Here is an example of sound quality - just sharing so you can share with them after this meeting via email. Doesn't have to be read for the meeting. Jessica's giving the presentation as well as Phil's was worse...

Hello Mayor, City Council Members, and City manager,

I'd like to express some concerns regarding the streaming platform used for the public meetings.

I have used it many times when I cannot attend a meeting.

I would like to know if the City of Napa has looked at other ways to stream the meetings to replace the current system. The current platform is not user friendly, difficult to access, and you can only pause for a limited time before it is offline. We also have to wait several days after the meeting is over to access the video again.

There are many other more effective ways to create online engagement and online access. I am happy to share ideas for improved access for the public that will improve public engagement in a more user friendly way. Thank you for your time and consideration.

Sincerely,

Bernardo "Bernie" Narvaez

Council Members,

I would first like to mention that the method by which you are requiring the public to comment: Via telephone before 1:00 PM on the day of the meeting or in less than 500 characters during the meeting with a very specific subject line, is unreasonable and potentially a violation of the Brown Act. In terms of the financial forecast, I hope that council has requested detailed financials. A powerpoint presentation is not going to provide the essential fiscal data to make an informed decision. Council members, at the very least you should require raw financial data to make such substantial and impactful decisions.
