Following the Council discussion, Mayor Sedgley proposed a brief break for the applicant team to convene and consider potential adjustments to the project based on suggestions from Council members. These suggestions included reducing the total number of units, limiting floodway usage, reducing the number of fire pits, and addressing traffic concerns.

A break was called at 11:36 P.M. The meeting reconvened at 11:45 P.M.

Bernie Corea of the applicant team responded, expressing confidence that the team could effectively address the right-turn-in and right-turn-out traffic flow with map service providers. The team would also collaborate with CalTrans to install some sort of center divider. Regarding density, the team proposed maintaining a maximum of 80 units at the campsite at any given time, with a year-round weighted average of 70 units. He noted the reduction would help limit traffic, particularly on peak days, and reduce the number of campfires on any given day. Concerning the floodway, the team would like to keep units there during the non-winter months.

Mayor Sedgley brought discussion back to Council.

A motion was made by Councilmember Narvaez, seconded by Mayor Sedgley, to, as outlined in the agenda packet, adopt a resolution adopting a Mitigated Negative Declaration, approve the first reading and introduction of an ordinance, and adopt a resolution approving a Use Permit and Design Review Permit with modifications to that resolution to include a change from 100 units to 80 units and an edit to condition #18, to the reasonable satisfaction of the planning staff to prevent left hand turns. The motion failed for a lack of a second.
