated the PGA for two separate probabilistic conditions, the 2% chance of exceedance in 50 years (2,475-year statistical return period) and the 10% chance of exceedance in 50 years (475-year statistical return period), The results of the probabilistic analyses are presented in Table B.

TABLE B
PROBABILISTIC SEISMIC HAZARD ANALYSES
First and Oxbow Gateway Project
1st Street and McKinstry Street
Napa, California

| | <u>Statistical Return Period</u> | <u>Magnitude</u> | <u>PGA</u> |
|-----------------|----------------------------------|------------------|------------|
| 2% in 50 years | 2,475 years | 6.6 | 0.70 g |
| 10% in 50 years | 475 years | 6.6 | 0.44 g |

Reference: USGS (2016)

The potential for strong seismic shaking at the project site is moderate. Due to its close proximity, the West Napa Fault (approximately 3.0 kilometers to the west) presents the highest potential for strong ground shaking. The most significant adverse impact associated with strong seismic shaking is potential damage to structures and improvements. Strong shaking can also trigger liquefaction which is discussed in the following sections

Evaluation: Less than significant with mitigation.

Mitigation: Minimum mitigation measures should include designing the structural improvements in accordance with current codes or standards to be determined by the project engineers and permitting agencies when final design commences.

4.4 Liquefaction Potential and Related Impacts

Liquefaction refers to the sudden, temporary loss of soil shear strength during strong ground shaking. Liquefaction-related phenomena include liquefaction-induced settlement, flow failure, lateral spreading and other issues that can occur where there are saturated, loose, granular deposits. Recent advances in liquefaction studies have also indicated that liquefaction can occur in granular materials with high fines contents (silty materials that pass the #200 sieve) provided the fines exhibit a Plasticity Index of less than 7. Saturated, granular layers were observed during previous explorations in the vicinity of the site. Additionally, the site is mapped by the Association of Bay Area Governments (ABAG) with high susceptibility to liquefaction as shown on Figure 6.

To evaluate soil liquefaction, the seismic energy from an earthquake is compared with the ability of the soil to resist pore pressure generation. The earthquake energy is termed the cyclic stress ratio (CSR) and is a function of the maximum credible earthquake peak ground acceleration (PGA) and depth. For our preliminary liquefaction analysis, we utilized an acceleration of 0.44 g which is the 10% in 50 years PSHA shown in Table B. The soil resistance to liquefaction is based on the relative density, and the amount and plasticity of the fines (silts and clays).

We analyzed some of the reference subsurface data in the immediate project area, to determine the project site's susceptibility to liquefaction utilizing the procedures outlined by Idriss and Boulanger (2008). Based on our analyses, there are numerous soil layers that are susceptible to liquefaction and virtually every boring or CPT test location analyzed suggested liquefaction would occur within some portion of the explored depth.

The adverse effects of liquefaction include potential loss of foundation bearing capacity, post liquefaction settlement, lateral spreading, and other issues. Loss of bearing capacity and resulting building settlements/rotations can occur during liquefaction of soils immediately below the building foundations.

Post liquefaction settlement occurs as excess pore pressures generated during shaking dissipate, allowing the individual soil particles to redistribute into a denser "formation". Based on the procedures outlined by Idriss and Boulanger (2008), our preliminary analysis suggests 0 to 3-inches of post liquefaction settlement may be anticipated across the site after a liquefaction triggering seismic event.

Lateral spreading refers to the movement of a surficial "crust" of non-liquefiable soils towards a free-face slope. This movement occurs as the non-liquefiable material "floats" on an underlying continuous layer of liquefied soil. Due to the close proximity of the Napa River and known

liquefiable soils, lateral spreading is considered a moderate to significant risk at the project site. Based on the procedures outlined by T. Leslie Youd (2002), we estimate significant movement toward the Napa River may occur at the site. For an “average” condition of a 20-foot elevation difference between the ground surface within the oxbow to the river channel bottom, lateral spread (horizontal displacement) of perhaps 10 feet might occur along the southern edge of the project area that is closest to the river. Six to eight feet of lateral spread may be expected in the middle of the project area, and perhaps three to five feet at the northern portion of the project along 1st Street. If liquefiable layers are not continuous (as may be the case in the project area), lateral spreading would be significantly reduced from the above estimates.

New exploration and laboratory testing in the immediate project area was not included in our current scope of work, and will be required for final project design and more detailed analysis of liquefaction hazards.

Evaluation: Less than significant with mitigation.

Mitigation: The subsurface soils at the project site are moderately to highly susceptible to liquefaction and liquefaction associated phenomena. Since the predicted settlements and lateral spreading is likely too severe for multi-story, mixed use buildings, deep foundations and/or ground modification, such as vibro-replacement/stone columns, deep soil mixing, compaction grouting or other techniques will be required to mitigate liquefaction. More detailed discussion of ground improvement is presented in Section V.B of this report.

4.5 Seismically Induced Ground Settlement

Seismic ground shaking can induce settlement of unsaturated, loose, granular soils. Settlement occurs as the loose soil particles rearrange into a denser configuration when subjected to seismic ground shaking. Varying degrees of settlement can occur throughout a deposit, resulting in differential settlement of structures founded on such deposits. The reference borings generally did not encounter loose granular soil above the (shallow) anticipated groundwater levels. Therefore, the risk of seismically induced ground settlement is not considered a significant risk at the site, although this hazard should be further evaluated with additional borings and/or CPTs.

Evaluation: Less than significant with mitigation.

Mitigation: Deep foundations and/or ground modification techniques can also be used to mitigate seismically induced ground settlement hazards, if needed. More detailed discussion of ground improvement is presented in Section V.B of this report.

4.6 Lurching and Ground Cracking

Lurching and associated ground cracking can occur during strong ground shaking. The ground cracking generally occurs along the tops of slopes where stiff soils are underlain by soft deposits or along steep slopes or channel banks. The Napa River flows near the southern perimeter of the site. Lurching and ground cracking may occur along the creek banks as the underlying soil liquefies. Therefore, lurching and ground cracking are considered significant hazards at the project site.

Evaluation: Less than significant with mitigation.

Mitigation: The deep ground modification techniques described above could also mitigate

lurching and ground cracking. More detailed discussion of ground improvement is presented in Section V.B of this report.

4.7 Erosion

Sandy soils on moderate slopes or clayey soils on steep slopes are susceptible to erosion when exposed to concentrated water runoff. Erosion along the Napa Riverbank should be anticipated at the site, although the existing rip-rap will reduce erosion risks provided the rock is continuous and maintained in good condition. Erosion rates are also typically more significant along the “outer bends” in river channels, such as the condition at the south end of the project. Erosion risks can be reduced by vegetating or rip-rapping areas prone to erosion.

Evaluation: Less than significant with mitigation.

Mitigation: Mitigation measures should be evaluated as project planning advances. Erosion risks should be greatest along the riverbank slopes and there are many “bioengineering” (i.e. vegetation) and “armoring” (i.e. rip-rap) options that could be considered to reduce risks. Careful control of stormwater discharges from the site should also be planned to further reduce risks of erosion.

4.8 Seiche and Tsunami

Seiche and tsunamis are short duration, earthquake-generated water waves in large enclosed bodies of water and the open ocean, respectively. The extent and severity of a seiche would be dependent upon ground motions and fault offset from nearby active faults. The project site is not located near a large (open) body of water such as the San Francisco Bay or ocean. Therefore, seiche and tsunami are not considered geologic hazards at the site.

Evaluation: No significant impact.

Mitigation: No mitigation measures are required.

4.9 Flooding

The existing project site elevations range from about +17 to +25 feet (MSL) and the site is currently mapped within a FEMA Zone-A 100-year flood zone as shown on Figure 7. The flood control project nearing completion will reduce the flood potential of the Napa River but some risk will likely still exist at the project site.

Evaluation: Less than significant with mitigation.

Mitigation: The Project Civil Engineer and/or Architect should evaluate the risk of localized flooding and design appropriate finished floor elevations and other mitigations.

4.10 Expansive Soil

Expansive soils are capable of exerting significant lateral and vertical expansion pressures on building foundations, interior floor slabs and exterior flatwork. Distress from expansive soil movement can include cracking of brittle wall coverings (stucco, plaster, drywall, etc.), racked door and/or window frames, and uneven floors and cracked slabs. Lightly-loaded flatwork, pavements, and concrete slabs-on-grade are particularly vulnerable to distress. Existing structures at the site appear to be performing relatively well and we did not observe significant heave or distress to pavements/curb and gutter or other surfaces associated with expansive soils.

Additionally, the surficial soils observed in the reference borings were generally lower plasticity so expansive soils are not considered a significant geologic hazard at the site.

Evaluation: No significant impact.
Mitigation: No mitigation measures are required.

4.11 Settlement/Subsidence

Significant settlement can occur when new loads are placed at sites due to consolidation of soft compressible clays (i.e., bay mud) or compression of loose soils. Thick deposits of soft compressible materials were not encountered in the reference borings so the risk of settlement to the proposed structures at the project site is low. "Unloading" the site with two levels of underground parking will also reduce any potential for settlement.

Evaluation: No significant impact.
Mitigation: No mitigation measures are required.

4.12 Slope Stability/Landslides

Slope instability generally occurs in relatively steep slopes and/or on slopes underlain by weak materials. The project site is relatively flat with minor grade changes and there are no known landslide deposits in the vicinity that could affect the site. Therefore, traditional (hillside) slope stability/landslides are not considered a geologic hazard at the project site. However, as previously noted, lateral spreading could be considered a form of instability which could impact the project site.

The locally steep creekbank just south of the project site may be susceptible to shallow sloughing, but this would likely only impact improvements very near the top of riverbank slope. Small setbacks could be considered to mitigate instability at the top of the existing riverbank slope.

Evaluation: No significant impact.
Mitigation: No mitigation measures for traditional (hillside) slope instability are required, setbacks of significant structural features of perhaps five to ten feet should be considered to reduce risks of damage. Slightly deepened foundations could also be considered to reduce risks of improvements near the top of bank.

4.13 Buoyancy

Although perhaps not a typical "geologic hazard", buoyancy of the buildings could occur if high groundwater exists around a "dry" basement. During flood conditions, groundwater will likely be at or near the ground surface, so significant hydrostatic pressures can develop on the lower parking floor slab and the basement retaining walls. Dead weight of the building will probably not be enough to resist the upward forces, so some type of ground anchoring system, along with a structural slab to span between the anchors and the building columns, will likely be required. Alternatively, the building's dead weight could be used to resist some buoyancy, and a pressure relief system could then be designed into the parking garage so that flooding of the garage could occur prior to any building flotation. This issue will need to be addressed in greater detail when building weights, depth of basement and ability to "flood" the basement are better understood.

Evaluation: Less than significant with mitigation.

Mitigation: Building dead weight, hold-downs such as helical anchors or driven piles, or flooding of the parking basement can all be considered to prevent buoyancy and will be addressed in greater detail during final design of the project.

5.0 CONCLUSIONS AND PRELIMINARY RECOMMENDATIONS

5.1 Conclusions

Based on our review of project geologic and geotechnical data and experiences with nearby sites, we conclude the proposed project is geotechnically feasible. There are several geologic and geotechnical hazards at the project site that will require mitigation for the proposed development. Construction of two floors of below-ground parking will also be complicated by high groundwater that will likely require dewatering and temporary shoring during construction along with some system to “hold” the building down and prevent buoyancy. Preliminary recommendations are provided below to aid in the planning of the project. As the project planning and approvals advance, we must perform a design-level geotechnical investigation, including subsurface exploration, to provide site-specific recommendations for the project.

5.2 Liquefaction and Lateral Spreading Remediation

As discussed in Section IV, both liquefaction and seismically induced lateral spreading are significant potential hazards at the site. The hazards associated with liquefaction- and/or lateral spreading are primarily sudden, vertical settlement, and horizontal shifting of the ground surface which can affect load bearing structural members as well as non-structural members such as concrete slabs-on-grade and site flatwork. These movements tend to occur in a chaotic pattern with greater vertical settlements occurring in thicker deposits of liquefiable soils and greater horizontal shifting occurring near the edge of slopes. While small and/or “less significant” buildings such as single family homes might be constructed by simply stiffening conventional shallow foundations, significant commercial development will likely require more robust foundations and/or ground improvement for acceptable performance.

Stone columns/vibroreplacement was performed under the existing Copia Building to the northeast of the current project area. We have discussed the project site conditions and building types with Hayward Baker, a specialty contractor that has developed many of the techniques currently used to mitigate liquefaction and its related impacts. The following bullet points summarize these discussions and our preliminary recommendations:

- A) Given the relatively large project area and variable depths of the liquefiable deposits currently identified, stone columns which are also known as “vibroreplacement” (<http://www.haywardbaker.com/WhatWeDo/Techniques/GroundImprovement/VibroReplacement/default.aspx>) are probably the most cost-effective option of mitigating liquefaction effects at the site. The area and depth of treatment can be considered in more detail as project planning progresses and additional subsurface exploration occurs for our final design report. The “upper-bound” of this mitigation work could include treating the entire site from the bottom of the parking garages to a depth of 50 feet at significant construction costs. This level of work would provide very good performance of the entire site. With additional exploration and laboratory testing at each building site, it may also be possible to reduce the vertical and/or lateral extents of ground improvement, reducing site

development costs. We note that if significant shaking occurred, areas outside of the treatment area could exhibit settlements and cracking. Repairs to damaged flatwork, driveways, landscaping or other improvements could be performed as needed, likely for moderate costs.

- B) The stone columns/vibroreplacement noted above would likely consist of 3-foot diameter columns installed at an approximate 9-foot on-center grid spacing (9% replacement ratio). Representative test areas with before and after CPTs or borings would be required at the beginning of construction to verify liquefaction risks have been mitigated in the treatment area.
- C) Another option to mitigate liquefaction and lateral spreading issues would be a slurry wall/deep soil mixing process around the perimeter of the site (<http://www.haywardbaker.com/WhatWeDo/Techniques/AdditionalServices/SlurryWalls/deFault.aspx>) to reduce lateral spreading toward the river. Liquefaction and potential settlements under the buildings would then be mitigated with a deep foundation system such as driven piles, auger-cast piles, or other approaches. This alternative would likely be more costly than the stone column option. The advantage of this system is that the slurry wall could likely be used as a shoring wall for the underground parking area.

5.3 Preliminary Dewatering/Site Grading/Foundation Design Recommendations

Following completion of ground improvements (stone columns, slurry wall, etc), dewatering of the site will likely be required to construct the two levels of underground parking. This dewatering will likely include wells and a water treatment system so that “clean” water can be discharged into the Napa River. With the proximity of the site to the Napa River, 1st Street, railroad tracks and other “off-site” improvements, cut slopes will not be possible and temporary shoring walls will instead be required around the perimeter of both buildings to allow for underground parking. With the nearby improvements, the dewatering system and shoring walls will need to be carefully designed so that settlements and/or lateral movement into the excavation does not damage offsite improvements.

Excavation should be possible with conventional equipment such as rubber-tired backhoes, excavators, small dozers, etc. The deeper soils will likely be well above optimum moisture contents due to high groundwater but with proper dewatering, an excavation with no free water should be possible.

Since the above-ground portion of the buildings will probably not be heavy enough to resist buoyancy associated with two levels of underground parking, in addition to building weight, “hold-down” anchors may also be required. These hold-downs might include helical anchors, driven piles or other deep-foundation systems. The concrete slab at the lower parking level would need to be structurally designed to “span” between building columns (dead load) and the hold-down anchors and resist buoyant pressures. A very thick slab could also be considered instead of deep foundations so that the weight of concrete is sufficient to prevent buoyancy, but this slab might be many feet thick, depending on the weight of the building. Another alternative is to use building dead weight along with a moderately thick lower slab which should be sufficient to resist a significant portion of the maximum buoyant force. Under very high groundwater levels, a pump system could be activated used to dewater and prevent buoyancy, and if the pumps failed, the basement would be allowed to flood prior to any flotation of the building.

The foundation system for the building will be selected based on the method for resisting

buoyancy and ground improvement performed to reduce liquefaction/lateral stability issues. For example, if driven piles are used to resist buoyancy, these piles could also be used as the foundation system and to mitigate any liquefaction related settlements. Lateral spreading would still be a concern however, so a slurry wall would likely be required along the southern edge of the building to prevent movement toward the Napa River.

If building dead weight and a very thick concrete slab is used to prevent buoyancy (or pumping/flooding of the parking basement is acceptable), the lower floor slab could be placed over stone columns or other "improved ground" and a perimeter slurry wall could be installed to resist lateral movements toward the Napa River.

With the site's geologic complexity and underground parking, we will work closely with the project Structural Engineer during final design, and it would also be helpful to have a knowledgeable Contractor on the team to assist with cost estimating and feasibility of the various alternatives described above.

5.4 Other Construction Notes

Exterior slabs-on-grade and asphalt pavements will generally not require any extraordinary design at the site, and conventionally-reinforced, 5-inch thick exterior slabs should be appropriate for non-traffic loaded areas. Concrete subjected to vehicle loads could be thickened depending on the type of traffic and desired performance. Depending on usage, asphalt concrete for driveways or parking areas will likely range from 3 to 5 inches in thickness over 8 to 16 inches of baserock. If ground improvement is not performed under exterior slabs or pavements, repairs may be needed after significant shaking.

6.0 ADDITIONAL GEOTECHNICAL SERVICES

This report provides preliminary geotechnical and geological information, and is therefore suitable for planning purposes only. Further detailed geotechnical exploration, testing and engineering analysis will be required to develop final design criteria for project design.

We should consult with the project professionals during design. When the project improvement plans have been prepared, we must review the documents to confirm that the intent of our recommendations has been understood and incorporated. Supplemental recommendations can be prepared during the design phase as needed.

During construction we must inspect all site preparation, ground improvement, excavation work, construction of building foundations, pavement construction, utility trench backfills and other items to observe that subsurface conditions are as expected and are consistent with geotechnical design criteria.

APPENDIX A

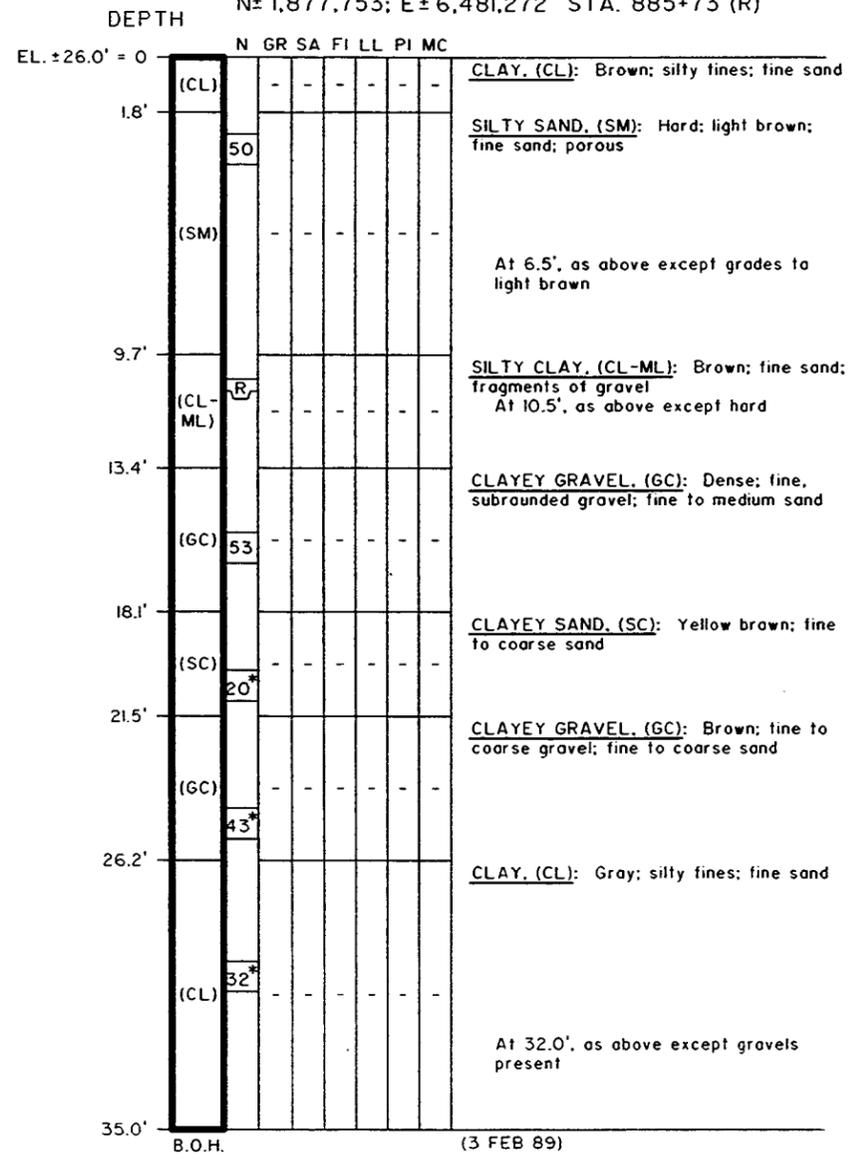

REFERENCE BORING LOGS AND LABORATORY TEST DATA

Appendix A contains reference borings logs and selected laboratory test data for the Copia Building, the First Street Bridge and the COE Flood Control Project. We note the reference exploratory boring logs, description of soils encountered and the laboratory test data reflect conditions only at the location of the boring at the time they were excavated or retrieved. Conditions may differ at other locations and may change with the passage of time due to a variety of causes including natural weathering, climate and changes in surface and subsurface drainage.

NOTES:

1. CORPS OF ENGINEERS EXPLORATIONS PERFORMED PRIOR TO 1988 WERE CLASSIFIED IN ACCORDANCE WITH MILITARY STANDARD 619 B, "UNIFIED SOIL CLASSIFICATION SYSTEM" REVISED 12 JUNE 1968.
2. CORPS OF ENGINEERS EXPLORATIONS PERFORMED DURING OR AFTER 1988 WHICH WERE LABORATORY CLASSIFIED ARE IN ACCORDANCE WITH ASTM D 2487, "CLASSIFICATION OF SOILS FOR ENGINEERING PURPOSES".
3. EXPLORATIONS PERFORMED BY J.H. KLEINFELDER & ASSOCIATES (B-1 THROUGH B-12) WERE CLASSIFIED IN ACCORDANCE WITH THE UNIFIED SOIL CLASSIFICATION SYSTEM.
4. EXPLORATIONS PERFORMED DURING OR AFTER 1990 WHICH WERE FIELD CLASSIFIED ARE IN ACCORDANCE WITH ASTM D 2488, "DESCRIPTION AND IDENTIFICATION OF SOILS (VISUAL-MANUAL PROCEDURE)".
5. SOIL DESCRIPTIONS MAY CONTAIN BOTH FIELD VISUAL AND LABORATORY INFORMATION. VISUAL DESCRIPTIONS ON PARTICLE DISTRIBUTION ARE APPROXIMATE.
6. COLORS DESCRIBED IN CORPS OF ENGINEERS LOGS PERFORMED DURING OR AFTER 1989 ARE IN ACCORDANCE WITH THE GEOLOGICAL SOCIETY OF AMERICA'S "ROCK COLOR CHART".
7. ALL SIEVE SIZES SHOWN ARE U.S. STANDARD.
8. BORINGS 2F-60, -62, AND -65 THROUGH -69 WERE DRILLED ON 21 AND 21 JUNE 1967, AND BORINGS 2F-137 AND -138 WERE DRILLED ON 9 SEPTEMBER 1968. THE BORINGS WERE DRILLED, CLASSIFIED, VISUALLY DESCRIBED AND LABORATORY TESTING WAS SELECTED BY THE SAN FRANCISCO DISTRICT.
9. BORINGS B-1 THROUGH B-6 WERE DRILLED WITH A MOBILE B-53 TRUCK MOUNTED DRILL RIG USING A 6-INCH SOLID STEM AUGER ON 10 NOVEMBER 1988. BORINGS B-7 THROUGH B-9 WERE DRILLED ON 26 JANUARY 1989, AND BORINGS B-10 THROUGH B-12 WERE DRILLED ON 3 FEBRUARY 1989 WITH A MOBILE B-53 TRUCK MOUNTED DRILL RIG USING A 4-INCH BAFFLED DRAG BIT AND SIZE "A" DRILL RODS WITH BENTONITE DRILL FLUID. BLOWCOUNTS WERE MEASURED USING A CALIFORNIA MODIFIED SAMPLER WITH A 2-INCH I.D. AND WITH A SPLIT-BARREL SAMPLER IN ACCORDANCE WITH ASTM D 1586.
10. BORINGS 2F-90-4 THROUGH -6 WERE DRILLED WITH A MOBILE B-53 TRUCK MOUNTED DRILL RIG USING A 6-INCH HOLLOW STEM FLIGHT AUGER DURING 12 THROUGH 14 FEBRUARY 1990. STANDARD PENETROMETER DATA WERE OBTAINED IN ACCORDANCE WITH ASTM D 1586 UTILIZING AN 18-INCH LONG BY 2-INCH O.D. AND 1-3/8-INCH I.D. SPLIT-BARREL SAMPLER.
11. CONE PENETROMETER SOUNDINGS CPT-94-8 THROUGH -10 WERE PERFORMED ON 16 OCTOBER 1994.
12. GROUNDWATER WAS ENCOUNTERED AT SOME LOCATIONS AT THE TIME OF EXPLORATIONS. GROUNDWATER LEVELS CAN BE EXPECTED TO FLUCTUATE IN RESPONSE TO VARIATIONS IN RAINFALL, RIVER/CREEK STAGE, AND IN THE VICINITY OF SITE DRAINAGE FEATURES.
13. DEPENDING ON THE SOIL MOISTURE AT THE TIME OF CONSTRUCTION, THE SOIL ENCOUNTERED MAY BE UNSTABLE OR POTENTIALLY UNSTABLE. THE PROBABILITY OF UNSTABLE CONDITIONS IS HIGHEST WHEN THE SOIL MOISTURE IS GREATEST.
14. REFUSAL WITH THE STANDARD PENETROMETER IS DEFINED AS ONE OF THE FOLLOWING:
 - A. 10 BLOWS FOR NO APPARENT ADVANCEMENT OF THE SAMPLER; OR
 - B. 50 BLOWS FOR LESS THAN 6" ADVANCEMENT OF THE SAMPLER; OR
 - C. 100 BLOWS FOR 6" TO 18" ADVANCEMENT OF THE SAMPLER.
15. STATIONING LOCATIONS ARE BASED ON CHANNEL CENTERLINE ALIGNMENT.
16. LOCATIONS OF EXPLORATIONS ARE SHOWN ON THE NAPA RIVER PLAN PLATES.
17. ADDITIONAL LOGS OF EXPLORATIONS ARE SHOWN ON PLATE NOS. 110 AND 112 THROUGH 119.

GENERAL NOTES

Classification of Soils in general accordance with ASTM D2487 or D2488 (based on the Unified Soil Classification System)

Geologic Formation noted in bold font at the top of interpreted interval

Sloped line in break column indicates transitional boundary

Blow counts for modified California Liner Sampler shown in ()

Length of sample symbol approximates recovery length

SAMPLER DRIVING RESISTANCE

Number of blows with 140 lb. hammer, falling 30-in. to drive sampler 1-ft. after seating sampler 6-in.; for example,

| Blows/ft | Description |
|----------|--|
| 25 | 25 blows drove sampler 12" after initial 6" of seating |
| 50/7" | 50 blows drove sampler 7" after initial 6" of seating |
| Ref/3" | 50 blows drove sampler 3" during initial 6" seating interval (Ref=Refusal) |

STRENGTH TEST METHOD

U = Unconfined Compression
 Q = Unconsolidated Undrained Triaxial
 T = Torvane
 P = Pocket Penetrometer
 M = Miniature Vane
 F = Field Vane

OTHER TESTS

k = Permeability EI = Expansion Index
 Consol = Consolidation OVM = Organic Vapor
 Gs = Specific Gravity Meter
 MA = Particle Size Analysis

WATER LEVEL SYMBOLS

▽ Initial or perched water level
 ▼ Final ground water level
 ↕ Seepages encountered

SAMPLER TYPE AND RECOVERY

Samplers and sampler dimensions (unless otherwise noted in report text) are as follows:

| | |
|--|------------------------|
| 1 SPT Sampler, driven 1 3/8" ID, 2" OD | 6 Hand Auger Sample |
| 2 MOD CA Liner Sampler 2 3/8" ID, 3" OD | 7 Lexan Sample |
| 3 CA Liner Sampler 1 7/8" ID, 2.5" OD | 8 Pitcher Sample |
| 4 Thin-walled Tube, pushed 2 7/8" ID, 3" OD | 9 Vibracore Sample |
| 5 Bulk Bag Sample (from cuttings) | 10 No Sample Recovered |
| | 11 Rock Core |

Retained samples listed in sample No. column

SOIL STRUCTURE

Fissured: Containing shrinkage or relief cracks, often filled with fine sand or silt, usually more or less vertical.

Pocket: Inclusion of material of different texture that is smaller than the diameter of the sample.

Parting: Inclusion less than 1/8 inch thick extending through the sample.

Seam: Inclusion 1/8 inch to 3 inches thick extending through the sample.

Layer: Inclusion greater than 3 inches thick extending through the sample.

Laminated: Soil sample composed of alternating partings or seams of different soil types.

Interlayered: Soil sample composed of alternating layers of different soil type.

Intermixed: Soil sample composed of pockets of different soil type, and layered or laminated structure is not evident.

| CONSISTENCY (1) | | | RELATIVE DENSITY (1) | | INCREASING VISUAL MOISTURE CONTENT |
|-----------------|----------------|--------------------------------|----------------------|----------------|------------------------------------|
| Clays | Blows/Foot SPT | Undrained Shear Strength (ksf) | Sands and Gravels | Blows/Foot SPT | |
| Very Soft | 0 - 2 | 0 - 0.25 | Very Loose | 0 - 4 | Dry ↓ Moist ↓ Wet |
| Soft | 2 - 4 | 0.25 - 0.5 | Loose | 4 - 10 | |
| Firm | 4 - 8 | 0.5 - 1 | Medium Dense | 10 - 30 | |
| Stiff | 8 - 15 | 1 - 2 | Dense | 30 - 50 | |
| Very Stiff | 15 - 30 | 2 - 4 | Very Dense | Over 50 | |
| Hard | Over 30 | Over 4 | | | |

Information on each boring log is a compilation of subsurface conditions and soil or rock classifications obtained from the field as well as from laboratory testing of samples. Strata have been interpreted by commonly accepted procedures. The stratum lines on the logs may be transitional and approximate in nature. Water level measurements refer only to those observed at the time and places indicated, and can vary with time, geologic condition, or construction activity.

(1) Terzaghi and Peck 1967

Attached please find our PHASE I ENVIRONMENTAL SITE ASSESSMENT, ("the Report") for the above-mentioned Subject Property. This report has been prepared by Odic for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither Odic, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, and has no personal bias with respect to the parties involved.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by Odic.

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. Odic is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

By signing below, Odic declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. Odic has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,

A handwritten signature in black ink that reads "Mary Osborne". The signature is written in a cursive, flowing style.

Mary Osborne, CEM

Senior Consultant per §312.10 of 40 CFR 312

EXECUTIVE SUMMARY

ODIC Environmental (hereinafter referred to as ODIC) performed a *Phase I Environmental Site Assessment* (hereinafter *Phase I ESA* or *Report*) of the subject property (hereinafter referred to as the Property) in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to or deletions from this practice are described in the individual sections of this Report. A summary of findings is provided below:

| REPORT COMPONENT | SUMMARY OF FINDINGS |
|---|--|
| Current Property Address(es) | <p>The Property address is 711, 731, 743, 803, 819, 823, and 825 1st Street and 718 and 730 Water Street, Napa, Napa County, CA 94559.</p> <p><i>*1st Street has also been referred to as First Street</i></p> |
| Property Description | <p>The Property is located on the south side of 1st Street between Soscol Avenue to the west and McKinstry Street to the east. Water Street is south of the Property. It consists of seven parcels totaling 0.87 acres that is divided by a railroad that is owned by the Napa Valley Wine Train LLC. Therefore, for description purposes, the Property will be referred to as the West Property to indicate the four parcels west of the railroad tracks and the East Property to indicate the three parcels east of the railroad tracks.</p> <p>The West Property consists of four parcels with a total square footage of 15,964 or 0.37 acres that are assigned the addresses of 803, 819, 823, and 825 1st Street. The West Property is a vacant commercial lot. There are no improvements.</p> <p>The East Property consists of three parcels with a total square footage of 22,183 square feet or 0.5 acres that are assigned the addresses of 711, 731, and 743 1st Street and 718 and 730 Water Street. The East Property is improved with a commercial building (731 1st Street) occupied by Trade Brewing, three residential dwellings (711 1st Street, 718 Water Street, and 730 Water Street), a detached garage, and unpaved land (743 1st Street).</p> <p>The commercial building at 731 1st Street is occupied by Trade Brewing, a brewery and taproom. The three residential dwellings at 711 1st Street, 718 Water Street, and 730 Water Street are two-bedroom / one-bathroom single-family residential dwellings.</p> |
| Summary of Property Reconnaissance | <p>Site reconnaissance revealed no evidence of underground storage tanks, clarifiers, sumps, hazardous materials, or other environmental concerns. However, 731 1st Street was identified as a historical dry cleaning facility that operated an onsite dry cleaning machine from 2003 to 2014. Due to the building being remodeled into a brewery and taproom, no evidence of the former dry cleaning operations were observed.</p> |

| REPORT COMPONENT | SUMMARY OF FINDINGS |
|---|--|
| <p>Historical Use of the Property and Vicinity</p> | <p style="text-align: center;">West Property</p> <p>The West Property was developed with four residential dwellings and storage sheds in 1886. By 1891, one of the dwellings was replaced with the Hotel Di Genova. The hotel was later renamed the Lombardo Hotel until it was demolished in 1967. The West Property remained relatively unchanged until the mid-1950s when two of the residential dwellings were removed. In the late 1960s, all improvements on the West Property were demolished. Since then, it has remained a vacant commercial lot.</p> <p style="text-align: center;">East Property</p> <p>The East Property was developed with six residential dwellings and storage sheds in 1886 that included the four current buildings. In the 1940s, a restaurant building was constructed at the west side of the East Property replacing two of the dwellings. By the 1950s, the restaurant was converted into a furniture store known as First Street Furniture Store that operated into the 1970s. This building later became an office and plumbing showroom until it was demolished in 2009 to rebuild the railroad bridge and railroad tracks. In 1982, the residential dwelling at 731 1st Street was converted to a commercial use and was occupied by a possible dry cleaners known as Valet Cleaner & Tailor until 1988 followed by Ye Olde Valet Shoppe from the late 1980s through the 1990s. From 2003 to 2014, Adam’s Cleaners operated a dry cleaners with an onsite dry cleaning machine that uses perchloroethylene (PCE). In 2017, Trade Brewing moved into the building. The residential dwellings at 711 1st Street, 718 Water Street, and 730 Water Street have remained relatively unchanged since the 1880s.</p> <p style="text-align: center;">Site Vicinity</p> <p>In 1886, the site vicinity was developed with a wine cellar, grocery store, a blacksmith and residential dwellings to the north, a laundry business to the south, a residential dwelling to the west, and a lodging building to the east. By 1891, the wine cellar was replaced with a hay and grain warehouse and the residential dwelling to the west was redeveloped with the Thomson Houston Light Company that had a coal house and a tram way that traversed the Napa River. In 1910, the hay and grain warehouse became a vacant lot and the grocery store was converted into the Roma Hotel. The blacksmith and residential dwellings on the north side 1st Street and to the east of the Property remained, the Thomson Houston Light Company became the Napa Pump & Manufacturing Company with a machine shop and a foundry, and the tramway was removed. The site vicinity remained relatively unchanged until the 1960s when the blacksmith was replaced with the current commercial buildings, the west-adjacent site became a machine shop, and the southeast-adjacent building was developed as a truck and equipment repair building. Between the 1970s and the 1980s, a bridge for Soscol Avenue was constructed across the Napa River and the west-adjacent machine shop became part of Soscol Avenue. The site vicinity remained relatively unchanged until 2007 when a nearby auto repair and tire facility at the northeast corner of 1st Street and McKinstry Street was converted into the Oxbow Public Market. In 2009 the railroad bridge was replaced with the current bridge by the Napa Valley Wine Train LLC. Since 2009, the immediate site vicinity has remained relatively unchanged.</p> |

| REPORT COMPONENT | SUMMARY OF FINDINGS |
|---|---|
| Federal, State, and Local Agency Records Research | The Property address of 731 1 st (First) Street is identified in the RCRA-SQG, FINDS, NCDEH, DTSC HWTS, and EDR Historical Cleaners databases. EDR identified 731 1 st Street as being Valet Cleaner & Tailor in 1986-1988, Ye Olde Valet Shoppe from 1989-1994, and Adam's Cleaners from 2004-2013. Refer to Section 5.2 Property Listings for detailed information. |
| Potential Off-site Concerns | <p><u>Former Cleaners – 712-714 1st Street</u> A former dry cleaners known as Valet Cleaners & Tailors at 712-714 1st Street was located approximately 90 feet to the north of the Property. It was identified as having operated from 1965 to 1985. It is unknown if this site was a dry cleaning plant or a drop-off location. Moreover, this site is located up-gradient from the Property and groundwater in the site vicinity was identified as flowing to the southwest, towards the Property and the Napa River. Therefore, a potential vapor intrusion condition (VIC) exists from to the Valet Cleaners & Tailors north-adjacent site.</p> <p><u>Former Gas Plant and Machine Shop – 831 1st Street</u> Based on Sanborn Fire Insurance Maps from 1901 and 1910, the west-adjacent property that is currently Soscol Avenue was a former Napa Gas & Electric Company gas plant that became a machine shop that also operated an onsite foundry. A historical address identified for this site was 831 1st Street. Although this site became part of Soscol Avenue, since no known assessments have been conducted at the Property, a VIC exists.</p> |
| Non-Scope Items | Unless the <i>Client</i> contracted ODIC to investigate specific Non-Scope or Non-CERCLA items, evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.5 of this Report, is neither required nor relevant for compliance with the AAI Rule or E1527-13. |
| Inaccessible or Un-surveyed Portions of the Property | Full access to the entire Property was provided to ODIC, and there were no notable portions of the Property excluded from the survey and field inspection. |
| Significant Data Gap | A Phase II Subsurface Investigation was conducted in 2014 at the Property, specifically 731 1 st Street, by BSK Associates due to the building being identified as a former dry cleaning facility. BSK advanced two borings, B1 and B2, outside the buildings because interior access was not granted for their subsurface investigation. Although no contaminants of concerns were identified by BSK, since no borings were advanced inside the dry cleaning building and down-gradient, ODIC believes that the potential for soil, groundwater, and soil vapor contamination remains onsite and a significant data gap exists. |
| Conclusion | <p>REC identified: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No HREC identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No CREC identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Significant data gap identified: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>For detailed discussion of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), and/or Controlled Recognized Environmental Conditions (CRECs) in connection with the Property, see Section 8.0 of this <i>Report</i>.</p> |
| Recommendations and Opinions | Refer to Section 8.0 for ODIC's professional opinions and recommendations. |

1.0 INTRODUCTION

ODIC Environmental (ODIC) performed a *Phase I Environmental Site Assessment Report* (hereinafter referred as "*Phase I ESA*" or "*Report*") of the Property in conformance with the scope and limitations of the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, *ASTM Designation E1527-13*.

This *Report* documents the methods and findings of the *Phase I ESA* performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the Property.

This *Report* has been prepared by ODIC for the *Client* under the professional supervision of the principal and/or senior staff whose seal(s) and signature(s) appear hereon. Neither ODIC, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

PURPOSE AND OBJECTIVE

The purpose of this practice is to define good commercial and customary practice for conducting an *environmental site assessment* of a parcel(s) of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *User (Client, Purchaser, Lender, Owner)* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *Property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

Another purpose of this *Phase I ESA* is to assist the *Client* in its underwriting of a proposed mortgage loan on the Property, if this *Report* is prepared as a part of a pre-financing environmental due diligence, and to identify *Recognized Environmental Conditions (RECs)* in connection with the Property described in this *Report*.

ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to *release to the environment*; (2) under conditions indicative of a *release to the environment*; or (3) under conditions that pose a *material threat* of a future *release to the environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *Recognized Environmental Conditions* or *Controlled Recognized Environmental Conditions*.

A *Controlled Recognized Environmental Condition (CREC)* is a *Recognized Environmental Condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

A *Historical Recognized Environmental Condition (HREC)* is a past release of any hazardous substances or petroleum products that has occurred in connection with the *Property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *Property* to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

- *OSHA Hazard Communication Regulation, 29 C.F.R. §1910.1200*

SCOPE OF WORK

This *Report* was prepared for the exclusive use of the *Client or User of this Report*. The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard Practice E1527-13; a visual survey of areas readily observable, easily accessible or made accessible by the *Property* contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the *Property*. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the *Property*. Findings, conclusions, and recommendations included in the *Report* are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the *Client (or User)*, and/or a review of readily available and supplied documents.

The scope of work for this *Phase I ESA* is in general accordance with the requirements of ASTM Standard Practice E 1527-13. This assessment included: 1) *Property* and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of standard historical sources; 4) a review of standard regulatory agency records; and 5) a review of a regulatory database report provided by a third-party company such as Environmental Data Resources (EDR).

LIMITATIONS AND EXCEPTIONS

ODIC renders no opinion as to the *Property* condition at un-surveyed and/or inaccessible portions of the *Property*, which are described below. ODIC relies completely on the information, whether written, graphic or verbal, provided by the *Property* contact or as shown on any documents reviewed or received from the *Property* contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Where access to portions of the *Property* or to structures on the *Property* was unavailable or limited, ODIC renders no opinion as to

the presence of petroleum products or hazardous substances in that portion of the Property or structure. In addition, ODIC renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The conclusions provided by ODIC are based on the information obtained by visual survey of the Property, and information provided by agents representing the Property, or agents of the owner. In addition, ODIC has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ODIC at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ODIC did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these Environmental Services.

CERCLA Requirements Other Than *All Appropriate Inquiry* (ASTM Standard Practice E1527-13 1.1.3) - This practice does not address whether requirements in addition to *All Appropriate Inquiries* have been met in order to qualify for the *LLPs* (specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of *Activity and Use Limitations*), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

It is acknowledged that ODIC's judgments shall not be based on scientific or technical tests or procedures beyond the Scope of Services or beyond the time and budgetary constraints imposed by the *Client*. It is acknowledged further that ODIC's conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. The *Client* also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the conclusions and opinion of this *Report* are not guaranteed to be a representation of actual conditions on the Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation.

In performing the Services, ODIC shall use that the degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized or in effect at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

It should be noted that certain conditions may not have been reasonably identifiable or ascertainable from the available information during the course of this *Report*. ODIC assumes that information obtained from the record review and the interviews concerning the Property is reliable. However, ODIC cannot and does not warrant or guarantee that the information provided by these other sources is accurate or correct.

Some of the information provided in this *Report* is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This *Report* is subject to the limitations of historical documentation, availability, and accuracy of the pertinent records, and the personal recollections of those persons contacted. This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the *LLPs*. Furthermore, this *Report* does not intend to address health and safety concerns, if any, associated with the Property.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by ODIC.

Controlled substances are not included within the scope of this standard. Persons conducting an *environmental site assessment* as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of *business environmental risk* associated with a parcel of *commercial real estate* may necessitate investigation beyond those identified in this practice.

SIGNIFICANT ASSUMPTIONS AND LIMITING CONDITIONS

The objective of ASTM Standard Practice E1527-13 is to help *Users* qualify for one of the CERCLA Landowner Liability Protections (LLPs). *Users* should be aware that there are other federal, state, and local environmental laws and regulations that can impose liabilities and obligations on owners and operators of real property that are outside the scope of this practice. This practice does not address all possible environmental liabilities that a *User* may need to consider in the context of a commercial real estate transaction. Therefore, *Users* may desire to expand the scope of pre-purchase or pre-finance due diligence to assess other business environmental risks that exist beyond CERCLA liability associated with the Property.

Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, and is not an issue required to be investigated under this practice. A BER may include one or more of the non-scope issues contained in Non-Scope Considerations. Evaluation of Non-Scope or Non-CERCLA items, including those addressed in this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the *User* and ODIC including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of ASTM Standard Practice E1527-13, not part of this *Report*, and should only be included in the *Report* if so specified in the terms of engagement between the *User* and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13).

ASTM Standard Practice E1527-13 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information regarding non-ASTM Standard Practice E1527-13 issues may be provided merely for the *User's* convenience, and cannot be used to bind this *Report* as a whole to the compliance and conformance with ASTM Standard Practice E1527-13. No disassembly of systems or building components or physical or invasive testing is to be performed unless the *Client* specifically calls for such testing as an additional scope of work.

ODIC has performed this *Phase I ESA* in conformance with the scope and limitations of ASTM Standard Practice E1527-13. This *Report* may not include all environmental conditions which can materially impact the Property other than those defined as RECs in ASTM Standard Practice E1527-13.

ODIC is not contracted to perform *Environmental Liens* and *Activity and Use Limitations (AULs)* searches via title records, and such is beyond the scope of services included in this *Report*. Information pertaining to deed restrictions and environmental liens, Activity/Use Limitations, title search/report was requested

from the *Report User*. This information may or may not be provided to ODIC at the time of the assessment. See pertinent sections of this *Report* for further discussion.

Interviews with past or current owners, operators and occupants may not be reasonably ascertainable and can constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 4.0), this data gap may or may not be expected to alter the findings of this assessment. See Section 8.0 for further discussion.

Adjoining sites, neighboring sites, or surrounding properties mentioned in this *Report* are defined only up to one parcel immediately next to the Property, and ODIC will only check immediately adjoining properties to identify historical use of the surrounding areas via historical sources or data on such adjoining properties, and/or walk-through visual inspection along the Property's perimeters to identify obvious signs of environmental concerns.

It is often not possible (under the "*reasonably ascertainable*" clause of the ASTM Standard Practice E1527-13) to identify every single historical business tenant or occupant of the Property. ODIC cannot be liable for not identifying all such past tenants or occupants of the project site.

This ESA did not necessarily comply with the ASTM Standard Practice E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-13 is required.

For the purposes of ASTM Standard Practice E1527-13, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM Standard Practice E2600-15; however, nothing in this practice (ASTM Standard Practice E1527-13) should be construed to require application of ASTM Standard Practice E2600-15 standard to achieve compliance with all appropriate inquiries.

USER RELIANCE

This investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client* and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the *Client*. Neither this *Report*, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the *Client*.

All reports, both verbal and written, are for the sole use and benefit of the *Client*. Either verbally or in writing, third parties may come into possession of this *Report* or all or part of the information generated as a result of this work. In the absence of a written agreement with ODIC granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against ODIC, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold ODIC, the *Client* and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this *Report* shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

INDEPENDENT CONTRACTOR STATUS / PROFESSIONAL RESPONSIBILITY

In performing Services under the mutually agreed contractual agreement and verbal engagement, ODIC operates as, and has the status of, an independent contractor. Subject to any limitations established by the *Client* as to the degree of care and amount of time and expenses to be incurred and any other

limitations contained in the mutually agreed contractual agreement and verbal engagement, ODIC performs the Services consistent with the level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. *Client* hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to *Client* or Property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and verbal engagement.

QUALIFICATION STATEMENT OF ENVIRONMENTAL PROFESSIONAL

ODIC states that this ESA was performed under *Environmental Professional (EP)*'s direct supervision, that he/she has prepared and/or reviewed and approved the *Report*, and that the methods and procedures utilized in the development of this *Report* conform to minimum industry standards using both the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, Standard Practice E1527-13 and the United States – Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as guidelines. ODIC certifies that ODIC's *Environmental Professionals* and *Subcontractors* are properly licensed, qualified and/or certified to conduct *Phase I Environmental Site Assessments*.

ODIC's EP declares that, to the best of his/her professional knowledge and belief, he/she meets the definition of *Environmental Professional* as defined in 40 CFR Part 312. ODIC's EP who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the Property. ODIC has developed and performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

2.0 PROPERTY DESCRIPTION

2.1 PROJECT INFORMATION

| Project Information | | |
|---|--|-----------------|
| ITEM | | |
| Project Number | 6366640-ESAI | |
| Property Address(es) | 711, 731, 743, 803, 819, 823, and 825 1 st Street and 718 and 730 Water Street, Napa, Napa County, CA 94559 <i>*1st Street has also been referred to as First Street</i> | |
| Historical/Alternate Property Address(es) | According to Sanborn Fire Insurance Maps, historical addresses for the Property have included 717 1 st Street, 720 Water Street, 780 Water Street, 812 Water Street, 900 North Lawrence, and 905 North Lawrence. | |
| Tax Assessor's Parcel Number | East Property | |
| | Address | APN# |
| | 711 1 st Street | 003-241-003-000 |
| | 730 Water Street (731 1 st Street) | 003-241-005-000 |
| | 743 1 st Street | 003-241-006-000 |
| | West Property | |
| | Address | APN# |
| | 803 1 st Street | 003-235-005-000 |
| | 819 1 st Street | 003-235-006-000 |
| | 823 1 st Street | 003-235-004-000 |
| 825 1 st Street | 003-235-003-000 | |
| Property Name | None identified | |
| Property Inspection Date | August 13, 2018 | |
| Weather Condition | Cloudy, approximately 62 degrees Fahrenheit | |
| Site Visit Conducted by | Richard Kim, Senior Environmental Consultant | |
| Report Author | Richard Kim, Senior Environmental Consultant | |
| QA/QC Environmental Professional | Mary Osborne, Senior Environmental Consultant | |
| Property Location | The Property is located on the south side of 1 st Street between Soscol Avenue to the west and McKinstry Street to the east. Water Street is south of the Property. <i>True north was altered approximately 20 degrees to the northeast for Property description purposes.</i> | |
| General Setting | The general setting is commercial, industrial, and residential. | |

2.2 PROPERTY IMPROVEMENTS

| Property Improvements & Building / Land Description | |
|---|--|
| ITEM | |
| Property Description | <p>The Property consists of seven parcels totaling 0.87 acres that is divided by a railroad that is owned by the Napa Valley Wine Train LLC. Therefore, for description purposes, the Property will be referred to as the West Property to indicate the four parcels <i>west</i> of the railroad tracks and the East Property to indicate the three parcels <i>east</i> of the railroad tracks.</p> <p>The West Property consists of four parcels with a total square footage of 15,964 or 0.37 acres that are assigned the addresses of 803, 819, 823, and 825 1st Street. The West Property is a vacant commercial lot. There are no improvements.</p> <p>The East Property consists of three parcels with a total square footage of 22,183 square feet or 0.5 acres that are assigned the addresses of 711, 731, and 743 1st Street and 718 and 730 Water Street. The East Property is improved with a commercial building (731 1st Street) occupied by Trade Brewing, three two-bedroom and one-bathroom residential dwellings (711 1st Street, 718 Water Street, and 730 Water Street), a detached garage, and unpaved land (743 1st Street).</p> <p>731 1st Street is approximately 1,830 square feet, 711 1st Street is approximately 1,525 square feet, 718 Water Street is 730 Water Street is approximately 1,000 square feet, and the detached garage is approximately 350 square feet.</p> <p>Data Source(s) for Parcel Size: First American Title Company Property Profile</p> <p>Data Source(s) for Building Size(s): Site Reconnaissance</p> |
| Estimated Year of Construction | <p>Based on Sanborn Fire Insurance Maps, the current commercial and residential buildings appear to have existed onsite since 1886. The detached garage was added by the 1940s. In 1982, 731 1st Street was converted from a residential dwelling to commercial use.</p> <p>Data Source(s): Sanborn Fire Insurance Maps, City of Napa Building Department</p> |
| Improvement Description | <p>The buildings are wood-framed buildings with crawl spaces on raised concrete foundations due to the site being in a flood zone of the Napa River. 731 1st Street that is occupied by Trade Brewing consists of a taproom, a food preparation area, restroom, and storage areas. The three residential dwellings are two-bedroom / one-bathroom single-family residential dwellings with kitchens and storage areas. The detached garage is used for storage by the residents of 718 Water Street.</p> <p>See also appended photographs and site plot plan.</p> |
| Other Improvements & Features (including description of unimproved areas) | <p>None observed.</p> |

2.3 *PROPERTY OCCUPANTS & USE*

| Property Occupants & Use | |
|---|--|
| ITEM | |
| Present Occupant(s) and Detailed Description of Business Operation(s) | <p>The Property is improved with a commercial building, three residential dwellings, and a detached garage that are located on the East Property (711-743 1st Street and 718-730 Water Street). The West Property (803-825 1st Street) is a vacant commercial lot.</p> <p>The commercial building at 731 1st Street is occupied by Trade Brewing, a brewery and taproom. The three residential dwellings at 711 1st Street, 718 Water Street, and 730 Water Street are two-bedroom / one-bathroom single-family residential dwellings.</p> |

2.4 *MUNICIPAL SERVICES & UTILITIES*

| Municipal Services & Utilities | |
|---|---|
| ITEM | |
| Potable Water Supply | City of Napa |
| Natural Gas Utility Provider | Pacific Gas and Electric Company (PG&E) |
| Electrical Utility Provider | Pacific Gas and Electric Company (PG&E) |
| Sewage Disposal System | City of Napa |
| Solid Waste Disposal | Napa Recycling & Waste Services |
| Any Septic System, Cesspool, Seepage Pits | None observed |
| Private Water Well | None observed |
| Heating/Cooling System | Ground-mounted HVAC |

2.5 *PHYSICAL SETTING*

The Property is located within Napa Valley, approximately 50 feet north of the Napa River at an elevation of approximately 18 feet above mean sea level (amsl). Napa Valley is generally composed of younger alluvial deposits of Pleistocene to Recent age, underlain by older alluvial deposits. The younger alluvium consists of interbedded, unconsolidated gravel, sand, silt, clay, and peat to depths of up to 30 feet below ground surface (bgs). Groundwater based on groundwater monitoring data for Valley Auto Repair at 1046 McKinstry Street (approximately 120 feet to the north-northeast) identified groundwater at approximately 12 to 13 feet below ground surface (bgs) with a flow direction towards the south to southwest and to the west.

Sources:

Second Quarter 2008 Quarterly Groundwater Monitoring Report for 644 1st Street and 1046 McKinstry Street prepared by Bromley Consulting Services Inc. (BCS) dated may 28, 2008
http://geotracker.waterboards.ca.gov/esi/uploads/geo_report/6380661487/T0605522317.PDF

While groundwater flow direction at the Property cannot be confirmed without survey measurement of static groundwater level at triangulated points, it is expected to flow in the direction of surface topographical contour, or toward the wetland or nearest water body or discharge basin (percolation channel).

It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 PROPERTY RECONNAISSANCE**3.1 LIMITING CONDITIONS**

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property.

No disassembly of systems or building components or physical or invasive testing was performed. ODIC renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property. ODIC relies completely on the information, whether written, graphic or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Note: Typically lenders have environmental policies where due diligence reports are valid for one year from the report date. However, such policies and standards can vary from each lender or *User*. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM Standard Practice E1527-13.

3.2 PROPERTY RECONNAISSANCE

ODIC conducted interior and exterior observations of the Property with the intent to identify *releases* or *material threat* of future *releases* of *hazardous substances* or *petroleum products* to the *environment*. The site reconnaissance table below lists items *visually and/or physically observed*.

| Property Reconnaissance | |
|--|---------------------------|
| ITEM | |
| Processes involving Petroleum Products or Hazardous Substances | There were none observed. |
| Underground Storage Tanks (USTs) | There were none observed. |
| Aboveground Storage Tanks (ASTs) | There were none observed. |
| Fuel Islands / Dispensers, or any type of fueling system/operation | There were none observed. |
| Containers or Drums of Hazardous Materials and/or Petroleum Products related to the Property's operations/processes | There were none observed. |
| Unidentified Substance Containers: Other containers of suspect hazardous materials in drums, barrels, or other storage, or unlabeled/unidentified containers on site | There were none observed. |
| Stained or Corroded Surfaces / Stained Soil (paved or unpaved) | There were none observed. |
| Unusual areas of asphalt/cement patch or surface depressions including any possible boring locations | There were none observed. |
| Stockpiled soils, fill materials, or soil piles | There were none observed. |
| Stressed vegetation | There were none observed. |
| Any type of heavy equipment or machinery of environmental concern | There were none observed. |
| Electrical or hydraulic equipment or machinery of environmental concern | There were none observed. |
| Drains for machinery/equipment cleaning or flushing | There were none observed. |
| Evidence of onsite surface water impoundment, pits, dry wells or sensitive surface water features such as lagoons, ponds, and other water bodies | There were none observed. |
| Drains, sumps, wastewater treatment units, oil/water separators, clarifiers, catch basins, drip pads, or sumps | There were none observed. |

| Property Reconnaissance | |
|--|---------------------------|
| ITEM | |
| Any regulated surface-water discharges, illegal dumping, unauthorized surface runoff or discharge to potentially impact water bodies | There were none observed. |
| Storm water or surface-water drainage system having any abnormal accumulation of petroleum or chemical run-off or foreign materials, any unusual blockage of the storm-water control systems | There were none observed. |
| Pools of liquid such as standing surface water, pools or sumps containing liquids likely to be hazardous substances or petroleum products | There were none observed. |
| Odors (strong, pungent, or noxious odors and their sources) | There were none observed. |
| Septic systems, cesspools, seepage pits | There were none observed. |
| Wells (private water wells, irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, vapor recovery wells or other-monitoring wells) | There were none observed. |
| Railroad tracks or spurs | There were none observed. |
| Visual evidence of improper handling/disposal of solid wastes | There were none observed. |

3.3 Detailed Description of Site Reconnaissance and Environmental Conditions The Property is currently developed with a former residential building converted into a commercial building that is occupied by Trade Brewing at 731 1st Street; three residential dwellings at 711 1st Street, 718 Water Street, and 730 Water Street; and a detached garage at the East Property. The West Property is an unpaved lot. No Recognized Environmental Conditions (RECs) were observed during site reconnaissance.

3.4 CURRENT USES OF ADJACENT PROPERTIES

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the Property. An adjoining property is defined as any real property or properties in which the border is contiguous or partially contiguous with that of the Property, or that would be contiguous or partially contiguous with that of the Property but for a street, road, or other public thoroughfare separating them.

| Adjacent Properties West Property: 803-825 1st Street | |
|---|---|
| ITEM | |
| North | 1 st Street is to the north followed by an office building for the Napa County Flood Control at 804 1 st Street. |
| South | Vacant land that is owned by the Napa Valley Wine Train LLC is to the south followed by the Napa River. |
| West | Soscol Avenue is to the west followed by China Point Park. |
| East | Railroad tracks owned by the Napa Valley Wine Train LLC are to the east followed by the Trade Brewing and a residential dwelling of the East Property at 731 1 st Street and 730 Water Street. |
| Northwest | The intersection of 1 st Street and Soscol Avenue is to the northwest followed by the China Point Park. |
| Northeast | Railroad tracks are to the northeast followed by Forno Piombo, a wood fire oven business at 728 1 st Street. |
| Southwest | The Soscol Avenue bridge and Napa River are to the southwest. |
| Southeast | Railroad tracks are to the southeast followed by Water Street and a parking lot for the Napa County Flood District at 876 Water Street. |

| Adjacent Properties East Property: 711-743 1st Street and 718-730 Water Street | |
|--|---|
| ITEM | |
| North | 1 st Street is to the north followed by by Forno Piombo Woof Fire Ovens at 728 1 st Street and a multi-tenant retail building at 708-714 1 st Street that is occupied by The Wine Thief, Voo Doo's Hair Salon, Mark Herold Wines and other business. |
| South | Water Street is to the south followed by a parking lot for the Napa County Flood District at 876 Water Street. |
| West | Railroad tracks owned by the Napa Valley Wine Train LLC are to the west followed by a vacant lot at 803-825 1 st Street that is the West Property. |
| East | A residential dwelling is to the east at 903 McKinstry Street. |
| Northwest | Railroad tracks are to the northwest followed by an office building for the Napa County Flood Control at 804 1 st Street. |
| Northeast | 1 st Street is to the northeast followed by the multi-tenant retail building at 708-714 1 st Street. |
| Southwest | Vacant land that is owned by the Napa Valley Wine Train LLC is to the southwest followed by the Napa River. To the south-southwest is a railroad bridge. |
| Southeast | Water Street is to the southeast followed by the County of Napa Corporate Yard at 933 Water Street. |

3.5 NON-SCOPE (NON-ASTM) CONSIDERATIONS

Evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.4 of this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the *User* and ODIC Environmental including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of Standard Practice E1527-13, are not part of this *Report*, and should only be included in the *Report* if so specified in the terms of engagement between the *User* and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13). No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive.

There may be environmental issues or conditions at a *Property* that parties may wish to assess in connection with *commercial real estate* that are outside the scope of this practice (the non-scope considerations). As noted by the legal analysis in Appendix X1 of ASTM Standard Practice E1527-13, some substances may be present on the *Property* in quantities and under conditions that may lead to contamination of the *property* or of nearby properties but are not included in CERCLA's definition of *hazardous substances* (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice.

Whether or not a *User* elects to inquire into non-scope considerations in connection with this practice or any other *environmental site assessment*, no assessment of such non-scope considerations is required for appropriate inquiry as defined by this practice.

| NON-SCOPE, NON-CERCLA ITEMS | |
|--|--|
| ITEM | |
| Suspect asbestos-containing building materials (ACBM) in damaged condition if the structure is built prior to 1978 | <p>Since an asbestos survey is not included in the scope of services for this Phase I ESA, ODIC did not test suspect asbestos-containing building materials (ACBM) at the Property. However, because improvements at the Property were constructed before 1978, the presence of ACBM is likely.</p> <p>It is important to note that state and federal laws impose special requirements for handling these materials, especially in the event of remodeling or demolition that may impact these materials. Prior to any remodeling or demolition, the Property owner must have properly certified personnel test all suspect ACBM to be disturbed by the work. If ACBM are identified and are subject to disturbance, the Property owner must have properly certified personnel prepare and implement work procedures and associated Operations and Maintenance Plans, as applicable. The Property owner/occupant should assure compliance with all applicable regulations, notably AHERA, OSHA, and the General Construction Standard (as applicable).</p> |
| Suspect lead-based paint (LBP) in damaged condition if the structure is residential and was built prior to 1978 | <p>Since a lead-based paint survey is not included in the scope of services for this Phase I ESA, ODIC did not test suspect lead-based paint (LBP) at the Property. However, because improvements at the Property were constructed before 1978, the presence of LBP is likely.</p> <p>It is important to note that state and federal laws impose special requirements for handling these materials, especially in the event of remodeling or demolition that may impact these materials. Prior to any remodeling or demolition, the Property owner must have a certified/licensed LBP consultant test all suspect LBP to be disturbed by the work. If LBP are identified and are subject to disturbance, the Property owner must have properly certified personnel prepare and implement work procedures and associated Operations and Maintenance Plans, as applicable. The Property owner/occupant should assure compliance with all applicable regulations, notably OSHA, and the General Construction Standard (as applicable).</p> |
| Lead in drinking water (LIW) | <p>Since a lead in drinking water survey is not included in the scope of services for this Phase I Environmental Site Assessment, ODIC did not test drinking water at the Property for lead content.</p> <p>The major source of LIW is leaching of lead from household plumbing materials or water service lines used to bring water from the main to the building. Lead can leach into drinking water through contact with the plumbing, solder, fixtures and faucets (brass), and fittings. The amount of lead in drinking water will be influenced by the type and amount of minerals in the water, how long the water stays in the pipes, the amount of wear in the pipes, the water's acidity and its temperature.</p> |

| NON-SCOPE, NON-CERCLA ITEMS | |
|--|---|
| ITEM | |
| Radon | <p>Since a radon survey is not included in the scope of services for this Phase I ESA, ODIC did not test for radon at the Property.</p> <p>Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.</p> <p>A review of the EPA's Map of Radon Zones indicates that Napa County falls within Zone 3, a zone of low radon potential. Counties located within Zone 3 have a predicted average indoor radon screening level less than 2 picocuries per liter (pCi/L). A radon survey was not included in the current scope of services.</p> <p>Source: https://www.epa.gov/radon/find-information-about-local-radon-zones-and-radon-programs</p> <p>It should be noted that site-specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the Property radon levels.</p> |
| Urea Formaldehyde | <p>A UFFI survey was not included in the scope of services for this Phase I ESA. The sale and installation of Urea Formaldehyde Foam Insulation (UFFI) as thermal insulation began in approximately 1970, and continued until December 1980 when it was banned under the federal <i>Hazardous Products Act</i>. UFFI was installed in both new and existing buildings during this period. UFFI was not commonly used in industrial or commercial buildings.</p> |
| Suspect PCB-oil concern with hydraulic equipment, ballasts, transformers, etc. | <p>Since a PCB survey is not included in the scope of services for this Phase I ESA, ODIC did not test for PCBs at the Property.</p> |
| Wetlands, creeks, swale, pits, ponds, lagoons, or any other water bodies | <p>A wetland is defined as areas inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands provide a number of economically and environmentally important functions such as flood control, water quality protection, groundwater recharge, spawning areas for commercially important fish, and wildlife habitat.</p> <p>Wetlands are evaluated using three indicators: hydrology, hydrophytic vegetation, and hydric soils. Section 404 of the Clean Water Act requires a permit before dredged or fill material may be discharged into regulated wetlands (known as Jurisdictional Wetlands). The Army Corps of Engineers has primary responsibility for making wetlands jurisdictional determinations and issuing wetlands permits. A number of activities are authorized through the use of nationwide permits.</p> <p>A wetland study or survey is not included in the current scope of services for this Phase I ESA. However, based on a review of the EDR Radius Map Report, the site is not within a mapped National Wetland Inventory location.</p> |

| NON-SCOPE, NON-CERCLA ITEMS | |
|---|---|
| ITEM | |
| Visual evidence of mold problems from wet areas, roof leaks, moisture around air conditioning or plumbing units | Since a mold/microbial matter survey is not included in the scope of services for this Phase I ESA, ODIC did not test for mold/microbial matter at the Property. |
| Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment (unusual smells, noxious odors, or visual emissions, air emission stacks), excluding impacts to indoor air from releases of hazardous substances into the environment | <p>Since indoor air quality testing is not included in the scope of services for this Phase I ESA, ODIC did not conduct indoor air quality testing at the Property.</p> <p>There are many sources of indoor air pollution. These include combustion sources such as oil, gas, kerosene, coal, wood, tobacco products, asbestos-containing materials, wet or damp carpet, formaldehyde, certain pressed wood products, cleaning and maintenance chemicals, and pesticides. EPA estimates that indoor levels of air pollutants can be two to five times higher, and occasionally 100 times higher, than outdoor levels. In general, EPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion).</p> |
| Flood Zone | <p>The Federal Emergency Management Agency Flood Insurance Rate Map is typically used to determine if the Property is located within a flood zone. Such evaluation is not included in the scope of work for this Phase I ESA.</p> <p>However, it appears that the Property is within a flood zone.</p> |
| Methane Gas | <p>Since a methane gas survey is not included in the scope of services for this Phase I ESA, ODIC did not test for methane gas at the Property.</p> <p>In response to concern regarding the potential for methane accumulation beneath buildings, and potential methane intrusion into buildings, some cities or regulatory oversight agencies have established methane zones and/or methane buffer zones based on the proximity to oil wells, landfills, or naturally occurring methane deposits.</p> <p>A methane risk assessment is not included in the scope of work for this Phase I ESA.</p> |

| NON-SCOPE, NON-CERCLA ITEMS | |
|---|--|
| ITEM | |
| <p>Other non-scope considerations discussed in Appendix X1 and Appendix X5 of ASTM Standard Practice E1527-13</p> | <p>No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive. These items are not included in the current scope of services for this Phase I ESA.</p> <p><i>Endangered Species Act</i>—Under the Endangered Species Act (ESA), the government protects endangered and threatened plants and animals (listed species) and their habitats. The presence of listed species can restrict use of the Property to ensure that the proposed activities do not adversely affect endangered or threatened species as well as their critical habitats. This includes <i>Biological agents, Cultural and historical resources, and Ecological resources</i>.</p> <p><i>Compliance with AULs</i>—Parties who wish to qualify for one of the LLPs will need to know whether they are in compliance with AULs, including land use restrictions that were relied upon in connection with a response action. A determination of compliance with AULs is beyond the scope of ASTM Standard Practice E1527-13.</p> <p><i>Regulatory Compliance (Includes Health and Safety and Industrial Hygiene)</i>—Properties used for industrial, commercial and even residential purposes are frequently subject to a panoply of environmental laws and regulations that relate to many aspects of operations conducted at the Property. In the context of a property transaction, noncompliance with environmental laws and regulations may create a material risk of financial loss for both building operators and owners of the properties.</p> <p><i>Potential Effects of Noncompliance</i>—Depending on the circumstances, noncompliance with various regulatory requirements could result in material costs to owners and operators of industrial, commercial or residential properties, including fines or other monetary penalties, injunctions or other equitable relief that slows or eliminates productivity, and could result in increased transaction costs associated with defending claims of noncompliance. Furthermore, even in the absence of administrative or legal enforcement proceedings, the costs to bring facilities into compliance with applicable regulatory requirements could be material in some circumstances.</p> |

4.0 PROPERTY AND VICINITY HISTORY

The objective of consulting historical sources is to develop a history of the previous uses of the Property and surrounding area, in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) in connection with the Property. ODIC exercises professional judgment and consider the possible *releases* that might have occurred at a Property in light of the historical uses and, in concert with other relevant information gathered as part of the Phase I process, to use this information to assist in identifying RECs, CRECs, and/or HRECs in connection with the Property. Historical Records Search was conducted for the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

4.1 PREVIOUS ENVIRONMENTAL REPORTS

Phase I Environmental Site Assessment (ESA) for 730 Water Street and 731 1st Street, ODIC Environmental – January 29, 2014

ODIC reviewed the 2014 ESA report to determine the Property was occupied by a residential dwelling at 730 Water Street and Adam’s Cleaners at 731 1st Street. A Columbia-model dry cleaning machine and drums of perchloroethylene (PCE) were identified at Adam’s Cleaners. The owner of Adam’s Cleaners, Mr. Adam Chebl, was interviewed at that time and stated that the previous occupant was a seamstress and that in 2003, he installed the PCE solvent dry cleaning machine.

| | |
|---|--|
| View of Adam’s Cleaners in 2014 | Interior of Adam’s Cleaners |
|  |  |
| Columbia-model Dry Cleaning Machine | 55-gallon drum of PCE |
|  |  |

Since 731 1st Street was a dry cleaners at the time of site reconnaissance, and was likely a historical dry cleaners, ODIC stated that that due to the shallow groundwater in the site vicinity and the potential for vapor intrusion due to the potential soil and soil vapor contamination associated with dry cleaners, a subsurface investigation should be conducted.

Phase II Investigation Report for Adams Cleaners – BSK Associates, March 14, 2014

Based on ODIC's Phase II recommendation, BSK Associates conducted a targeted Phase II Investigation Report for Soil and Groundwater at Adam's Cleaners. BSK advanced two borings, B1 and B2, outside the buildings because interior access was not granted for their subsurface investigation. These locations were selected because they were adjacent to the sanitary sewer line cleanout leaving the dry cleaning business. Soil samples were collected at depths of 5, 7, and 10 feet below ground surface (bgs). Groundwater was encountered around 11 and 13 feet bgs and groundwater samples were collected at 10 feet bgs for both borings. Soil and groundwater samples did not identify any halogenated solvents, specifically perchloroethylene (PCE) and trichloroethylene (TCE). BSK stated that based on their site observations and analytical results of soil and groundwater samples, no evidence of contamination from the former or existing dry cleaning operations was discovered.

ODIC's Opinion

While no soil or groundwater samples from BSK's Phase II Report identified contaminants of concern, since no borings were advanced inside the dry cleaning building, ODIC believes that the potential of soil, groundwater, and soil vapor contamination remains onsite, specifically below the building. Moreover, groundwater in the site vicinity flows towards the southwest and no borings were advanced down-gradient of the building. Therefore, ODIC believes a potential human health risk from the former dry cleaners remains.

Boring Map – BSK Associates

4.2 SANBORN MAP COMPANY FIRE INSURANCE MAPS

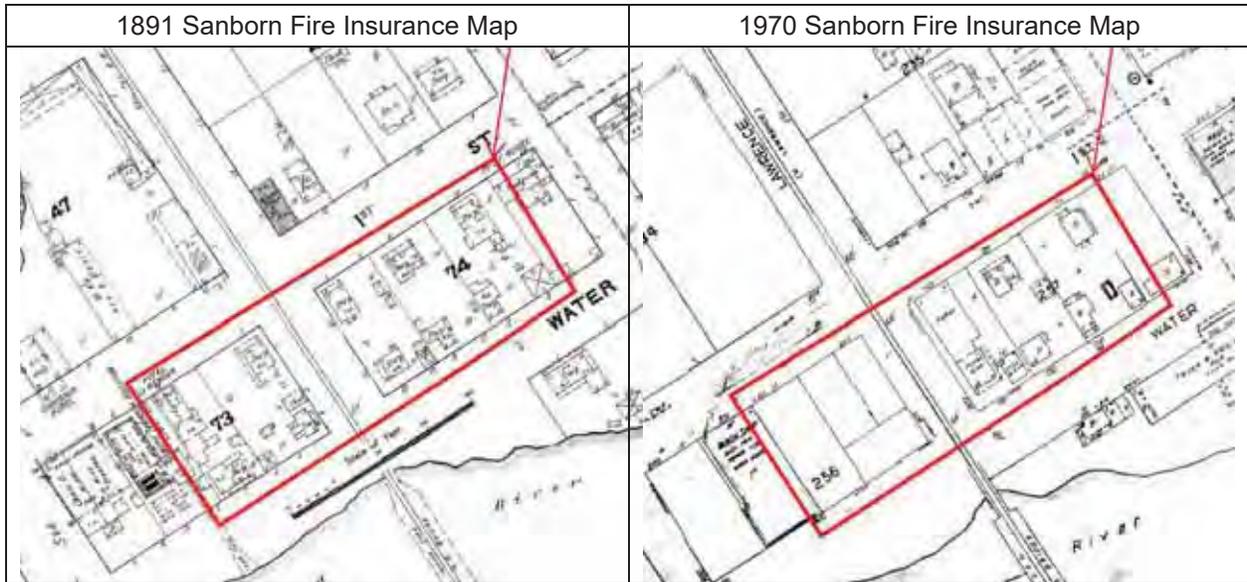

Sanborn Map Company maps were created for insurance underwriters from 1867 to present, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. In 1996, the entire Sanborn Map Company collection was acquired by Environmental Data Resources, Inc. (EDR). ODIC subcontracted with EDR to provide copies of Sanborn Map Company maps, if available, for the Property and vicinity.

ODIC reviewed Sanborn Map Company fire insurance maps supplied by EDR. A summary of observations is provided below:

| Historical Sanborn Fire Insurance Maps | |
|--|--|
| YEAR | DESCRIPTION |
| 1886 | Property: The West Property is developed with four residential dwellings and storage sheds. The East Property is developed with six residential dwellings and storage sheds. The four current building, the three residential dwellings and Trade Brewing are developed. |
| | Adjacent North: The property to the north is developed with A. Wagner’s wine cellar and a mixed-use commercial and residential building with a grocery store and dwelling west of the railroad tracks. A blacksmith and wagon shop is developed to the north, east of the railroad tracks. |
| | Adjacent South: Water Street is to the south followed by Napa White Laundry and the Napa River. |
| | Adjacent West: The property to the west is developed with a residential dwelling. |
| | Adjacent East: The property to the east is developed with a building that is labeled with a saloon and kitchen. |
| 1891, 1901 | Property: The West Property is developed with the Hotel Di Genova at the west side, three residential dwellings, and storage sheds. The East Property remains developed with six residential dwellings and storage sheds. |
| | Adjacent North: The property to the north is developed with a hay and grain warehouse and a grocery store with a saloon west of the railroad tracks. A blacksmith and wagon shop and three residential dwellings are developed to the north, east of the railroad tracks. |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. |
| | Adjacent West: The property to the west is developed with a Thomson Houston Light Company facility with a coal house and tram way. |
| | Adjacent East: The property to the east remains developed with a building that is labeled as a saloon. |
| 1910 | Property: The West Property is developed with a lodging building with a saloon at the west side, four residential dwellings, and storage sheds. The East Property is developed with five residential dwelling and storage sheds. |
| | Adjacent North: The hay and grain warehouse has been removed and the grocery store has been converted into the Roma Hotel with a saloon west of the railroad tracks. The blacksmith and wagon shop and three residential dwellings remain to the north, east of the railroad tracks. |
| | Adjacent South: Water Street is to the south followed by two residential dwellings and the Napa River. |
| | Adjacent West: The property to the west is now the Napa Pump & Manufacturing Company with a machine shop and a foundry. |
| | Adjacent East: The property to the east is now a dwelling. |
| 1924 | The Property and adjacent properties remain relatively unchanged from the previous Sanborn Fire Insurance map. |
| 1945 | Property: The West Property remains developed with a lodging building with a saloon at the west side, four residential dwellings, and storage sheds. The East Property is |

| YEAR | DESCRIPTION |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. |
| | Adjacent West: The property to the west remains a machine shop. |
| | Adjacent East: The property to the east is now developed with one residential dwelling. |
| | Adjacent Southeast: The current building to the southeast remains a truck and equipment repair. |

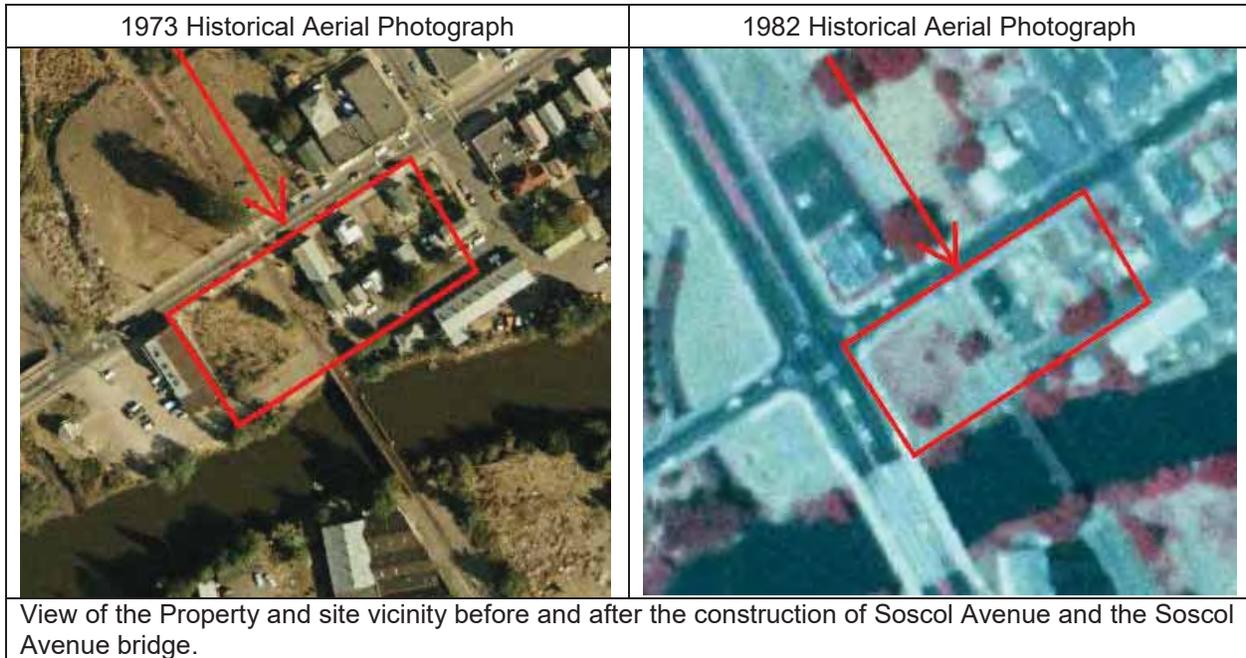

THE 1891 SANBORN FIRE INSURANCE MAP (SANBORN) DEPICTS THE CURRENT FOUR BUILDINGS AT THE EASTERN PROPERTY.

ODIC reviewed aerial photographs supplied by the EDR Aerial Photo Decade Package (1947-2016) and Google Earth (2008, 2009, and 2018). A summary of observations is provided below:

| Historical Aerial Photographs | |
|-------------------------------|--|
| YEAR | DESCRIPTION |
| 1947 | Property: The Property is developed with five buildings and storage sheds at the West Property. The East Property is developed with a commercial building, the four current buildings, and storage sheds. |
| | Adjacent North: From west to the east, the property to the north is developed with two commercial buildings, a residential dwelling and a retail building. |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. |
| | Adjacent West: The property to the west is developed with a commercial building. |
| | Adjacent East: The property to the east is developed with two residential dwellings. |
| 1958 | Property: The West Property is developed with three residential dwellings and a detached garage. The East Property remains developed with a commercial building, the four current buildings, and the current detached garage. |
| | Adjacent North: From west to the east, the property to the north remains developed with two commercial buildings, a residential dwelling and a retail building. |

| Historical Aerial Photographs | |
|-------------------------------|---|
| YEAR | DESCRIPTION |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. A storage building is developed to the southeast. |
| | Adjacent West: The property to the west remains developed with a commercial building. |
| | Adjacent East: The property to the east remains developed with two residential dwellings. |
| 1968 | Property: The West Property is now a vacant lot. The East Property remains developed with a commercial building, the four current buildings, and the current detached garage. |
| | Adjacent North: The commercial building to the north is now a vacant lot. North-adjacent properties east of the railroad tracks are developed with a residential dwelling and commercial building. |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. The current light industrial building is developed to the southeast. |
| | Adjacent West: The property to the west remains developed with a commercial building. |
| | Adjacent East: The property to the east remains developed with two residential dwellings. |
| 1973 | The Property and adjacent properties remain relatively unchanged from the previous photograph. |
| 1982 to 2008 | Property: The West Property remains a vacant lot. The East Property remains developed with a commercial building, the four current buildings, and the current detached garage. |
| | Adjacent North: The Napa County Flood Control District building is developed to the north. The north-adjacent properties east of the railroad tracks remain developed with a residential dwelling and commercial building. |
| | Adjacent South: Water Street is to the south followed by a residential dwelling and the Napa River. The current light industrial building remains to the southeast. |
| | Adjacent West: The property to the west is now developed with Soscol Avenue. The Soscol Avenue bridge is developed to the southwest. West of Soscol Avenue is the China Point Park. |
| | Adjacent East: The property to the east is developed with a residential dwelling. |
| 2009, 2010 | Property: The West Property remains a vacant lot. The commercial building at the East Property has been demolished. The four current buildings and the current detached garage remain unchanged. |
| | Adjacent North: The Napa County Flood Control District building remains to the north. The north-adjacent properties east of the railroad tracks remain developed with a residential dwelling and commercial building. |
| | Adjacent South: Water Street is to the south followed by a parking lot and the Napa River. The current light industrial building remains to the southeast. |
| | Adjacent West: The property to the west remains developed with Soscol Avenue. West of Soscol Avenue is the China Point Park. |
| | Adjacent East: The property to the east remains developed with a residential dwelling. |
| 2011 | Property: The West Property remains a vacant lot. The East Property remains developed with the four current buildings and detached garage. |
| | Adjacent North: The Napa County Flood Control District building remains to the north. The north-adjacent properties east of the railroad tracks remain developed with a residential dwelling and commercial building. |
| | Adjacent South: Water Street is to the south followed by a parking lot and the Napa River. The current light industrial building remains to the southeast. The railroad bridge has been redeveloped and an additional railroad spur has been added to the railroad tracks that bisect the Property. |
| | Adjacent West: The property to the west remains developed with Soscol Avenue. West of Soscol Avenue is the China Point Park. |
| | Adjacent East: The property to the east remains developed with a residential dwelling. |
| 2016 | The Property and adjacent properties remain relatively unchanged from the previous photograph. |
| 2018 | The Property and adjacent properties remain relatively unchanged from the previous |

4.5 CITY/COUNTY BUILDING DEPARTMENT, ZONING/LAND USE, PROPERTY TAX RECORDS, PROFILES

Building Department Records:

ODIC reviewed building records from the City of Napa Building Department. The original building permit was not identified. A summary of the building records is provided below:

| Building & Planning Department Records | |
|--|--|
| YEAR | DESCRIPTION |
| 1955 | Addition permit for Lombardo Hotel (819 1 st Street) Owner: A. Daros |
| 1957 | Alterations to an existing store (743 1 st Street) Owner: Roy Griffin |
| 1959 | Re-roofing permit (743 1 st Street) Owner: John Tamborini |
| 1960 | Addition to an existing store (743 1 st Street) Owner: John Tamborini |
| 1965 | Permit to demolish a residential dwelling (803 1 st Street) Owner: Joe DeSilva |
| 1967 | Permit to demolish Lombardo Hotel (811-819 1 st Street) Owner: Joe DeSilva |
| 1975 | Permit for a furniture store (743 1 st Street) Owner: Roy Griffin |
| 1977 | Permit for Western Tours, Offices (743 1 st Street) Owner: Norman Springer |

| | |
|------|--|
| 1981 | Re-roofing permit for a single family dwelling (730 Water Street) Owner: Dorothy Mirani |
| 1982 | Repair foundation for residential dwelling (731 1 st Street) Owner: Guadagni & Thompson |
| 1983 | Permit to remodel a residential dwelling to commercial use (731 1 st Street) Owner: Al Guadagni |
| 2000 | Electrical permit for residential dwelling (711 1 st Street) Owner: Alvin Guadagni |
| 2003 | Re-roofing permit for residential dwelling (711 1 st Street) Owner: Raymond Guadagni |
| 2003 | Permit to add a boiler room for Adam's Cleaners (731 1 st Street) Owner: Adam Chebl |
| 2004 | Permit for Adam's Cleaners (731 1 st Street) Owner: Adam Chebl |
| 2005 | Permit for Steve Silva Plumbing Showroom (743 1 st Street) Owner: Napa County Flood Control |
| 2009 | Permit to demolish a single family dwelling (743 1 st Street) Owner: Napa County Flood Control |
| 2014 | Replace foundation for a residential dwelling (718 Water Street) Owner: Raymond Guadagni |
| 2016 | Siding repairs and re-roofing permit for a commercial building (731 1 st Street) Owner: Foxbow Development LLC |
| 2017 | Permit for a 1,213-square-foot beer tasting room (731 1 st Street) Owner: Glen Loban |

Property Profile:

ODIC obtained Property information from the First American Title Company property profiles:

West Property
15,964 SF – 0.37 Acres

- Current Property Owner(s): Pt-Five Investments Lp
- Property Address(es): 825 1st Street, Napa, CA 94559
- APN#: 003-235-003-000
- Lot Size: 0.156 acres / 6,807 square feet
- Building Size: N/A
- Construction Date: N/A
- Site Use / Use Code: Commercial Lot

- Current Property Owner(s): Pt-Five Investments Lp
- Property Address(es): 823 1st Street, Napa, CA 94559
- APN#: 003-235-004-000
- Lot Size: 0.08 acres / 3,536 square feet
- Building Size: N/A
- Construction Date: N/A
- Site Use / Use Code: Commercial Lot

- Current Property Owner(s): Pt-Five Investments Lp
- Property Address(es): 803 1st Street, Napa, CA 94559
- APN#: 003-235-005-000
- Lot Size: 0.068 acres / 2,965 square feet
- Building Size: N/A

- Construction Date: N/A
- Site Use / Use Code: Commercial Lot

- Current Property Owner(s): Pt-Five Investments Lp
- Property Address(es): 819 1st Street, Napa, CA 94559
- APN#: 003-235-006-000
- Lot Size: 0.06 acres / 2,656 square feet
- Building Size: N/A
- Construction Date: N/A
- Site Use / Use Code: Commercial Lot

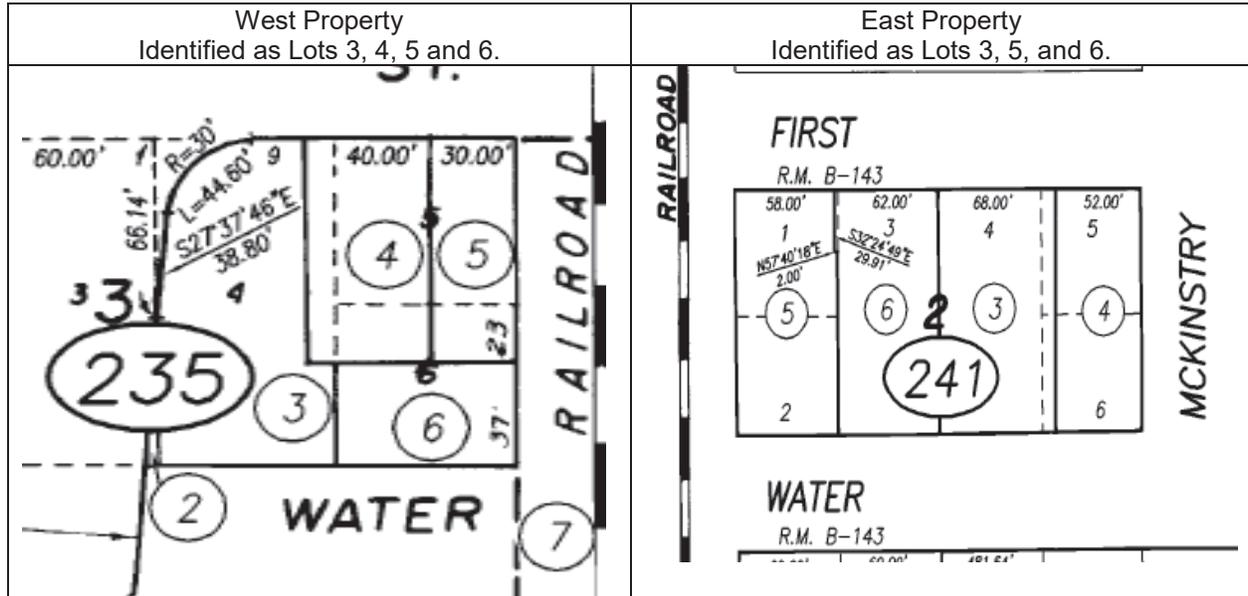

East Property
22,183 SF – 0.5 Acres

- Current Property Owner(s): Raymond A Guadagni Trust
- Property Address(es): 711 1st Street, Napa, CA 94559
- APN#: 003-241-003-000
- Lot Size: 0.18 acres / 8,245 square feet
- Building Size: 1,525 square feet
- Construction Date: 1910
- Site Use / Use Code: Multi Family

- Current Property Owner(s): Napa County Flood Control & Water Conservation District
- Property Address(es): 743 1st Street, Napa, CA 94559
- APN#: 003-241-005-000
- Lot Size: 0.16 acres / 6,969 square feet
- Building Size: N/A
- Construction Date: N/A
- Site Use / Use Code: Public (Nec)

- Current Property Owner(s): Foxbow Development LLC
- Property Address(es): 730 Water Street, Napa, CA 94559
- APN#: 003-241-006-000
- Lot Size: 0.16 acres / 6,969 square feet
- Building Size: N/A
- Construction Date: N/A
- Site Use / Use Code: Commercial (Nec)

Total Size
38,147 SF – 0.87 Acres

4.6 HISTORICAL TOPOGRAPHIC MAPS

Development history of the Property and surrounding area was researched using historical 7.5 Minute USGS topographic maps provided by EDR from 1902 to 2012. No features of environmental concern were identified.

4.7 OIL & GAS MAPS

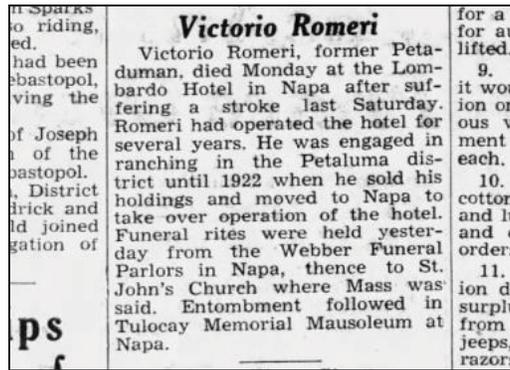

ODIC reviewed California Department of Conservation, Division of Oil, Gas & Geothermal Resources (DOGGR) maps for the Property and immediate vicinity via the DOGGR Online Mapping System (DOMS), but found no active or abandoned oil and/or gas wells on the Property or in the immediate vicinity.

Source: <https://maps.conservation.ca.gov/doggr/wellfinder/#openModal>

4.8 OTHER HISTORICAL RECORDS

This category includes, but is not limited to: miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current owners or occupants of neighboring properties, or records in the files and/or personal knowledge of the Property owner and/or occupants.

According to an obituary from The Press Democrat newspaper on Friday, August 17, 1945, Mr. Victorio Romeri died on August 13, 1945 at the Lombardo Hotel in Napa. It stated that Mr. Romeri moved to Napa in 1922 to take over the hotel. The Lombardo Hotel was located at the Western Property at 819 1st Street. Mr. Romeri was identified in a 1942 city directory listing from EDR.

Source: <https://www.newspapers.com/image/265116466/?terms=lombardo%2Bhotel%2Bnapa>

ODIC researched Google Maps Street View and identified 731 1st Street as being occupied by Adam's Cleaners in 2007. Below is the image. Adam's Cleaners occupied the Property until at least early 2014 based on ODIC's previous Phase I Environmental Site Assessment dated January 29, 2014. This building is currently occupied by Trade Brewing.

5.0 STANDARD ENVIRONMENTAL RECORDS RESEARCH

5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were provided by governmental record search database suppliers, such as Environmental Data Resources (EDR). For definitions of database acronyms, review the database report in Appendix C and/or refer to ASTM Standard Practice E1527-13, Sections 3.3 and 8.2.

Database sources maintained by local offices were obtained via records requests. Databases were searched for properties with reported environmental listings within distances specified by ASTM Standard Practice E1527-13, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is included as an appendix to this *Report*. The database report may identify certain “orphan sites” which are those facilities that could not be mapped or geocoded due to inadequate address information. ODIC cannot be held liable for not correctly locating these orphan sites to determine their impact to the Property.

ASTM Standard Practice E1527-13 Sections 3.3 and 8.2 use terminology such as Leaking Storage Tank and Registered Storage Tank to refer to both Leaking Underground/Aboveground Storage Tanks and Underground/Aboveground Storage Tanks. For the purposes of this assessment, ODIC has used state-specific terminology to refer to Leaking Storage Tanks and/or other Registered Storage Tanks as generally defined by the state in which the Property is located.

5.2 PROPERTY LISTING(S)

| 2012 | ADAMS CLEANERS | Drycleaning Plants, Except Rugs |
| 2013 | ADAMS CLEANERS | Drycleaning Plants, Except Rugs |

The RCRA-SQG listing from 1996 was for Ye Olde Valet Shoppe due to the business generating more than 100 and less than 1000 kilograms (kg) of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generating 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time. No additional information was available.

Ye Olde Valet Shoppe is identified in the Environmental Protection Agency's (EPA) Facility Index System (FINDS) database with a Registry ID #110001179260. No additional information was available. Adam's Cleaners is identified in the FINDS database with a Registry ID #110038078291. No additional information was available.

Adam's Cleaner is identified in the Napa County Division of Environmental Health (NCDEH) as operating a perchloroethylene (PCE) dry cleaning machine according to an undated Emergency Response Plan. Moreover, records revealed that Adam's Cleaners operated a perchloroethylene (PCE) dry cleaning machine from at least 2004 to 2014. The machine was identified as being located at the southeast portion of the building according to an Emergency Response Plan. An inspection report from 2006 stated that Adam's Cleaners used more than 55-gallons of hazardous materials. Additionally, a Notice of Violation was issued to Adam's Dry Cleaners on December 18, 2012 for not having hazardous waste containers that were clearly marked and not having an emergency response plan.

Adam's Cleaners is identified in the California Department of Substances Control (DTSC) Hazardous Waste Tracking System (HWTS) database. The DTSC HWTS database identified Adam's Cleaners as generating liquids with halogenated organic compounds / halogenated solvents from 2005 to 2014 ranging from 0.075 to 0.8 tons annually. This confirms that Adam's Cleaners operated an onsite dry cleaning machine. Moreover, in January 2014, ODIC conducted a previous Phase I when Adam's Cleaners was still in operation. During site reconnaissance at that time, perchloroethylene (PCE) in drums was identified. See Section 4.2 Previous Environmental Reports.

SEMS (Superfund Enterprise Management System) - Archive:

| LISTING | ADDRESS | DISTANCE |
|---------------------|---|---------------|
| PG&E Gas Plant Napa | 5 th Street Between Main and Brown | 1/4 – 1/2 SSW |

The PG&E Gas Plant Napa SEMS-ARCHIVE site also known as Napa Gas & Electric in the California Department of Toxic Substances Control (DTSC) ENVIROSTOR database, was a small coal gasification facility constructed by Napa Gas Works in about 1867 located approximately 1,400 feet to the south-southwest. The facility consisted of an office building, gas production building, a condensing/purifying building, a workshop, two storage sheds, and an aboveground gas storage tank. The gasification facility produced about 3,000 cubic feet of gas per day through the carbonation of coal. The gas was distributed through underground gas mains which lit city street lamps and served about 100 households. Operations ceased in 1889 and the facility was demolished by 1891. The Napa Mill Development Company acquired the Site in 1986 and planned to expand the existing commercial building. Subsurface sampling revealed that the contamination remains confined to the site and the site received certification with land-use restrictions on September 21, 2015. Therefore, this site is not assessed as an environmental concern for the Property.

|---------------------|---|---------------|
| Al's Auto Wrecking | 1274 McKinstry Street | 0 – 1/8 N |
| Bresciani Property | 750 Randeau Way | 1/4 – 1/2 NNW |
| PG&E Gas Plant Napa | 5 th Street Between Main and Brown | 1/4 – 1/2 SSW |
| The Chrome Shop | 739 8 th Street | 1/4 – 1/2 S |

The nearest ENVIROSTOR site, Al's Auto Wrecking, was approximately 500 feet to the north of the Property. It is currently undeveloped land that is part of the Oxbow Commons north of the Oxbow Public Market and south of The Westin Verasa Napa hotel. This site had subsurface contamination due to an underground storage tank and auto dismantling operations. After remedial activities, site closure was issued by the Regional Water Quality Control Board on October 2, 2001 and the Napa County Flood Control & Water Conservation District acquired the site as part of flood control activities. Therefore, this site is not assessed as an environmental concern for the Property.

Source: http://geotracker.waterboards.ca.gov/profile_report?global_id=T0605500197

The Bresciani Property at 750 Randeau Way, is approximately 1,600 feet to the northwest of the Property. This site had two 12,000-gallon gasoline underground storage tanks (USTs), one 10,000-gallon gasoline UST, and one 10,000-gallon diesel UST that were removed in 1986 and had a release to the subsurface soil and groundwater. After groundwater monitoring and remedial activities, the site received case closure from the Regional Water Quality Control Board on March 31, 1993. This site was certified by the California Department of Toxic Substances Control (DTSC) on May 10, 1994. Therefore, this site is not assessed to pose a significant environmental risk to the Property.

Source(s): https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=28290002

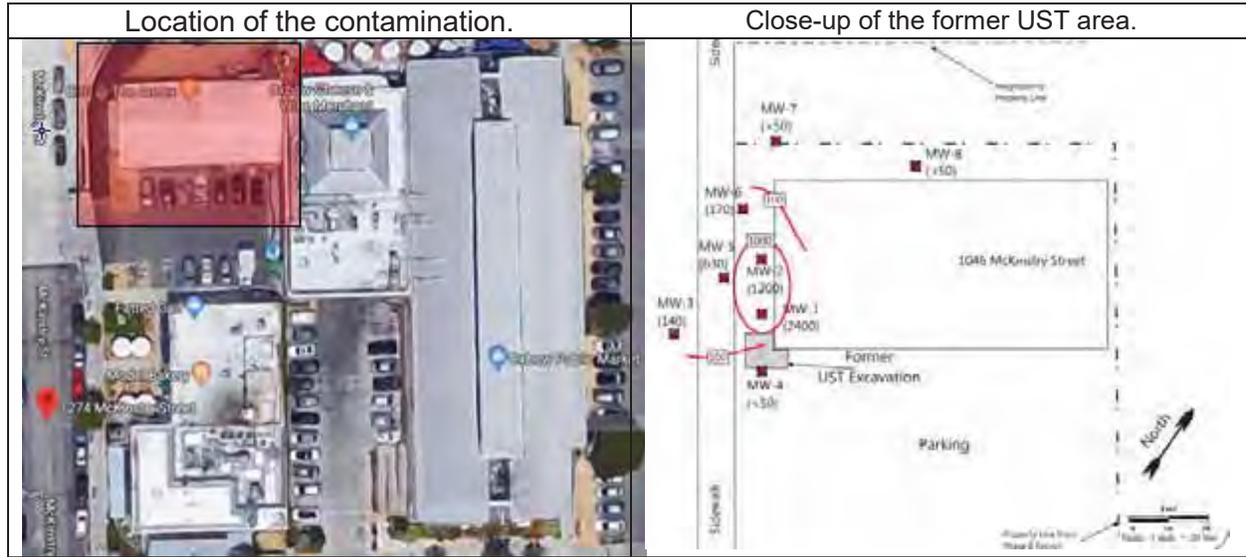

The remaining ENVIROSTOR sites are not assessed to pose a significant environmental risk to the Property based on their respective horizontal distances from the Property.

State/Tribal LST (Leaking Storage Tank) – LUST (Leaking Underground Storage Tank):

Listed below are the four nearest LUST sites to the Property. For a complete listing, refer to the EDR Radius Map Report appended to this report.

| LISTING | STATUS | ADDRESS | DISTANCE |
|--------------------|--------|----------------------------|-------------|
| Valley Auto Repair | Closed | 644 1 st Street | 0 – 1/8 NE |
| Napa County Yard | Closed | 933 Water Street | 0 – 1/8 SE |
| Al's Auto Wrecking | Closed | 1274 McKinstry Street | 0 – 1/8 N |
| Riverside Service | Closed | 967 1 st Street | 0 – 1/8 WSW |

The nearest LUST site, Valley Auto Repair and Valley Tire and Brake at 644 1st Street were located at the northeast corner of the intersection of 1st Street and McKinstry Street. The site had a former underground storage tank that was removed in 1979. In 2006, a subsurface investigation revealed that there had been a release to the subsurface soil and groundwater of gasoline and diesel. Eight groundwater monitoring wells were installed and sampled and found that the contamination was concentrated to within the site boundaries with low to non-detect concentrations of benzene and the site received case closure on August 28, 2011. Groundwater was identified as flowing towards the southwest to the Napa River. Therefore, this site is not assessed as an environmental concern for the Property.

Source: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0605522317

The Napa County Corporate Yard at 933 Water Street is identified as a case closed LUST site that received case closure on October 24, 2003 for an unauthorized release identified in 1990. Moreover, since groundwater in the site vicinity flows to the southwest, which is a direction that is away from the Property, this site is not assessed to pose a significant environmental risk to the Property.

Source: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0605500202

The remaining LUST sites are not assessed to pose a significant environmental risk to the Property based on their respective horizontal distances from the Property and/or their case closed status.

State/Tribal RST (Registered Storage Tank) – UST (Underground Storage Tank):

| LISTING | ADDRESS | DISTANCE |
|----------------------------|------------------|------------|
| Napa County Corporate Yard | 933 Water Street | 0 – 1/8 SE |

The southeast-adjacent Napa County Corporate Yard is identified as a historical UST site that operated three USTs: a 10,000-gallon gasoline UST, a 10,000-gallon diesel UST, and a 2,000-gallon diesel UST. This site is also listed as a case closed LUST site. Therefore, this site is not assessed as an environmental concern for the Property.

Source: <http://geotracker.waterboards.ca.gov/ustpdfs/pdf/0002B05A.pdf>

State/Tribal Brownfields Sites:

| LISTING | ADDRESS | DISTANCE |
|-----------------------------|-----------------------------|---------------|
| Former Slinsen Construction | 1314 McKinstry Street | 1/8 – 1/4 N |
| The Inn at Town Center | 1400 1 st Street | 1/4 – 1/2 WSW |

The Former Slinsen Construction CPS site is approximately 1,300 feet to the north of the Property. It is cross-listed in the CPS database as a case closed site. Based on its horizontal distance, this site is not assessed to pose a significant environmental risk to the Property.

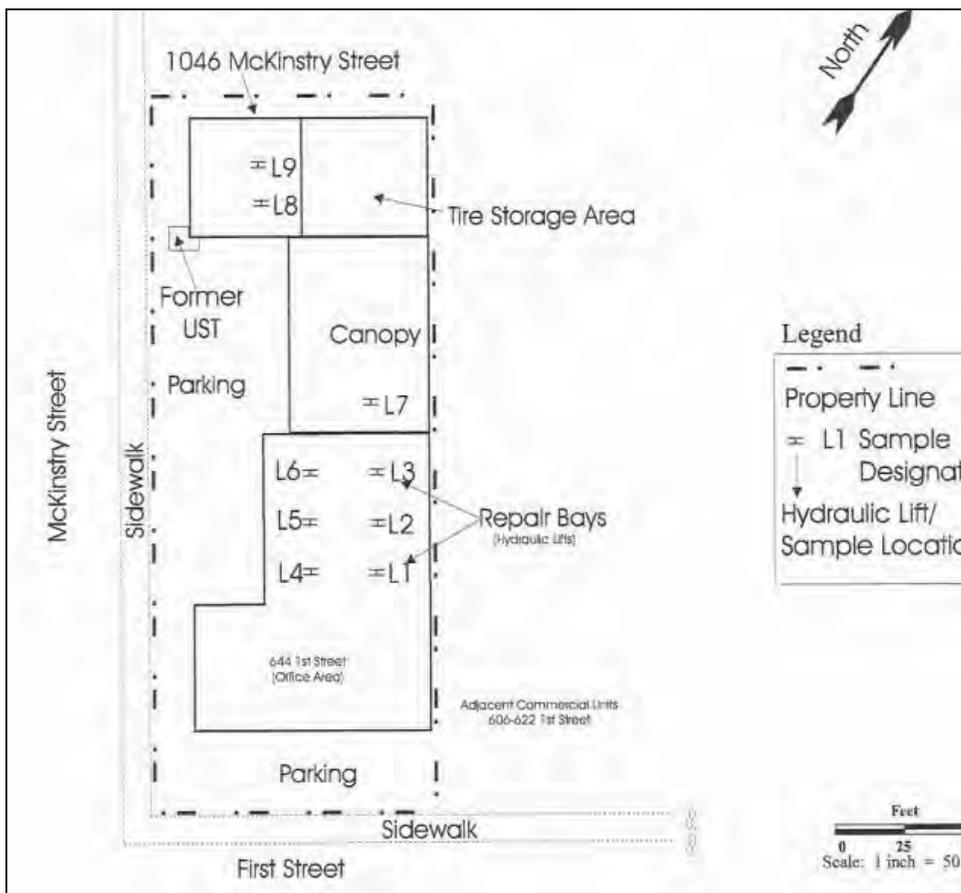

The Inn at Town Center CPS site is over 2,000 feet to the southwest of the Property. It is cross-listed in the CPS database as a case closed site. Based on its horizontal distance, this site is not assessed to pose a significant environmental risk to the Property.

Cleanup Program Sites (CPS):

Listed below are the five nearest CPS sites to the Property. For a complete listing, refer to the EDR Radius Map Report appended to this report.

| LISTING | STATUS | ADDRESS | DISTANCE |
|--------------------------|--------|-----------------------------|---------------|
| Valley Tire and Brake | Closed | 644 1 st Street | 0 – 1/8 NNE |
| Napa River / Napa Creek | Closed | 1001 2 nd Street | 1/8 – 1/4 SW |
| Mr. Howard Nunn | Closed | 826-828 Brown Street | 1/8 – 1/4 SW |
| Former Tidewater Station | Closed | 965 3 rd Street | 1/8 – 1/4 SSW |
| Slinsen Construction | Closed | 1314 McKinstry Street | 1/8 – 1/4 N |

The nearest CPS site, the former Valley Tire and Brake site at 644 1st Street, is approximately 120 feet to the north-northeast of the Property. It is identified in the CPS database due to an unauthorized release of identified during subsurface investigations adjacent and in the vicinity of seven hydraulic lifts at 644 1st Street and two hydraulic lifts at 1046 McKinstry Street. Low concentrations of hydraulic oil were detected and all nine lifts were extracted and removed in 2006. Therefore, the site received case closure on November 28, 2006.

Source: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=SL0605542749

The remaining CPS sites are not assessed to pose a significant environmental risk to the Property based on their respective horizontal distances from the Property and/or their case closed status.

Other Non-ASTM List - EDR Historical Cleaners:

| LISTING | ADDRESS | DISTANCE |
|--------------------------|--------------------------------|-----------|
| Valet Cleaners & Tailors | 712-714 1 st Street | 0 – 1/8 N |

Valet Cleaners & Tailors at 712-714 1st Street was located approximately 90 feet to the north of the Property. It was identified as having operated from 1965 to 1985. It is unknown if this site was a dry cleaning plant or a drop-off location. Moreover, this site is located up-gradient from the Property and groundwater in the site vicinity was identified as flowing to the southwest, towards the Property and the Napa River. Therefore, Valet Cleaners & Tailors is assessed as a probable environmental concern for the Property.

5.5 VAPOR ENCROACHMENT CONDITION

ODIC performed this Phase I ESA of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. It should be noted that ASTM Standard Practice E1527-13 does not necessarily comply with ASTM Standard Practice E2600-15 “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.” For assessment of potential “vapor encroachment conditions” (VECs) and to determine if a “vapor intrusion condition” (VIC) exists on-site, additional investigation beyond ASTM Practice E1527-13 is required.

For the purposes of ASTM Standard Practice E1527-13, “migrate” and “migration” refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM Standard Practice E2600-15; however, nothing in this practice (ASTM Standard Practice E1527-13) should be construed to require application of the ASTM Standard Practice E2600-15 to achieve compliance with all appropriate inquiries.

The Property building at 731 1st (First) Street was identified as a historical dry cleaners from 1986 to 2014. The most recent dry cleaners, Adam’s Cleaners, was identified in the DTSC HWTS as generating liquids with halogenated organic compounds / halogenated solvents from 2005 to 2014 ranging from 0.075 to 0.8 tons annually. ODIC conducted a previous Phase I for 731 1st Street in January 2014 when Adam’s Cleaners was still in operation and identified perchloroethylene (PCE) solvents and an onsite dry cleaning machine. Therefore ODIC recommended a Phase II.

A Phase II was conducted at 731 1st Street by BSK Associates in March 2014 due to ODIC’s Phase II recommendation. BSK advanced two borings, B1 and B2, outside the buildings because interior access was not granted for their subsurface investigation. These locations were selected because they were adjacent to the sanitary sewer line cleanout leaving the dry cleaning business. Soil samples were collected at depths of 5, 7, and 10 feet below ground surface (bgs). Groundwater was encountered around 11 and 13 feet bgs and groundwater samples were collected at 10 feet bgs for both borings. Soil and groundwater samples did not identify any halogenated solvents, specifically perchloroethylene (PCE) and trichloroethylene (TCE). While no soil or groundwater samples from BSK’s Phase II Report identified contaminants of concern, since no borings were advanced inside the dry cleaning building, ODIC believes that the potential of soil, groundwater, and soil vapor contamination remains onsite. Moreover, groundwater in the site vicinity flows towards the southwest and no borings were advanced down-gradient of the building. Therefore, ODIC believes a potential human health risk from the former dry cleaners remains from the former dry cleaners. Therefore, a potential soil vapor issue exists at the Property.

A former dry cleaners known as Valet Cleaners & Tailors at 712-714 1st Street was located approximately 90 feet to the north of the Property. It was identified as having operated from 1965 to 1985. It is unknown if this site was a dry cleaning plant or a drop-off location. Moreover, this site is located up-gradient from the Property and groundwater in the site vicinity was identified as flowing to the southwest, towards the Property and the Napa River. Therefore, a potential VIC exists from to the Valet Cleaners & Tailors north-adjacent site.

Based on Sanborn Fire Insurance Maps from 1901 and 1910, the west-adjacent property that is currently Soscol Avenue was a former Napa Gas & Electric Company gas plant that became a machine shop that operated an onsite foundry. A historical address identified for this site was 831 1st Street. Although this site became part of Soscol Avenue, since no known assessments have been conducted at the Property, a VIC exists.

6.0 USER PROVIDED INFORMATION

6.1 USER PROVIDED INFORMATION

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-13 Phase I Standards require that the *Report User* conduct independent research and consider certain information before purchasing a property.

The purpose of this section is to describe tasks to be performed by the *User*. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for an *landowner liability protections (LLP)* to CERCLA liability. While such information is not required to be provided to the *environmental professional*, the *environmental professional* shall request that the *User* provide the results of these tasks as such information can assist the *environmental professional* in identifying Recognized Environmental Conditions.

Per ASTM Standard Practice E1527-13, the “*User*” is defined as follows:

User—the party seeking to use Practice E 1527-13 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *User* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

| USER/CUSTOMER QUESTIONNAIRE | |
|---|--|
| QUESTION | USER/CUSTOMER TO ANSWER |
| <p>(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</p> <p>Are you aware of any environmental cleanup liens against the <i>Property</i> that are filed or recorded under federal, tribal, state or local law?</p> | <p>The <i>User</i> has not informed ODIC of any knowledge of cleanup liens filed or recorded against the <i>Property</i>.</p> <p>An environmental cleanup lien/AUL search is not required from ODIC as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this <i>Report</i>; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the <i>Property</i> were identified.</p> <p>Source: http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</p> |

| | |
|---|---|
| <p>(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).</p> <p><i>Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</i></p> <p>Are you aware of any AULs, such as <i>engineering controls</i>, land use restrictions or <i>institutional controls</i> that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?</p> | <p>The <i>User</i> has not informed ODIC of any knowledge of activity or land use limitations associated with the Property.</p> <p>An environmental cleanup lien/AUL search is not required from ODIC as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this <i>Report</i>; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the Property were identified.</p> <p>Source: http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</p> |
| <p>(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</p> <p>As the <i>User</i> of this <i>ESA</i> do you have any specialized knowledge or experience related to the <i>Property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>Property</i> or an adjoining <i>property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p> | <p>The <i>User</i> has not informed ODIC of any specialized knowledge or experience related to the Property or nearby properties.</p> |
| <p>(4.) Relationship of the purchase price to the fair market value of the Property if it were not contaminated (40 CFR 312.29).</p> <p>Does the purchase price being paid for this <i>Property</i> reasonably reflect the fair market value of the <i>Property</i>? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the <i>Property</i>?</p> | <p>The <i>User</i> has not informed ODIC of any information pertaining to the purchase price with respect to the fair market value of the Property.</p> |
| <p>(5.) Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30).</p> <p>Are you aware of commonly known or <i>reasonably ascertainable</i> information about the <i>Property</i> that would help the <i>Environmental Professional(EP)</i> to identify conditions indicative of releases or threatened releases? For example, as <i>User</i>,</p> <p>(a.) Do you know the past uses of the <i>Property</i>?</p> <p>(b.) Do you know of specific chemicals that are present or once were present at the <i>Property</i>?</p> <p>(c.) Do you know of spills or other chemical releases that have taken place at the <i>Property</i>?</p> <p>(d.) Do you know of any environmental cleanups that have taken place at the <i>Property</i>?</p> | <p>The <i>User</i> has not informed ODIC of any commonly known or reasonably ascertainable information about the Property that would identify conditions indicative of releases or threatened releases, other than as described in Section 6.3 (Interviews), if applicable.</p> |

| | |
|---|---|
| <p>(6.) The degree of obviousness of the presence of likely presence of contamination at the <i>Property</i>, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the <i>User</i> of this <i>ESA</i>, based on your knowledge and experience related to the <i>Property</i> are there any <i>obvious</i> indicators that point to the presence or likely presence of contamination at the <i>Property</i>?</p> | <p>The <i>User</i> has not informed ODIC of any obvious indicators that point to the presence or likely presence of contamination at the <i>Property</i>, other than as described in Section 6.3 (Interviews), if applicable.</p> |
|---|---|

6.2 PRELIMINARY TITLE REPORT OR LAND TITLE RECORDS

NO PRELIMINARY TITLE REPORTS, RECORDED LAND TITLE RECORDS, OR HISTORICAL CHAIN OF TITLE WAS REVIEWED DURING THIS ESA. ODIC'S SCOPE OF INVESTIGATION AS WELL AS THE CONTRACTUAL AGREEMENT BETWEEN ODIC AND THE CLIENT DOES NOT INCLUDE OBTAINING AND/OR REVIEWING A PRELIMINARY TITLE REPORTS, RECORDED LAND TITLE RECORDS, OR HISTORICAL CHAIN OF TITLE. 6.3 INTERVIEWS

| Interview with Owner | | | |
|-------------------------------------|---|-----------|-------|
| INTERVIEW DETAILS | | | |
| Name | Mr. JB Leamer | | |
| Title | Owner | | |
| Contact Information | 415-286-3126 | | |
| Purpose of Environmental Assessment | Property Sale | Refinance | Other |
| | | | X |
| Summary | Mr. Leamer engaged ODIC to conduct a Phase I Environmental Site Assessment to determine the history of the Property. Plans for the Western Property and Eastern Property are to redevelop the sites into two boutique hotels. He explained that in 2009-2010 a commercial building was demolished at 743 1 st Street as part of rebuilding the railroad bridge for the Napa Valley Wine Train. Due to ODIC's Phase II recommendation in 2014 because of the dry cleaners recognized environmental conditions (RECs), he said (and provided) a Phase II done for the Property by BSK. He added that Trade Brewing has occupied 731 1 st Street for approximately one year and that it was vacant for a couple years before then. | | |

7.0 CONCLUSIONS

ODIC Environmental (ODIC) performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *Property*: (1) due to *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not *Recognized Environmental Conditions*.

A *Historical Recognized Environmental Condition (HREC)* is a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *Property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *Property* to any required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

A *Controlled Recognized Environmental Condition (CREC)* is a *Recognized Environmental Condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

| Conclusions and Findings | |
|---|---|
| <p>ODIC performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. This environmental assessment has revealed the following in connection with the Property:</p> | |
| REC identified: | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |

| CREC identified: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| Significant data gap identified: | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
| <p>Refer to Section 8.0, Recommendations and Opinions, for further details.</p> | |

8.0 RECOMMENDATIONS AND OPINIONS

ODIC performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

Property and Vicinity History

West Property

The West Property was developed with four residential dwellings and storage sheds in 1886. By 1891, one of the dwellings was replaced with the Hotel Di Genova. The hotel was later renamed the Lombardo Hotel until it was demolished in 1967. The West Property remained relatively unchanged until the mid-1950s when two of the residential dwellings were removed. In the late 1960s, all improvements on the West Property were demolished. Since then, it has remained a vacant commercial lot.

East Property

The East Property was developed with six residential dwellings and storage sheds in 1886 that included the four current buildings. In the 1940s, a restaurant building was constructed at the west side of the East Property replacing two of the dwellings. By the 1950s, the restaurant was converted into a furniture store known as First Street Furniture Store that operated into the 1970s. This building later became an office and plumbing showroom until it was demolished in 2009 to rebuild the railroad bridge and railroad tracks. In 1982, the residential dwelling at 731 1st Street was converted to a commercial use and was occupied by a possible dry cleaners known as Valet Cleaner & Tailor until 1988 followed by Ye Olde Valet Shoppe from the late 1980s through the 1990s. From 2003 to 2014, Adam’s Cleaners operated a dry cleaners with an onsite dry cleaning machine that uses perchloroethylene (PCE). In 2017, Trade Brewing moved into the building. The residential dwellings at 711 1st Street, 718 Water Street, and 730 Water Street have remained relatively unchanged since the 1880s.

Previous Environmental Site Assessments – 730 Water Street and 731 1st Street

ODIC conducted a previous Phase I Environmental Site Assessment for 730 Water Street and 731 1st Street dated January 29, 2014. At the time of site reconnaissance, the Property was occupied by a residential dwelling at 730 Water Street and Adam’s Cleaners at 731 1st Street. A Columbia-model dry cleaning machine and drums of perchloroethylene (PCE) were identified at Adam’s Cleaners. The owner of Adam’s Cleaners, Mr. Adam Chebl, was interviewed at that time. He said that the previous occupant was a seamstress and that in 2003, he installed the PCE solvent dry cleaning machine.

Since 731 1st Street was a dry cleaners at the time of site reconnaissance, and was likely a historical dry cleaners, ODIC stated that that due to the shallow groundwater in the site vicinity and the potential for vapor intrusion due to the potential soil and soil vapor contamination associated with dry cleaners, a subsurface investigation should be conducted.

Based on ODIC’s Phase II recommendation, BSK Associates conducted a targeted Phase II Investigation Report for Soil and Groundwater at Adam’s Cleaners. BSK advanced two borings, B1 and B2, outside the buildings because interior access was not granted for their subsurface investigation. These locations were selected because they were adjacent to the sanitary sewer line cleanout leaving the dry cleaning business. Soil samples were collected at depths of 5, 7, and 10 feet below ground surface (bgs). Groundwater was encountered around 11 and 13 feet bgs and groundwater samples were collected at 10 feet bgs for both borings. Soil and groundwater samples did not identify any halogenated solvents, specifically perchloroethylene (PCE) and trichloroethylene (TCE). BSK stated that based on their site observations and analytical results of soil and groundwater samples, no evidence of contamination from the former or existing dry cleaning operations was discovered.

While no soil or groundwater samples from BSK’s Phase II Report identified contaminants of concern, since no borings were advanced inside the dry cleaning building, ODIC believes that the potential of soil, groundwater, and soil vapor contamination remains onsite, specifically below the building and a significant data gap exists despite BSK’s Phase II report. Moreover, groundwater in the site vicinity flows towards the southwest and no borings were advanced down-gradient of the building. Therefore, ODIC believes a potential human health risk from the former dry cleaners remains and this is a Recognized Environmental Condition (REC).

Off-Site Concerns

Former Cleaners – 712-714 1st Street

A former dry cleaners known as Valet Cleaners & Tailors at 712-714 1st Street was located approximately 90 feet to the north of the Property. It was identified as having operated from 1965 to 1985. It is unknown if this site was a dry cleaning plant or a drop-off location. Moreover, this site is located up-gradient from the Property and groundwater in the site vicinity was identified as flowing to the southwest, towards the Property and the Napa River. Therefore, a potential vapor intrusion condition (VIC) exists from to the Valet Cleaners & Tailors north-adjacent site.

Former Gas Plant and Machine Shop – 831 1st Street

Based on Sanborn Fire Insurance Maps from 1901 and 1910, the west-adjacent property that is currently Soscol Avenue was a former Napa Gas & Electric Company gas plant that became a machine shop that operated an onsite foundry. A historical address identified for this site was 831 1st Street. Although this

site became part of Soscol Avenue, since no known assessments have been conducted at the Property, a VIC exists.

Recommendations and Opinions

Although BSK Associates conducted a Phase II at 731 1st Street, no borings were advanced inside the building and down-gradient of the former dry cleaners. This represents a significant data gap and a REC.

A possible dry cleaners known as Valet Cleaners & Tailors was located on the north side of 1st Street within 100 feet of the Property. Since groundwater in the site vicinity flows to the southwest, towards the Property and the Napa River, this off-site property is considered a REC.

A former Napa Gas & Electric Company gas plant that became a machine shop that operated an onsite foundry was located west of the West Property. This former site is now part of Soscol Avenue. Since no known assessments have been conducted at the West Property, this represents a REC.

ODIC recommends further investigation.

9.0 REFERENCES

During the preparation of this *Report*, a number of sources were contacted, individuals were interviewed, and various federal, state, county or local municipal agencies were consulted. Documentation applicable to the Property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM Standard Practice E1527-13. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydrogeologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this *Report* in corresponding sections. Any additional reference sources not cited in each applicable section of this *Report*, if applicable, are disclosed in this section.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

|------------------------|----------------------|-----------------------------|---------------|-------------|
| PG&E GAS PLANT NAPA | 5TH BET MAIN & BROWN | SSW 1/4 - 1/2 (0.262 mi.) | Q95 | 163 |

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to,

EXECUTIVE SUMMARY

identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 79 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 10 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

BROWNFIELDS: A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

A review of the BROWNFIELDS list, as provided by EDR, and dated 06/25/2018 has revealed that there are 2 BROWNFIELDS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

| PACIFIC BELL | 933 COOMBS | WSW 1/8 - 1/4 (0.243 mi.) | 78 | 130 |

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/21/2018 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2016 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 06/18/2018 has revealed that there are 2 Notify 65 sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 18 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

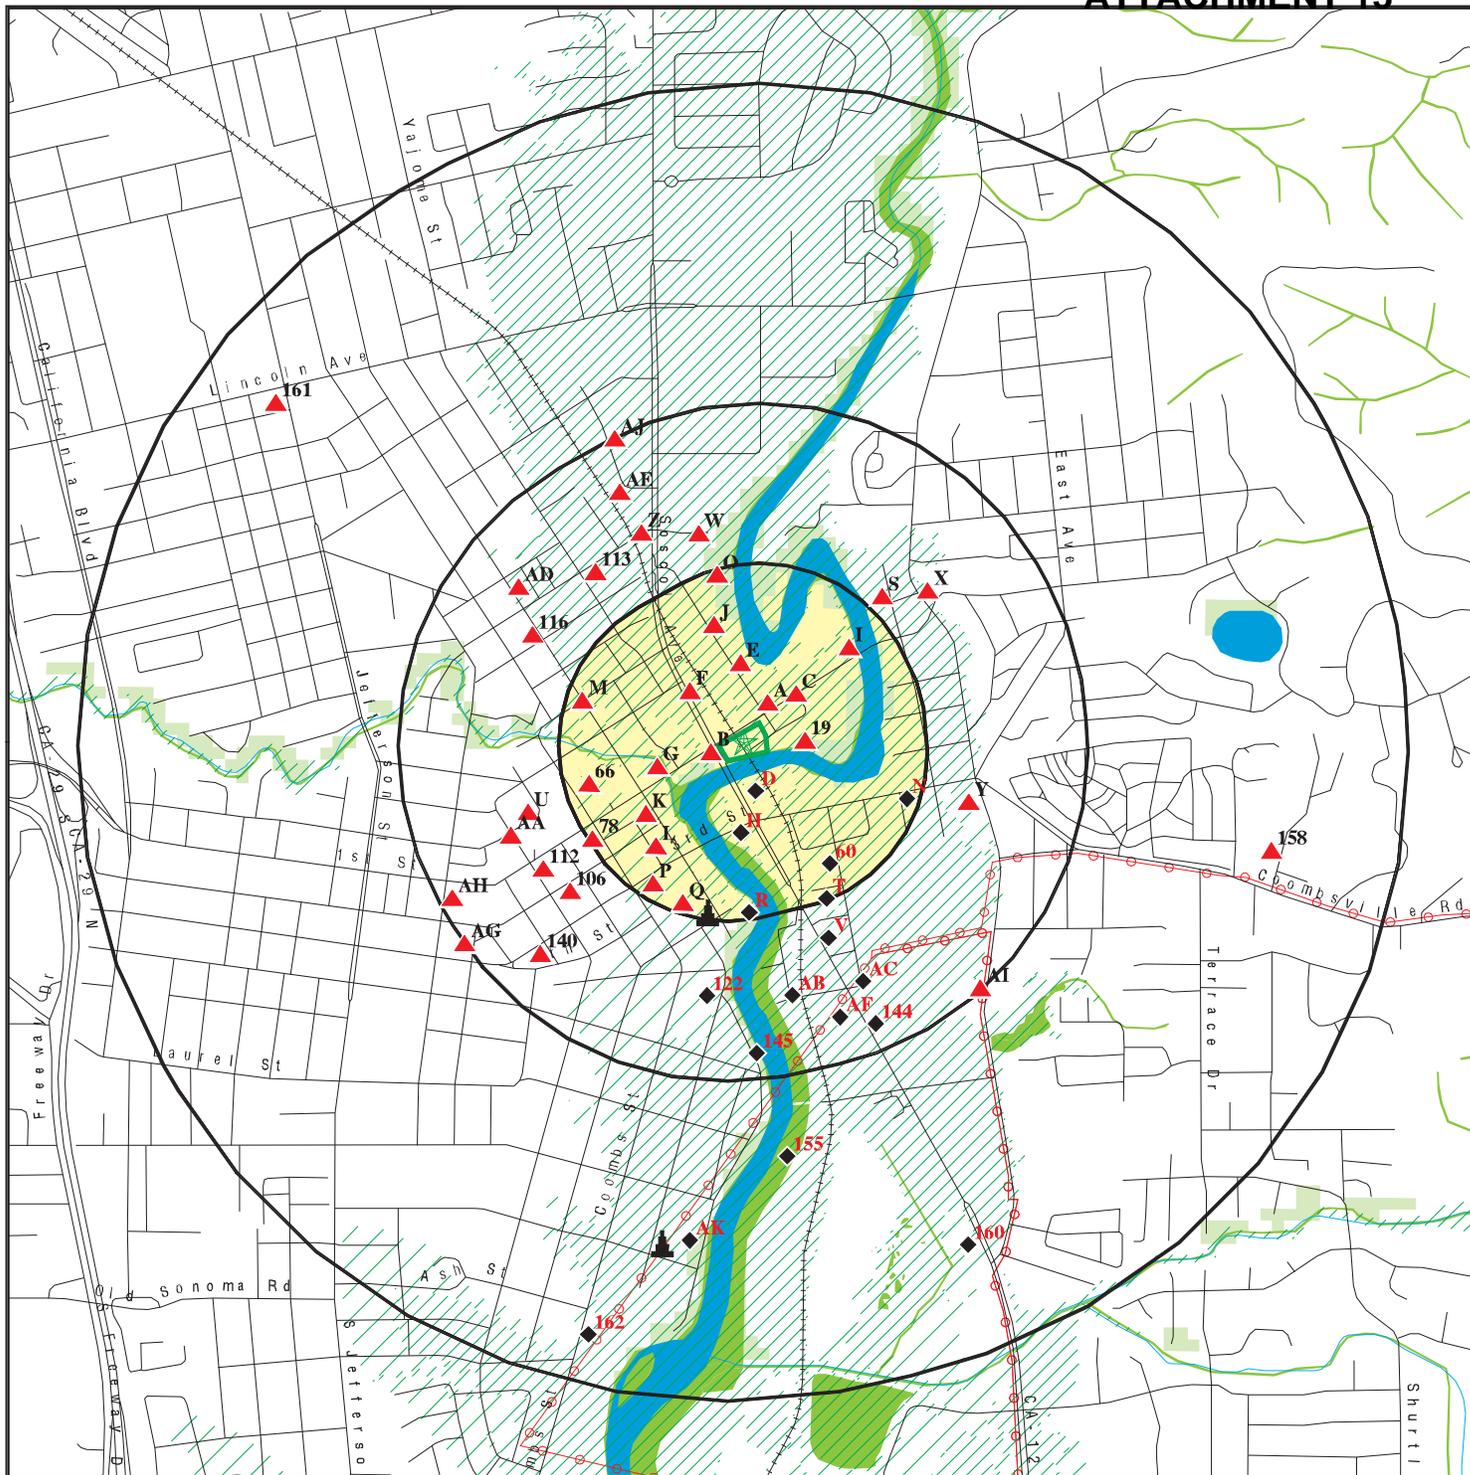

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002777843

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: BGS
RB Case Number: 28-0106
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History:

The subject property (Site) is a commercially-zoned 1/2 acre parcel located on 5th and Main Streets near the Napa River in downtown Napa, California.. The Site was occupied previously by an industrial facility, which included the operation of grain silos and barley mills. Thereafter, the site structures are thought to have been used for a wine-making operation; the warehousing of agricultural chemicals, lumber and other building materials; an automotive maintenance and painting operation; and several other commercial/industrial activities apparently including a trucking firm during the late-1940's to the 1950's. Previous business activities at the site included the utilization of two 500-gallon, underground fuel storage tanks, which may have been installed during the late-1940's or early-1950's for use by the trucking operation. The two underground storage tanks were removed from the site sometime during early-1987. Following the removal of the storage tanks, several subsurface investigations were conducted, which included the

installation of several soil borings, subsurface extraction piping and twelve groundwater monitor wells. Groundwater in saturated soil beneath the site has been found to contain significantly elevated concentrations of fuel hydrocarbons in the ranges of gasoline and diesel fuel (TPHg and TPHd), including the associated volatile organic BTEX compounds (i.e., benzene, toluene, ethylbenzene and total xylenes), and the lead scavenger 1,2-dichloroethane (DCA). Soil beneath the site building mainly in the area where the former underground storage tanks were located appears to be contaminated significantly with fuel hydrocarbons to a depth of approximately 20 feet below ground surface where saturated sandy strata has been encountered.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type: Cleanup Program Site
Case Worker: MS
Local Agency: Not reported
RB Case Number: 28S0063
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Surface water
Potential Contaminants of Concern: Gasoline, Other Petroleum
Site History: The subject property (Site) consists of several parcels situate adjacent to one another totaling 11 acres on the east bank of the Napa River in a mixed commercial and residential zone of Napa, California. The property is in a mixed commercial and residential neighborhood. Residential houses are located east of the site. The main parcel of the Site is currently vacant and unimproved with the exception of a single-story small building located at the corner of Clay and Jaurez streets. This site is currently impacted by petroleum hydrocarbons in soil and groundwater. In soil gas, there are high TPHg concentrations (15,000 ug/m3). In groundwater, there is significant TPHg (19,000 ug/l), TPHd (78,000 ug/l), TPHmo (4300 ug/l), and benzene (1100 mg/l) contamination. For metals in soil, arsenic and vanadium are above the ESLs.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 06/20/1990
 Comments: Completed Site Screening. On Cortese List. Former underground storage tank site. Soil samples collected showed TPH as gasoline, diesel and motor oil (19,180 ppb, benzene (41,400 ppb), toluene (7 ppb), xylenes (623,000 ppb), & ethylbenzene (126,000 ppb) and organic lead (0.73 ppb). The on-site soil is contaminated by TPH and volatile organic compounds (VOCs). 1,000 cubic yards of contaminated soil removed off-site. No ground water data is available and there is potential for groundwater contamination. PEA recommended.

 Status Date: 01/19/2016
 Global Id: SL1825F927
 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
 Lead Agency Case Number: Not reported
 Latitude: 38.294869
 Longitude: -122.277932
 Case Type: Cleanup Program Site
 Case Worker: BAC
 Local Agency: Not reported
 RB Case Number: 28S0032
 File Location: Regional Board
 Potential Media Affected: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)
 Site History: The subject property (Site) is located at 901 Eighth Street in Napa, California. The Site located near the eastern banks of the year-round flowing Napa River and is associated with another open case (BASALT ROCK COMPANY INC -DILLINGHAM CONSTRUCTION, case ID: SL1825P926) on the same parcel. The Site is a part of a large and complex grouping of properties under the Napa Valley Flood Control and Water Conservation District's (NCFWCWD) plan to evaluate multiple land sites for the flood control project in the city of Napa. Assessment of petroleum impacts from former Site operations and land use are required for flood project management. Cost-effective solutions to remediate any contamination of on-Site soil and groundwater is ongoing.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: * Discovery
 Completed Date: 01/12/1988
 Comments: Facility identified: Environmental Health (Napa); Prop 65 file found; complaint of improper discharge of plating wsts by former employee 02/28/85.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 02/18/1988
 Comments: DHS Drive-by: Visibility limited. Site Screening Done: Recommend Preliminary Assessment (med) based on drive-by and business type; send questionnaire.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 06/25/2008
 Comments: The site operated from 1979; but facility closure is unknown. Based on a complaint, a soil investigation was conducted, with the County's oversight, which detected lead and chromium above the screening levels. Records indicated investigation was not completed by owner and that the County could not make contacts with the property owner. It is currently operated by North Coast Laminates.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002752682

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
 Lead Agency Case Number: Not reported
 Latitude: 38.2888923983039
 Longitude: -122.281694412231
 Case Type: Cleanup Program Site
 Case Worker: BAC
 Local Agency: Not reported
 RB Case Number: 28S0008
 File Location: Regional Board
 Potential Media Affected: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)
 Site History: The subject property (Site) is an undeveloped river terrace just south of parcels formerly used for several oil bunker and storage facilities located on the east bank of the Napa River in Napa, California. The Site is under review for sediment discharge to the Napa River and associated water quality impacts from the Site remediation activities. The Site is under Order # 01-066 by the RWQCB to implement post-construction Site monitoring, prior to excavation of contaminated soils. The Napa County Flood Control District is responsible for the Site billing activities, and Chevron is the responsible party for cleanup work including remediation and mitigation efforts.

Completed Info:

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Voluntary Cleanup Agreement
 Completed Date: 03/28/1996
 Comments: The property owner entered into a Voluntary Cleanup Agreement with DTSC for oversight on the preparation and implementation of a site characterization plan. DTSC acts as a support agency to the Napa County Environmental Health Department.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: *Voluntary Cleanup Agreement Completion
 Completed Date: 03/06/1998
 Comments: Site Referred to California Integrated Waste Management Board.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 08/14/1991
 Comments: No residential development is proposed within the identified landfill limits. The area will be an open space and maintained by the owner after closure. Solid waste assessment test (SWAT) results indicate no evidence of waste leakage. However, soil test results indicated total lead levels as high as 2500 ppm. Composite soil samples subjected to the waste extraction test (WET) procedure showed lead concentration levels (13-250 ppm) exceeding the STLC. The Napa County Environmental Health Dept., as Local Enforcement Agency for the Integrated Waste Management Board, has expressed interest in acting as lead agency for the site.

Site History: The subject property (Site) is a former expansive dry cleaner facility, coat factory and wool finishing plant complete with former crude oil underground storage tanks (USTs), solvent tanks (for dry cleaning), numerous above-and below ground storage tanks of various and unknown fluids, petrochemicals, solvents, and dyes. The Site is bordered by the Napa River to the East, and Coombs Street to the West in a semi-industrial area of Napa, California. A long list of contaminants are cause for the Site investigation, including CAM-17 metals such as chromium (total, and hexavalent chromium), volatile organic compounds (VOCs), total petroleum hydrocarbons as diesel (TPHd), as gasoline (TPHg), and Stoddard solvent (TPHss)

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
 Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
 Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

| | |
|----------------------|------------------|
| Target Property Map: | 5602154 NAPA, CA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

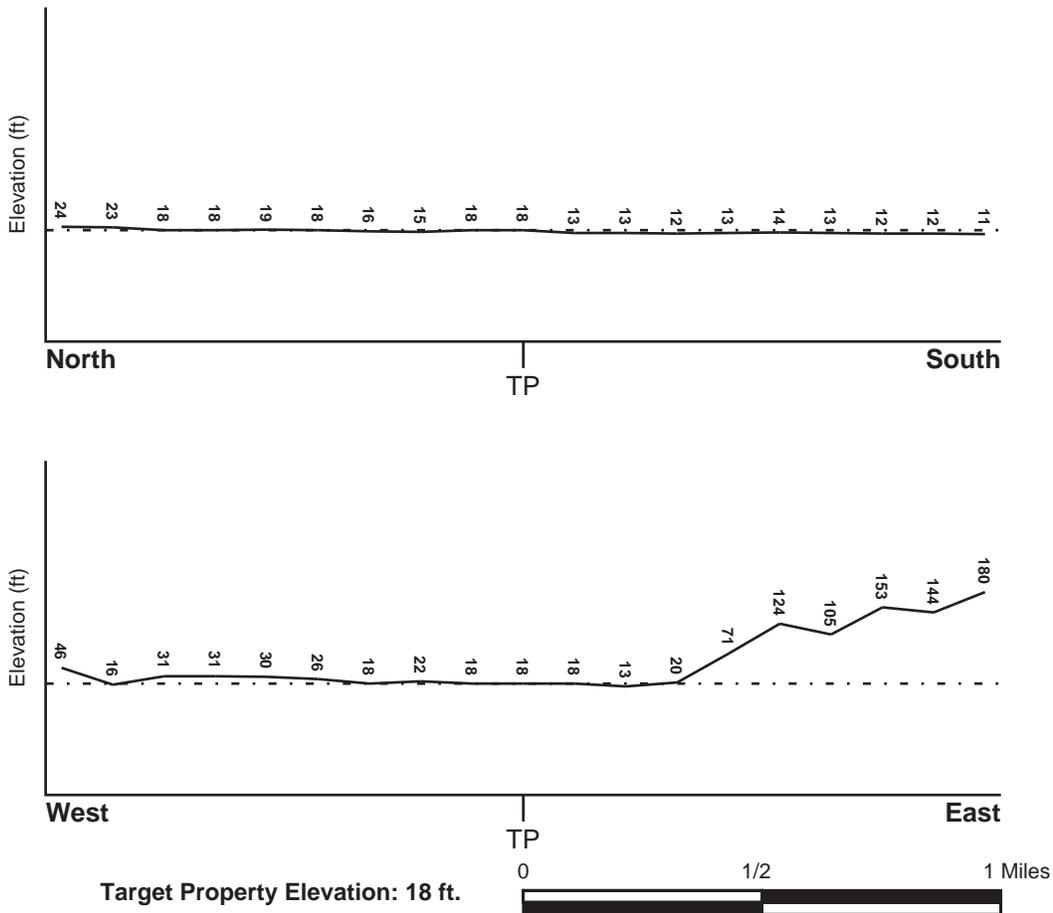

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| NAPA | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported | | |

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: COLE

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

| Soil Layer Information | | | | | | | |
|------------------------|----------|-----------|--------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 7 inches | silt loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |
| 2 | 7 inches | 64 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: EGBERT

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 33 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 6.6 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: BALE

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--|--|--|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 24 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 14 Min: 4 | Max: 6.5 Min: 5.6 |
| 2 | 24 inches | 59 inches | stratified gravelly sandy loam to loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 14 Min: 4 | Max: 6.5 Min: 5.6 |

Soil Map ID: 5

Soil Component Name: Yolo

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health
Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation
Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services
Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS
Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA
Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ODIC Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

| <u>Year</u> | <u>Scale</u> | <u>Details</u> | <u>Source</u> |
|-------------|--------------|---------------------------------|---------------|
| 2016 | 1"=500' | Flight Year: 2016 | USDA/NAIP |

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ODIC Environmental were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

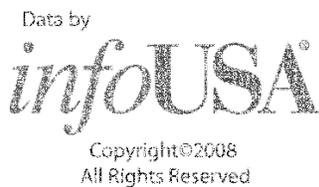

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
